(5) Receiving coal simultaneously from two vessels located anywhere along the unloading wharf, one, two, or three unloaders being at work on one vessel, and transporting it from both vessels to the same part of the storage pile, to the reloaders direct or to the wharf bunker direct, within the capacity of the conveyors supplying the bunker. If coal from both vessels is being transported to the storage pile it shall be possible simultaneously to reclaim coal from any other part of the storage pile by means of the remaining bridge or bridges, and transport it to the reloaders direct or to the wharf bunker direct. (6) Receiving coal simultaneously from two vessels, located anywhere along the unloading wharf, one, two, or three towers being at work on one vessel, and simultaneously transporting the coal from any one of the two vessels to any point in the storage pile and from the other vessel to any other point in the storage pile, or to the reloaders direct, or to the wharf bunker direct. (7) Receiving coal reclaimed from the storage pile by one or more bridges up to the full number, spaced at any intervals along the storage pile, and transporting it to the reloaders or to the wharf bunker. (8) Taking coal from any point in the storage pile and depositing it at any other point in the storage pile by use of the bridges.

Two duplex or four single bridges are required in the proposed plan for the Cristobal plant. The former are fitted with two shovels or buckets, and the latter only one each. These bridges will span the coal storage basin, over the coal piles, and move along the

walls longitudinally of the basin, so that they can cover any point in the basin. Upon them will be mounted the conveyors that will carry coal from the conveyors upon the walls to any point desired within the basin, and the shovels or buckets that will mine coal from the basin and carry it to the conveyors, which will transfer it to the wharf bunker and to the machines for loading it upon colliers or barges.—U. S. Government Advertiser.

AMERICAN INSTITUTE OF ARCHITECTS CO-OPERATES WITH THE NATIONAL FIRE PROTECTION ASSOCIATION IN FIRE PREVENTION PROPAGANDA.

Tour of Franklin H. Wentworth, February and March, 1913.

Members of the American Institute of Architects and others who attended the 46th annual Convention of the Institute in Washington last December will remember the forceful address delivered by Franklin H. Wentworth, Secretary of the National Fire Protection Association, in which he made a convincing appeal for the co-operation of the Institute in the work for which his Association stands.

Within a few weeks of that occasion Mr. Wentworth and D. Knickerbocker Boyd, the Chairman of the Institute's Committee on Public Information, after conference with the officers of the respective organizations, were considering the possibility of a speaking tour by Mr. Wentworth under the auspices of the Institute.

The proposition was placed before those Chapters of the Institute which Mr. Wentworth could reach in a month's travel and it only remained with them to signify their approval and to assure, on the part of each, an enthusiastic meeting devoted to Fire Prevention in order to determine the project.

In spite of the comparative short time which remained to conclude these arrangements, the responses from the Chapters addressed were so cordial and enthusiastic that no doubt remained as to the desirability of undertaking the tour and the start was promptly provided for.

Even after the itinerary was apparently completed, other possibilities disclosed themselves because of the interest manifested in the spreading of the Fire Prevention Propaganda, and additional Chapters were placed on the list, as well as State Architectural Associations, not integral units of the American Institute of Architects, in three States through which Mr. Wentworth would pass.

Announcement can now be made of the complete schedule, which is as follows, including those addresses which have already been given up to this writing. About one-third of the tour had been completed before the final arrangements had been made for the concluding portion of the trip:

Brooklyn Chapter, A. I. A., Brooklyn, January 27th.

New Jersey Chapter, A. I. A., Jersey City, January 30th.

Pittsburgh Chapter, A. I. A., Pittsburgh, February 3rd.

Buffalo Chapter, A. I. A., Buffalo, February 4th.

Cleveland Chapter, A. I. A., Cleveland, February 5th.

Michigan Chapter, A. I. A., Detroit, February 6th.
 Indiana Chapter, A. I. A., Indianapolis, February 8th.
 Illinois Chapter, A. I. A., Chicago, February 11th.
 Louisville Chapter, A. I. A., Louisville, February 12th.
 Cincinnati Chapter, A. I. A., Cincinnati, February 13th.
 St. Louis Chapter, A. I. A., St. Louis, February 17th.
 Kansas City Chapter, A. I. A., Kansas City, February 18th.
 Texas State Association of Architects, Dallas, February 19th.
 Louisiana Chapter, A. I. A., New Orleans, February 21st.
 South Carolina Association of Architects, Columbia, February 24th.
 North Carolina Architectural Association, Raleigh, February 25th.
 Baltimore Chapter, A. I. A., Baltimore, March 6th.
 Philadelphia Chapter, A. I. A., Philadelphia, March 7th.

While this tour has been arranged under the auspices of the Institute, through its Committees on Public Information in various parts of the country, to better inform the public on matters pertaining to architecture and sound building construction, too much credit cannot be given to Mr. Wentworth and his Association, but particularly to himself personally for his willingness to undertake the arduous task of such an extended tour.

Full details of the important results achieved will be given after the tour has been completed. For the present it need only be said that, in each instance, the local Chapter or State Association has arranged for the widest possible benefit from the Fire Prevention meetings. The public has been freely invited to hear Mr. Wentworth's addresses and the discussions by prominent city officials and various other authorities which will follow. In any case, the Mayor of the city and in some cases an entire State Assembly are expected to participate in the meeting, and in almost all of the cities the co-operation has been secured of important civic bodies, engineers' societies, builders' exchanges, fireunderwriters, firemen's associations, and where they exist, the Fire Prevention Commissions and the Fire Marshals. In some cases luncheons and dinners also been arranged as a part of the program.

The American Institute of Architects, through its Chapters, in thus bringing the public in general and architects and professional men in particular to the realization of what can be done by all of them in lessening the fire risk and in aiding in the conservation of human life and property, is placing itself before the country as a public human life and property, is placing it interested in the community welfare as in the advancement of the profession which it represents.

The San Francisco Call prints an extra Sunday edition of the paper in which one section is devoted to Bohemian life. In it pictures are given of most of the cafes in the Tenderloin district. This may be Bohemianism but it is not the kind of which the city is particularly proud nor is it anything distinctive. The management is evidently unable to distinguish true Bohemianism from the night life that frequents the demi monde of all large cities.

General Contractors Dedicate New Home.

Monster Installation Banquet Marks Opening of New Quarters in The Sharon Building.

The members of the General Contractors Association, to the number of five hundred, assembled at their new quarters, corner of New Montgomery and Jessie streets, last Saturday night to celebrate the formal opening of their new home.

The celebration was in the form of an elaborate banquet, to which all did ample justice.

The new quarters are by far the finest and the largest in the United States, and would do justice to any banking institution. The assembly room is on the ground floor of the Sharon Building, a class A building, in the very heart of the business life of the city. With mosaic floor, marble wainscoting, and hardwood trim, the assembly hall certainly presents an imposing and impressive appearance. Ample room is also provided for pri-

the invited speakers to be called upon, and after referring to the team work necessary to make San Francisco great, he told of the two big problems confronting the city, water and transportation. He said that the traffic expert hired by the city had estimated that San Francisco would have a million population in 1914, but for himself he believed with the development of the Sacramento and San Joaquin valleys, the opening of the canal and the exposition, this figure would be reached before 1920.

"It is up to us to make the city what it should be," said the Mayor, "and to do this we have got to have water and transportation. These are the two big problems confronting us. For twelve years we have been trying to get water from Hetch-Hetchy and tonight I have a telegram from Washington saying that the prospects for the granting of the permit by the Federal Government are not bright.

Sees Bright Future.

"We have built the Geary-street railway, it is in operation and is successful, at the present time paying off the sinking fund, interest on the bonds, operating expenses and showing a

CHAS. A. DAY, President

WM. A. AGUE, Secretary

vate rooms for estimating purposes, directors' rooms, committee rooms, secretary's offices, etc., etc., all of which are most handsomely furnished.

Following the banquet, President Day, who acted as toastmaster, made a short speech in which he gave the history of the organization since its start, its objects, etc.

"A talk of this kind would not be complete without referring to the labor situation," said the speaker. "That we find satisfactory. For the past two years there have been no strikes, and few misunderstandings which conferences with the Building Trades Council have soon dissipated. Wages in the building trades are higher than any city in the country, and this association believes they are high enough and will oppose any further increase, no matter how slight."

Mayor James Rolph was the first of

the speakers. In the near future we want this line extended to the Ferry and out Van Ness avenue to the exposition grounds, and I believe the people of this city will vote for the necessary bonds when the time comes."

The speaker then told of the work being done in harbor improvement, and finished his remarks by saying that the future for the city was bright, needing only team work among all the population to make it the greatest city on the Pacific Coast.

Other speakers were: Charles Vogel-sang, for C. C. Moore, "1915"; W. T. S. Shon, "Our Commercial Future"; A. C. Rolofson, "Home Industry"; George L. McDougall, "Modern Architecture"; Paul Bancroft, "Public Buildings"; F. J. Lynde, "California"; F. H. Masow, "Progress of our Organization," and Lewis F. Byington, "Building Industry."

During the evening vocal selections are rendered by Chas. F. Balotti, Jess Woodruff, Geo. D. Murphy, Eddie Ealy, and L. A. Larsen.

The banquet committee consisted of J. Lynch, Charles W. Gompertz and John Biller. The reception committee was as follows: C. J. Carillon, R. G. Graham, J. W. Hatch, L. A. Jordan, P. C. Masow, H. J. Balston, C. D. Stelger, T. Thurston, Charles Wright, W. H. Wright and Frank M. Heffernan, publicity manager.

The officers and directors are: President, Chas. A. Day; Vice-President, Chas. W. Gompertz; Treasurer, Chas. Lindgren; Secretary, Wm. E. Hague; Attorneys, Aitken & Aitken.

Directors: Chas. Wright, F. H. Masow, H. W. Beach, John Biller, A. K. Bergstrom, Grant Fee, P. J. Lynch, Edward Ginley, Directors Elect, Ralph McLeran, Frank P. Lansing, Clerks: Geo. A. Watson, Geo. A. Maas and E. A. McCallum.

Provisional President Huerta has announced that he will "rule with an iron hand." If that means that he will assassinate everybody opposed to him he is certainly starting in right. The killing of the former president and the prominent members of his party is certainly putting a savage aspect on the revolution which savors more of anarchy than anything else and is equalled only by the scenes of the French revolution. So far as anyone on the outside is able to judge there is no man in Mexico at present fit or able to govern the country. There is no chance for a Napoleon to arise in Mexico as he would not have the material out of which to build up a successful army. What the world generally looks for is whether or not this savagery, intrigue and counter revolutions will not extend to the murder and plunder of foreign residents by the mobs, and whether any of the so-called generals will be able to maintain order and protect lives and property. The succession of events in the Mexican capital will be watched with tense interest by all who have any interest in the Southern capital. The promise and the oremance of a Mexican general are about as far removed as anything could be an if a "provisional" president can trust his own brother it is because his head depends upon his being loyal.

So far as can be ascertained there is no great moral or industrial question upon which the people are divided and it is doubtful whether or not the people would have the backbone to stand by it if there were. The "generals" are simply soldiers of fortune seeking their own advancement by intrigue, murder, or assassination. Under this state of things it is doubtful if there will be any peace of a permanent nature for a long time to come. The question is whether or not these assassinations and intrigues will not be carried so far as to compel the intervention of the United States. That the world would profit generally by such intervention there can be no question. It remains to be seen what will be done by the bunch that now hold the reins of power in Mexico.

TO WHOM IT MAY CONCERN.

WANTED: A centrifugal pump with capacity of 15,000 gallons per hour, with sub base for direct motor constructions. State size, price and where pump can be seen. GALLAND MERCANTILE LAUNDRY, 317-37 8th St.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$75,000. Architects, O'Brien Bros., China Bldg., S. F. Owner's name withheld. The building will be erected on Bush street, west of Mason, and will be arranged for a number of two and three room suites. All suites will have connecting baths and wall beds. There will be steam heat, elevator service, a vacuum cleaning system and a hot water plant. Interior finish will be of pine, redwood and hardwoods. Bath rooms will be finished in tile and will have composition floors. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, William Bush. The building will be erected at the northeast corner of Hyde and Vallejo streets and will cover an area of 24x60 feet. The first floor will contain stores and the upper floors will be divided into six apartments of three rooms each. There will be private baths and wall beds. Interior will be finished in pine with some oak floors. A hot water plant will be installed. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$18,000. Architect, Albert Schroepfer, Foxcroft Bldg., S. F. Owner, William Menser. The building will cover an area of 32x77 feet, and is designed for six apartment flats with baths and wall beds. Interior finish will be of pine, redwood and hardwood. Bath rooms will have composition floors and tile wainscot. There will be steam heat and a hot water system. Entrance vestibule will be finished in marble and tile. The exterior of the house will be covered with tapestry brick veneer and rustic. Plans are complete and the work will be sublet by the architect.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$11,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, J. Eric Johanson. The building will be erected on Pine street and will cover an area of 28x72½ feet. The interior will be arranged for three-room suites with private baths and wall beds. A central heating system will be installed. Interior finish will be of pine with some hardwood floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Masonic Ave., S. F. The building is to be erected at the corner of Fell and Cole streets, and will cover an area of 28½x90 feet. There will be nine apartments of three rooms and bath each. All suites will have wall beds and hot and cold run-

ning water. Interior finish will be of pine and redwood with some oak floors. Bath rooms will have composition floors. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Hans Petersen. The building will contain eight apartments of three rooms and bath each. All suites will be equipped with wall beds and will have hot and running water. Interiors will be finished in pine and redwood with some oak floors. A central heating system will be installed. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, William Helbing, 1420 Market St. S. F. Owners, William Helbing and Oscar Curtis. The building will be erected at the corner of Post and Leavenworth streets and will cover an area of 112½x57½ feet. Interior will be arranged for a number of two and three room suites with private baths and wall beds. There will be steam heat, elevator service, a hot water plant and vacuum cleaning system. Interior finish will be of pine and redwood with some ornamental plaster used in the entrance. The exterior of the building will be faced with pressed brick. Plans are being prepared and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architect, J. F. Dunn, Monadnock Bldg., S. F. Owners, Metropolis Investment Co. The building will contain twelve apartments of two and three rooms each, with wall beds and private baths. Interior finish will be of pine and redwood throughout. A central heating system will be installed and a vacuum cleaning plant. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the owners are taking figures on the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Theodore E. Rulfs. The building will be erected on property recently purchased by Mr. Rulfs at the southeast corner of Pine and Leavenworth streets. The first floor will be arranged for stores and upper two floors for a number of two and three room apartments with private baths and wall beds. All interior finish will be of pine. Hardwood floors will be used in some of the rooms. Bath's will have composition floors. There will be steam heat, a vacuum cleaning system and hot water plant. The exterior of the building will be covered with brick veneer and ship lap. Plans are being prepared.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 6 story and base, reinforced concrete. Cost not

ated Architect Paul C. Pape, Union League Bldg., L. A. Owner, E. Tislerat. The building will be located on a corner and will contain a total of eighty rooms arranged in suites of from two to five rooms each. All apartments will have wall beds and private baths. Interior finish will be of pine and hardwoods. There will be steam heat, elevator service, hot water plant and vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Interior partitions will be of hollow tile and metal lath and plaster. The exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

VENICE, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick. Patent store fronts will be S. Garrett, Currier Bldg., L. A. Owner, Dr. J. C. Elliott. The building is to be arranged for stores on the first floor and modern two and three room suites on the upper floors. The structure will cover an area of 77x60 feet. Interior will be finished in pine. There will be twenty baths with composition floors. Plans include steam heat and a vacuum cleaning system. The exterior will be faced with pressed brick. Patent store fronts will be used. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, Mrs. John Featherington. The building will contain sixty rooms arranged in two and three room apartments. All suites will have running hot and cold water, wall beds and private baths. Interior of the building will be finished in pine. Baths will have composition floors and tile wainscot. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are now nearly complete and the work will be done by Day Labor.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect, B. Cooper Corbett, Union Oil Bldg., L. A. Owner, Mr. Young. The building will cover an area of 50x140 feet, and will contain forty rooms which are to be arranged in suites of two and three rooms each with wall beds and private bath. Interior finish will be of pine throughout. Bath rooms will have composition floors. A hot water system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

BANKS.

LOS ANGELES, CAL.—Bank and offices, 12 story and base. Class A construction. Cost not stated. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Insurance Bldg., L. A. Owners, Merchants' Fireproof Building Co. This building is to be erected at the northeast corner of 4th and Spring streets. The entire first floor has been leased to one of the leading financial institutions of Los Angeles. The building has been mentioned in these columns a number of time before when the architects were first commissioned. Plans are now complete and figures are being taken on the work.

BRIDGES, DAMS AND HARBOR WORK.

LA GRANGE, STANISLAUS CO., CAL.—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor E. H. Annear, Modesto. Owners, Stanislaus County. This bridge will be erected over the Tuolumne River at La Grange. No description of the work has been received and details are lacking. Plans have been approved by the Board of Supervisors and bids are now being taken. Bids will be opened by the Board of Supervisors at Modesto on March 11th. Complete information, plans and specifications can be obtained from the County Surveyor.

HUNTINGTON BEACH, LOS ANGELES CO., CAL.—Wharf, reinforced concrete, \$65,000. Engineer, City Engineer, Huntington Beach. Owners, Town of Huntington Beach. Plans for this work have been approved by the Town Trustees and bids are now being taken. All figures must be in the hands of the City Clerk, C. E. Laverling, by March 10. The wharf will be of reinforced concrete except the deck, which is to be of frame construction.

PORT ANGELES, WASH.—Bridge, steel and concrete, \$40,000. Engineer, J. M. Baird, White Bldg., Seattle. Owners, Clallam County. This structure will be erected over the Elwha River at Port Angeles. There will be concrete abutments and several steel spans. Plans are on file at the office of the engineer. Bids will be opened on March 10th.

CHURCHES.

SAN FRANCISCO—Church, Class A construction. Cost not stated. Architects, Shea & Lofquist, 550 Montgomery St., S. F. Owners, Mission Dolores. Contractors: Excavating has been awarded to J. J. Leonard, 180 Jessie St., S. F., and the structural steel work to the Central Iron Works, 651 Florida St., S. F., at \$83 per ton. Plans for the other parts of the work are being completed as rapidly as possible and bids will be called for shortly.

LONG BEACH, LOS ANGELES CO., CAL.—Church addition, 1 story, frame, \$10,000. Architects, Austin & Lochridge, 18 Locust Ave., Long Beach. Owners, Grace Methodist Church. The building will be in the nature of an addition to the present building. New portion will cover an area of 52x80 feet and will be used as the auditorium. The old portion of the building will be altered for Sunday School purposes. Interior finish will be of pine throughout. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse, 3 story and base, mill construction. Cost not stated. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Warehouse Investment Co. This building, which is to be erected on King street, will cover a large ground area. Plans provide for an automatic sprinkler system, fireproof floors and metal window frames and sash. The exterior of the building will be faced with stock brick. The structure has been leased for a long

term to Castel Bros. Plans are complete and a contract for the excavation has been let. Other parts of the work are now out for figures.

NILES, ALAMEDA CO., CAL.—Factory, 3 frame buildings, \$50,000. Architect, G. W. Page, Ica Bldg., S. Jose. Owner, G. M. Anderson. This group of buildings has been designed for a moving picture manufacturing plant and will include the general factory, stables and offices. Construction will be of frame with a considerable amount of glass used. Complete details of the enterprise are lacking. Plans are being prepared and full particulars will be given later.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Studio building, reinforced concrete, \$50,000. Architect, J. Corbly Poole, Santa Barbara. Owners, American Film Co. Contractor, Magnus Johnson, Santa Barbara. Not. This contract has been taken on a percentage basis.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,000. Architect, M. Matanovich, David Hewes Bldg., S. F. Owner, F. Radmanovic. The building will contain three modern flats of four, five and six rooms. Interior finish will be of pine and redwood with some hardwood floors. There will be either open fire places or gas grate. Mantels will be of tile. Tile will be used in the bath rooms and kitchen. The exterior of the building will be covered with cement plaster and rustle. Plans are complete and figures are being taken on the work.

SAN FRANCISCO—Flats and store, 2 story and base, frame, \$5,000. Architect, none. Owner, Jacob Bachmann, 4644 Geary St., S. F. The building will cover an area of 25x74 feet. The first floor will be arranged for on store and the upper floor for modern flats. The interior finish will be of pine and redwood with some oak floor. There will be open fire places and brick or tile mantels. Store will have plate glass windows. The exterior will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, William Cadigan, 24 Steiner St., S. F. The building has been designed to contain two flats of five and six rooms each with bath. The building will cover a lot 25x44 feet. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. The exterior of the house will be covered with rustle and cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flat alterations for new construction, \$2,500. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, L. Boggione. This work will include raising the present building and constructing a store on the first floor. Alterations will require new plaster, painting, plumbing, electric work and interior finish. The exterior will be covered with rustle. Plans are complete and the owner is doing the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame. Cost not stated. Architect, none. Owner, M. F. Muller, 69 Brosnan St., S. F. The building will cover an area of 25x60 feet, and has been designed to contain two modern flats of five and six rooms each with bath. Interiors will be finished in pine and redwood. Same oak floors will be used. There will be either open fire places or gas grates in the living rooms. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$10,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Peter Cauby. This building will be erected on Green street near Leavenworth, and is to be designed for a number of high-class residential flats. Interiors will be finished in pine and hardwood with hardwood floors in the principal rooms. A central heating system will be installed. There will also be open fire places and brick or tile mantels. Bath rooms will have tile wainscot and composition floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architects.

SAN FRANCISCO—Flats, 3 story and base, frame, \$10,000. Architect, E. Young, 251 Kearny St., S. F. Owner, C. C. W. Haun. The building will be erected on Capp street, north of 21st street, and will cover an area of 27½x66 feet. The interior will be arranged for six apartment flats of four and five rooms each. All suites will have bath and wall beds. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places and Dutch tile mantels. Bath will have tile wainscoting. The exterior of the building will be covered with brick veneer and rustic. Plans are complete and the work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO., CAL.—Flats, 2 story and base, frame. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner, Stephen Arnold. The building will be arranged for four flats of four and five rooms each. All bed rooms will be equipped with wall beds. Interior finish will be of pine throughout. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic. Plans for this work are now being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Flat alterations, frame construction. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mrs. L. E. Blanchard. A two-story dwelling now on the property will be altered into four modern flats. This work will require new interior finish, electric work and painting. Open fire places and tile mantels will be used. The exterior of the building will be covered with rustic. Plans for this work are being prepared.

GARAGES.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Mrs. Marie Ham-mell. The building will be designed for a commercial garage and is to cov-

er an area of 50x110 feet. There will be a cement floor and brick exterior walls faced with enameled brick. Considerable structural steel will be used. Plans call for metal window frames and sash. Interior finish will be of pine throughout. Plans are being prepared.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architects, California Real Estate and Building Co., L. A. Owners, May and Grimwood, 903 Security Bldg., L. A. The building has been designed for a commercial garage and will cover an area of 75x157 feet. Interior of the front portion of the building will be handsomely finished. There will be a cement floor and special gasoline storage tanks. Metal window frames and sash are called for in the specifications. The exterior of the building will be faced with glazed brick. Plans are being prepared.

SEATTLE, WASH.—Garage, 2 story and base, reinforced concrete, \$30,000. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, L. W. Roe. The building will be erected on 12th avenue, and will cover a ground area of 121x118 feet. The structure has been designed for a commercial garage. Construction will be practically fireproof with a cement floor on the first story, metal window sash and frames and some metal trim. There will be special gasoline storage tanks. The exterior of the building will be faced with cement plaster. Plans are complete and a contract will be awarded within a few days.

GOVERNMENT WORK AND SUPPLIES.

PRESIDIO OF SAN FRANCISCO—Oil distributing system and oil burners. Cost not stated. Engineers Constructing Q. M. Dept. Capt. E. S. Walton, Presidio, in charge Owners, United States Government. Plans and specifications have been completed for the construction of an oil distributing system and for furnishing oil burners for the Presidio and Fort Winfield Scott. Bids are now being taken and will be opened on March 13th. Plans and specifications can be secured from Capt. E. S. Walton, of the Q. M. Dept., Presidio of San Francisco.

Cement for Reclamation Work.

Of bids received by the Reclamation Service for furnishing 210,000 barrels of Portland cement, the Government has decided to purchase from the Southwestern Portland Cement Co., of El Paso, Tex., 50,000 barrels at \$1.40 per barrel for use on the Rio Grande project, and from the Colorado Portland Cement Co., of Denver, Colo., 31,000 barrels at 99c per barrel for use on the North Platte Uncomphrage Valley project.

Bids for furnishing two direct-connected kerosene engine-driven air compressors for the St. George Reef Light station were opened by the High House Inspector, 18th district, San Francisco, Cal., as follows:

Fairbanks, Morse & Co., \$3,627.

Doak Gas Engine Co., Oakland, Cal., \$3,425; accepted.

Wharf, E. P. Pio, Cal.

The big of the Mercereau Bridge & Construction Co., of Los Angeles, Cal., \$8,910 in amount, has been accepted for the construction of a wharf, etc., at Fort Pio Pio, Cal.

Puget Sound Dry Dock.

It is planned by the Navy Department to dock the U. S. S. Oregon in the new dry dock at Puget Sound about March 1. This will not be the official trial of the dock, which is to be used for the first time, it appears, as a matter of sentiment with the outgoing administration, which will thus be able "to point with pride" to the completion of this largest of naval docks before March 4. The official test will occur during the subsequent three or four weeks, when it will be possible to have the usual economy runs of the pumping equipment and otherwise conduct the docking of a ship in a way to ascertain whether the contract has been complied with.

HALLS AND SOCIETY BUILDINGS.

OAKLAND, CAL.—Auditorium steel work, \$177,867. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. But one bid, that of the California Construction Co., was received for the structural steel work on the new Municipal Auditorium. No action was taken by the Council and the bid was referred to the City Attorney for an opinion.

MONTEREY, MONTEREY CO., CAL.—Club house, 5 story and base. Class A construction. Cost not stated. Architect, J. W. Chalmers, Mason Bldg., L. A. Owners, Los Angeles Capitalists headed by M. L. Foster, Mason Bldg., L. A. The building is to be designed for a private club, and will cover an area of 120x190 feet. Besides the large social halls, banquet room, dining rooms, billiard room, bowling alleys and sun parlor, the building will contain forty suites. Plans include a plunge and private baths. Interior will be handsomely finished in hardwoods and tile. There will be a complete steel frame with exterior walls of glazed terra cotta. Plans are being prepared.

ALHAMBRA, LOS ANGELES CO., CAL.—City hall, 2 story and base, brick and steel. Cost not stated. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Town of Alhambra. Plans for a building to house the municipal offices have been completed and approved by the Trustees. Bids are now being taken and will be opened on March 22nd. The

structure will cover an area of 50x150 feet, and will be of brick construction with the exterior walls faced with pressed brick and terra cotta. Interior will be finished in hardwood, marble and tile. A central heating system will be installed. Special concrete vaults are specified. Plans can be secured from the architects.

ROSEBURG, ORE.—Lodge hall, 2 story and base, brick. Cost not stated. Architect, Earl A. Roberts, Selling Bldg., Portland. Owners, Roseburg Elks' Hall Association. The building will be erected on a corner lot and will cover an area of 50x100 feet. The building will be arranged around an open court with stores on two sides. The court will be laid out in handsome gardens. Interior of the building will be arranged for lodge halls, banquet room and a number of sleeping rooms and suites. Interior finish will be of pine and hardwoods. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Considerable ornamental iron will be used. Tile will be used in all baths. Plans are being prepared.

BEAVER LAKE, ORE.—Club house, 2 story and base, frame. Cost not stated. Architect, D. L. Williams, Chamber of Commerce Bldg., Portland. Owners, Beaver Lake Club. The main floor will contain one large living room, kitchen and dining room. The main room will extend through the second floor, which will be more of a balcony effect and will be arranged for sleeping rooms and private baths. Two large open fire places are to be installed on the first floor. Mantels will be of brick. There will be a hot water system of heating. The exterior will be covered with logs and shakes. Plans are being prepared.

Contracts Awarded.

MODESTO, STANISLAUS CO., CAL.—Lodge hall, 3 story and base, brick, \$25,000. Architect, Ralph P. Morrill, Yosemite Theatre Bldg., Stockton. Owner, Mrs. Tully, Contractor, George Shannon, \$21,485. General construction only. Bids will be received later for the heating, plumbing and electric work. The following bids were received for the general construction: W. H. Arnold, \$25,450; Bishop-Steven-Wilson, 1113 Post St., S. F., Contract Ulrich & Howell, \$23,600; George Shannon, \$21,485.

LARKSPUR, MARIN CO., CAL.—City Hall, 2 story and base, frame, \$10,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, Town of Larkspur. Contractors, Peterson & Wilson, 112 Post St., S. F. Contract price, \$8,785. A complete list of these figures appears under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

HOSPITALS.

OXNARD, VENTURA CO., CAL.—Hospital, 2 story and base, brick and steel. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. The building will be 40x150 feet with two wings 50 feet each. It will contain the usual wards, both public and private, operating rooms, kitchens and dining rooms. Special nurses' quarters will also be provided. There will be a central heating system and vacuum cleaning plant. Interior finish will be of

pine and hardwood. Tile will be used in the operating rooms and baths. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base. Class C construction, \$30,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Louis Friedman. The building is to be erected at the northeast corner of Bush and Grant avenue. The first floor will be arranged for stores and the hotel lobby. Upper floors will contain a number of single rooms and several baths. Interior finish will be of pine and redwood. There will be a hot water system. Some tile will be used in the entrance. Patent store fronts are specified. The exterior of the building will be faced with cement plaster. Plans are being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Hotel and stores, 3 story and base, brick. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owners, Stockton, Ice and Fuel Co. The building will occupy a corner site and will cover an area of 50x100 feet. Construction will be of brick and steel. The first floor will contain several stores besides the hotel lobby. Upper floors will be arranged for single rooms and baths. Interior finish will be of pine throughout. Entrance will be finished in mosaic and tile. A central heating system and running hot and cold water will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel, 3 story and base, brick, \$30,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner's cover an area of 50x112 feet. There will be stores and the lobby and entrance on the first floor. Upper floors will be arranged for about forty guest rooms and several baths. Interior finish will be of pine and redwood throughout. The exterior of the building will be faced with pressed brick. A hot water system will be installed. Plans are nearly ready for figures.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel, 3 story and base, brick, \$20,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Girlach. The building will be erected at the corner of Richmond and Railroad avenues and will cover an area of 40x50 feet. The first floor will contain the hotel offices, lobby, dining room and a bar. Upper floors are to be arranged for a total of forty guest rooms and a number of baths. Interior finish will be of pine throughout. All rooms will be supplied with hot and cold running water. There will be patent store fronts. The exterior of the building will be faced with pressed brick.

SAN FRANCISCO—Hotel, 2 story and base, reinforced concrete. Cost not stated. Architect, Clay N. Rurrell, Albany Bldg., Oakland. Owner, Miss E. Rickard. This work has been mentioned here before when plans were being prepared. Foundations and walls are of sufficient strength to carry four additional stories. There will be a large store and hotel entrance on the first floor and about forty guest rooms on the upper floor. Interior finish will be of pine. Bath rooms will have the wainscot. There will be patent store fronts. The exterior of the building

will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architects, Butler Bros., Mason Bldg., L. A. Owner, E. B. Dukeman. The building will have a street frontage of 64 feet and a depth of 165 feet. Interior will contain a total of 120 guest rooms and 20 baths. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior finish will be of pine throughout. Metal lath and plaster partitions will be used. The exterior of the building will be faced with pressed brick. Some tile will be used in the bath rooms. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. F. W. Sabich. The building will cover an area of 50x150 feet. The first floor will contain a number of stores besides the hotel entrance, lobby and offices. Upper floors will be arranged for a large number of single rooms. There will be several baths on each floor. Plans include steam heat, elevator service and hot and cold running water. Metal window sash and frames are to be used. The entrance will be finished in tile and marble. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel 8 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Biescar Estate. Preliminary plans only have been prepared for this work and none of the details of construction are available at this time. The building will be erected on Hope street north of 8th, and is to be fireproof throughout. Complete details will be given as the plans progress.

LOS ANGELES, CAL.—Hotel, 12 story and base, Class A construction, cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Rosslyn Hotel Co. This building has been mentioned in these columns before when plans were first started. Working drawings for the structural steel, concrete work, masonry and carpentry work and plumbing are complete and figures are being taken. Construction will be Class A throughout. The structure covers an area of 158x115 feet and will contain a total of about 475 guest rooms. Construction cannot be undertaken until its leases on the present buildings expire, which is in November.

LIBRARIES.

SEATTLE, WASH.—Library, 1 story and base, brick and stone, \$30,000. Architect, W. Marbury Somervell, White Bldg., Seattle. Owners, City of Seattle. The architect has just been commissioned to prepare plans for a one-story building of brick and stone which will be erected at the corner of Vesler Way and 23rd avenue. Other than the fact that the building is to be faced with terra cotta and stone no details have been decided upon. Complete information will be given in these columns as the plans progress.

PORT TOWNSEND, WASH.—Library, 1 story and base, brick and con-

crete, \$15,000. Architects, C. Lewis Wilson Co., Northern Bank Bldg., Seattle. Owner, City of Port Townsend. Plans for this building have been completed and figures were opened by City Clerk George Anderson at Port Townsend on March 4th. An award of contract will be made within a few days.

RAILROAD CONST. STATIONS AND EQUIPMENT.

SAN FRANCISCO—Railroad construction, \$21,990. Engineers, City Dept. of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Contractor, P. Roland, 550 Montgomery St., S. F. Contract price, \$21,990. Note: This contract calls for the completion of the Municipal road from Third and Market streets to the outer tracks on Market street at Sansome.

DOUGLASS, ARIZ.—Passenger depot, 2 story and base, brick and steel, \$75,000. Architect's name not given. Owners, El Paso and Southwestern R. R. Co. Work is to be started at once under the Day Labor system on the construction of the superstructure of the new depot. The building covers a large area. Interior will be finished in pine and hardwoods. The exterior will be faced with pressed brick.

Contracts Awarded.

WYOMING—Railroad construction, \$7,000,000. Engineers, Engineering Department Burlington Route. Owners, Burlington R. R. Contractors, Twohey Bros., Portland. Contract price, \$7,000,000.

RESIDENCES.

SAN FRANCISCO—Residences, 6, 2 story and base, frame, \$2,000 each. Architect, none. Owner, J. Anderson, 423 16th Ave., S. F. These dwellings are to be erected in the west line of 17th avenue, south of Anza street. Each house will contain six rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living and dining rooms. Tile will be used in the kitchens and baths. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic shingles and cement plaster. Work will be started under the Day Labor system as soon as plans can be completed.

SAN FRANCISCO—Residence, 2 story and base, frame, \$1,000. Architect, Theo. S. Boehm, David Hewes Hewes Bldg., S. F. Owner, O. E. Anderson. This dwelling has been designed for an eight-room house with bath. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. Furnace heat and open fire places will be used. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling is to be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$3,000 each. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The houses will be erected in Ingleside Terrace, and each will be

arranged for a seven-room dwelling with bath. Interiors will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and brick or tile mantels. The exteriors will be covered with shingles and rustic. Tile will be used in the kitchens and bath rooms. Plans are complete and the owners are purchasing all materials. The work will be done by Day Labor.

SAN FRANCISCO—Bungalow, 1 1/2 story and base, frame, \$2,500. Architect, none. Owner, Ralph J. Hutton, 1039 Franklin St., S. F. The house will contain six rooms and has been designed in the bungalow style. Interior will be finished in pine and redwood. Floors in the living and dining rooms will be of hardwood. There will be and open fire place and brick mantel. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and shingles. Some elm panels will be used. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,500 each. Architect, none. Owner, Fernando Nelson, 30 Presidio Terrace. These houses will be erected in the Richmond District. Each will contain seven rooms and bath. All interior finish will be of pine or redwood. Some oak flooring will be used. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, R. H. Banning, Mission Terrace, S. F. The house has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. There will be an open fire place in the living room with a brick or tile mantel. Tile will be used in the bath room. The exterior of the house will be covered with rustic and cement plaster on metal lath. The work will be done by Day Labor.

SAN FRANCISCO—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owners, Homeland Building Co., Merchants National Bank Bldg., S. F. The house will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the two principal rooms. Tile will be used in the bath room and kitchen. There will be an open fire place and brick mantel. The exterior of the dwelling will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Bungalow, 1 1/2 story and base, frame, \$2,000. Architect, none. Owner, Emil Nelson, 550 Jersey St., S. F. The house has been designed to contain six rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with rustic and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2

and base, frame, \$3,000. Architect Joseph M. Geary, 23rd and Polman Sts., S. F. Owners, Parkside Building Co. The house has been designed for a seven-room dwelling with bath. Interior will be finished in pine and redwood with some elm panels. There will be open fire places and tile or brick mantels. Hardwood floors will be used in the dining and living rooms. The exterior of the dwelling will be covered with shingles and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO — Residence, 2 story and base, frame, \$3,000. Architect none. Owner, Frank J. Taylor, 11 Presidio Terrace, S. F. The house will be designed to contain seven rooms, bath and laundry. All interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile will also be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO — Residences, 4 city blocks to be improved. Cost not stated. Architect, none. Owner, Fernando Nelson, 30 Presidio Terrace, S. F. Fernando Nelson has just purchased a tract covering the four city blocks, bounded by 27th avenue, 33rd avenue, Lincoln Way and Irving street, and which is located in one of the choicest parts of the Sunset District. Mr. Nelson has probably built more houses than any other one individual and his work has been of a character which assures his success in the present undertaking. His Sunset property with the new houses which are to be erected on it will represent an investment of \$750,000, and is said by real estate men to be the largest deal in this kind of property in the history of San Francisco. Between \$15,000 and \$20,000 will be expended in street improvements, grading, sewers, etc., in each of the four blocks. Mr. Nelson intends to erect two-story houses containing seven rooms each, and which will cost on an average of \$3,500.

BERKELEY, ALAMEDA CO., CAL. — Residences, 2, 2 story and base, frame, \$3,500. Architect, none. Owners, Patrick Nelson Co., 2025 Addison St., Berkeley. These houses will be designed for seven rooms and bath each. Interior finish will be of pine throughout. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster. Plans are in the hands of the owners who will do the work by Day Labor.

OAKLAND, CAL. — Bungalows, 4, 1 story and base, frame, \$2,500 each. Architect, W. H. Hudson, Albany Block, Oakland. Owners, Morse Hargrave Co. These houses will be erected in Cottage Court near Seminary avenue, and each will be arranged for six rooms and bath. All interior finish will be of pine. There will be open fire places and tile or brick mantels.

Oak floors will be used in the principal rooms. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster. Plans are complete and the owners are now purchasing all materials and will do the work by Day Labor.

OAKLAND, CAL. — Residence, 2 story and base, frame, \$6,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, A. B. Stephens. This dwelling will be erected in the Piedmont by the Lake Tract and has been designed for an eight-room house with baths and sleeping porch. Interior will be finished in pine, redwood and hardwood. Oak floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. There will be an automatic water heater. Exterior of the house will be covered with rustic. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL. — Bungalow, 1 story and base, frame, \$2,300. Architects, F. R. Peake Co., 2127 University Ave., Berkeley. Owner, L. R. Wilson. The house will contain 5 rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the dining and living rooms. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. Plans are complete and the work is to be done by Day Labor.

OAKLAND, CAL. — Residence, 2 story and base, frame, \$3,500. Architect, A. Howard Peterson, Mills Bldg., S. F. Owner, E. H. Baker. The house will contain seven rooms and bath. Interior will be finished in pine throughout with some hardwood floors and hardwood panels in the dining and living rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and figures are being taken by the architect.

BERKELEY, ALAMEDA CO., CAL. — Residence, 2 story and base, frame, \$4,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owners, Marshall and Diggs. The house will contain seven rooms, bath and sleeping porch. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL. — Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, L. W. Button, 5930 Telegraph Ave., Berkeley. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are com-

plete and in the hands of the owner who will do the work by Day Labor.

MADERA, MADERA CO., CAL. — Residence, 2 story and base, frame, \$8,000. Architects, Parker & Kenyon, 241 Kearny St., S. F., associated with J. Carl Thayer, Fresno. Owner, Richard Roberts, Commercial Bank of Madera. The dwelling will contain eight rooms, baths and sleeping porch. Interior will be finished in pine, redwood and oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO — Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, Adfred T. Merris, 616 9th Ave., S. F. The house will contain six rooms and bath. Interior finish will be of pine throughout. There will be an open fire place with tile or brick mantel in the living room. Some oak floors will be used. Tile will be used in the bath room and kitchen. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO — Bungalows, 4, 1 story and base, frame, \$1,500 each. Architect, none. Owner, M. Anderson, 291 Church St., S. F. These houses will be erected on Noe street, north of Duncan. Each will contain five rooms and bath. All interior finish will be of pine or redwood. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic and shingles. Plans are in the hands of the owner and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL. — Residence, 2 story and base, frame, \$2,500. Architect, R. B. Hotchkiss, Bacon Bldg., Oakland. Owner, Wilson Flagg, Bonita Ave., Berkeley. The houses will contain five rooms and bath. Interior finish will be of pine throughout. Some oak floors will be used. There will be an open fire place with the mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are complete and figures are being taken by the architect.

RICHMOND, CONTRA COSTA CO., CAL. — Residence, 2 story and base, frame, \$3,500. Architect, J. B. Ogborn, Richmond. Owner, J. C. Shepherd. The house is designed to contain seven rooms and bath. Interior finish will be of pine and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HOLLYWOOD, LOS ANGELES CO., CAL. — Residence, 2 story and base, frame, \$20,000. Architect, R. Cooper Corbett, Union Oil Bldg., L. A. Owner, Mr. Perry. The dwelling will contain in the neighborhood of fourteen rooms and several baths. Interior finish will be of pine and hardwoods, oak floors will be used throughout except

the bath rooms which will have composition floors and tile wainscot. There will be furnace heat and an automatic water heater. There will be fire places and brick mantels. A tile roof is specified. The exterior of the dwelling will be covered in cement plaster on metal lath. Plans are being prepared for the work.

SCHOOLS.

KINGS CITY, MONTEREY CO., CAL.—School, 1 story and base, frame and concrete, \$22,500. Architect, H. B. Kelas, Watsonville. Owners, Kings City School District. The building will contain six class rooms and an assembly hall. The design is in the Mission style, the exterior to be faced with cement plaster on metal lath. There will be furnace heat and a program air system. Interior finish will be pine throughout. Plans are complete and figures for the construction were opened on Saturday last. A complete list of the bids will appear in our next issue.

LAFT, KERN CO., CAL.—School, 1 story and base, brick, \$30,000. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Conley School District. Plans have been accepted by the Board of School Trustees for this building and construction work will be undertaken early in March. The building contains six class rooms and an assembly hall. Interior finish will be of pine throughout. The exterior will be faced with cement plaster. Roof will be of red clay tile. Bids will be called by the Board of Trustees. Plans will be secured from the architect.

LONG BEACH, LOS ANGELES CO., CAL.—School, 3 buildings, 1 story and base, brick, \$110,000. Architect, A. Inside Sturgess, Long Bldg., L. A. Owners, City of Long Beach. Two of the buildings will contain six standard class rooms, auditorium to seat 300, offices, etc., and will cost about \$30,000 each. They will be erected at the Maple street and East Fourth street corners. The other building will contain ten standard class rooms, auditorium to seat 500, library, offices, etc., and will cost about \$50,000. The buildings will be of brick construction and will probably be plastered on the exterior. Seventeen sets of plans were received in competition by the Board of Education.

Contracts Awarded.

ORANGE, ORANGE CO., CAL.—Schools, 2, 1 story and base, brick and concrete. Cost not stated. Architect, H. Eley, Santa Ana. Owners, City of Orange. Contractor, George Buchel, general construction, \$26,774. American Heating Co., California Bldg., L. A., heating and ventilating, \$450.

SEATTLE, WASH.—School, 2 story and base, reinforced concrete, \$76,760. Architect's name not given. Owners, City of Seattle. Contractor, J. W. Lawson, High Bldg., Seattle. Contract price, \$76,760.

SEATTLE, WASH.—School, 2 story and base, reinforced concrete, \$77,474. Architect's name not given. Owners, City of Seattle. Contractors, Manhattan Co., Inc., Central Bldg., Seattle. Contract price, \$77,474.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO.—Water tank, etc., reinforced concrete. Cost not stated. Engineer, City Dept. of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for a large reservoir with a capacity of 750,000 gallons have been approved and ordered constructed. Bids will be opened by the Board of Public Works on March 12th. The reservoir will be erected on the block bounded by Jones, Le Roy Place, Sacramento and Clay streets. Separate bids will be taken for the construction and for furnishing the pipes, valves and specials. Plans can be obtained from the Engineering Department.

PUEBLO, LOS ANGELES CO., CAL.—Reservoir, reinforced concrete. Cost not stated. Engineer, George W. Harding, 634 Citizens' National Bank Bldg., L. A. Owners, Puente Water Co. The reservoir will be of reinforced concrete. The capacity of the big tank is to be 3,000,000 gallons. Plans are complete and figures are being taken by the engineer.

SAN DIEGO, CAL.—Water main extensions. Cost not stated. Engineer, H. A. Whitney, San Diego Water Department. Owners, City of San Diego. Plans are being prepared for a second high pressure pipe line from the Chollas Reservoir to San Diego. The line will be of 28-inch pipe and four and one-half miles long. Bids will be called for as soon as the plans can be completed.

STORES & OFFICE BUILDINGS

OAKLAND, CAL.—Stores and offices, 8 story and base. Class A construction. Cost not stated. Architect, John Galen Howard, 604 Mission St., S. F. Owners, Sather Estate. This building is proposed for the northeast corner of 12th and Castro streets. Only preliminary plans have been prepared and no details will be given out for some time. Construction is to be fireproof throughout with a complete steel frame and reinforced concrete walls and floors. Further particulars will be given as the plans progress.

LOS ANGELES, CAL.—Stores and lofts, 8 story and base. Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Metropolitan Fireproof Building Co. This building will be erected at the northwest corner of Broadway and 5th street. The first floor will be arranged for stores and the upper floors for lofts suitable for light manufacturing purposes. Interior will be finished in pine. There will be fireproof doors, metal lath and plaster interior partitions and metal window frames and sash. Plans provide for elevator service, mail chutes, a vacuum cleaning system and automatic sprinklers. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and lofts, 6 story and base. Class B construction. Cost not stated. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Edward D. Silent & Co. The building will cover an area of 60x51 feet with an L 39x109 feet. There will

be a steel frame with exterior walls of brick and terra cotta. The interior will be finished in pine and hardwood. There will be metal window sash and frames, elevator service, a vacuum cleaning system and steam heat. The wing portion of the structure will be but two stories in height. Plans are complete and figures are being taken.

Contracts Awarded.

C.—Sealed proposals, plainly marked on the outside of the sealed envelope: "Proposals for Frame Day School Building, Arapaho Day School, Wyo.," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian office until 2 o'clock p. m., March 15, 1913, for furnishing material and labor for the erection of a frame day school building at the Arapaho Indian day school, Shoshone reservation, Wyoming, in strict accordance with the plans, specifications, and instructions to bidders, which may be examined at this office, the offices of the supervisor of construction, Denver, Colo.; the U. S. Indian warehouse at San Francisco, Cal.; and the Shoshone school. For further information apply to the superintendent of the Shoshone Indian school, Wind River, Wyo. F. H. ABBOTT, acting commissioner.

PROPOSALS FOR CEMENT.

CEMENT—U. S. Engineer Office, Portland Ore. Sealed proposals for furnishing 100,000 barrels cement will be received here until **11 o'clock a. m. March 10, 1913**, and then publicly opened. Information on application. **JAY J. MORROW**, major, engineers.

PROPOSALS FOR GENERATOR SETS.

GENERATOR SET AND SWITCHBOARD ACCESSORIES—Sealed proposals, Indorsed "Proposals for Motor Generating Set," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. March 22, 1913**, and then and there publicly opened, for one 200-kilowatt motor generator set and switchboard accessories at the naval station, Pearl Harbor, H. T. Specifications can be obtained on application to the bureau. **H. R. STANFORD**, chief of bureau.

PROPOSALS FOR BRIDGE WORK.

PURSUANT to an order of the Board of Supervisors of the County of Stanislaus, State of California, duly made on the 15th day of February, 1913, notice is hereby given that sealed bids will be received by the undersigned up to and not later than **10:30 a. m. of the 11th day of March, 1913**, for the erection and construction of a bridge over the Tuolumne River at the town of La Grange, Stanislaus County, California, in accordance with the plans and specifications therefor prepared by the County Surveyor of said county and now on file in the office of the County Clerk of said county, where the same may be seen by intending bidders during business hours.

All bids must be accompanied by a certified check on some solvent bank of the State of California, in a sum equal to 10 per cent of the amount bid, conditioned that the successful bidder will enter into such contract and furnish such bonds as may be required within ten days after the award, or failing so to do, will forfeit the amount of such check as liquidating damages for such failure.

The Board reserves the right to reject any or all bids.

By order of the Board of Supervisors of the County of Stanislaus, State of California. **H. BENSON**, Clerk of the Board of Supervisors.

NOTICE TO CONTRACTORS.

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Cal., 27th February, 1913.—Sealed proposals, in triplicate, for oil distributing system and oil burners at Fort Baker and Fort Mason, Cal., and oil burners at Presidio of San Francisco and Fort Winfield Scott, Cal., will be received here until **11 a. m. 13th March, 1913**, and then opened. Plans, specifications, blank forms and necessary information can be obtained here. Deposit of \$10.00 required to insure return of plans, etc. Envelopes containing proposals should be marked "Proposals for Installing Oil Burners" and addressed to **CAPTAIN E. S. WALTON**, Q. M. Corps. (*)

PROPOSALS FOR CONCRETE TANK. **OFFICE OF THE BOARD OF PUBLIC WORKS** of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on**

Wednesday, the 12th day of March, 1913, for doing the following work, to wit:

(1) The construction of one 750,000 gallon reinforced concrete tank on property between Leroy Place and Jones street, in the block bounded by Sacramento, Jones, Clay and Leavenworth streets.

(2) The furnishing, testing and delivering of Valves, Pipes, and Fittings, for one 750,000 gallon reinforced concrete Tank on property between Leroy Place and Jones street in the block bounded by Sacramento, Jones, Clay and Leavenworth streets.

Progressive payments will be made. Said work must be done in accordance with the plans and specifications thereon on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar

days and completed within one hundred and thirty (130) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$10,000.00. All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposals will be furnished gratuitously upon application to the office of the City Engineer, and a proposal must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. **F. J. CHURCHILL**, Secretary.

Plans describing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, are carefully classified as to location. These same items are repeated in the far left part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

San Francisco.

RESIDENCES—6, 2 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, J. Anderson, 123 16th Ave., S. F. These dwellings are to be erected in the west line of 17th avenue, south of Anza street. Each house will contain six rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living and dining rooms. Tile will be used in the kitchens and baths. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic, shingles and cement plaster. Work will be started under the Day Labor system as soon as plans can be completed.

RESIDENCE—2 story and base, frame, \$4,000. San Francisco. Architect, Theo. S. Boehm. David Hewes Bldg., S. F. Owner, O. E. Anderson. This dwelling has been designed for an eight-room house with bath. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. Furnace heat and open fire places will be used. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling is to be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$3,000 each. San Francisco. Architect, Joseph A. Leonard. Phelan Bldg., S. F. Owners, Urban Realty Co. The houses will be erected in Ingleside Terrace and each will be arranged for a seven-room dwelling with bath. Interiors will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and brick or tile mantels. The exterior will be covered with shingles and rustic. Tile will be used in the kitchens and bath rooms. Plans are complete and the owners are purchasing all materials. The work will be done by Day Labor.

BUNGALOW—1½ story and base,

frame, \$2,500. San Francisco. Architect, none. Owner, Ralph J. Butto 1039 Franklin St., S. F. The house will contain six rooms and has been designed in the bungalow style. Interior will be finished in pine and redwood. Floors in the living and dining rooms will be of hardwood. There will be an open fire place and brick mantel. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and shingles. Some clay panels will be used. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, Fernand Nelson. 30 Presidio Terrace. The houses will be erected in the Richmond District. Each will contain 7 rooms and bath. All interior finish will be of pine or redwood. Some open flooring will be used. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, R. H. Bannion. Mission Terrace, S. F. The house has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. There will be an open fire place in the living room with brick or tile mantel. Tile will be used in the bath room. The exterior of the house will be covered with rustic and cement plaster on metal lath. The work will be done by Day Labor.

BUNGALOW—1 story and base, frame, \$2,000. San Francisco. Architect, none. Owners, Homeland Building Co., Merchants National Bldg., S. F. The house will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the two principal rooms. Tile will be used in the bath room and kitchen. There will be an open fire place and brick mantel. The exterior of the dwelling will be covered

ed with rustic and shingles. Plans complete and the work will be done by Day Labor.

BUNGALOW—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Emil Nelson, 580 Geary St., S. F. The house has been designed to contain six rooms and three baths. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with rustic and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, Joseph M. Geary, 23rd and Folom Sts., S. F. Owners, Parkside Building Co. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Frank J. Taylor, 4 Presidio Terrace, S. F. The house will be designed to contain seven rooms, bath and laundry. All interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Tile will also be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCES—4 city blocks to be improved. Cost not stated. San Francisco. Architect, none. Owner, Fernando Nelson, 30 Presidio Terrace, S. F. Fernando Nelson has just purchased a tract covering the four city blocks bounded by 27th avenue, 33rd avenue, Lincoln Way and Irving street, and which is located in one of the choicest parts of the Sunset District. Mr. Nelson has probably built more houses than any other individual and his work has been of a character which assures his success in the present undertaking. His Sunset property with the new houses which are to be erected on it will represent an investment of \$750,000, and is said by real estate men to be the largest deal of this kind of property in the history of San Francisco. Between \$15,000 and \$20,000 will be expended in street improvements, grading, sewers, etc., in each of the four blocks. Mr. Nelson intends to erect two-story houses containing seven rooms each and which will cost on an average of \$3,500.

APARTMENT HOUSE—6 story and base, brick and steel, \$75,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected on

Bush street west of Mason and will be arranged for a number of two and three room suites. All suites will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system and a hot water plant. Interior finish will be of pine, redwood and hardwoods. Bath rooms will be finished in tile and will have composition floors. The exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, cost not stated. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, William Bush. The building will be erected at the northeast corner of Hyde and Vallejo streets, and will cover an area of 24x60 feet. The first floor will contain stores and the upper floors will be divided into six apartments of three rooms each. There will be private baths and wall beds. Interior will be finished in pine with some oak floors. A hot water plant will be installed. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$18,000. San Francisco. Architect, Albert Schroeffer, Foxcroft Bldg., S. F. Owner, William Menser. The building will cover an area of 32x77 feet, and is designed for six apartment flats with baths and wall beds. Interior finish will be of pine, redwood and hardwood. Bath rooms will have composition floors and tile wainscot. There will be steam heat and a hot water system. Entrance vestibule will be finished in marble and tile. The exterior of the house will be covered with tapestry brick veneer and rustic. Plans are complete and the work will be sublet by the architect.

APARTMENT HOUSE—3 story and base, frame, \$11,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, J. Eric Johnson. The building will be erected on Pine street and will cover an area of 25x72½ feet. The interior will be arranged for three-room suites with private baths and wall beds. A central heating system will be installed. Interior finish will be of pine with some hardwood floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Masonic Ave., S. F. The building is to be erected at the corner of Fell and Cole streets, and will cover an area of 28½x90 feet. There will be nine apartments of three rooms and bath each. All suites will have wall beds and hot and cold running water. Interior finish will be of pine and redwood with some oak floors. Bath rooms will have composition floors. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Hans Petersen. The building will contain eight apartments of three rooms and bath each. All suites will be equipped

with wall beds and will have hot and cold running water. Interiors will be finished in pine and redwood with some oak floors. A central heating system will be installed. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE—4 story and base, brick and steel, cost not stated. San Francisco. Architect, William Helbling, 1129 Market St., S. F. Owners, William Helbling and Oscar Curtaz. The building will be erected at the corner of Post and Leavenworth streets, and will cover an area of 112½x87½ feet. Interior will be arranged for a number of two and three room suites with private baths and wall beds. There will be steam heat, elevator service, a hot water plant and vacuum cleaning system. Interior finish will be of pine and redwood with some ornamental plaster used in the entrance. The exterior of the building will be faced with pressed brick. Plans are being prepared and the work will be done by Day Labor.

APARTMENT HOUSE—2 story and base, frame, \$12,000. San Francisco. Architect, J. E. Dunn, Monadnock Bldg., S. F. Owners, Metropolis Investment Co. The building will contain twelve apartments of two and three rooms each with wall beds and private baths. Interior finish will be of pine and redwood throughout. A central heating system will be installed and a vacuum cleaning plant. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the owners are taking figures on the work.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Theodore E. Rulfs. The building will be erected at the southeast corner of Pine and Leavenworth streets. The first floor will be arranged for stores and upper two floors for a number of two and three room apartments with private baths and wall beds. All interior finish will be of pine. Hardwood floors will be used in some of the rooms. Baths will have composition floors. There will be steam heat, a vacuum cleaning system and hot water plant. The exterior of the building will be covered with brick veneer and shiplap. Plans are being prepared.

FLATS—3 story and base, frame, \$5,000. San Francisco. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, F. Radmanovic. The building will contain three modern flats of four, five and six rooms. Interior finish will be of pine and redwood with some hardwood floors. There will be either open fire places or gas grates. Mantels will be of tile. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with cement plaster and rustic. Plans are complete and figures are being taken on the work.

FLATS AND STORES—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Jacob Bachmann, 4644 Geary St., S. F. The building will cover an area of 25x74 feet. The first floor will be arranged for one store and the upper floor for modern flats. Interior finish will be of pine and redwood with some oak floors. There will be open fire places and brick or tile mantels. Store will have plate glass windows. The exte-

floor will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, William Cadigan, 206 Steiner St., S. F. The building has been designed to contain two flats of five and six rooms each with bath. The building will cover a lot 25x44 feet. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. The exterior of the house will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

FLAT ALTERATIONS—Frame construction, \$2,500. San Francisco. Architects, Righeiti & Headman, Phelan Bldg., S. F. Owner, L. Boggione. This work will include raising the present building and constructing a store on the first floor. Alterations will require new plaster, painting, plumbing, electric work and interior finish. The exterior will be covered with rustic. Plans are complete and the owner is doing the work by Day Labor.

FLATS—2 story and base, frame. Cost not stated. San Francisco. Architect, none. Owner, M. F. Muller, 69 Brosnan St., S. F. The building will cover an area of 25x60 feet, and has been designed to contain two modern flats of five and six rooms each with bath. Interiors will be finished in pine and redwood. Some oak floors will be used. There will be either open fire places or gas grates in the living rooms. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$10,000. San Francisco. Architects, C. M. and A. P. Rousseau, Monadnock Bldg., S. F. Owner, Peter Canby. This building will be erected on Green street near Leavenworth, and is to be designed for a number of high-class residential flats. Interiors will be finished in pine and hardwood with hardwood floors in the principal rooms. A central heating system will be installed. There will also be open fire places and brick or tile mantels. Bath rooms will have tile wainscot and composition floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architects.

FLATS—2 story and base, frame, \$10,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, C. C. W. Haun. The building will be erected on Capp street, north of 21st street, and will cover an area of 21x66 feet. The interior will be arranged for six apartment flats of four and five rooms each. All suites will have bath and wall beds. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places and Dutch tile mantels. Baths will have tile wainscot. The exterior of the building will be covered with brick veneer and rustic. Plans are complete and the work will be done by Day Labor.

HOTEL—3 story and base, Class C construction, \$30,000. San Francisco.

Architect, Joseph Cohen, 15 Kearny St., S. F. Owner, Louis Friedman. The building is to be erected at the northeast corner of Bush and Grant avenue. The first floor will be arranged for stores and the hotel lobby. Upper floors will contain a number of single rooms and several baths. Interior finish will be of pine and redwood. There will be a hot water system. Some tile will be used in the entrance. Patent store fronts are specified. The exterior of the building will be faced with cement plaster. Plans are being prepared.

HOTEL—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner Miss E. Rickard. This work has been mentioned here before when plans were being prepared. Foundations and walls are of sufficient strength to carry four additional stories. There will be a large store and hotel entrance on the first floor and about 40 guest rooms on the upper floor. Interior finish will be of pine. Bath rooms will have tile wainscot. There will be patent store fronts. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

WAREHOUSE—3 story and base, mill construction. Cost not stated. San Francisco. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Warehouse Investment Co. This building, which is to be erected on King street, will cover a large ground area. Plans provide for an automatic sprinkler system, fireproof doors and metal window frames and sash. The exterior of the building will be faced with stock brick. The structure has been leased for a long term to Castel Bros. Plans are complete and a contract for the excavating has been let. Other parts of the work are now out for figures.

OIL DISTRIBUTING SYSTEM AND OIL BURNERS—Cost not stated. Presidio of San Francisco. Engineers, Constructing Q. M. Dept., Capt. E. S. Walton, Presidio, in charge. Owners, U. S. Government. Plans and specifications have been completed for the construction of an oil distributing system and for furnishing oil burners for the Presidio of San Francisco. Engineers, Comm. are now being taken and will be opened on March 13th. Plans and specifications can be secured from Capt. E. S. Walton of the Q. M. Dept., Presidio of San Francisco.

RAILROAD CONSTRUCTION—\$21,990. San Francisco. Engineers, City Dept. of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Contractor, F. Rolandt, 550 Montgomery St., S. F. Contract price, \$21,990. Note: This contract calls for the completion of the Municipal road from Third and Market streets to the outer tracks on Market street at Sansome.

RESIDENCE—2 story and base, frame, \$2,100. San Francisco. Architect, none. Owner, Alfred T. Merris, 616 9th Ave., S. F. The house will contain six rooms and bath. Interior finish will be of pine throughout. There will be an open fire place with tile or brick mantel in the living room. Some oak floors will be used. Tile will be used in the bath room and kitchen. The exterior of the building will be covered with rustic and cement plaster

on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOWS—4, 1 story and base, frame, \$1,500 each. San Francisco. Architect, none. Owner, M. Anderson, 234 Church St., S. F. These houses will be erected on Noe street, north of Duncan. Each will contain five rooms and bath. All interior finish will be of pine or redwood. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic and shingles. Plans are in the hands of the owner and the work will be done by Day Labor.

WATER TANK, ETC.—Reinforced concrete. Cost not stated. San Francisco. Engineer, City Dept. of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for a large reservoir with a capacity of 750,000 gallons have been approved and ordered constructed. Bids will be opened by the Board of Public Works on March 12th. The reservoir will be erected on the block bounded by Jones, Le Roy Place, Sacramento and Clay streets. Separate bids will be taken for the construction and for furnishing the pipes, valves and specials. Plans can be obtained from the Engineering Department.

Building Contracts.

CHURCH—Class A construction. Cost not stated. San Francisco. Architects, Shea & Lofquist, 550 Montgomery St., S. F. Owners, Mission Dolores. Contractors: Excavating has been awarded to J. J. Leonard, 180 Jessie St., S. F., and the structural steel work to the Central Iron Works, 651 Florida St., S. F. at \$85 per ton. Plans for the other parts of the work are being completed as rapidly as possible, and bids will be called for shortly.

BUILDING SUPERINTENDENT.

Glacken, Edw. E. General building superintendent, architectural and structural; supervision of any class of building construction. Expert in reinforced concrete, including cost data, design, floor load, quantity surveying, etc. Address 568 Golden Gate Ave. Phone Franklin 7619.

Cut out the cost of curved form work

You can now specify curved or arched construction—admittedly the strongest type—without the prohibitive cost of form work.

This expense is no longer necessary. Eliminate it entirely by using a reinforcement which is also a centering.

Draw your plans on stronger, lighter lines, save money for your client and give freer scope to your own artistic ideas, by specifying

"Self-Sentering" is a new form of expanded metal for concrete work and general fireproofing. It is a combined reinforcement and centering, which can be used with economy and advantage in all classes of buildings, for roofs, floors, walls, ceilings—practically every form of concrete construction.

"Self-Sentering" is made regularly in sheets 28" wide and up to 14' long; or curved in the factory to any desired radius.

The Standard Fireproofing Reinforcement

Roofs constructed with "Self-Sentering" are the lowest cost concrete roofs that can be built, requiring only 2" of concrete. **Floors** to carry heavy loads can be planned with arched slab construction without form work up to 12' spans. **Suspended Ceilings** may be built with supports 5' between centers. **Partitions** only 2" thick are strong, rigid and low in cost, if built with "Self-Sentering".

Write For Our "Fireproofing Handbook"

We will be glad to send you a complimentary copy on request. It is a handsome 80-page illustrated book, published for Architects, Engineers and Contractors. It will give you concisely all the facts you want to have regarding "Self-Sentering".

Interior will be finished in pine, redwood and some hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal bath. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

AUDITORIUM STEEL WORK — \$177,867. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. But one bid, that of the California Construction Co., was received for the structural steel work on the Municipal Auditorium. No action was taken by the Council, and the bid was referred to the City Attorney for an opinion.

Factory — 3 frame and concrete buildings, \$50,000. Niles, Alameda Co., Cal. Architect, G. W. Page, Rea Bldg., San Jose. Owner, G. M. Anderson. This group of buildings has been designed for a moving picture manufacturing plant and will include the general factory, stables and offices. Construction will be of frame with a considerable amount of glass used. Complete details of the enterprise are lacking. Plans are being prepared and full particulars will be given later.

RESIDENCE — 2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, R. E. Hotchkiss, Bacon Bldg., Oakland. Owner, Wilson Flagg, Bonita Ave., Berkeley. The house will contain five rooms and bath. Interior finish will be of pine throughout. Some oak floors will be used. There will be an open fire place with tile mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are complete and figures are being taken by the architect.

STORES AND OFFICES — 3 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, John Galen Howard, 604 Mission St., S. F. Owners, Sather Estate. This building is proposed for the northeast corner of 12th and Castro streets. Only preliminary plans have been prepared and no details will be given out for some time. Construction is to be fireproof throughout, with a complete steel skeleton and floors. Further particulars will be given as the plans progress.

Building Contracts Awarded.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

RESIDENCE—2 story and base, frame, \$8,000. Madera, Madera Co., Cal. Architects, Parker & Kenyon, 244 Kearny St., S. F., associated with J. Carl Thayer, Fresno. Owner, Richard Roberts, Commercial Bank of Madera. The dwelling will contain eight rooms, baths and sleeping porch. Interior will be finished in pine, redwood and oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

BRIDGE—Steel and concrete. Cost not stated. La Grange, Stanislaus Co., Cal. Engineer, County Surveyor E. H. Annear, Modesto. Owners, Stanislaus County. This bridge will be erected over the Tuolumne River at La Grange. No description of the work has been received and details are lacking. Plans have been approved by the Board of Supervisors and bids are now being taken. Bids will be opened by the Board of Supervisors at Modesto on March 11th. Complete information, plans and specifications can be obtained from the County Surveyor.

SCHOOL—1 story and base, brick, \$30,000. Taft, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Conley School District. Plans have been accepted by the Board of School Trustees for this building and construction work will be undertaken early in March. The building contain six rooms and an assembly hall. Interior finish will be of pine throughout. The exterior will be faced with cement plaster. Roof will be of red clay tile. Bids will be called for by the Board of Trustees. Plans can be secured from the architect.

Contracts Awarded.

LODGE HALL—3 story and base, brick, \$25,000. Modesto, Stanislaus Co., Cal. Architect, Ralph P. Marrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Tully. Contractor, George Shannon, \$21,485, general construction for only. Bids will be received later for the heating, plumbing and electric work. The following bids were received for the general construction: W. H. Arnold, \$25,450; Bishop-Stevenson Co., \$25,600; A. N. Frost, \$24,047; Ulrich & Howell, \$23,600; George Shannon, \$21,485.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—6 story and base, reinforced concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, E. Tisnerat. The building will be located on a corner and will contain a total of eighty rooms, arranged in suites of from two to five rooms each. All apartments will have wall beds and private baths. Interior finish will be

of pine and hardwoods. There will be steam heat, elevator service, hot water plant and vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Interior partitions will be of hollow tile and metal lath and plaster. The exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Venice, Los Angeles Co., Cal. Architect, W. S. Garrett, Currier Bldg., L. A. Owner, Dr. J. C. Elliott. The building is to be arranged for stores on the first floor and modern two and three room suites on the upper floors. The structure will cover an area of 75x60 feet. Interior will be finished in pine. There will be twenty baths with composition floors. Plans include steam heat and a vacuum cleaning system. The exterior will be faced with pressed brick. Patent store fronts will be used. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stinson Bldg., L. A. Owner, Mrs. John Heatherington. The building will contain 60 rooms arranged in two and three room apartments. All suites will have running hot and cold water, wall beds and private baths. Interior of the building will be finished in pine and tile wainscot. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are now nearly complete and the work will be done by Day Labor.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. Cooper Corbett, Union Oil Bldg., L. A. Owner, Mr. Young. The building will cover an area of 50x140 feet, and will contain forty rooms, which are to be arranged in suites of two and three rooms each with wall beds and private baths. Interior finish will be of pine throughout. Bath rooms will have composition floors. A hot water system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

BANK AND OFFICES—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Insurance Bldg., L. A. Owners, Merchants' Fireproof Building Co. This building is to be erected at the northeast corner of 6th and Spring streets. The entire first floor has been leased to one of the leading financial institutions of Los Angeles. The building has been mentioned in these columns a number of times before when the architects first were commissioned. Plans are now complete and figures are being taken on the work.

CITY HALL—2 story and base, brick and steel. Cost not stated. Alhambra, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Town of Alhambra. Plans for a building to house the municipal offices have been completed and approved by the Trustees. Bids are now being taken and will be opened on March 22nd. The structure will cover an area of 50x150 feet, and will be of brick construction with the exterior faced with pressed brick and terra cotta. Interior will be finished

in hardwood, marble and tile. A central heating system will be installed. Special concrete vaults are specified. Plans can be secured from the architects.

HOTEL—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Butler Bros., Mason Bldg., L. A. Owner, E. B. Dukeman. The building will have a frontage of 61 feet and a depth of 165 feet. Interior will contain a total of 120 guest rooms and 20 baths. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior finish will be of pine throughout. Metal lath and plaster partitions will be used. The exterior of the building will be faced with pressed brick. Some tile will be used in the bath rooms. Plans are being prepared.

HOTEL—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Wallis & Morgan, Story Bldg., L. A. Owner, Mrs. F. W. Sabichi. The building will cover an area of 50x150 feet. The first floor will contain a number of stores besides the hotel entrance, lobby and offices. Upper floors will be arranged for a large number of single rooms. There will be several baths on each floor. Plans include steam heat, elevator service and hot and cold running water. Metal window sash and frames are to be used. The entrance will be finished in tile and marble. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—8 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Biescar Estate. Preliminary plans only have been prepared for this work and none of the details of construction are available at this time. The building will be erected on Hope street north of 8th, and is to be fireproof throughout. Complete details will be given as the plans progress.

STORES AND LOFTS—5 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Metropolitan Fireproof Building Co. This building will be erected at the northwest corner of Broadway and 5th street. The first floor will be arranged for stores and the upper floors for lofts suitable for light manufacturing purposes. Interior will be finished in pine. There will be fireproof doors, metal lath and plaster interior partitions and metal window frames and sash. Plans provide for elevator service, mail chutes, a vacuum cleaning system and automatic sprinklers. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

STORES AND LOFTS—6 story and base. Class B construction. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Edward D. Silent & Co. The building will cover an area of 60x51 feet with an L 30x109 feet. The interior will be finished in pine and hardwood. There will be metal window sash and frames, elevator service, a vacuum cleaning system and steam heat. The wing portion of the structure will be but two stories in height. Plans are complete and figures are being taken.

RESIDENCE—2 story and base frame, \$20,000. Hollywood, Los Angeles Co., Cal. Architect, R. Coope Corbett, Union Oil Bldg., L. A. Owner, Mr. Perry. The dwelling will contain in the neighborhood of fourteen rooms and several baths. Interior finish will be of pine and hardwoods. Oak floors will be used throughout except in the bath rooms, which will have composition floors and tile wainscot. There will be furnace heat and an automatic water heater. There will be open fire places and brick mantels. A clay tile roof is specified. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared for the work.

WHARF—Reinforced concrete, \$65,000. Huntington Beach, Los Angeles Co., Cal. Engineer, City Engineer Huntington Beach. Owners, Town of Huntington Beach. Plans for this work have been approved by the Town Trustees and bids are now being taken. All figures must be in the hands of the City Clerk, C. E. Lavinger, by March 10th. The wharf will be of reinforced concrete except the deck which is to be of frame construction.

CHURCH ADDITION—1 story frame \$10,000. Long Beach, Los Angeles Co., Cal. Architects, Austin & Lochridge 18 Locust Ave., Long Beach. Owners, Grace Methodist Church. The building will be in the nature of an addition to the present building. New portion will cover an area of 52x80 feet and will be used as the auditorium. The portion of the building will be altered for Sunday school purposes. Interior finish will be of pine throughout. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgin Bldg., L. A. Owner, Mrs. Marie Hammel. The building will be designed for a commercial garage and is to cover an area of 50x140 feet. There will be a cement floor and brick exterior walls, faced with enameled brick. Considerable structural steel will be used. Plans call for metal window frames and sash. Interior finish will be of pine throughout. Plans are being prepared.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, California Real Estate and Building Co., L. A. Owners, May and Grimwood, 903 Security Bldg., L. A. The building has been designed for a commercial garage and will cover an area of 75x157 feet. Interior of the front portion of the building will be arranged for sales rooms and will be handsomely finished. There will be a cement floor and special gasoline storage tanks. Metal window frames and sash are called for in the specifications. The exterior of the building will be faced with glazed brick. Plans are being prepared.

HOSPITAL—2 story and base, brick and steel. Cost not stated. Oxnard, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. The building will be 40x50 feet with two wings 50 feet each. It will contain the usual wards, both public and private, operating rooms, kitchens and dining rooms. Special nurses' quarters will also be provided. There will be a central heating system and vacuum cleaning

PATENTS

promptly obtained **OR NO FEE.** Trade-Marks, Copyrights and Labels registered. **TWENTY YEARS PRACTICE.** Highest references. Read model, sketch or photo, for free report on patentability. All business confidential. **HAND-BOOK FREE.** Explains everything. Tells How to Obtain and Sell Patents. What Inventions Will Pay, How to Get a Partner, explains best mechanical movements, and contains 500 other subjects of importance to inventors. Address,

H. B. WILSON & CO. Patent Attorneys
Box 239 Wilson Bldg. WASHINGTON, D. C.

ent. Interior finish will be of pine and hardwood. Tile will be used in the lavatory rooms and baths. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Armstrong. Security Bldg., L. A. Owners, Rosslyn Hotel Co. This building is been mentioned in these columns before when plans were first started. Working drawings for the structural steel, concrete work, masonry and carpentry work and plumbing are complete and figures are being taken. Construction will be Class A throughout. The structure covers an area of 50x115 feet and will contain a total of about 175 guest rooms. Construction cannot be undertaken until the basis on the present buildings expire, which is in November.

PASSENGER DEPOT—2 story and base, brick and steel, \$75,000. Douglas, Ariz. Architect's name not given. Owners, El Paso and Southwestern R. R. Co. Work is to be started at once under the Day Labor system on the construction of the superstructure of a new depot. The building covers a large area. Interior will be finished in pine and hardwoods. The exterior will be faced with pressed brick.

SCHOOLS—3 buildings, 1 story and base, brick, \$170,000. Long Beach, Los Angeles Co., Cal. Architect, A. Burnside Sturges. Story Bldg., L. A. Owners, City of Long Beach. Two of the buildings will contain six standard class rooms, auditorium to seat 300, offices, etc., and will cost about \$30,000 each. They will be erected at the Temple street and East Fourth street sites. The other building will contain sixteen standard class rooms, auditorium to seat 500, library offices, etc., and will cost about \$30,000. The buildings will be of brick construction and will probably be plastered on the exterior. Seventeen sets of plans were received in competition by the Board of Education.

RESERVOIR—Reinforced concrete. Cost not stated. Puente, Los Angeles Co., Cal. Engineer, George W. Harding. 621 Citizens' National Bank Bldg., L. A. Owners, Puente Water Co. The reservoir will be 225 feet in diameter and 10 feet deep. Construction will be of reinforced concrete. The capacity of the big tank is to be 3,000,000 gallons. Plans are complete and figures are being taken by the engineer.

WATER MAIN EXTENSIONS—Cost not stated. San Diego, Cal. Engineer, H. A. Whitney. San Diego Water Department. Owners, City of San Diego. Plans are being prepared for a second

high pressure pipe line from the Chollas Reservoir to San Diego. The line will be of 28-inch pipe and four and one-half miles long. Bids will be called for as soon as the plans can be completed.

Contracts Awarded.

STUDIO BUILDINGS—Reinforced concrete, \$50,000. Santa Barbara, Santa Barbara Co., Cal. Architect, J. Corbrey Poole, Santa Barbara. Owners, American Film Co. Contractor, Magnus Johnson, Santa Barbara. Note: This contract has been taken on a percentage basis.

SCHOOLS—2, 1 story and base, brick and frame. Cost not stated. Orange, Orange Co., Cal. Architect, Fred H. Eley. Santa Ana. Owners, City of Orange. Contractor, George Keuchel. Orange, general construction, \$36,771. American Heating Co., California Bldg., L. A., heating and ventilating, \$2,450.

SCHOOL—2 story and base, reinforced concrete, \$76,760. Seattle, Wash. City of Seattle. Contractor, J. W. Architect's name not given. Owners, Hoge Bldg., Seattle. Contract price, \$76,760.

PORTLAND AND OREGON.

LODGE HALL—2 story and base, brick. Cost not stated. Roseburg, Ore. Architect, Earl A. Roberts. Selling Bldg., Portland. Owners, Roseburg Elks' Hall Association. The building will be erected on a corner lot and will cover an area of 50x100 feet. The building will be arranged around an open court with stores on two sides. The court will be laid out in handsome gardens. Interior of the building will be arranged for lodge halls, banquet room and a number of sleeping rooms and suites. Interior finish will be of pine and hardwoods. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Considerable ornamental iron will be used. Tile will be used in all baths. Plans are being prepared.

CLUB HOUSE—2 story and base, frame. Cost not stated. Beaver Lake, Ore. Architect, D. L. Williams. Chamber of Commerce Bldg., Portland. Owners, Beaver Lake Club. The main floor will contain one large living room, kitchen and dining room. The main room will extend through the second floor, which will be more of a balcony effect, and will be arranged for sleeping rooms with private baths. Two large open fire places are to be installed on the first floor. Mantels will be of brick. There will be a hot water system of heating. The exterior will be covered with logs and shakes. Plans are being prepared.

SEATTLE AND WASHINGTON.

BRIDGE—Steel and concrete, \$10,000. Port Angeles, Wash. Engineer, J. M. Baird. White Bldg., Seattle. Owners, Clallam County. This structure will be erected over the Elwha River at Port Angeles. There will be concrete abutments and several steel spans. Plans are on file at the office of the engineer. Bids will be opened on March 10th.

LIBRARY—1 story and base, brick and stone, \$70,000. Seattle, Wash. Architect, W. Marbury Somers II. White Bldg., Seattle. Owners, City of Seattle.

stone to prepare plans for a one-story building of brick and stone, which will be erected at the corner of Yesler Way and 23rd avenue. Other than the fact that the building is to be faced with terra cotta and stone no details have been decided upon. Complete information will be given in these columns as the plans progress.

LIBRARY—1 story and base, brick and concrete, \$15,900. Port Townsend, Wash. Architects, C. Lewis Wilson & Co., Northern Bank Bldg., Seattle. Owners, City of Port Townsend. Plans for this building have been completed and figures were opened by City Clerk George Anderson at Port Townsend on March 1th. An award of contract will be made within a few days.

GARAGE—2 story and base, reinforced concrete, \$20,000. Seattle, Wash. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, L. W. Roe. The building will be erected on 12th avenue, and will cover a ground area of 121x118 feet. The structure has been designed for a commercial garage. Construction will be practically fireproof with a cement floor on the first story, metal window sash and frames and some metal trim. There will be special gasoline storage tanks. The exterior of the building will be faced with cement plaster. Plans are complete and a contract will be awarded within a few days.

Building Contracts.

STORES AND OFFICES—2 story and base, brick and concrete, \$15,000. Seattle, Wash. Architect, Charles Hayes, Melhorn Bldg., Seattle. Owners, John Asbling. City of Seattle. Contractor, S. G. Combs, 521 5th Ave., Seattle. Contract price, \$15,000.

RAILROAD CONSTRUCTION—\$7,000,000. Wyoming. Engineers, Engineering Dept. Burlington Route. Owners, Burlington R. R. Contractors Twelvey Bros., Portland. Contract price, \$7,000,000.

SCHOOL—2 story and base, reinforced concrete, \$77,474. Seattle, Wash. Architect's name not given. Owners, City of Seattle. Contractors, Manitation Co., Inc., Central Bldg., Seattle. Contract price, \$77,474.

STORE AND OFFICE REPAIRS—\$55,000. Seattle, Wash. Architects, Dehn & Mendell, Hight Bldg., Seattle. Owners, Denny Bldg. and Times Bldg. Contracts have just been awarded for the repair of fire damage to these two buildings. Contractor, Alexander Pearson, New York Bldg., secured both contracts, the work on the Times Bldg. amounting to \$20,000 and on the Denny Bldg. to \$25,000.

ANGER SIGNS FOR CONCRETE WORKERS.

Careful Selection and Proportioning of Materials, and Careful Engineering Calculation and Design, Must Be Supplemented by Thorough Field Inspection.

In the economic design of engineering works, it has been common to assume that masonry structures were permanent, that steel structures had a long life, and that timber structures had a relatively short life. That no definite statement can be made with reference to the durability of any structure unless all the conditions surrounding its design, construction, and use are known is made evident by the

wooden structures altogether too numerous, of engineering structures. A masonry dam on an insufficient foundation is not only not a permanent structure but gives an erroneous idea of safety. A timber pile dam built at much less cost might be much more permanent.

In the design of concrete structures, it has been the practice to assume for them a very long life; but that many of them, both plain and reinforced, are short-lived is becoming very evident. This is particularly true of concrete irrigation works. The ordinary life of timber construction when exposed to variations of moisture, as in flumes and similar works, is from 6 to 8 years, with a much longer life of individual structures under peculiar conditions. In recent irrigation works built by the Government and by individuals, reinforced concrete has been widely used. Some of it, it is certain, will not last as long as timber. This is not due to any inherent weakness in concrete, whether plain or reinforced, or in the theory of reinforced concrete, but to several things, of which the following are important: (1) The structures are often designed by men not familiar with local conditions and allowable soil pressures, resulting in a structure that settles unequally; and while unequal settlement of timber work is ordinarily of little importance, the unequal settlement of reinforced concrete flume may cause the destruction of the structure; (2) The ingredients of the concrete are not properly proportioned to make a dense, strong concrete, the proportions being commonly specified as 1:2:4, 1:2½:5, etc., without reference to the character of the sand and the coarse aggregate; (3) the field inspection is of a most perfunctory sort, no attempt being made to check up the work of the contractor by making control beams and test cubes. Where fine and coarse aggregate are found together, as in the case of gravel, it is not uncommon for the contractor to measure the fine and coarse aggregate together. With a nominal 1:2:4 concrete where there are 33-1/3 per cent voids in the fine and coarse aggregate when measured together, the one part of cement will be sufficient to fill only one-half of the voids in the aggregate. With the ordinary conditions of mixing and a wet mix, this will result in a weak, porous concrete which will disintegrate when it comes in contact with water. In a reinforced concrete flume which recently failed after brief service, it was found that while the sand and gravel each contained 35 per cent of voids, the mixture of 2½ parts of sand with 5 parts of gravel gave 7.3 parts, with approximately 33 per cent voids, giving 2.4 parts voids in the mixture. The cement paste in the concrete was only sufficient to fill approximately four-fifths of the voids in the aggregate. The concrete was porous and chalky, and fell apart when it came in contact with clear water. The failure of this structure is similar to that of most of those whose failure has been attributed to the action of alkali.

Field inspection is much more important in the construction of reinforced concrete than in timber or steel construction, for, in the latter, only the connections are made in the field, and defects in them are easily seen; while in the former the entire structure is fabricated in the field, and de-

fects are for the most part hidden.

The responsibilities involved in the use of reinforced concrete need to be more deeply appreciated. The work should include not only the calculation of the stresses and the design of the parts, but also the mixing and proportioning of the concrete and the placing of the steel. The principles of design and construction are too well known for engineers to charge unknown causes with the destruction of structures that have been badly designed and constructed.—Engineering Record.

GOVERNMENT ARCHITECTURE.

The federal architectural bureau is a part and parcel of the Treasury Department. And the head of this department is a successful business man who can analyze and dissect a proposition, cull out the facts and explain the situation in plain language, which is readily understood by all. In reference to the repeal of the "Tarsney Act," which provided for architectural competition for Government buildings, and which was repealed last August, Secretary McVeagh said:

The repeal of the Tarsney act was received with great regret by the Treasury Department and by great numbers of people who are especially interested in the care and fitness of Government buildings. Our Federal Government is the largest builder of buildings ever known in the world—and its building enterprises are to be far more important still, and the fact that it builds in every part of our great country gives it an unexampled influence upon the architectural art of the entire people. It cannot avoid affecting in a pronounced degree the architectural taste, knowledge and enjoyment of the nation. It cannot avoid affecting the growth of good architecture in all communities, for the effect and influence of our building operations are completely nationalized. The mere facts nationalize this influence. The Government, therefore, enjoys in its building operations a tremendous opportunity for good in the judgment of all who regard architecture as one of the important factors of the higher civilization. This opportunity is really unexampled.

Now the elimination from the service of the Government of the knowledge, gifts and inspirations of all architects except those confined within the treasury building reduces the architectural dimensions to those of a single architect's office, and limits us to the architectural control of one man; whereas such continual building as we do, such opportunities of influence upon all the building in the country as we have, such responsibilities to the architecture of the nation as we cannot relieve ourselves of, demand that the Government should have at its disposal every bit of architectural ability that the nation possesses.

To my mind it is absurd to believe that any single architectural office, whether a Government office or any other, ought to design every one of the large number of Government buildings turned out annually, when those buildings are all charged with a mission of architectural education to every part of the country. No supervising architect and no private firm ever existed to whom such a great

public duty could be properly committed.

The Treasury Department is doing excellent work. Under this administration the supervising architect's office has been revised. It has not only been economized largely, but both its efficiency and its architectural spirit have been distinctly confirmed and advanced. And whatever a Government architectural office ought to be expected to do it is competent to do. But, as I have said, no single architectural office, no single set of designers, ought ever to be charged with so great a work and so grave a responsibility as the entire building of the Government; and no architect's office, such as this or any other, should be thrown upon itself or should be taken out of constant association and competition with all the other successful architects and architectural offices.

The Government architect—like any other successful architect—needs the touch of all the great architectural activity of the country, and to be in constant relation with all the architectural thoughts and gifts of the country. Nor is there any question of expense that need stand in the way. It can easily be arranged, and if the department had been permitted, it would have arranged so that it would not have cost the Government any more to have certain of its buildings designed with the broad aid of the architectural world. This could have been accomplished, notwithstanding the fact that under the improvements we have inaugurated the cost of the work of the Government's own office has been reduced. I hope, therefore, that the Congress will reconsider its action of the last session and restore to the Government the privilege of employing the architects of the country, in at least the comparatively few instances where it was the practice to employ them.—American Contractor.

HARD FINISH FOR SOFT WOOD.

Those of our readers who are called upon to give a hard and smooth finish to soft wood are likely to be interested in a suggestion published in a late issue of the Woodworker Art Craftsman, and tending as follows:

"When only a thin surface is required, a few coats of zinc will make the surface of wood almost as hard as zinc itself. The coating will be a very thin one, and it will yield to light blows, on account of the very soft wood underneath the coating of zinc. To give wood a thick and very hard surface, cover it with a paste made up of: Putty powder, 1 pound; powdered oxalic acid, one-fourth pound; and powdered gum, 1 ounce. Use just enough water to make the paste stiff, then spread upon the wood surface, and place aside to harden. If any trouble is experienced in making the coating adhere to the surface of the wood, give the surface a coating of thin glue, or mix a small amount with the ingredients while making the paste. The coated surface should be allowed to remain undisturbed for several days, until the paste has hardened to a degree which will stand any usage it is likely to get.

Cracks in Plaster.

Even the best workmanship and materials are not always a guarantee against cracks in a new plaster ceiling.

ing Settlement of foundations and shrinkage of joists are two insuperable causes. Where only superficial cracks result, they may be easily filled with plaster of paris, which will make them impossible to detect under subsequently applied decoration or painting. But, if the cracks are wide and numerous, filling them is apt to give a patchy ceiling, and is, besides, a tedious task. A better remedy is to stretch cheesecloth over the entire ceiling, pasting it in the same manner as paper is applied. Owing to the accommodating elasticity of the cloth, no existing and future cracks are opened, and the material has besides an interesting texture, which asserts itself through the painting, where that sort of decoration is used. If the walls of the room have a frieze and fluted mold, the cloth can be carried over the sides, and its edges hidden under the mold. Where a very rough texture is desired, a heavier cloth can be substituted.

However, because a remedy has been found, one should not be careless about the cause of ceiling cracks. It should be in mind when the frame of the house is put up, and guarded against, as far as possible, by using timbers and studding in such a way as to reduce shrinkage to a minimum. By this is meant reducing the horizontal wood. Ordinary pine or spruce will shrink about a half inch over the foot across the grain; therefore, as little as possible should be used in this position. The shrinkage of wood over time is almost imperceptible. A well-framed house with studs running from sill to roof and with ledger boards notched in to the studs, would require only the floor beams on the horizontal. A poorly framed house, such as contractor builders usually put up, would have short lengths of studs to end at each floor, with two inches of joists to carry the floor beams. All about twelve inches of horizontal timber, with a shrinkage of half an inch. This in the whole height of the house might run into several inches and no end of ceiling cracks. This careful framing up is one of the differences between an architect's house and a builder's.—Home Beautiful.

San Jose Gets Next Contractors' Convention.

Second Annual Convention of the Specialty Contractors Concludes with Big Banquet.

The business of the Second Annual Convention of the Contractors' and Specialty Association was concluded at seven o'clock Friday night.

The Constitution and By-Laws were revised and the name was changed to the Specialty Contractors' Protective Association of California.

Under the terms of the new Constitution material men, unless engaged so in a specialty contracting business, will not be eligible to membership.

The legislative committee recommended that as the present lien law is satisfactory and has afforded adequate

protection to the owner, mechanic, contractor and material man, and has done much to put the building business on an honest basis, that all amendments to the present law by the legislature be resisted. Also that Senate Bill No. 905, by Boynton, pertaining to workmen's compensation, be endorsed, and that a slight reduction of the compensation rates as provided in the bill might be advocated.

Also that Senate Bill No. 159, by Finn, relating to the licensing of Master Plumbers; also Assembly Bill No. 738, by Scott, regulating the licensing of electrical contractors be endorsed and that the Association go on record as favoring the licensing of all building contractors.

The recommendations of the committee were unanimously adopted. Ex-State Secretary Frank Smith, who was instrumental in organizing the Association, declined to be a candidate for reelection. He was given a vote of thanks for his faithful and efficient service and he was made an honorary member of the State Association.

The following officers were elected to serve for the ensuing year:

President, J. E. Steere, San Francisco; Vice-President, D. W. Stoville, Sacramento; Secretary, W. S. Scott, San Francisco; Treasurer, W. S. Hanbridge, San Francisco; Sergeant-at-arms, Peter Hansen, San Francisco.

Executive Board—Chairman, H. C. Maddox, Sacramento; J. C. Stagg, San Jose; A. G. Labhard, Sacramento; H. B. Lynch, San Francisco; Thomas Guilfoxy, San Francisco; W. C. Beck, San Francisco.

Second Vice-Presidents: San Francisco, H. J. Hughes; San Jose, to be selected; Sacramento, C. Butler; Stockton, C. Potten.

Attorneys—Munday & Williams.

San Jose was the unanimous choice of the delegates as the place to hold the next State Convention in February, 1914.

Saturday afternoon the visitors were taken for an auto ride to the World's Fair Grounds and from there through the Presidio Reservation and Golden Gate Park and out along the Ocean Beach to the Ingleside House, where refreshments were served.

Saturday night the three days' convention terminated with a very pleasing banquet at the Cosmos Cafe.

Frank J. Klimm presided as toast master and with his usual good nature and aptness in introducing the various speakers succeeded in making the affair a great success. Following well known specialty contractors responded to toasts: Thos. W. Butcher, J. E. Steere, P. F. Bradhoff, Secretary of the Builders' Exchange, Oakland; Wm. Makin, Leroy De Luchi, Tim Seetan, H. Scheele, all of Oakland; H. C. Maddox, Sacramento; T. E. McShane, Sacramento; A. G. Labhard, Sacramento; W. T. Beck, H. J. Hughes, Chalmers Munday and E. A. Williams, Attorneys of the Association, and W. S. Scott.

The past year has been very successful and the enthusiasm of the large number of delegates to the convention just closed portends a prosperous future.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file number]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10433. **Farming implements, tools, machinery, etc.**—An American consul reports that the plans now being prepared by a foreign Government to make a loan through land owners for the execution of large irrigation works will benefit many American interests. The consul believes that conditions will soon favor the establishment of a big general store to handle all sorts of things used by farmers and ranchmen, making a specialty of farming implements, tools, vehicles, hardware, and mining machinery. A considerable stock would have to be carried in order to handle the trade, which would come from an immense and very rich territory that is developing in agriculture and mining, as well as being one of the principal stockgrowing regions of the country.

No. 10434. **Autotrucks, traction engines, plows, etc.**—A report from an American consul states that the price of gas oil (semicrude oil) has declined about 50 per cent in his district, and if present intentions are carried out, a good opportunity will be offered for the sale of autotrucks capable of use on bad roads, and of traction engines, plows, etc. Miners will use pumps worked by motors, and agriculturists are asking for information as to motor plows, corn shellers, harrows, etc. Several firms are mentioned as being interested in these lines, and their names, together with the language to be used in addressing them, can be obtained from the Bureau of Foreign and Domestic Commerce.

No. 10435. **Medium-priced automobiles.**—The proprietor of a garage in a South African city informs an American consulate that he wishes to obtain the agency for a medium-priced American car. The machine must be able to retail in South Africa at \$1000 to \$1500 for touring cars. Light cars, high clearance, and low petrol consumption desired. Transactions will be conducted on a cash basis.

No. 10439. **Turpentine.**—An American consul in Canada reports that he has been requested by a local firm of wholesale hardware dealers to obtain from dealers in the United States prices of turpentine delivered in the city in which the Canadian firm is located, free of all charges.

No. 10440. **Automobiles.**—A report from an American consul in Germany states that an experienced automobile dealer in his district wishes to secure the agency for a reliable car worth \$1200 to \$1500, with all modern appliances. He will purchase one car for demonstration and requires that the firm supplying him with machines shall keep one or more cars in bond in some customhouse in Germany, ready for delivery when sold. He also wishes to purchase cars and motors ready for the touman, which he desires to have

built in that country to suit the German taste. Persons desiring to enter into sales agreements with him should send full details as to sizes, prices, etc. He prefers correspondence in German, if possible.

No. 10411. White and red lead.—A European business firm informs an American consulate that it would like to have quotations on white and red lead from some firm in the United States.

No. 10380. Steel tubing and appliances for petroleum pipe line.—An American consular officer in a European country has cabled the name of a firm that desires bids on steel tubing of various dimensions and other appliances for a petroleum pipe line. It is said the undertaking may involve a large sum.

No. 10388. Butted and welded bedstead tubing.—A foreign manufacturing company has requested an American consul to place it in communication with manufacturers of butted and welded bedstead tubing. This company now buys annually large quantities of tubing direct from the United States, but its business is increasing and purchases will be made from the best bidders. This firm claims to be the largest manufacturer of iron and brass bedsteads in the country, and can not fill its orders at the present time. Financial references are furnished, and interested American concerns should write for further specifications and particulars.

No. 10389. Kitchen utensils and household novelties.—A report from an American consular officer states that a business firm in a Mediterranean country desires to be placed in communication with American manufacturers of kitchen utensils and household novelties, with a view of purchasing direct, or of securing the local agency. References can be furnished, and correspondence may be in English.

No. 10390. Machinery and tools of various kinds.—An American consul in a European country reports that there appears to be a first class opportunity for American manufacturers so desiring to make connections for the sale of their products in the country in which he is located. In an interview with a local business man, who has important connections throughout the country, he was requested to secure illustrated catalogues and other descriptive matter relating to the following lines: Woodworking and metal machinery, such as lathes, drilling, milling, and thread-cutting machinery, planing machines, circular and other saws and accessories, tools of every description for wood and metal workers, including carpenter, plumbers, blacksmiths, etc. Copy of the complete report, giving further details regarding language to be used, etc., can be obtained from the Bureau of Foreign and Domestic Commerce.

No. 10393. Glass, steel, iron, and bronze materials.—An American consular officer reports that a firm of general merchants and importers in a Canadian city is anxious to receive communications from American manufacturers of and dealers in the following lines: Wired plain glass, exterior and interior ornamental steel, iron, and bronze materials for buildings. Bank references are furnished.

No. 10423. Automobiles and accessories.—An American consular officer in a Latin American country reports that a company in his district recently

Edward R. Bacon is positively not connected with any other firm.

bought 50 automobiles of European manufacture, and is contemplating purchasing more. The company has asked to be put in communication with American manufacturers not only of automobiles but also of accessories and fixtures for the same. Correspondence and literature should be in Spanish.

No. 10425. Office furniture and supplies.—A report from an American consul states that a firm in his district has recently gone into the business of handling modern office appliances and has requested him to have American manufacturers forward catalogues of all kinds of modern office furniture, such as desks, chairs, wood and steel filing cases, sectional book cases, and any modern office supplies. If possible correspondence should be in French.

No. 10427. American goods for Australia.—A manufacturers' representative in Australia has applied to an American consulate to be put in communication with manufacturers of general lines of merchandise seeking a market in that country.

No. 10429. Petroleum incandescent lamps.—The Bureau of Foreign and Domestic Commerce is in receipt of a communication from a commercial organization calling attention to the fact that a great many petroleum incandescent lamps are sold by foreign countries in the Near East. The letter states that there is a splendid opportunity to introduce American lamps of this type, and a local business firm, whose name is given, desires to be placed in communication with one of more manufacturers of such lamps, with a view of acting as their agents in that country.

No. 10430. Steel pipe.—The American consulate general at Vancouver, Bri-

tish Columbia, Canada, has forwarded a newspaper clipping calling for tenders for the supply of steel pipe for the municipality of Burnaby, British Columbia. These supplies include about 15 miles of steel pipe, varying about meter from 3 to 10 inches. Tenders will be received until March 3. Particulars may be obtained at the office of the engineers, Cleveland & Cameron, 1001 Rogers Building, Edmonds, from whom specifications, schedule of quantities, etc., can also be procured.

No. 10431. Machinery for making tinware, etc.—A civil engineer in Russia has informed an American consulate that he desires to get in touch with American factories manufacturing machines for tinware, etc., as well as with electrotechnical factories, as he wishes to become an agent for these lines in Russia.

DESTRUCTION CAUSED BY FOREST FIRES.

SACRAMENTO, February 25.—An area of 375,294 acres in California suffered from forest fires during the biennial period which ended June 30, 1912, according to the two-year report of State Forester G. M. Homans, just issued. Of this total area 282,284 acres were burned over in 1911 and 92,920 acres in 1912. Estimates of the actual damage are not yet complete, but the State Forester's figure shows a loss accounted for of \$146,881. Of the causes of fire, 126 in 1911 were of incendiary origin. Campers contributed to 109 fires in the two-year period and lightning was responsible for 317. Railroads started 27 and smokers 16. Fires starting from unknown origin numbered 272.

Editorial Comment.

Building construction during the past month has gone ahead with about the usual pace compared with preceding years. Figures for February show permits to have been let and contracts to have been filed for \$1,979,043 for private construction, \$121,921 for Exposition work, \$179,447 for city contracts and \$456,400 for construction work by the State Board of Harbor Commissioners, making in all a grand total of \$2,736,813 for the month.

Of the private building contracts and permits \$946,242 was for brick and fire-proof construction, \$812,853 for frame buildings and \$219,948 was classed under the head of alterations and additions.

Comparing this total with the figures of former years we have the following table:

February, 1904	\$ 981,125
February, 1905	1,200,880
February, 1906	1,791,858
February, 1907	4,355,513
February, 1908	2,662,143
February, 1909	2,871,495
February, 1910	2,066,034
February, 1911	1,568,680
February, 1912	1,696,232
February, 1913	1,979,043

It will thus be seen that on private construction work alone the month shown a substantial increase over the same month last year and the two preceding years as well as showing a natural growth with increase of population. It also registers an increase in the amount of private construction over January of this year. On the whole the month has been normal and very near the two million mark outside of city work, government construction or state improvements.

Northwestern Canada has experienced unexampled progress in the last few years. Reports in the press indicate that the exploitation of real estate in that country has surpassed almost anything in the history of the country. And along with this movement in property has been an unexampled development of transportation and in building of railroad lines. During the ten months which ended with October 31st, 1912, a total of 695 miles of railroad were constructed in the province of Alberta alone. The ENGINEER calls attention to the fact that since 1909 there has been an activity in railroad construction in Canada without precedent in the history of the North American continent. During the year 1912 the Canadian Northern Railway built 463 miles of new line in the province and the Grand Trunk Pacific increased its mileage from 384 to 619 miles.

Reports state that a new slide has commenced at the Culebra cut in the Panama canal, the largest that has yet taken place. Indications are that about 3 million cubic yards are in motion and that it will take till the late autumn to remove the material. At that time the water is to be turned into the canal and this, it is expected, will help to the earth in place by exerting counter pressure to a considerable degree. At the same time the two big dredgers that are now building will be on their way to the Isthmus and their combined capacity is over one million cubic yards per month. With these in operation it is confidently expected that the cut will easily be kept open when once the water is turned in.

A remark of Bryan when addressing the members of the office of the Secretary of State relative to tenure of office seems to have occasioned a good deal of gossip in political circles. It was a natural remark to make by the executive head of an office where the great majority of undersecretaries are more or less under civil service. The reporters seem to have imagined that the remark related to his own tenure of office and have given it a mysterious significance. Both Bryan and Wilson have been men with ideas which they wish to carry out and political jobs are only an incident to their career. It is evident that many job chasers are doomed to disappointment as neither of them have ever built up a machine or in any probability expect to. And Marse Henry Watterson and William Randolph Hearst are likely to be the most disappointed of all.

The report made by the Bureau of Building Inspection of the City and County of San Francisco show a total of building construction for the period from May, 1906 to February 28, 1913, of \$217,497,293. Under the present system of issuing permits wherein the owner usually understates the cost of construction these figures are well within the limits, and if the actual cost were given these figures would be naturally increased. The classified list and number of permits issued between May, 1906 and March 1, 1913, is as follows:

Class "A"	149	\$29,292,661
Class "B"	180	13,444,221
Class "C"	2437	72,995,912
Frames	22314	85,982,780
Alterations	18479	15,781,659

Total

43559 \$217,497,293
Considering the fact that the period covered is about six years and nine months the yearly average is over \$1 million as it stands. Had city work been added these figures would be materially increased not to mention the fact that most buildings are usually undervalued in the permit.

A number of segregated contracts were filed last Saturday for the construction of an annex by the Stewart Hotel Company. To all of them there was appended the following stipulation:

**NOTICE TO SUB-CONTRACTORS,
LABORERS AND MATERIAL
MEN.**

This contract is entered into upon the express condition that there shall be no liens on said building or on the property on which same is to be erected, and all sub-contractors, laborers and material men are hereby notified that if they perform labor or furnish material in or for the erection or construction of said building, or make contracts in relation thereto, they must do so on the personal responsibility of the person or parties contracting with them, and without relying on any lien against said building or the property on which the same is erected, and the performance of any work or the furnishing of any material to the contractor for said building, or to any sub-contractor therefor, or the making of any sub-contract in respect thereto, is to be deemed an assent to the foregoing condition. Evidently the owner is attempting to stipulate a waiver of lien rights on the part of material men and sub-contractors but the notice is in a form that does not express waiver in very clear terms and evidently is intended to contract away the rights of third parties which cannot be done in any case.

Section 1201 of the Code of Civil Procedure, otherwise known as the Lien Law reads as follows: Sec. 1201. It shall not be competent for the owner and contractor, or either of them, by any term of their contract, or otherwise, to waive, affect, or impair the claims and liens of other persons whether with or without notice, except by their written consent, and any term of the contract to that effect shall be null and void.

So that so far as it attempts to bind third parties is not worth the paper it is written on. The only way any one can waive his lien rights under the law is by his written consent and this attempt at notice and stipulations between persons who do not sign the contract is of no value and effect whatever.

Secretary Fisher has seen fit to refuse the permit of the city to the waters of Hetch-Hetchy valley, stating as his ground of refusal that so important a natural curiosity should not be radically changed without an express action of congress. It amounts to about the same thing as the contention of the nature lovers.

It is presumed that Mr. Fisher is sincere in his opinion. If so he must have arrived at this conclusion only recently and not have given the subject any particular thought before.

For if he had why did he have the city report on every other available source of supply and go to the expense of procuring statistics on relative costs. If he knew about the situation in the first instance why this interminable delay and then side tracking the issue?

However, in Franklin K. Lane the incoming administration will have a man who has the courage of his con-

victions. Then probably somewhere about the year 1930 we will get a water supply. After the present holders of the stock of the Spring Valley Water Company have passed into the great beyond.

Woodrow Wilson comes to the head of the Nation's government at a time when there is a period of great change. Revolution and agitation in government have been marked during the past five years. There is a change of relation. The old order is changing, bringing forth the new and in this period of change there are grave responsibilities. Mr. Wilson comes to the presidency under fortuitous circumstances. His life and work have been amongst idealistic surroundings. He has a most comprehensive knowledge of the history of his own country. He is himself an authority on almost any phase of its existence. He is under obligation to no man or set of men, unless it be William Jennings Bryan, and Bryan himself is peculiarly free from any outside influence and control. Bryan is one man whom the interests have never bought or intimidated, who has maintained the tenor of his way through a long political career and has consistently stood for the people.

The selection of his cabinet seems to indicate a wise choice on the part of the President. They are men of integrity and ability so far as the public knows. And they will no doubt be competent advisers to their chief in the many problems that will confront him. Mr. Wilson comes from the position of College President to President of the United States. Here's hoping he will be able to work out some of his ideals of government and leave us a better government than he received. In this he will receive the support of all good citizens whatever their party affiliations.

The Inaugural Address of President Wilson is a masterpiece in its way and appeals to the people with the directness of language of President Lincoln. It announces in general terms the policy which the people may expect him to follow. His message to Congress will be expected to embody the specific reforms he intends to accomplish and state the specific promises to which he will pledge himself. So far the new President has set a high standard and all good men should rally to his support. His appeal to the patriotism of every lover of his country should touch everyone with the loftiness of purpose and the high aim it embodies. Its closing sentences remind one of Lincoln's Inaugural address:

"This is not a day of triumph; it is a day of dedication. Here must not the forces of party, but the forces of humanity. Men's hearts will upon us; men's lives hang in the balance; men's hopes call upon us to say what we will do. Who shall live up to the great trust? Who dares fail to try?"

I summon all honest men, all patriotic, all forward-looking men, to my side. God helping me, I will not fail them, if they will but counsel and sustain me!"

As long as Woodrow Wilson lives up to the high aim expressed in this foreword he will have the support of all good men whether they belong to his party or fought against him in the

political campaign. It is an appeal to the courage, loyalty and patriotism of the country which knows no party line or political affiliations.

Auditor Boyle has held up the demand of Bion J. Arnold for the month of January amounting to \$2,662.04 for want of authority to pay. What benefit the city has derived from this highly paid expert is hard to tell. All we have received, so far as the public is able to judge, is some recommendations that anybody could make and some proposed charter amendments of very doubtful value and very ambiguous phraseology.

And the United Railroads have state that they would make no more extensions. That if the city is going into the railroad business private capital will have to go out of business.

If the city goes into the street railway business it is certain that private capital, as conducted by the United Railroads, will have to go out of business. For about two-thirds of its capital is simply paper and represents no investment whatever. And the United Railroads will not produce the books for the Railroad Commission, will not try to accommodate the exposition or do anything else unless the people give it valuable concessions. It is about time that the city take a hand in the matter and reduce fares. By doing the city can build its own line and the people can pay two fares and get off as cheaply as they do now and be independent of this arrogant and bulldozing monopoly.

**HEARST THE ONLY MAN PROPER
TO FILL THE BILL.**

"We Need Another Lincoln to Free our Slaves," shriek the Hearst organs in unison. And they ask:

Where shall we find the man to free the slaves of today, not black men but grown, but white children, who are cheated of life before life has really begun? What man, what party will millions of men behind it, will do for white children what Lincoln did for black men?

We twig, Bill, we twig.
Also and likewise we'll bite, just if the fun of it.

Here we go, Bill:
MR. CHAIRMAN—In the name of the little children doomed to hear aching toll; in the name of stout bearded men, bearing the burdens of a slavery worse than chattel; in the name of worn and weary and weeping women, "like Niobe, all tears; in the name of Manhood under the lash; in the name of Womanhood driven to sin; in the name of Child hood brutalized over by the Slave Legrees of Capital; in the name of the Nizarene who declared little children to be of the Kingdom of Heaven—The nominees for the vacant seat of martyred Lincoln that Capsule of Genius, that Tabloid of Sincerity, that Epitome of Humility—at once to Jeremiah to Capital and the Paul, Labor—alike the Eiffel Tower of Devotion to Humanity and the shriveling Violet of Modesty—the Honorable William Randolph Hearst of California, New York, Illinois, Massachusetts, London, Long, loud and continuing applause, the audience rising to applause in singing, "Lead, Kind Light"—Sacramento Bee.

Comparison Of European And American Building Construction.

Paper Read Before the Canton, (O.) Builders' Exchange.

By Edmond Hermann, Architect, Canton, Ohio.

Holocausts, on the one hand, like the Chicago fire, the Collinwood disaster and the New York conflagration where 140 girls lost their lives, and, on the other hand, collapsing of buildings still under construction, which we can observe in regular turn, are arousing the public conscience, and the time will arrive when a thorough house-cleaning among some of our most cherished and moss-covered institutions and traditions will and must be started.

In reading of all these accidents the thinking man will look for a comparison, and nothing will be nearer than to compare our state of affairs with those in foreign countries, and, in doing so, we find that all the odds are on our side. Our statistics tell us a gawsonic story, laying bare how we sacrifice yearly enormous fortunes through astonishing ignorance or punishable frivolity, and, on the other hand, show us that in enforcing laws to prevent accidents and providing well stringent measures for the safety of their citizens the respective governments of the European nations must be looked at as wise heads of their families.

To find out what methods are used to obtain the desired results I will try to show you the practice and advantages of these methods. Voluminous building laws and ordinances regulate every phase of building construction, whether intended for new buildings or remodeling and alterations. They must be carried out to the letter, and to do this every government is keeping a staff of well trained men whose lives are devoted to the services of their respective departments, and these men also have the power to bring those violating the laws before the court, where they are prosecuted to the full extent of the law, regardless of their social standing. Before we will be able to obtain the same results in this country we will have to change the policies entirely which we are following at present.

As it is our daily experience that in enforcing our very few building laws we hear too much opposition to this, which very often is called "paternalism," and we also learn about "individual rights," etc., but if the authorities had always listened to those howls we would not have gone forward one step in our civilization.

To cite just one instance: You would not have, without legislation, one sidewalk on a straight level in your city, but you would have to walk over planks, bricks, tiles, cinders, etc., up and down steps, with greatest dangers to your body. Applying to these cases, where the whole community, the entire population, is interested, the old phrase, "liberty and rights," referring to some individuals, is only nonsense.

Fortunately, this idea is rapidly altering and we can see a new era, where the government will protect the people against dangers of all kinds, hidden in poorly constructed buildings, by enforcing laws rigidly.

The two main periods through which buildings have to go to a successful end are, first: Their "planning and designing," and, second, their "construction and erection." These two distinct divisions are the same all over the world, but the carrying out of their meaning and purpose is so different from each other in this country and Europe that it pays well to compare them.

Our first operation, the "planning and designing," is done by the owner with the assistance of a professional adviser. The owner describes in general to his adviser a more or less rough image of the future structure and leaves it to him to work out plans and specifications, according to which the "construction and erection" cannot be done well without having the "Planning and designing" brought to a successful end. It is of the utmost importance that the owner select a skillful adviser. This adviser, which we might call "architect" or "builder," is supposed to understand not only the construction of buildings, but ought to be conversant with the laws of states, have knowledge of all the material used in every building to the minutest detail, have a true understanding of the different arts and crafts, and last, but not least, he must be trained to harmonize beauty with utility.

All this knowledge is absolutely necessary to the adviser to give the owner the proper service. Why is it then, that when the adviser is equipped with all the aforementioned knowledge that we do not get the correct results?

The architects of other nations have to go through a severe training to call themselves architects. If anyone else would undertake to call himself an architect without having the required knowledge he would be liable to prosecution. In our country an architect is in many cases simply an amateur that has nerve enough to stand up before the people and take advantage of their ignorance and give them services for just a nominal fee that leads the owner into all kinds of trouble, with the final result that the construction of a building is only a makeshift of what it really ought to be.

The two great institutes of American architects, recognizing these facts, are endeavoring to secure laws which will require every architect to have a license, just the same as licenses are required for doctors, druggists, etc. This only will do away with dilettantism.

Under "Planning of Buildings" we furthermore have to consider the laws which are made to have the buildings constructed according to certain rules and regulations. These rules embody our experience which we have gained by former accidents and which are preventive measures.

Our second operation, "The construction and erection," is just the same as transferring theory into practice. The plans are turned over to the building contractor with the intention to have him carry out the ideas as laid down

on paper. In very few cities of our country plans must be submitted to some building department for approval. In Ohio the state requires all plans which comprise the construction of theatres, assembly halls, churches, school buildings, club and lodge buildings, to be approved by the state department, and some of the larger cities, as Columbus, Toledo, etc., require the submittance to the city building department.

In smaller cities there are no authorities to look after this matter, and the submittance for approval, as we, for instance, have in our city, is nothing more than a joke. In Germany every plan, whether it is a new building or a small addition to any dwelling house, or even a stable, must be submitted for approval to the authority as our counties. In every county a learned architect is standing at the head of a department. This architect is called district inspector. To him cities, the nation is divided into inspection districts of about the same

every owner has to submit plans in duplicate. These plans must show the details of construction and must be accompanied by a plain but extensive description of the construction, showing for what purpose every room and every space will be used, what loads are intended to be placed, what safety factors are used for computing the different members supporting those loads, and the fee paid to the county treasurer is figured according to the class of construction and also according to the cubic contents.

The district inspector will only approve those plans which comply with the requirements of the laws. But it is not sufficient to have plans approved by the state department; it is just as essential to have trustworthy persons look after the erection and to find out whether the owner is constructing the building according to his approved plans. This again is done by members of the same inspection department, and there are two ways to do this. There are many ordinances in every city which govern the safety of the men employed by the contractors and protecting the people from injury they might receive by entering buildings under construction or passing by them on the streets. To have these ordinances properly enforced the police in general will look after and inspect every building under construction at short intervals. To get acquainted with these ordinances the police lieutenants gather their men every morning to read new ordinances and explain the meaning of old ones, so that the men might get acquainted in a short time with the requirements which the laws provide for those purposes.

The second supervision is done by a special commission of which the district architect is the head and which furthermore consists of three more practical builders appointed by the state authorities. This commission visits every building twice during its

construction, the first time after the building is made watertight; that is, after it is covered with a roof, but not plastered, so that the members of the building commission can see the rough construction and check every detail of the carrying members. After this visit the building dare not be touched for six consecutive weeks, except for work which must be done by plumbers and steamfitters. This period of six weeks is very essential to a healthy and dry building, when you consider that all the buildings used for occupancy of people must be of slow burning or fireproof construction, and when you consider the time it takes to dry out a brick building, as it has no wall less than thirteen inches and the joists of which are never less than 6x8 inches, with the open spaces between filled with incombustible material, you will clearly see the reason for giving the building such a long time to dry out.

The final inspection is made when the owner applies for "receipt of acceptance," that is, when it is ready for occupancy. The same commission which visited the building the first time concludes its inspection with this last visit and certifies the owner the acceptance, which means that he can rent the building. No part of any building can be occupied before this commission has made its final inspection. The fee, which is paid by taking out the building permit, is used for paying the expenses of this aforementioned building commission. You, perhaps, think that this way of constructing buildings is connected with a lot of red tape, but when you compare the results which must be obtained by complying with rigid building laws and ordinances and see in what a despicable way too many of our buildings are thrown together, regardless of any appearance and safety, you will admit that the slow and safe way of Germany is far more superior to that of ours.

The material used in the construction of buildings in Germany is the same as the material which we use here. The main difference is that the work is done in a more substantial way, and that it is the endeavor of every owner and builder to build houses that last and will pay better interest in the long run, instead of trying to break records every time a new structure is to be erected.

In large cities the height of buildings is limited in proportion to the width of the street, and so it is that long streets show you all the buildings of the same height, which we call sky-line. This sky-line would be monotonous to look at, but the roofs are constructed under all kinds of angles and are ornamented with dormers, towers, etc., and so relieve the monotony of this sky-line. The main cornice of every house, when it is constructed of wood, must be protected with metal about five feet away from the adjoining building on either side to prevent the spreading of fire over to the neighbor's cornice. Every roof must be provided with plank gables for inspection of the chimneys, which are regularly cleaned by licensed chimney sweepers, as all the ovens, stoves, kitchen ranges, etc., are heated by coal or wood, which necessitates a cleaning out of the chimney flues to avoid clogging up.

The number and size of windows is regulated in proportion to the depth of each room. Wings adjoining front buildings must be closed by fire walls extending two feet above the roof and having iron doors to connect the different stories. All the openings along the neighbor's lot must be closed with solid glass, brick or wire glass, and no window of any kind is permitted.

Firms desiring news on special classes of buildings, such as Hotels, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$30,000. Architects, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Anna C. Brownlee. This building has been mentioned in these columns a number of times before. Plans are now complete and figures are being taken. The building is designed to contain a number of two and three room suites with wall beds and private bath rooms. Interiors will be handsomely finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. A central heating system will be installed. Hot and cold running water will be supplied to all rooms. The exterior of the building will be covered with cement plaster on metal lath.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architects, Joseph Cahen, 45 Kearny St., S. F. Owners, James and Mary Ward. The building will be erected at the southeast corner of Clay and Taylor streets. There will be stores on the first floor and a number of two and three room suites on the upper two floors. Interior finish will be of pine and redwood with some hardwood floors. All suites will have connecting baths and wall beds. A central heating system and hot water plant will be installed. Bath rooms will have tile wainscot. The exterior of the building will be covered with shiplap. Plans for this work are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$13,000. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owners, Metropolis Investment Co. The building will cover an area of 37½x94 feet and will contain apartments arranged in suites of two and three rooms each. There will be a central heating system and hot water plant. All suites will have private baths and wall beds. Interiors will be finished in pine and redwood. Some oak floors will be used. Tile will be used in the bath room and kitchens. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete, \$16,000. Architect, C. Pantoul, 916 Kearny St., S. F. Owner's name withheld. The building will contain a number of two room suites with private baths. Interior finish will be of pine throughout. Bath rooms and kitchens will have tile wainscot.

This gives in general some idea of the difference between European building construction and supervision in our country, and it is hoped that it will not be long before municipal and government laws in our state will control the erection of our buildings, whether public or private, along the same line.

There will be a hot water plant installed. Exterior of the building will be faced with cement plaster. Only preliminary plans have been prepared and working drawings will be completed as rapidly as possible.

SAN FRANCISCO—Apartment house, 6 story and base. Class C construction, \$75,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected in the south line of Bush street near Mason, and will have a frontage of 50 feet and a depth of 137½ feet. The interior will be arranged for a number of two and three room suites, all of which will have connecting baths and wall beds. Plans include a steam heating plant, elevator service, vacuum cleaning system and hot water plant. Interior will be finished in pine and hardwoods. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$20,000. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Herman Hogrefe. The building will be erected at the northeast corner of Union and Van Ness avenue, and will cover an area of 30x90 feet. Stores will occupy the first floor. Upper two floors will be arranged for eleven apartments of two and three rooms each. All suites will have wall beds and private bath rooms. Interior will be finished in pine and elm veneer. Tile and marble will be used in the bath rooms and entrance lobby. There will be a central heating system and hot water plant. The exterior of the building will be covered with shiplap and special run rustic. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$9,000. Architect, none. Owner, E. A. Schmidt, 1077 16th St., Oakland. The building has been designed to contain 33 rooms which will be arranged in two-room apartments with wall beds and private baths. All interior finish will be of pine or redwood. Some oak floors will be used. Bath rooms will have tile wainscot. Gas grates will probably be used. Mantels will be of tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house, 2 story and base, frame. Cost not stated. Archi-

lect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, W. B. Vickers. This building will contain eight suites of two and three rooms each. There will be wall beds and private bath rooms. Interior will be finished in pine and redwood. Some tile will be used in the baths. A central heating system and hot water heater will be installed. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are under advisement.

PORTLAND, ORE.—Apartment house, 6 story and base, reinforced concrete, \$220,000. Architects, Johnson & Mayer, Selling Bldg., Portland. Owner, Charles H. Lehman, Yeon Bldg., Portland. This building will occupy a corner site and will cover an area of 135x100 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof. Interior partitions will be of tile or metal lath and plaster. Interior will be arranged for 51 apartments of from four to six rooms each. All suites will have private baths and wall beds. Interior will be finished in pine and hardwoods, the bath rooms in tile and composition. Plans provide for steam heat, elevator service, hot water system, vacuum cleaning and dumb waiters. Besides the suites there will be a large lobby, amusement room and social hall. All suites will have outside sleeping porches. The exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, E. R. Jeffery, Citizens' National Bank Bldg., L. A. Owner, Mrs. Ella Barker. The building is to occupy a corner site and will contain 90 rooms, arranged in two and three room suites with private baths and wall beds. Interior will be finished in pine with some hardwood floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The work has been mentioned here before. Plans are now complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick. Cost not stated. Architects, Home Seekers Building Corp., Higgins Bldg., L. A. Owner, Mrs. P. G. Tompkins. The building will cover an area of 42x130 feet and will contain 80 rooms arranged in two and three room suites with private baths and wall beds. There will be steam heat and elevator service. Interior finish will be of pine with some hardwood floors and oak veneer. Bath rooms will have tile wainscot and composition floors. A vacuum cleaning system and hot water plant will be installed. The exterior of the building will be faced with pressed brick. Plans for the work are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owner, F. Lane. The building will cover an area of 46x125 feet. The interior has been planned for 75 rooms, arranged in suites of two and three rooms each. All apartments will have connecting baths and wall beds. Steam heat, a hot and cold water supply system, elevators and a vacuum cleaning system are specified in the mechanical

equipment. Interior finish will be of pine and redwood with some oak floors. Baths will have composition floors and tile wainscot. Metal window frames and sash are specified. The exterior of the building will be faced with pressed brick. Entrance will be finished in marble and tile. Plans are being prepared.

Contracts Awarded

OAKLAND, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Cunningham & Pollard, First National Bank Bldg., S. F. Owner, D. Dwyer, Contractor W. A. Savage (at the site) 41st and Piedmont avenue, Oakland. This contract has been taken on a percentage basis.

LOS ANGELES, CAL.—Apartment house, 3 story and base, Class C construction, \$56,000. Architect, Leonard A. Cooke, 100 East Colorado St., L. A. Owner, Mrs. F. T. Dandy. Contractor, Whiting Thompson, Douglas Bldg., L. A. Contract price, \$36,000.

BANKS.

SANTA CLARA, SANTA CLARA CO., CAL.—Bank alterations and additions, brick construction, \$30,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Bank of Santa Clara. Plans and specifications are complete and have been out for figures on this work and bids will be opened at once. The work will include complete new bank fixtures, vault work and interior finish and decoration. An addition to the present building will also be constructed. Plans have been out for figures and a contract will be awarded with a few days.

BRIDGES, DAMS AND HARBOR WORK.

SAN FRANCISCO—Pier No. 46, wood pile construction. Cost not stated. Engineer, Assistant State Engineer, Perry Bldg., S. F. Owners, State of California. Plans and specifications have been approved for the construction of Pier No. 46, which is to be erected between Pier No. 44 and the Channel. This structure will be carried on wood piles and will have a frame shed covering the whole structure. The pier will be 800 feet in length and 200 feet wide. Besides the shed there will be two spur tracks. Bids will be called for as soon as the plans receive the approval of the State Board of Control.

SEATTLE, WASH.—Bridges, 8 reinforced concrete and steel, \$2,000,000. Engineer, City Department of Engineering, Seattle. Owners, City of Seattle. The question of providing suitable ways and means for handling traffic in certain sections of the city, and especially in the neighborhood of the Lake Washington Canal has been recently decided by the City Council. Instead of constructing a system of subways the Council went on record at its last meeting as being in favor of constructing the following bridges: Fremont and Westlake; 15th NW at Ballard; Eastlake and 6th avenue N.; Mountlake avenue and University Grounds; Spokane avenue and East Waterway; Westlake and Stone Way, and 3rd avenue W. at Ross. Plans will be ordered at once.

CHURCHES.

MODESTO, STANISLAUS CO., CAL.—Church, 2 story and base, reinforced concrete, \$21,000. Architect, John J. Foley, 45 Kearny St., S. F. Owners, St. Stanislaus Parish. This building will be designed in the Spanish Colonial style with a cement plaster exterior and clay tile roof. The main auditorium will have a seating capacity of 500 people and will be finished in pine, redwood and ornamental plaster. A central heating system will be installed. Working drawings are being prepared and bids will be called for as soon as possible.

Contracts Awarded.

SAN FRANCISCO—Church, 2 story and base, reinforced concrete, \$50,000. Architect, P. Brouchoud, 52 Bush St., S. F. Owners, French Catholic Church. Contractor, James McLaughlin, 244 Kearny St., concrete work, \$26,000. Note: This is the only contract so far awarded. Plans for the balance of the work are complete and figures will be called for within a short time.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse addition, 2 story frame, \$2,000. Architect, none. Owners, Roehling Construction Co., Crocker Bldg., S. F. The addition will be made to a building 50x75 feet. There will be a concrete foundation, metal skylights, corrugated iron roof and sheathing. Interior will not be finished. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Dairy depot, 2 story and base, reinforced concrete. Cost not stated. Engineer, C. F. Wieland, Mutual Savings Bank Bldg., S. F. Owners, Dairy Delivery Co. The building will be erected on the property at 1350 19th street, the site of the present plant of the owners. The structure will cover an area of 60x60 feet and will be practically fireproof throughout. There will be reinforced concrete walls and floors, tar and gravel roof and metal window sash and frames. Special attention has been given to the sanitary conditions. The exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Warehouse, 3 story and base, brick, \$30,000. Architect, none. Owners, J. M. Overall Furniture Co., 700 South Main St., L. A. This company has ordered plans prepared for a warehouse structure 70x140 feet. There will be brick exterior walls faced with blue pressed brick. Interior construction will be of the heavy mill type. Plans include elevator service. Bids will be called for on the work within a short time.

LOS ANGELES, CAL.—Factory, 2 story and base, brick, \$20,000. Architect, T. Beverley Kelm, Jr., Co. Title Insurance Bldg., L. A. Owner, J. W. Earl. The building has been designed for a photo engraving plant, and has been leased for a long term to the National Engraving Co. The structure will cover an area of 50x145 feet. Interior will be finished in pine throughout. There will be metal window frames and sash. The exterior will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

SAN FRANCISCO—Factory, 5 story and base, reinforced concrete, \$120,000. Architect, George William Kelham, Sharon Bldg., S. F. Owners, Gantner & Mattern Co. Contractors, Lindgren & Co., Monadnock Bldg., S. F. Contract price, \$120,000.

SEATTLE, WASH.—Warehouse, 4 story and base, reinforced concrete, \$75,000. Engineers, Weld & Thomas, Hoeg Bldg., Seattle. Owners, Great Northern R. R. Co. Contractors, Butler Construction Co., Central Bldg., Seattle. Contract price, \$75,000.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$6,000. Architect, none. Owner, Caspar Hexberg, 2079-B 15th St., S. F. The building will have a frontage of 25 feet and a depth of 61 feet. Interior will be arranged for three modern flats of four and five rooms each with baths. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used in the principal rooms. Gas grates and tile mantels will be used in all living rooms. The exterior of the building will be covered with rustic and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, John Dahlin, 127 Judah St., S. F. The building has been designed for two modern flats and a store, and will cover an area of 25x87 feet. Interior finish will be of pine and redwood. Open fire places and brick or tile mantels will be used in the living rooms. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic and cement plaster. Plans are complete and the owner will do the work by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,500. Architect, none. Owner, G. Spitz, 232-A Langston St., S. F. The building will have a frontage of 24 feet and a depth of 60 feet. Interior will be arranged for three modern flats of five and six rooms each with bath. All interior trim will be of pine or redwood. Some oak floors will be used. Tile will be used in the bath rooms and kitchens. There will be gas grates and tile or brick mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, \$35,000. Engineers, Heller & Wilson, First National Bank Bldg., S. F. Owner, Dr. Albert Abrams. The building will be erected at the southwest corner of Van Ness avenue and California street, and will cover a considerable ground area. The front portion of the building has been arranged for automobile show rooms and the rear and upper floor for repair shop, storage space and shipping departments. Interior of the sales rooms will be finished in hardwood and tile. Metal window frames and sash will be used. The exterior of the building will be faced with cement plaster. Concrete floor will be used on the first floor. Plans

are complete and figures are being taken.

PORTLAND, ORE.—Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, C. A. Duke, Mohawk Bldg., Portland. Owner's name withheld. The building will be 67x100 feet with foundations and walls of sufficient strength to support additional stories. There will be a cement floor. Front portion of the building will be finished for offices. The rear will retain a repair shop and commercial garage. There will be metal window sash and frames and special gasoline storage tanks. The exterior of the building will be faced with cement plaster. A trussed roof will be used, permitting the free handling of cars. Plans are being prepared.

SEATTLE, WASH.—Garage, 3 story and base, reinforced concrete, \$50,000. Engineer, John M. Baird, White Bldg., Seattle. Owner, R. H. Gray. The building will cover an area of 65x120 feet. The entire structure has been leased to the Havers Motor Car Co., and will be designed to meet their requirements. There will be modern sales and display rooms in the front portion of the building, and the balance of the structure will be used for shipping rooms, an assembling plant and storage space. Metal window frames and sash are to be installed. The exterior of the building will be faced with cement plaster. Interior of the offices and display rooms will be finished in hardwood, marble and tile. Plans will be ready for figures in April.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 2 story and base, brick, \$50,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, J. A. Graves. Contractor, Carl Leonhardt, H. W. Hellman Bldg., L. A. Contract price, \$50,000.

GOVERNMENT WORK AND SUPPLIES.

SAN FRANCISCO—Hospital addition, 1 story and base, reinforced concrete, \$18,000. Architects, Constructing Q. M. Dept., Fort Mason. Owners, United States Government. Bids will be called for early this month by the Constructing Q. M. Dept. at Fort Mason for the construction of a one-story and basement reinforced concrete addition to the Letterman General Hospital at the Presidio, and for 100 feet of reinforced concrete sea wall at Fort Mason. The hospital addition is estimated to cost \$18,000. The official call for bids will be published in these columns.

Army Construction in Hawaii.

Major B. Frank Cheatham, quartermaster corps, who is in charge of construction in Hawaii, has submitted some important recommendations regarding the type of construction of army buildings at the coast artillery post of Kanehameha. It is proposed not to make use of the cement-gun type, which has been used in the construction of Schofield Barracks, for the reason that the buildings are under the mortars or near the guns of the coast defenses. Major Cheatham is in favor of a type of construction similar to that used by the people of Honolulu. It will be possible by this means to construct buildings for the four

companies of the coast artillery to constitute the garrison for \$200,000, as compared with \$356,500, which was the original estimate. Major Cheatham in his memorandum on the subject says:

"Owing to the local conditions, and particularly to the recent decision to limit the cost of officers' quarters in Hawaii to \$4,000 for a company officer and \$6,000 for a field officer, it is believed that this is a case where exception to the rule of the War Department to construct permanent buildings only should be made, and it is strongly recommended that all buildings be of frame and only one story high.

The types of construction used locally have been carefully studied, and it is found that, owing to the absence of high winds, it is customary to use an exceedingly light frame with single walls. Such houses are almost universal here and are not only satisfactory, but are as permanent as could be expected from all-frame construction. The relatively small amount of lumber used reduces the cost materially as compared with standard frame construction in the United States.

"Sketch plans for all buildings at Fort Kanehameha, based on the idea above expressed, are now being prepared and will be forwarded for consideration at an early date; the delay in submitting them is due to the fact that an engineer could not be spared from Schofield Barracks until now.

"It is estimated that suitable buildings as above suggested will cost as follows: Field officer's quarters, 4 bedrooms and 2 baths, \$5,500; captain's quarters, 3 bedrooms and 1 bath, \$4,000; lieutenant's quarters, 2 bedrooms and 1 bath, \$3,500.

"Barracks to be of same type of construction, frame, one story high; estimated cost, with mess hall and kitchen, \$18,000 each.

Pearl Harbor Dump Cars.

The bureau of yards and docks, Navy Department, Washington, will open bids April 5 for furnishing 30 complete 20-yard air dump cars, delivered at the U. S. naval station, Pearl Harbor, Hawaii, in knock-down condition, the cars to be of the best description in stock and workmanship. The parts of the cars to be assembled, to be securely boxed or crated for ocean shipment. It is desired to reduce to a minimum the amount of work required in erecting the cars at the naval station. The nature of the service these cars will be subject to is the transportation of coal loaded by one or two ton grab buckets. The cars shall be built entirely of metal, except the ends and flooring, which shall be of 3-inch white oak. General dimensions as follows: Gage of track, 4 feet 3½ inches; radius of track curvature, 150 feet; length of body, inside, 30 feet; width of body, inside, 8 feet 6 inches; height of body, inside, 2 feet 1½ inches; extreme height from top of rail, 5 feet 7 inches; center to center of trucks, 24 feet; truck base, 5 feet 3 inches; clear opening between door and car floor when dumped, about 4 feet 3 inches; capacity of body even full, 20 cubic yards. The entire work is to be completed within eight calendar months.

Hillings, Mount, Public Building.
As previously reported, the contract

the construction of the U. S. public building at Billings, Mont., was awarded to J. H. Wiese, Omaha, Neb., \$109,748. In the construction of the building the following fixtures and material will be used: Plumbing fixtures, John Douglas Co.; down draft furnace, Hawley Down Draft Furnace Co.; direct and wall radiators, American Radiator Co.; nonconducting coverings, Johns-Manville Co.; radiator dyes, Jankins Brothers; damper regulator, American Radiator Co.; cabinet and tablet, Frank Adam Electric Co.; conduit, Enameled Metals Co.; wire, standard Underground Cable Co.; pendant push button switches, General Electric Company; insulating joints, Charles Wirt & Co.; plug receptacles, Hart Mfg. Co.; snap switches, Hart & Egeman Mfg. Co.; lighting fixtures, as Fixture and Brass Co.

Puget Sound, Wash., Buildings.

The following bids were received by the chief of the bureau of yards and docks, Washington, D. C., for contiguous group buildings at the naval hospital reservation, Puget Sound, Wash.:

Item 1, work complete; 2, price for installation of wire fence; 3, work complete, omitting Ward A.
George Eckman, Seattle, Wash., em 1, \$13,998; 2, \$600; 3, \$10,358.
Finne & Gjarde, Seattle, Wash., item 1, \$14,771; 2, \$811; 3, \$10,769.
J. L. Murphy & Son, Tacoma, Wash., em 1, \$15,432.55; 2, \$225; 3, \$11,347.
Erikson & Dahl, Seattle, Wash., em 1, \$17,474.68; 2, \$1,300; 3, \$12,643.
Carl M. Stebinger, Portland, Ore., em 1, \$16,714.45; 2, \$342.50; 3, \$12,13.40.

Puget Sound, Quarters.

The contract for the construction of frame house at the naval magazine, Puget Sound, Wash., bids for which were opened January 15, has been awarded to Charles H. Schaer, Seattle, Wash., at \$7,900.

Pueblo Bouito Indian School.

The contract for the construction of brick school house at the Pueblo Bouito Indian School, N. Mex., bids for which were opened January 12, has been awarded to W. D. Lovell, Minneapolis, Minn., at \$9,500.

Generator Set and Switchboard.

On March 22 the bureau of yards and docks will open bids for a 200-kilowatt motor generator set delivered f. o. b. cars at the naval station, Pearl Harbor, T. H. There is also to be furnished a six-panel switchboard and accessories. The set shall consist of a three-phase 60-cycle 2,200-volt synchronous motor of not less than 50 kilowatt ampere capacity, mounted on the same bed-plate and direct connected to two 100-kilowatt direct current 125-volt compound wound generators. The switchboard shall consist of three panels for the control of the motor generator set and three feeder panels.

Prospective Bidders.

The following firms have applied to be bureau of yards and docks, Navy department, Washington, D. C., for plans and specifications of the following work:

Pearl Harbor, Generator Sets, March 22.

A. L. Mc & Son, 90 West street, New York city.

Crocker - Wheeler Co., Washington, D. C.

Terry Steam Turbine Co., 90 West street, New York city.

Burke Electric Co., Erie, Pa.

General Electric Co., Schenectady, N. Y.

Western Electric Co., 463 West street, New York city.

Pearl Harbor, Locomotive Crane, April 12.

HALLS AND SOCIETY BUILDINGS.

SAN FRANCISCO—Municipal auditorium, 4 story and base. Class A construction, \$1,000,000. Architects, John Galen Howard, John Reid, Jr., and Frederick H. Meyer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the \$1,000,000 auditorium to be erected in the civic center have been approved by the executive committee of the Panama-Pacific International Exposition. The money to build the great meeting house has been set aside by the Exposition Company, which aims to have the building completed by 1915 so that the numerous conventions gathering in San Francisco that year can properly be housed.

The auditorium will be of stone, and with the City Hall, it will form the keynote of the stupendous scheme. It will flank the southern end of the great plaza.

The great feature of the interior of the main auditorium will be the octagonal dome, 190 feet in diameter. The steel structure of this dome will be exposed and will present a strong architectural effect. The seating capacity is approximately 11,000. A place has been set aside in the architect's sketch, indicating accommodations for 3,900 banquets. The easterly and westerly or minor auditoriums, easily will take care of from 750 to 900 persons each. A kitchen with all necessary appointments is provided for in the basement of the east wing.

On the third and fourth floors there will be committee rooms and exhibition spaces at the easterly and westerly sides.

The stage or platform will be large enough to meet the average requirements for large concerts. A portable stage made in sections will be provided and stored under the permanent stage when not in use. The structure will be equipped with a magnificent pipe organ.

BAKERSFIELD, KERN CO., CAL.—Club house, 3 story and base, brick, \$30,000. Architect's name not given. Owners, Bakersfield Club. The building will be erected at the corner of 19th and F streets, and has been designed for a modern city club. Interior arrangement will include several large social rooms, billiard hall, bowling alley, dining room, library and several living apartments. Interior finish will be of pine and hardwoods. A central heating system will be installed. The exterior of the building

will be faced with pressed brick. Plans are complete and in the hands of the Building Committee, which consists of F. N. Scofield, W. E. Benz and J. A. Hughes. Bids will be called for within three weeks.

Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Lodge hall, 1 story and base, brick, \$36,000. Architects, Starbuck & Clark, Fresno. Owners, Knights of Pythias. Contractor, D. A. Cowan, Fresno. Contract price, \$36,000. Note: The building will cover an area of 75x700 feet.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Association building, 3 story and base, brick and steel, \$50,000. Architects, E. Russell Hay and Windsor Soule, Santa Barbara. Owners, Young Men's Christian Association. Contractor, E. F. Edwards, East Pedregosa St., Santa Barbara, general construction, \$50,000. Bids are now being taken for the plumbing, painting, electric work and steam heating by the architects.

HOTELS.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architect, E. C. Thorne, 631 So. Spring St., L. A. Owner, I. I. Dehail. The building will be 64x106 feet, and will be arranged for stores on the first floor and 100 guest rooms and a number of baths on the upper floors. Plans include elevator service, steam heat and vacuum cleaning. Interior finish will be of pine and hardwoods. The exterior of the building will be faced with pressed brick. Bath rooms will have cement floors. Plans are being prepared and the work will probably be done by Day Labor.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, A. W. Ross. The building will be erected on a corner site and will cover an area of 70x140 feet. Several stores and the hotel lobby will occupy the first floor. Upper floors will be arranged for 27 guest rooms and 10 baths to each floor. Interior finish will be of pine and redwood. Tile will be used in the baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are nearly complete and the work will probably be done by Day Labor.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$12,000. Architect, C. Fantoni, 916 Kearny St., S. F. Owner's name withheld. The building will contain a number of single rooms on the upper floors and store and hotel lobby on the first floor. Interior finish will be of pine and redwood. All rooms will be supplied with hot and cold running water. The exterior of the building will probably be covered with shiplap and rustic. Preliminary plans only have been prepared.

SEATTLE, WASH.—Hotel, 2 story and base, brick and steel, \$75,000. Architect, A. Wisckersham, 703 22nd Ave., Seattle. Owners, Yesler Estate. The building will cover an area of 36x100 feet, and the nature of the soil on which it is to be erected makes it necessary to carry the building on a pile foundation. Concrete piles will be used. The first floor will be arranged for a number of stores besides the hotel entrance and lobby. Upper floors will contain a total of about 150 rooms.

There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior will be finished in pine and hardwoods. Bath rooms will have tile floors. The exterior of the building will be faced with pressed brick. Plans will be ready for figures about April 1st.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architect, none. Owner, Eugene Pourroy. Contractor, Joseph F. Rhodes, Central Bldg., L. A. Contract price not stated.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, none. Owner, W. S. Hook. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price not stated.

PANAMA-PACIFIC EXPOSITION WORK.

LIGHT AND POWER CONTRACT.

Exposition Company Awards The Largest Contract To The Pacific Gas and Electric Company.

Contracts were signed Wednesday by officials of the Panama-Pacific Exposition company and of the Pacific Gas and Electric company binding the latter concern to supply all electricity, gas and steam for the 1915 fair from the present until the work of dismantling is over.

The deal is the largest in the history of the exposition and represents considerably more than \$1,000,000. The gross revenue to the gas company from electricity alone will be at least \$500,000.

A big generating plant is to be erected on one of the nine lots at the site of the old San Francisco Gas company on the north beach, which has been leased to the exposition company free of rental. The generating plant will serve a dual purpose. Besides generating the power for the fair it will serve as the gas company's exhibit, and visitors to the fair will be shown how the wonderful "juice" is made.

The fair company is bound to use, or at least pay for, a minimum of 12,000 horse power during the construction period of the exposition and 20,000 horse power during the actual life of the fair. Afterward the generating plant will be used as a substation for supplying individual consumers.

The steam to be supplied is to be used for heating purposes, mainly, and the exposition company is bound to use 20,000 pounds of steam per hour between 10 a. m. and 5 p. m. each day during the fair. The gas will be used mainly for illuminating purposes, and this is no inconsiderable item, for the streets of the fair, if present plans are adopted, will be lighted with gas lamps.

RAILROAD CONST., STATIONS AND EQUIPMENT.

OAKLAND, CAL.—Switch tower, 3 story, reinforced concrete, \$10,000. Architects, Architectural Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for a switch tower which is to be erected at the 16th street depot have been completed and are now out for figures. Interior will be finished in pine.

Metal window sash and frames are specified. The exterior of the building will be faced with cement plaster.

RESIDENCES.

SAN FRANCISCO—Residences, 2 1 story and base, frame. Cost not stated. Architect, Louis Christian Mullgardt, Chronicle Bldg., S. F. Owners, West Lake Park Co. These two houses will be erected on San Diego Way in St. Francis Wood. Each of the houses will contain from six to eight rooms with baths and sleeping porches. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster. Plans are complete and construction will shortly be undertaken.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$5,000 each. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble, 363 14th avenue. These houses will be erected on Lake street east of 25th avenue. Each will be arranged for eight rooms and bath. All interior finish will be of pine. Oak floors will be used in the reception hall, living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heaters will be installed. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Bungalows, 2, 1 story and base, frame, \$1,650 each. Architect, none. Owner, A. A. Wesen dunk, 1747 Dolores St., S. F. These houses will each contain six rooms and bath. Interior finish will be entirely of pine and redwood with some hardwood flooring. There will be open fire places with tile mantels in the living rooms. Exteriors will be covered with rustic and cement plaster. Plans are complete and the owner will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,700. Architect, none. Owner, J. M. Peters, 1010 Balboa St., S. F. The house will contain seven rooms and bath. Interior will be finished in pine with some elm panels. There will be an open fire place in the living room. Hardwood floors will be used in the living and dining rooms. Bath room will be finished in tile. There will be an automatic water heater. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame. Cost not stated. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The National Engineering Co. are completing plans and specifications for two high class dwellings, which will be erected at once in this city. Plans are also nearly complete for a \$5,000 residence in Alameda, several bungalows in Oakland and a \$5,000 dwelling to be erected in San Rafael. Bids will be

taken by the National Engineering Co. within a week for the two city jobs, and within ten days on the Alameda work.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,900 each. Architect, none. Owner, Theodore Gibson, 255 Fair Oaks, S. F. Each of the houses has been designed for a seven-room dwelling with bath and laundry. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places in the living rooms. Bath rooms will have tile wainscoting. Mantels will be of brick. The exteriors of the houses will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Fernando Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a six-room house with all modern conveniences. Interior will be finished in pine and redwood. There will be open fire places and brick or tile mantels. Hardwood floors will be used in the principal rooms. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Bungalow, 1 story and base, frame, \$1,000. Architect, John P. Haner, 3579 19th St., S. F. Owner, G. W. Lambert. The bungalow will contain five rooms and bath. All interior trim will be of pine. Oak flooring will be used in the living and dining rooms. There will be an open fire place in the living room with a brick mantel. The exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Bungalow 1½ story and base, frame, \$1,900. Architect, none. Owner, Oscar Heyman, 742 Market St., S. F. The house will contain six rooms and bath. Interior will be finished in pine and redwood throughout. There will be a large open fire place in the living room. Hardwood floors will be used in the principal rooms. The exterior of the dwelling will be covered with rustic and shiplap. The work will be done under the Day Labor system.

SAN FRANCISCO—Bungalows, 2, 1½ story and base, frame, \$1,200 each. Architects, National Engineering Co., Foxcroft Bldg., S. F. Owner, Margaret C. Woodside. These houses will be erected on Putnam avenue, and each will contain five rooms and bath. Pine and redwood will be used for trim throughout. There will be open fire places and tile or brick mantels. Some oak flooring will be used. Exterior will be covered with rustic. Plans are complete and the work will be done under the Day Labor system.

SAN FRANCISCO—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owners, Roemer and Walton, 11 Guerrero St., S. F. The dwelling has been designed for a six-room house with bath and laundry. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath room and kitchen. The exterior o

the house will be covered with rustic and plans are complete and the work will be done by Day Labor.

SAN FRANCISCO.—Residence, 2 story and base, frame, 2,000. Architect, none. Owner, N. J. Neilson, 4278 rd St., S. F. The house will contain x rooms and bath. Interior will be finished in pine and redwood with one hardwood floors. A large open place will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, J. A. Bischoff, 349 82nd St., Oakland. The dwelling has been designed for a modern six-room house with bath. Interior will be finished in pine, redwood and some hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Dr. F. W. Arnden. This house will contain seven rooms and bath. All interior finish will be of pine or redwood. There will be furnace heat and open fire places. Hardwood floors will be used in the principal rooms. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are now being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, 1,000. Architect, none. Owner, F. J. Bernhoff, 1741 Franklin St., Oakland. The dwelling has been designed for a seven-room house with all modern conveniences. There will be furnace heat and open fire places. Mantels will be of brick and tile. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the living and dining rooms and reception hall. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,950. Architect, none. Owner, H. M. Turrell, 456 Loan St., Oakland. This house has been designed for an eight-room dwelling with bath. All interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and brick or tile mantels. Tile will also be used in the bath room and kitchen. The exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, W. Smith, 1010 Broadway, Oakland. Owner, Henry Perfontaine. This house will be arranged to contain six

rooms, sleeping porch and bath. Interior will be finished in pine and hardwoods. Oak floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior will be covered with brick veneer and shiplap. Plans are complete and now out for figures.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owners, Junk, Kiddell & Co., 2247 Telegraph Ave., Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and some hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of tile or brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$6,500. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mrs. Grant. The dwelling will be erected in Rockridge Park, and has been designed for an eight-room house with baths and sleeping porch. Interior will be finished in pine, redwood and some oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater is to be specified. Tile will be used in the baths and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, S. D. Beasley. The house will be erected in Berkeley Heights, and will contain seven rooms, bath and sleeping porch. Interior finish will be of pine, redwood and hardwoods. There will be furnace heat and open fire place. Hardwood floors will be used in the principal rooms. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with shingles. Plans are complete and bids are now being taken for the construction.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$10,000. Architect, none. Owner, Louis Engler, 2721 Haste St., Oakland. The dwelling has been designed for a fourteen-room house with several baths and a laundry, and will be erected on Spruce street near Virginia. Interior will be finished in pine and redwood with some hardwood floors. There will be a central heating system and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and the work is to be done by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owners, Green and Walker. The

house will contain eight rooms and bath. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior will be covered with shingles and cement plaster. Plans are complete and the owners will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Mrs. V. H. Owens. The house has been designed for an eight-room dwelling with bath and laundry. Interior will be finished in pine, redwood and some hardwoods. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Bungalows, 12, 1 story and base, frame, \$2,500 each. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, Roger Coit, 1522 Broadway, Oakland. These dwellings will be erected on the property at 51st street and Manila avenue, and each will contain six rooms and bath. All interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and brick and tile mantels. Tile will also be used in the baths and kitchens. Exteriors will be finished with cement plaster, rustic and shingles. Plans are being completed as rapidly as possible and the work will be done by Day Labor. The owner is now in the market for all kinds of building materials.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$3,750. Architect, Henry L. Wilson, L. A. Owners, J. H. and Kate Platner, 434 Leavenworth St., S. F. The dwelling will contain seven rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. There will be a central heating system and open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, Roger Coit. The dwelling has been designed for an eight-room house with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of tile and cement. The bath and kitchen will have some tile wainscoting. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 story and base, frame, \$2,800. Architect, none. Owner, W. M. Lewis, 465 N. 16th St., San Jose. The house has been designed for a six-room dwelling with bath and sleeping

porch. Interior finish will be of pine and redwood with some oak floors. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

MILL VALLEY, MARIN CO., CAL.—Bungalow, 1 story and base, \$4,500. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, John Baker. The house will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwoods. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OKDALE, STANISLAUS CO., CAL.—Residence, 2 story and base, frame, \$7,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Arthur Lietz, Oakdale. The dwelling has been designed for a modern eight-room house with baths, sleeping porch and laundry. Interior will be finished in pine with hardwood floors throughout. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath rooms and kitchen. There will be an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL.—Residence, 2 story, attic and base, frame, \$40,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Milton E. Getz. Only preliminary plans have been prepared for this building and details of construction will be given later. Mr. Getz can be addressed in care of K. Cohn & Co., 1st and Spring Sts., L. A.

SEATTLE, WASH.—Residence, 2 story, attic and base, brick, \$50,000. Architect, Julian Everett, Walker Bldg., Seattle. Owner, J. Redelsheimer. The dwelling will be in the neighborhood of 100 feet long, and has been designed to contain fifteen rooms, several baths and a laundry. Interior finish will be of pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. A central heating system and open fire places will be used. Mantel will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans will be ready for figures about April 1st.

SCHOOLS.

KING CITY, MONTEREY CO., CAL.—School, 1 story and base, frame and concrete, \$25,000. Architect, H. E. Douglas, Watsonville. Owners, King City School District. This building was mentioned in last week's issue of the Building and Industrial News, at which time it was stated that bids had been taken on the work and that a complete list of these figures would appear in the next issue. White & Thies of Santa Cruz put in the lowest figures as follows: (a) \$24,961, (b)

\$23,250, (c) \$22,000. This was for the general construction only. Bids for the heating and ventilating have not been opened. For a complete list of all figures see under San Jose and the Santa Clara Valley.

SACRAMENTO, CAL.—School, 2 story and base, reinforced concrete or brick and steel, \$180,000. Architects, S. C. & Lofquist, 550 Montgomery St., S. F. Owners, City of Sacramento. An award of this work has just been made to the above mentioned architects. Their plans were selected from a competition of 51 architects held under the A. I. A. Code. The building will contain 23 class rooms, a large auditorium, domestic science and manual training departments, two large lunch rooms, one for boys and one for girls, besides a library and teachers' rooms. Construction will be as near fireproof as the money will permit. Interior will be finished in pine and hardwood. Mechanical equipment will include steam heat, vacuum cleaning system and a modern system of ventilation and program clocks. Exterior will probably be faced with pressed brick. Working drawings are being prepared.

PASADENA, LOS ANGELES CO., CAL.—School, 2 story and base, brick. Cost not stated. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, South Pasadena High School District. Bids will be received until 12 o'clock noon, Thursday, March 27th, by the Board of Trustees of South Pasadena High School District at the high school for the erection of a Household Economy Building and Manual Arts Building. Bids will be received separately for the general work, the plumbing, electric wiring, heating and ventilating, and painting and tinting. The buildings will be of brick construction, each two stories high, 65x100 feet, with exterior faced with Redondo pressed brick, composition roof, pine finish, steam heating, modern school plumbing. Plans may be obtained at the office of the architect.

SCHOOLS — 2 story and base, brick. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, South Pasadena High School District. Bids will be received until 12 o'clock noon, Thursday, March 27th, by the Board of Trustees of South Pasadena High School District at the high school for the erection of a Household Economy Building and Manual Arts Building. Bids will be received separately for the general work, the plumbing, electric wiring, heating and ventilating, and painting and tinting. The buildings will be of brick construction, each two stories high, 65x100 feet, with exterior faced with Redondo pressed brick, composition roof, pine finish, steam heating, modern school plumbing. Plans may be obtained at the tract price, \$36,951.50.

HANFORD, KINGS CO., CAL.—School, 1 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Roman Catholic Parochial School. The building will be designed for two class rooms and a parochial hall. Interior finish will be of pine and redwood. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

ORANGE, ORANGE CO., CAL.—School, 2 story and base, brick, \$26,951.50. Architect, Fred H. Eley, Harvey-Finley Bldg., Santa Ana. Owners, Orange Union High School District. Contractor, George Kuschel, Orange. Contract price, \$36,951.50.

SANTA ANA, ORANGE CO., CAL.—Administration building, Polytechnic group, 3 story and base, brick, \$65,000. Architects, Withey & Davis, Story Bldg., L. A. Owners, City of Santa Ana. Contractor, George C. Condon, Citizens' National Bank Bldg., L. A., general construction, \$57,000; Robertson & Packard Co., Santa Ana, electric wiring, \$3,246.50; Machinery and Electric Co., L. A., heating and ventilating. Cost not stated. Bids for the plumbing, painting and program clocks were taken under advisement.

SCHOOL—2 story and base, brick, \$36,951.50. Orange, Orange Co., Cal. Architect, Fred H. Eley, Harvey-Finley Bldg., Santa Ana. Owners, Orange Union High School District. Contractor, George Kuschel, Orange. Contract price, \$36,951.50.

ADMINISTRATION BUILDING — Polytechnic group, 3 story and base, brick, \$65,000. Santa Ana, Orange Co., Cal. Architects, Withey & Davis, Story Bldg., L. A. Owners, City of Santa Ana. Contractor, George C. Condon, Citizens' National Bank Bldg., L. A., general construction, \$57,000; Robertson & Packard Co., Santa Ana, electric wiring, \$3,246.50; Machinery and Electric Co., L. A., heating and ventilating, cost not stated. Bids for the plumbing, painting and program clock were taken under advisement.

TACOMA, WASH.—College, 3 story and base, brick, \$49,339. Architect, C. Frank Mahon, Savage-Schofield Bldg., Tacoma. Owners, St. Martin's College. Contractors, Chalmers & Pearson, 2711 North Huson St. Contract price, \$49,339.

SEWERS, STREET WORK AND WATER SYSTEMS.

CALIFORNIA—State Highway construction. Cost not stated. Engineer, State Highway Commission, Sacramento. Owners, State of California. Bid have been opened by the State Highway Commission for ten miles of cement, concrete and bituminized surface road to be constructed in Los Angeles County, between Rancho El Encino and Calabasas. The engineer's estimate on this piece of work was \$61,151, and the three lowest figures were as follows: John D. Marsh, \$57,555; H. Considine, \$61,151, and Roger Brothers Co. \$61,389.

Bids for constructing seven and one half miles of water-bound macadam road with a gravel foundation to be built in Mendocino County, between Friar and Forsythe Creek, were also opened. The engineer's estimate was \$56,955. Bids were submitted as follows: Sawyer & White of Whittis \$53,315, E. B. & A. L. Stone Co., San Francisco, \$60,810, Fairbanks & Rachtel & Whittis \$67,113, and the Reichel Improvement Co., San Francisco, \$92,290. All bids have been referred to the Engineering Advisory Board, which he will take up the matter of awards at its meeting in Sacramento on March 1th.

HANFORD, KINGS CO., CAL.—Sewer system, etc., \$105,000. Engineer, City Engineer, Hanford. Owners, C.

of Hanford. An opinion has been rendered to the effect that the \$105,000 bond issue voted for municipal improvements in Hanford is illegal. This opinion is expected to affect the contract recently awarded to Chambers & Leafey of Oakland for about \$80,000 worth of sewers. The contract will probably be abrogated although no such action has yet been taken.

Contracts Awarded.

PUEBLO, LOS ANGELES CO., CAL.—Reservoir, reinforced concrete, \$12,000. Engineer's name not given. Owners, Cross Land Co., H. W. Hellman Bldg., L. A. Contractor, E. A. Simmons. Plans and. Contract price, \$12,000.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores, 1 story and base. Class C construction. Cost not stated. Architect, Lewis M. Gardner, Phelan Bldg., S. F. Owner, Mrs. Marie Fanhauser. The building will be arranged for retail stores and is to be located on McAllister street west of Van Ness avenue. Interiors of the stores will be finished in pine. There will be patent store fronts and plate glass windows. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

San Francisco—Stores and offices, 4 story and base. Class A construction. Cost not stated. Architect, Nathaniel Laisdell, 255 California St., S. F. Owners, Charles C. Moore Co. Plans for this building, which has been mentioned here before are complete and segregated figures are being taken. The structure will have a frontage on Mission street of 113 feet and 129 feet on First street. First floor will be occupied by the owners, and upper floors will be arranged for office suites designed to meet the special requirements of engineers, chemists and assayors. Construction will be fireproof throughout, with a large amount of metal trim and metal window sash and frames. Plans include elevator service, steam heat and all other modern conveniences. The exterior will be faced with pressed brick.

SAN FRANCISCO—Office addition, 3 story, Class A construction, \$100,000. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Metropolitan Insurance Co. This work includes the addition of three stories to a Class A building, which is devoted to the exclusive use of the Metropolitan Insurance Co. The new portion of the building will harmonize with the old. Steel frame will be carried up and exterior walls will be faced with white terra cotta. Interior will be finished in metal trim and interior partitions will be of hollow tile. Considerable marble and tile will be used. Plans are being prepared, but it will probably be a matter of a month or six weeks before figures are taken.

OAKLAND, CAL.—Stores and offices, 3 story and base. Class A construction. Cost not stated. Architect, Benj. McCombally, Sheldon Bldg., S. F. Owners, Carlson & Snyder. The building will be erected at the corner of 4th and Broadway in Oakland, and will cover a large ground area. Construction will be Class A throughout, with a complete steel frame, exterior walls of brick, faced with pressed brick and terra cotta. Floors will be concrete. Interior partitions will

be fireproof. Plans include metal trim, metal window sash and frames, elevator service, steam heat, vacuum cleaning and mail chutes. Working drawings are complete and specifications are being written. Bids will be called for shortly. All parts of the work will be segregated.

OAKLAND, CAL.—Stores and hall, 6 story and base, brick and steel, \$100,000. Architect, W. W. Dixon, 1844 5th Ave., Oakland. Owners, Owens and Black, Owens Apartments, Oakland. The building will be erected on Alice street between 14th and 15th streets, and has been designed for stores on the first floor, billiard parlors and dance halls on the upper floors. Considerable structural steel will be used. Exterior walls will be faced with pressed brick. Interior will be finished in pine and hardwood with tile and marble wainscoting. There will be steam heat and elevator service. Plans are complete and the work will be done by Day Labor.

TAFT, KERN CO., CAL.—Stores and offices, 1 story and base, brick, \$30,000. Architect, C. S. McNally, Mechanics Institute Bldg., S. F. Owners, Motor Transportation and Construction Co., Taft. The building will be the largest commercial structure in Taft, and will cover an area of 50x125 feet. First floor will be arranged for five large stores and upper floors for 21 offices, 2 large halls and living apartments. Interior will be finished in pine throughout. There will be steam heat. The exterior of the building will be faced with cement plaster. Plans are complete, but no figures have been called for as yet.

LOS ANGELES, CAL.—Lofts, 5 story and base, reinforced concrete. Cost not stated. Architects, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Owner, Mrs. F. W. Sahich. The building will be erected at the corner of Los Angeles and South Seventh streets, and will cover an area of 116x140 feet. Several stores will occupy the first floor and upper floors will be arranged for large light lofts. There will be steam heat, both freight and passenger elevators and a vacuum cleaning system. Copper sash will be used in the first story. Upper floors will have metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are complete and subfigures are being taken by Richards-Neustadt Co.

LOS ANGELES, CAL.—Department store, 8 story and base. Class A, \$1,000,000. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Broadway Department Store. This building will be erected at the southwest corner of Broadway and 4th streets, and will cover an area of 242x161 feet. All work will be under the supervision of the C. B. Weaver Construction Co., Wright and Callender Bldg. A contract for the structural steel work has been let and subfigures are being taken on the various other parts of the work through the Weaver Co.'s offices.

PORTLAND, ORE.—Telephone exchange and offices, 11 story and base, reinforced concrete. Cost not stated. Architect, Architectural Dept. Pacific States Tel. and Tel. Co., New Montgomery St., S. F. Owners, Pacific States Tel. and Tel. Co. This building was originally planned for a 14-story

structure, but only the first eleven stories will be erected at this time. A contract for the excavation has been completed and another contract for the steel work has been awarded to Puole-Treane Co. Plans for the balance of the contracts are complete and bids will be called for within the next six weeks.

SEALED PROPOSALS.

PROPOSALS FOR CRANES AND GRAB BUCKETS.

CRANES AND GRAB BUCKETS.—Sealed proposals, indorsed "Proposals for Locomotive Cranes" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. April 12, 1913, and then and there opened, for eleven 15-ton locomotive cranes with grab-bucket equipments, delivered and erected at the naval station, Pearl Harbor, Hawaii, and the navy yard, Puget Sound, Wash. Specifications can be obtained on application to the bureau of yards and docks. H. R. STANFORD, chief of bureau.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received in this office until 3 o'clock p. m. on the 7th day of April, 1913, and then opened, for the construction, complete (including plumbing, gas piping, heating apparatus, electric conduits and wiring, interior lighting fixtures and approaches), of the United States post office at Casper, Wyo. The building is to be of one story, mezzanine and basement, and has a ground area of approximately 4,000 square feet, fire proof first floor, stone, brick and terra cotta facing and tin roof. Drawings and specifications may be obtained from the custodian of site at Casper, Wyo., or at this office, at the discretion of the supervising architect. O. WENDEROTH, supervising architect.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 764.—Proposals for Electric Traveling Cranes, Steel Rail, Angle Bars, Truck Bolts, Switches, Track Frogs, Flat Plates, Track Chisels, Brackets Metal, Poultry Netting, Steel Wire, Taps, Screws, Cotter Pins, Hammers, Wrench Parts, Pipe Fittings, Valves, Saws, Hinges, Tackle Blocks, Torches, Ladders, Ropes, Dows, Hose, Silica Sand, Foundry Clay Block, Enamel and Lumber.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. March 26, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 764) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; E. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CONSTRUCTING BUILDING.

BUILDING.—U. S. Engineer Office, 602 Burke Building, Seattle, Wash.—

Sealed proposals for building lock-keeper's house at lock site, Lake Washington Canal, Seattle, Wash., will be received here until 11 a. m. March 18, 1913, and then publicly opened. Information on application. J. B. CAVANAUGH, major, engineers.

PROPOSAL FOR BUILDING AND

WATER AND SEWER SYSTEM.
BUILDING, WATER AND SEWER SYSTEM.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Buildings, Etc., Coeur d'Alene Indian Agency, Idaho," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m. March 24, 1913, for furnishing materials and labor for the erection of seven frame cottages, frame warehouse, frame office, frame pump house and concrete guardhouse and the installation of water and sewer system at the Coeur d'Alene Indian Agency, Idaho, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at this office, the offices of the supervisor of construction, Denver, Colo.; the U. S. Indian warehouses at San Francisco, Cal.; the Builder and Employers' Association, Tacoma, Wash., and at the agency. For further information apply to the superintendent of the Coeur d'Alene Indian Agency, Tekoa, Wash. F. H. ABBOTT, acting commissioner.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 763.—C.—Proposals for the Purchase of Brass and Copper Scrap Offered for Sale by the Isthmian Canal Commission.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 2:30 p. m. March 24, 1913, at which time they will be opened in public, for purchasing the above mentioned articles. Blanks and general information relating to this circular (No. 763-C) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer office at Seattle, Wash. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CONSTRUCTING PIER.

PIER WORK.—Sealed proposals, indorsed "Proposals for Pier No. 4," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. March 29, 1913, and then and there publicly opened, for Pier No. 4 at the navy yard, Puget Sound, Wash. Amount available, \$175,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named, H. R. STANFORD, chief of bureau.

PROPOSALS FOR PAVING.

PAVING.—Office of Quartermaster, Fort Flagler, Wash.—Sealed proposals, in triplicate, will be received in this office until 11 a. m. March 25, 1913, and then opened, for construction of granite sidewalk at this post. Further information may be obtained by applying at this office or quartermaster's of-

fice at Seattle, Wash. HERBERT O'LEARY, second lieutenant, coast artillery corps, assistant quartermaster.

PROPOSALS FOR PLAY PIPES.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, San Francisco.

In accordance with a resolution of the Board of Fire Commissioners duly passed February 14, 1913, sealed proposals will be received in open session of the Board on Friday, March 14, 1913, between the hours of 8:30 and 9 o'clock a. m. for furnishing fifty high pressure play pipes, complete, with tips and clamps, for use in the San Francisco Fire Department, in strict accordance with the specifications and conditions contained in the proposal blanks prepared by this department and approved by the Board of Fire Commissioners, on file, and copies of which may be obtained at the office of said Board, 1231 Market street, San Francisco, Cal.

FRANK T. KENNEDY, Secretary.

PROPOSALS FOR GYMNASIA.

SEALED bids will be received for the Equipment and Installation of Gymnasia of the Lowell High School and the Girls' High School. Specifications may be had at the office of the undersigned.

Sealed proposals will be received at open session of the Board of Education Wednesday, March 19th, 1913 at 2 o'clock p. m. M. R. NORRIS, Acting Secretary Board of Education.

DARED DO JUSTICE.

The universal acceptance of the California railroad commission's decision in the railway merger case illustrates the value of having an independent commission, possessed of the public confidence. Here was a decision distinctly in favor of the Southern Pacific. Its immediate effect was to put up the price of Southern Pacific stock, and stop the manipulation of the "bears" who were looting it in the market. Yet not a person has so much hinted in his innermost soul that the commission was under Southern Pacific influence to render this decision. In fact, for familiar stock-market reasons the official influence of the Southern Pacific management, would have been against the interests of the company. The Southern Pacific was better protected by the railroad commission than by its own directors. Yet the people of California, not only do not suspect this commission of deciding in the interests of the railroad. For the most part, they are glad it was done. For it seems that the interest of the railroad and of the people was probably identical. And the people are friendly, not hostile to the Southern Pacific. They were never hostile to it as a business institution, and a business institution is the only thing it now is.

The worst investment the Southern Pacific ever made was to own the California railroad commission for thirty years. The best thing that ever happened to it was to get under a commission it did not own, elected on a radical "anti-railroad" ticket, and acting under a law giving it almost absolute power over the road. It is only a just commission that dares justice. And justice is a better permanent asset than protection—Free Republican.

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCES—2, 2 story and base, frame. Cost not stated. San Francisco. Architect, Louis Christian Mullgardt, Chronicle Bldg., S. F. Owners, West Lake Park Co. These two houses will be erected on San Diego Way in St. Francis Wood. Each of the houses will contain from six to eight rooms with baths and sleeping porches. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster. Plans are complete and construction will shortly be undertaken.

RESIDENCES—2, 2 story and base, frame, \$5,000 each. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Schole, 363 14th avenue. These houses will be erected on Lake street east of 25th avenue. Each will be arranged for eight rooms and bath. All interior finish will be of pine. Oak floors will be used in the reception hall, living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heaters will be installed. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOWS—2, 1 story and base, frame, \$1,650 each. San Francisco. Architect, none. Owner, A. Wesen-dunk, 1747 Dolores St., S. F. These houses will each contain six rooms and bath. Interior finish will be entirely of pine and redwood with some hardwood flooring. There will be open fire places with tile mantels in the living rooms. Exteriors will be covered with rustic and cement plaster. Plans are complete and the owner will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$2,700. San Francisco. Architect, none. Owner, J. M. Peters, 1010 Balboa St., S. F. The house will contain seven rooms and bath. Interior will be finished in pine with some elm panels. There will be an open fire place in the living room. Hardwood floors will be used in the living and dining rooms. Bath room will be finished in tile. There will be an automatic water heater. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCES—2, 2 story and base, frame. Cost not stated. San Francisco. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The National Engineering Co. are completing plans and specifications for two high class dwellings, which will be erected at once in this city. Plans are also nearly complete for a \$5,000 residence in

Alameda, several bungalows in Oakland and a \$5,000 dwelling to be erected in San Rafael. Bids will be taken by the National Engineering Co. within a week for the two city jobs, and within ten days on the Alameda work.

RESIDENCES—2, 2 story and base, frame, \$2,900 each. San Francisco. Architect, none. Owner, Theodore Gibson, 355 Fair Oaks, S. F. Each of the houses has been designed for a seven-room dwelling with bath and laundry. Interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places in the living rooms. Bath rooms will have tile wainscoting. Mantels will be of brick. The exteriors of the houses will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Fernando Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a six-room house with all modern conveniences. Interior will be finished in pine and redwood. There will be open fire places and brick or tile mantels. Hardwood floors will be used in the principal rooms. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1 story and base, frame, \$1,000. San Francisco. Architect, John F. Haner, 3579 19th St., S. F. Owner, G. W. Lambert. The bungalow will contain five rooms and bath. All interior trim will be of pine. Oak flooring will be used in the living and dining rooms. There will be an open fire place in the living room with a brick mantel. The exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1½ story and base, frame, \$1,900. San Francisco. Architect, none. Owner, Oscar Heyman, 742 Market St., S. F. The house will contain six rooms and bath. Interior will be finished in pine and redwood throughout. There will be a large open fire place in the living room. Hardwood floors will be used in the principal rooms. The exterior of the dwelling will be covered with rustic and shiplap. The work will be done under the Day Labor system.

BUNGALOWS—2, 1½ story and base, frame, \$1,200 each. San Francisco. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner, Margaret C. Woodside. These houses will be erected on Putnam avenue, and each will contain five rooms and bath. Pine and redwood will be used for trim throughout. There will be open fire places and tile or brick mantels. Some oak flooring will be used. Exteriors will be covered with rustic. Plans are complete and the work will be done under the Day Labor system.

BUNGALOW—1 story and base, frame, \$2,000. San Francisco. Archi-

tect, none. Owners, Roemer and Walton, 11 Guerrero St., S. F. The dwelling has been designed for an eight-room house with bath and laundry. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath room and kitchen. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, N. J. Nelson, 4278 23rd St., S. F. The house will contain six rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. A large open fire place will be used in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$30,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Anna C. Brownlee. This building has been mentioned in these columns a number of times before. Plans are now complete and gures are being taken. The building is designed to contain a number of two and three room suits with wall beds and private bath rooms. Interiors will be handsomely finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. A central heating system will be installed. Hot and cold running water will be supplied to all rooms. The exterior of the building will be covered with cement plaster on metal lath.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, James and Mary Ward. The building will be erected at the southeast corner of Clay and Taylor streets. There will be stores on the first floor and a number of two and three room suites on the upper two floors. Interior finish will be of pine and redwood with some hardwood floors. All suites will have connecting baths and wall beds. A central heating system and hot water plant will be installed. Bath rooms will have tile wainscot. The exterior of the building will be covered with shiplap. Plans for this work are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owners, Metropolis Investment Co. The building will cover an area of 37½x94 feet and will contain apartments arranged in suites of two and three rooms each. There will be a central heating system and hot water plant. All suites will have private baths and wall beds. Interiors will be finished in pine and redwood. Some oak floors will be used. Tile will be used in the bath rooms and kitchens. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, reinforced concrete, \$16,000. San Francisco. Architect, C. Fantoni, 916 Kearny St., S. F. Owner's name withheld. The building will contain a number of two room suites with private baths. Interior finish will be of pine throughout. Bath rooms and kitchens will have tile wainscot. There will be a hot water plant installed. Exterior of the building will be faced with cement plaster. Only preliminary plans have been prepared and working drawings will be completed as rapidly as possible.

APARTMENT HOUSE—6 story and base. Class C construction, \$75,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected in the south line of Bush street near Mason and will have a frontage of 50 feet and a depth of 137½ feet. The interior will be arranged for a number of two and three room suites, all of which will have connecting baths and wall beds. Plans include a steam heating plant, elevator service, vacuum cleaning system and hot water plant. Interior will be finished in pine and hardwoods. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$20,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Herman Hogrefe. The building will be erected at the northeast corner of Union and Van Ness avenue, and will cover an area of 30x90 feet. Stores will occupy the first floor. Upper two floors will be arranged for eleven apartments of two and three rooms each. All suites will have wall beds and private bath rooms. Interior will be finished in pine and elm veneer. Tile and marble will be used in the bath rooms and entrance lobby. There will be a central heating system and hot water plant. The exterior of the building will be covered with shiplap and special run rustic. Plans are complete and the work will be done by Day Labor.

PIER NO. 46—Wood pile construction. Cost not stated. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Plans and specifications have been approved for the construction of Pier No. 46, which is to be erected between Pier No. 44 and the Channel. This structure will be carried on wood piles and will have a frame shed covering the whole structure. The pier will be 800 feet in length and 200 feet wide. Besides the shed there will be two spur tracks. Bids will be called for as soon as the plans receive the approval of the State Board of Control.

FLATS—3 story and base, frame, \$6,000. San Francisco. Architect, none. Owner, Caspar Hexsig, 2079-B 15th St., S. F. The building will have a frontage of 25 feet and a depth of 61 feet. Interior will be arranged for three modern flats of four and five rooms each with baths. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used in the principal rooms. Gas grates and tile mantels will be used in all living rooms. The exterior of the

building will be covered with rustic and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, John Dahlin, 127 Judah St., S. F. The building has been designed for two modern flats and a store, and will cover an area of 25x87 feet. Interior finish will be of pine and redwood. Open fire places and brick or tile mantels will be used in the living rooms. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic and cement plaster. Plans are complete and the owner will do the work by Day Labor.

FLATS—3 story and base, frame, \$5,500. San Francisco. Architect, none. Owner, G. Spirz, 232-A Langton St., S. F. The building will have a frontage of 24 feet and a depth of 60 feet. Interior will be arranged for three modern flats of five and six rooms each with bath. All interior trim will be of pine or redwood. Some oak floors will be used. Tile will be used in the bath rooms and kitchens. There will be gas grates and tile or brick mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

WAREHOUSE ADDITION—2 story frame, \$2,000. San Francisco. Architect, none. Owners, Roebeling Construction Co., Crocker Bldg., S. F. The addition will be made to a building 50x75 feet. There will be a concrete foundation, metal skylights, corrugated iron roof and sheathing. Interior will not be finished. Plans are complete and the work will be done by Day Labor.

DAIRY DEPOT—2 story and base, reinforced concrete. Cost not stated. San Francisco. Engineer, C. F. Wieland, Mutual Savings Bank Bldg., S. F. Owners, Dairy Delivery Co. The building will be erected on the property at 1350 19th street, the site of the present plant of the owners. The structure will cover an area of 60x60 feet, and will be practically fireproof throughout. There will be reinforced concrete walls and floors, tar and gravel roof and metal window sash and frames. Special attention has been given to the sanitary conditions. The exterior of the building will be faced with cement plaster. Plans are being prepared.

GARAGE—5 story and base, reinforced concrete, \$35,000. San Francisco. Engineers, Heller & Wilson, First National Bank Bldg., S. F. Owner, Dr. Albert Abrams. The building will be erected at the southwest corner of Van Ness avenue and California street, and will cover a considerable ground area. The front portion of the building has been arranged for automobile show rooms and the rear and upper floor for repair shop, storage space and shipping departments. Interior of the sales rooms will be finished in hardwood and tile. Metal window frames and sash will be used. The exterior of the building will be faced with cement plaster. A concrete floor will be used on the first floor. Plans are complete and figures are being taken.

HOSPITAL ADDITION—1 story and base, reinforced concrete, \$18,000. San Francisco. Architects, Constructing Q. M. Dept., Fort Mason. Owners, United States Government. Bids will be called for early this month by the

Constructing Q. M. Dept. at Fort Mason for the construction of a one-story and basement, reinforced concrete addition to the Letterman General Hospital at the Presidio, and for 100 feet of reinforced concrete sea wall at Fort Mason. The hospital addition is estimated to cost \$18,000. The official call for bids will be published in these columns.

STORES—1 story and base. Class C construction. Cost not stated. San Francisco. Architect, Lewis M. Gardner, Phelan Bldg., S. F. Owner, Mrs. Marie Panhauser. The building will be arranged for retail stores, and is to be located on McAllister street west of Van Ness avenue. Interiors of the stores will be finished in pine. There will be patent store fronts and plate glass windows. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES AND OFFICES—4 story and base. Class A construction. Cost not stated. San Francisco. Architect, Nathaniel Blaisdell, 255 California St., S. F. Owners, Charles C. Moore Co. Plans for this building, which has been mentioned here before, are complete and segregated figures are being taken. The structure will have a frontage on Mission street of 113 feet and 12½ feet on First street. First floor will be occupied by the owners and upper floors will be arranged for office suites designed to meet the special requirements of engineers, chemists and assayers. Construction will be fireproof throughout with a large amount of metal trim and metal window sash and frames. Plans include elevator service, steam heat and all other modern conveniences. The exterior will be faced with pressed brick.

OFFICE ADDITION—3 story. Class A construction, \$100,000. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Metropolitan Insurance Co. This work includes the addition of three stories to a Class A building which is devoted to the exclusive use of the Metropolitan Insurance Co. The new portion of the building will harmonize with the old. Steel frame will be carried up and exterior walls will be faced with white terra cotta. Interior will be finished in metal trim and interior partitions will be of hollow tile. Considerable marble and tile will be used. Plans are being prepared, but it will probably be a matter of a month or six weeks before figures are taken.

MUNICIPAL AUDITORIUM—4 story and base. Class A construction, \$1,000,000. San Francisco. Architects, John Galen Howard, John Reid, Jr., and Frederick K. Meyer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the \$1,000,000 auditorium to be erected in the civic center have been approved by the Executive Committee of the Panama-Pacific International Exposition. The money to build the great meeting house has been set aside by the Exposition Company, which aims to have the building completed by 1915 so that the numerous conventions gathering in San Francisco that year can properly be housed.

The Auditorium will be of stone, and with the City Hall, it will form the keynote of the stupendous scheme. It will flank the southern end of the great plaza.

Lloyd S. Ackerman

Attorney-At-Law

Rooms 414-418 Nevada Bank Bldg.
14 Montgomery St., S. F.

The great feature of the interior of the main auditorium will be the octagonal dome, 190 feet in diameter. The steel structure of this dome will be exposed and will present a strong architectural effect. The seating capacity is approximately 11,000. A place has been set aside in the architects' sketch indicating accommodations for 900 banqueters. The eastern and western or minor auditoriums, easily will take care of from 750 to 900 persons each. A kitchen with all necessary appointments is provided for in the basement of the east wing.

On the third and fourth floors there will be committee rooms and exhibition spaces at the eastern and western sides.

The stage or platform will be large enough to meet the average requirements for large concerts. A portable stage made in sections will be provided and stored under the permanent stage when not in use. The structure will be equipped with a magnificent pipe organ.

HOTEL—3 story and base, frame, 12,000. San Francisco. Architect, C. Antoni, 916 Kearny St., S. F. Owner's name withheld. The building will contain a number of single rooms on the upper floors and store and hotel lobby on the first floor. Interior finish will be of pine and redwood. All rooms will be supplied with hot and cold running water. The exterior of the building will probably be covered with clay and rustic. Preliminary plans only have been prepared.

Contracts Awarded.

CHURCH—2 story and base, reinforced concrete, \$50,000. San Francisco. Architect, P. Brouchoud, 521 Bush St., S. F. Owners, French Roman Catholic Church. Contractor, James McLaughlin, 244 Kearny St., concrete work, \$26,000. Note: This is the only contract so far awarded. Plans for the balance of the work are complete and figures will be called for within a short time.

PATENTS

Promptly obtained **OR NO FEE**. Trade-Marks, Copyrights and Labels registered. **TWENTY YEARS' PRACTICE**. Highest references. Send model, sketch or photo, for free report on patentability. All business confidential. **HAND-BOOK FREE**. Explains everything. Tells how to obtain and sell patents. What inventions will pay. How to get a partner, explains best mechanical movements, and contains 300 of our subjects of importance to inventors.

Box 239 Wilson Bldg. WASHINGTON, D. C.

FACTORY—5 story and base, reinforced concrete, \$120,000. San Francisco. Architect, George William Kelham, Sharon Bldg., S. F. Owners, Gantner & Mattern Co. Contractors, Lindgren & Co., Menadnock Bldg., S. F. Contract price, \$120,000.

Bids Opened For Highway Work.

Bids on Two Projects Were Opened and Referred to Advisory Board. Bids Within Appropriation.

Bids have been opened by the State Highway Commission for ten miles of cement, concrete and bituminized surface road to be constructed in Los Angeles County, between Rancho El Encino and Calabasas. The engineer's estimate on this piece of work was \$61,151 and the three lowest figures were as follows: John D. Marsh, \$55,555; J. H. Considine, \$61,151, and Roger Bros. Co., \$61,359.

Bids for constructing seven and one-half miles of water bound macadam road with a gravel foundation to be built in Mendocino County, between Ukiah and Forsythe Creek, were also opened. The engineer's estimate was \$56,055. Bids were submitted as follows: Sawyer & White, Willits, \$53,313; E. B. and A. L. Stone Co., S. F., \$60,840; Farbanks & Bachtel, Willits, \$67,143, and the Raisch Improvement Co., S. F., \$92,299.

All bids have been referred to the Engineering Advisory Board, which body will take up the matter of awards at its meeting in Sacramento on March 4th.

BUILDING SUPERINTENDENT.

Glacken, Edw. E. General building superintendent, architectural and structural; supervision of any class of building construction. Expert in reinforced concrete, including cost data, design, floor load, quantity surveying, etc. Address 568 Golden Gate Ave. Phone Franklin 7619.

San Francisco

Cut out the cost of curved form work

You can now specify curved or arched construction—admittedly the strongest type—without the prohibitive cost of form work.

This expense is no longer necessary. Eliminate it entirely by **using a reinforcement which is also a centering.**

Draw your plans on stronger, lighter lines, save money for your client and give freer scope to your own artistic ideas, by specifying

"Self-Sentering" is a new form of expanded metal for concrete work and general fireproofing. It is a combined reinforcement and centering, which can be used with economy and advantage in all classes of buildings, for roofs, floors, walls, ceilings—practically every form of concrete construction.

"Self-Sentering" is made regularly in sheets 28" wide and up to 14' long; or curved in the factory to any desired radius.

The Standard Fireproofing Reinforcement

Roofs constructed with "Self-Sentering" are the lowest cost concrete roofs that can be built, requiring only 2" of concrete. **Floors** to carry heavy loads can be planned with arched slab construction without form work up to 12' spans. **Suspended Ceilings** may be built with supports 5' between centers. **Partitions** only 2" thick are strong, rigid and low in cost, if built with "Self-Sentering".

Write For Our "Fireproofing Handbook"

We will be glad to send you a complimentary copy on request. It is a handsome 80-page illustrated book, published for Architects, Engineers and Contractors. It will give you concisely all the facts you want to have regarding "Self-Sentering".

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base,
 frame, \$3,000. Oakland, Cal. Archi-
 tect, none. Owner, J. A. Bisehoff, 349
 62nd St., Oakland. The dwelling has
 been designed for a modern six-room
 house with bath. Interior will be
 finished in pine, redwood and some
 hardwood. Oak floors will be used in
 the living and dining rooms and re-
 ception hall. There will be furnace
 heat and open fire place. Mantel will
 be of brick. Tile will be used in the
 bath room and kitchen. The exterior
 of the dwelling will be covered with
 cement plaster. Plans are complete
 and the work will be done by Day
 Labor.
 RESIDENCE — 2 story and base,
 frame, \$3,500. Berkeley, Alameda Co.,

Cal. Architect, Albert Farr, Foxcroft
 Bldg., S. F. Owner, Dr. F. W. Har-
 den. This house will contain seven
 rooms and bath. All interior finish
 will be of pine or redwood. There will
 be furnace heat and open fire place.
 Hardwood floors will be used in the
 principal rooms. Mantel will be of
 brick. Tile will be used in the bath
 room and kitchen. An automatic
 water heater will be installed. The
 exterior of the dwelling will be cov-
 ered with cement plaster. Plans are
 complete and figures are now being
 taken.

RESIDENCE — 2 story and base,
 frame, \$4,000. Piedmont, Alameda Co.,
 Cal. Architect, none. Owner, F. J.
 Fernhoff, 1741 Franklin St., Oakland.
 The dwelling has been designed for a
 seven-room house with all modern
 conveniences. There will be furnace
 heat and open fire places. Mantels
 will be of brick and tile. Interior fin-
 ish will be of pine, redwood and some
 hardwood. Oak floors will be used in
 the living and dining rooms and re-
 ception hall. Tile will be used in the
 bath and kitchen. The exterior of
 the house will be covered with ce-
 ment plaster on metal lath. Plans are
 in the hands of the owner and the
 work will be done by Day Labor.

RESIDENCE — 2 story and base,
 frame, \$3,950. Oakland, Cal. Archi-
 tect, none. Owner, H. M. Turrell, 456
 Loan St., Oakland. The house has
 been designed for an eight-room
 dwelling with bath. All interior finish
 will be of pine and redwood. Hard-
 wood floors will be used in the prin-
 cipal rooms. There will be open fire
 places and brick or tile mantels. Tile
 will also be used in the bath room
 and kitchen. The exterior of the
 house will be covered with rustic and
 shingles. Plans are complete and the
 work will be done by Day Labor.

RESIDENCE — 2 story and base,
 frame, \$4,000. Oakland, Cal. Archi-
 tect, A. W. Smith, 1010 Broadway,
 Oakland. Owner, Henry Perfontaine.
 This house will be arranged to con-
 tain six rooms, sleeping porch and
 bath. Interior will be finished in pine
 and hardwoods. Oak floors will be
 used throughout. There will be fur-
 nace heat and open fire places. Man-
 tels will be of brick. Tile will be used
 in the bath room and kitchen. Ex-
 terior will be covered with brick ven-
 eer and shiplap. Plans are complete
 and now out for figures.

BUNGALOW — 1½ story and base,
 frame, \$3,000. Oakland, Cal. Archi-
 tect, none. Owners, Junk, Riddell &
 Co., 2247 Telegraph Ave., Oakland.
 The dwelling has been designed for a
 six-room house with bath and sleeping
 porch. Interior finish will be of pine
 and some hardwood. Hardwood floors
 will be used in the living, and dining
 rooms and reception hall. There will
 be furnace heat and open fire place.
 Mantel will be of tile or brick. Tile
 will be used in the bath room and
 kitchen. An automatic water heater
 will be installed. The exterior of the
 dwelling will be covered with cement
 plaster on metal lath. Plans are com-
 plete and the work will be done by
 Day Labor.

RESIDENCE — 2 story and base,
 frame, \$6,500. Oakland, Cal. Archi-
 tect, Olin S. Grove, 2911 Telegraph
 Ave., Berkeley. Owner, Mr. Grant.
 The dwelling will be erected in Rock-
 ridge Park, and has been designed for
 an eight-room house with baths and

ceping porch. Interior will be finished in pine, redwood and some oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, cost not stated, Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, S. D. Beasley. The house will be erected in Berkeley Heights, and will contain seven rooms, bath and sleeping porch. Interior finish will be of pine, redwood and hardwoods. There will be furnace heat and an open fire place. Hardwood floors will be used in the principal rooms. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with shingles. Plans are complete and bids are now being taken for the construction.

APARTMENT HOUSE—3 story and base, frame, \$9,000. Oakland, Cal. Architect, none. Owner, E. A. Schmidt, 1077 16th St., Oakland. The building has been designed to contain 33 rooms which will be arranged in two room apartments with wall beds and private baths. All interior finish will be of pine or redwood. Some oak floors will be used. Bath rooms will have tile wainscot. Gas grates will probably be used. Mantels will be of tile. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$10,000. Oakland, Cal. Architect, none. Owner, Louis Engler, 2721 Haste St., Oakland. The dwelling has been designed for a fourteen-room house with several baths and a laundry, and will be erected on Spruce street near Virginia. Interior will be finished in pine and redwood with some hardwood floors. There will be a central heating system and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and the work is to be done by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. Alameda, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owners, Green and Walker. The house will contain eight rooms and bath. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior will be covered with shingles and cement plaster. Plans are complete and the owners will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Mrs. V. H. Owens. The house has been designed for an eight-room dwelling with bath and laundry. Interior will be finished in pine, red-

wood and some hardwoods. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOWS—12, 1 story and base, frame, \$2,500 each. Oakland, Cal. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, Roger Coit, 1522 Broadway, Oakland. These dwellings will be erected on property at 51st street and Manila avenue, and each will contain six rooms and bath. All interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and brick and tile mantels. Tile will also be used in the baths and kitchens. Exteriors will be finished with cement plaster, rustic and shingles. Plans are being completed as rapidly as possible and the work will be done by Day Labor. The owner is now in the market for all kinds of building materials.

BUNGALOW—1½ story and base, frame, \$3,750. Oakland, Cal. Architect, Henry L. Wilson, L. A. Owners, J. H. and Kate Plattner, 434 Leavenworth St., S. F. The dwelling will contain seven rooms and bath. Interior will be finished in pine and redwood with some hardwood floors. There will be a central heating system and open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster. Plans are complete and in the hands of the owners, who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, Roger Coit. The dwelling has been designed for an eight-room house with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of tile and cement. The bath and kitchen will have some tile wainscoting. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

STORES AND OFFICES—15 story and base, Class A construction. Cost not stated. Oakland, Cal. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Carlson and Snyder. The building will be erected at the corner of 15th and Broadway in Oakland, and will cover a large ground area. Construction will be Class A throughout, with a complete steel frame, exterior walls of brick, faced with pressed brick and terra cotta. Floors will be of concrete. Interior partitions will be fireproof. Plans include metal trim, metal window sash and frames, elevator service, steam heat, vacuum cleaning and mail chutes. Working drawings are complete and specifications are being written. Bids will be called for shortly. All parts of the work will be segregated.

STORES AND HALL—6 story and base, brick and steel, \$100,000. Oakland, Cal. Architect, W. W. Dixon, 1844 5th Ave., Oakland. Owners, Owens and Black, Owens Apartments, Oak-

land. The building will be erected on Alice street, between 14th and 15th streets, and has been designed for stores on the first floor, billiard parlors and dance halls on the upper floors. Considerable structural steel will be used. Exterior walls will be faced with pressed brick. Interior will be finished in pine and hardwood with tile and marble wainscoting. There will be steam heat and elevator service. Plans are complete and the work will be done by Day Labor.

SWITCH TOWER—3 story, reinforced concrete, \$10,000. Oakland, Cal. Architects, Architectural Dept., Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for a switch tower, which is to be erected at the 16th street depot, have been completed and are now out for figures. Interior will be finished in pine. Metal window sash and frames are specified. The exterior of the building will be faced with cement plaster.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Oakland, Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, D. Iwyer. Contractor, W. A. Savage (at the site) 41st and Piedmont Ave., Oakland. This contract has been taken on a percentage basis.

BUNGALOW—1 story and base, frame, \$2,800. San Jose, Santa Clara Co., Cal. Architect, none. Owner, W. M. Lewis, 165 N. 16th St., San Jose. The house has been designed for a six-room dwelling with bath and sleeping porch. Interior finish will be of pine and red oak with some oak floors. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

SCHOOL—1 story and base, frame and concrete, \$25,000. King City, Monterey Co., Cal. Architect, H. B. Douglas, Watsonville. Owners, King City School District. This building was mentioned in last week's issue of the Building and Industrial News, at which time it was stated that bids had been taken on the work and that a complete list of these figures would appear in the next issue. White & Thies of Santa Cruz put in the lowest figures as follows: (a) \$24,961, (b) \$23,250, (c) \$22,000. This was for the general construction only. Bids for the heating and ventilating have not been opened. For a complete list of all figures see under San Jose and the Santa Clara Valley.

King City School Bids Are Opened.

White & Thies, of Santa Cruz, Will Probably be Awarded Contract on One of Three Propositions.

Three sets of figures were opened on March 1st by the Board of School Trustees of the King City School District, in Monterey County, for the construction of the new concrete and frame school building. Bids were taken on three propositions. Plans for the building were prepared by Architect H. B. Douglas of Watsonville. White & Thies of Santa Cruz were low men on each of the three propositions. The following is a list of all bids as received:

General Construction.

White & Thies, Santa Cruz, (a) \$24,961; (b) \$23,250; (c) \$22,000.
C. J. Drosch, Merced (a) \$28,396; (b) \$26,595; (c) \$25,264.
J. H. W. Jones, Watsonville (a) \$35,042.75; (b) \$33,278.35; (c) \$32,000.

A contract for the work will probably be awarded to White & Thies of Santa Cruz, but on which of the three propositions has not been decided.

SCHOOL—2 story and base, reinforced concrete or brick and steel, \$180,000. Sacramento, Cal. Architects, Shea & Lofquist, 550 Montgomery St., S. F. Owners, City of Sacramento. An award of this work has just been made to the above mentioned architects. Their plans were selected from a competition of 51 architects held under the A. I. A. Code. The building will contain 23 class rooms, a large auditorium, domestic science and manual training departments, two large lunch rooms, one for boys and one for girls, besides a library and teachers' rooms. Construction will be as near fireproof as the money will permit. Interior will be finished in pine and hardwood. Mechanical equipment will include steam heat, vacuum cleaning system and a modern system of ventilation and program clocks. Exterior will

probably be faced with pressed brick. Working drawings are being prepared.

STATE HIGHWAY COMMISSION.—Cost not stated. California. Engineer, State Highway Commission, Sacramento. Owners, State of California. Bids have been opened by the State Highway Commission for ten miles of cement, concrete and bituminized surface road, to be constructed in Los Angeles County, between Rancho El Encino and Calabasas. The engineer's estimate on this piece of work was \$61,151, and the three lowest figures were as follows: John D. Marsh, \$55,555, J. H. Constine, \$61,151, and Roger Brother Co. \$61,389.

Bids for constructing seven and one-half miles of water bound macadam road with gravel foundation to be built in Mendocino County between Ukiah and Forsythe Creek were also opened. The engineer's estimate was \$56,055. Bids were submitted as follows: Sawyer & White of Willits, \$53,313, E. B. & A. L. Stone Co., San Francisco, \$60,840, Fairbanks & Bachtel of Willits \$67,143, and the Raich Improvement Co., San Francisco, \$92,299. All bids have been referred to the Engineering Advisory Board, which body will take up the matter of awards at its meeting in Sacramento on March 1th.

Amador County High School Bids Opened.

Roberts Bros. Company of This City Secure Contract For New School Building at Sutter Creek.

Four sets of figures were opened by the Board of School Trustees for the construction of the Amador County High School, which is to be constructed at Sutter Creek. Plans for the building were prepared by Architects Kenyon & Parker, 214 Kearny street, San Francisco. Roberts Bros. Company, Sheldon Bldg., San Francisco presented the lowest bid at \$23,650 and were awarded the contract. Others bids were as follows:

General Construction.

Campbell & Turner\$24,370

Peterson & Wilson 25,775

Roberts Bros., Inc. 22,650

Arthur Arlett 31,000

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

CHURCH—2 story and base, reinforced concrete, \$24,000. Modesto, Stanislaus Co., Cal. Architect, John J. Foley, 16 Kearny St., S. F. Owners, St. Stanislaus Parish. This building will be designed in the Spanish Colonial style, with a cement plaster exterior and clay tile roof. The main auditorium will have a seating capacity of 500 people and will be finished in pine, redwood and ornamental plaster. A central heating system will be installed. Working drawings are being prepared and bids will be called for as soon as possible.

RESIDENCE—2 story and base, frame, \$7,000. Oakdale, Stanislaus Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Arthur Lietz, Oakdale. The dwelling has been designed for a modern eight-room house with bath, sleeping porch and laundry. Interior will be finished in pine with hardwood floors throughout. There will be furnace heat and open fire places. Mantels will be of brick or tile. The will be used in the bath rooms and kitchens. There will be an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

STORES AND OFFICES—1 story and base, brick \$20,000. Taft, Kern Co., Cal. Architect, C. S. McNally, Mechan-

as' Institute Bldg., S. F. Owners, Motor Transportation and Construction Co. Taft. The building will be the largest communal structure in Taft, and will cover an area of 50x125 feet. First floor will be arranged for five large stores, and upper floors for 21 offices, two large halls and living apartments. Interior will be finished in pine throughout. There will be steam heat. The exterior of the building will be faced with cement plaster. Plans are complete but no figure has been called for as yet.

CLUB HOUSE—3 story and base, brick, \$30,000. Bakersfield, Kern Co., Cal. Architect's name not given. Owners, Bakersfield Club. The building will be erected at the corner of 19th and F streets, and has been designed for a modern city club. Interior arrangement will include several large social rooms, billiard hall, bowling alley, dining room, library and several living apartments. Interior finish will be of pine and hardwoods. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the Building Committee, which consists of F. N. Scofield, W. E. Benz and J. A. Hughes. Bids will be called for within three weeks.

SCHOOL—1 story and base, brick. Cost not stated. Hanford, Kings Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Roman Catholic Parochial School. The building will be designed for two class rooms and a parochial hall. Interior will be of pine and redwood. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SEWER SYSTEM, ETC.—\$105,000. Engineer, City Engineer, Hanford. Owners, City of Hanford. An opinion has been rendered to the effect that the \$105,000 bond issue voted for municipal improvements in Hanford is illegal. This opinion is expected to affect the contract recently awarded to Chambers & Heafey of Oakland for about \$50,000 worth of sewers. The contract will probably be abrogated, although no such action has yet been taken.

Contracts Awarded.

LODGE HALL—1 story and base, brick, \$36,000. Fresno, Fresno Co., Cal. Architects, Starbuck & Clark, Fresno Owners, Knights of Pythias. Contractor, D. A. Cowan, Fresno. Contract price, \$36,000. Note: The building will cover an area of 75x700 feet.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. R. Jeffery, Citizens' National Bank Bldg., L. A. Owner, Mrs. Ella Barker. The building is to occupy a corner site and will contain 90 rooms arranged in two and three room suites with private baths and wall beds. Interior will be finished in pine with some hardwood floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The work has been mentioned here before. Plans are now complete and figures are being taken.

APARTMENT HOUSE—4 story and

base, brick. Cost not stated. Los Angeles, Cal. Architects, Home Seekers Building Corp., Higgins Bldg., L. A. Owner, Mrs. P. G. Tompkins. The building will cover an area of 42x130 feet and will contain 80 rooms, arranged in two and three room suites with private baths and wall beds. There will be steam heat and elevator service. Interior finish will be of pine with some hardwood floors and oak veneer. Bath rooms will have tile wainscot and composition floors. A vacuum cleaning system and a hot water plant will be installed. The exterior of the building will be faced with pressed brick. Plans for the work are being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owner, F. Lane. The building will cover an area of 46x135 feet. The interior has been planned for 75 rooms, arranged in suites of two and three rooms each. All apartments will have connecting baths and wall beds. Steam heat, a hot and cold water system, elevators and a vacuum cleaning system are specified in the mechanical equipment. Interior finish will be of pine and redwood with some oak floors. Baths will have composition floors and tile wainscot. Metal window frames and sash are specified. The exterior of the building will be faced with pressed brick. Entrance will be finished in marble and tile. Plans are being prepared.

RESIDENCE—2 story, attic and base, frame, \$10,000. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Milton E. Getz. Only preliminary plans have been prepared for this building, and details of construction will be given later. Mr. Getz may be addressed in care of K. Cohn & Co., 1st and Spring Sts., L. A.

LOFTS—5 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Owner, Mrs. F. W. Sabieh. The building will be erected at the corner of Los Angeles and South Seventh streets, and will cover an area of 116x140 feet. Several stores will occupy the first floor and upper floors will be arranged for large light lifts. There will be steam heat, both freight and passenger elevators and a vacuum cleaning system. Copper sash will be used in the first story. Upper floors will have metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are complete and subfigures are being taken by Richards-Neustadt Co.

DEPARTMENT STORE—8 story and base. Class A, \$1,000,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Broadway Department Store. This building will be erected at the southwest corner of Broadway and 4th streets, and will cover an area of 24x161 feet. All work will be under the supervision of the C. B. Weaver Construction Co., Wright and Callender Bldg., L. A. A contract for the structural steel work has been let and subfigures are being taken on the various other parts of the work through the Weaver Co.'s offices.

WAREHOUSE—3 story and base, brick, \$20,000. Los Angeles, Cal. Architect, none. Owners, J. M. Overell Furniture Co., 700 South Main St., L. A.

This company has ordered plans prepared for a warehouse structure 70x140 feet. There will be brick exterior walls faced with blue pressed brick. Interior construction will be of the heavy mill type. Plans include elevator service. Bids will be called for on the work within a short time.

FACTORY—2 story and base, brick, \$20,000. Los Angeles, Cal. Architect, T. Beverly Keim, Jr., Co., Title Insurance Bldg., L. A. Owner, J. W. Earl. The building has been designed for a photo engraving plant and has been leased for a long term to the National Engraving Co. The structure will cover an area of 50x145 feet. Interior will be finished in pine throughout. There will be metal window frames and sash. The exterior will be faced with pressed brick. Plans are being prepared.

HOTEL—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. C. Thorne, 631 So. Spring St., L. A. Owner, I. I. Dehall. The building will be 64x106 feet, and will be arranged for stores on the first floor and 100 guest rooms and a number of baths on the upper floors. Plans include elevator service, steam heat and vacuum cleaning. Interior finish will be of pine and hardwoods. The exterior of the building will be faced with pressed brick. Bath rooms will have cement floors. Plans are being prepared and the work will probably be done by Day Labor.

HOTEL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, A. W. Ross. The building will be erected on a corner site, and will cover an area of 70x140 feet. Several stores and the hotel lobby will occupy the first floor. Upper floors will be arranged for 27 guest rooms and 10 baths to each floor. Interior finish will be of pine and redwood. Tile will be used in the baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are nearly complete and the work will probably be done by Day Labor.

Contracts Awarded.

APARTMENT HOUSE—3 story and base. Class C construction, \$36,000. Los Angeles, Cal. Architect, Leonard A. Cooke, 100 East Colorado St., L. A. Owner, Mrs. F. T. Dandy. Contractor, Whiting Thompson, Douglas Bldg., L. A. Contract price, \$36,000.

GARAGE—2 story and base, brick, \$50,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nux Bldg., L. A. Owner, J. A. Graves. Contractor, Carl Leonhardt, H. W. Hellman Bldg., L. A. Contract price, \$50,000.

ASSOCIATION BUILDING—3 story and base, brick and steel, \$50,000. Santa Barbara, Santa Barbara Co., Cal. Architects, E. Russell Ray and Windsor Soule, Santa Barbara. Owners, Young Men's Christian Association. Contractor, E. F. Edwards, East Pedregosa street, Santa Barbara, general construction, \$50,000. Bids are now being taken for the plumbing, painting, electric work and steam heating by the architects.

HOTEL—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, none. Owner, Eugene Pourroy. Contractor, Joseph F. Rhodes, Central Bldg., L. A. Contract price not stated.

Editorial Comment.

Again reports are made in the papers that a German inventor has perfected an apparatus for transmitting photographs by telegraph. The mechanism involves the same principle that has often been used before with partial success. That of breaking up the image formed by a lens or a mirror upon a screen into a number of points like the production of a screen on a halftone plate. This screen is composed of selenium, a substance that is susceptible to light, and through the various points produces an electric current that effects a similar change in a similar apparatus at the other end of the wire. This process is said to have been perfected to such an extent that practical results have been obtained. What with the moving picture, the telephone and the dictograph soon there will be nothing happen in the world that everybody will not be able to see and hear.

The question of transportation to the fair site is beginning to assume serious proportions. As usual the United Railroads keeps holding on to its policy of holding up the city and the Chronicle comes forward as usual with its pleading for private capital and the plunderbund. Private capital in street railways in San Francisco means the United Railroads. And the lue and cry that goes up that private capital will not invest in street railways if the city enters the field means only that the United Railroads will attempt to tie up the city unless they get their own way.

There never would have been such a unanimous popular demand for a municipal railway if this corporation had not stolen the ground from under the feet of the citizens by methods which have disgraced the fair name of the city. If private capital, as represented in the United Railroads, can not produce its books to the Public Utilities Commission that body has rightly decided that it will not allow it to issue further securities. If private capital, as represented in the United Railroads, will make no further extensions nor try to accommodate the people at the exposition then some action should be taken to see what can be done in the matter of forfeiting the franchises already held. Neither the Board of Supervisors nor the citizens of San Francisco are wanting to forfeit the right of this bulldozing and dimincering corporation be made to realize that it can no longer make the people pay an unearned dividend on a fictitious capital many times the actual investment

Building operations throughout the county for the past month maintained about an even break. From some fifty cities throughout the country reports to the American Contractors show a gain in the aggregate of about ten per cent over the same month last year. This in the main was due to the fact that New York and Chicago both showed substantial gains, while throughout the county there was generally a slight falling off. Seattle showed a marked gain during February, the total or last month being more than three times that of the same month in 1912. Generally the Pacific Coast cities have just about held their own. Particulars are shown in the following table:

City	February, 1913.		February, 1912.

The Evolution and Development Of the Fireplace.

—BY H. B. SMITH—

Just how the world got on without fireplaces as long as it did is hard for twentieth century folk to figure. But in the oldest castles, manor houses and monasteries of Europe there were no fireplaces such as we know. For the first thousand years or so of this era men were too busy fighting to have much time to spend at home, and the homes of early kings and nobles were rather fortresses than houses. The principal feature of these was a great hall where a king or noble and his retainers celebrated a victory with much feasting and drinking, or retired to nurse the wounds of a defeat.

How to keep warm in one of those great, lofty flag-paved halls would present a problem at any stage of the heating game, and their owners solved it in the simplest, most primitive way. They wore heavy clothes, drank lots of ale, and built a huge fire on the floor in the center of the hall, at which they could warm one side at a time while awake, and their toes when they went to bed on the flags. The smoke from the fire curled over their heads and found its way out through a hole in the roof called a *louvre*.

The cooking was done about this fire, and after the feast the retainers slept on the floor of the hall, while the lord and master slept in a small room opening off one end. Later there were separate kitchens, and though the fireplace was no more than a shallow pit in the floor or a slightly raised hearth, and the chimney a hole in the roof. Right royal feasts were made over them, of boars and bucks and sheep and cattle, roasted whole and served with many a leathern blackjack of ale to wash it down. A kitchen of this type is the one remaining feature of Glastonbury Abbey of England, which dates back to the twelfth century. The building was neither more nor less than a huge stone chimney, with a couple of doors and a few windows. In it were four huge fireplaces, not recessed, as our sense of the word implies, but mere places where fire was built, around which cooking was done for the monks, the smoke and fumes rising skyward through holes in the peak of the octagonal roof.

The nearest approach in early Norman days to a fireplace of any sort was one against the wall, but instead of having a recess for firelogs and back there was merely a slope backward from the base, and against this slope logs were probably placed on end. Chimneys were not common even in the finest houses until the fifteenth century. They seemed to have been first built in the solar, or upper chamber assigned to women in feudal days.

When fires first left the center of the great halls and took to one of the walls, they were built on a low, projecting hearth. Over this hearth was a hood resting on brackets or columns, which directed the smoke upward. Where the slanting roof of the hood merged into the wall, the flue sometimes went straight through to the outer side of the wall. This fashion never became general, and very soon the flue crept straight up the inner

wall to the roof, where it was capped by a spire or other ornamental feature. Sometimes this flue retained the hood shape all the way to the roof, but again it was built in more rectangular form.

By the fifteenth century there was less need of fighting. Men cared less to wander from their own firesides, and began to care more about what those firesides were like. There followed such a building boom throughout Europe as has never since been known. Millions of money and more millions of men were spent in building what are yet marvels and models in architecture. As life, to the few, at least, became a more comfortable and more private affair, living rooms increased in number, and scarcely a room was without its fireplace. The old fortresses were remodeled, and in their thick walls was ample space for both hearth and flue to be built, roomy enough for sections of whole trunks of trees, with plenty of wall beyond.

At first the fireplaces were simple, with arch flush with the wall and a small mantel above, sometimes plain, sometimes slightly carved. The chief subject for decoration was the heraldic device of the owner. As the Gothic style evolved and merged into the Renaissance, more and more attention was given to mantelpieces, until they and bedsteads vied with each other for first place in interior decoration, and were to the interior what the entrance was to the exterior. Fire-dogs and firebacks were elaborately wrought, to keep pace with the mantel pieces. Some of the earliest dogs had at the top a cup holder, which could be raised and lowered, and was evidently intended for mulled ale.

The materials used in mantel-pieces varied with the locality. Perhaps the finest work of the middle centuries in England was done in wood, which progressed from simple paneling to elaborate carving. Hard chalk and stone were also used in regions where they were more plentiful than oak forests; and in very great houses there was carved marble, largely under the influence of Italian workmen who came with their Renaissance ideas and their facility for working in marble when Henry VIII. and Elizabeth stretched forth a welcoming hand to foreigners.

In France wood was perhaps less used than marble and stucco, while in Italy marble was more common than any other material. Germany confined itself very closely to porcelain stoves, though in some of the old castles there are simple forms of open fireplaces. Holland was famous for its tile, for both stoves and fireplaces.

In France, as in England, the commonest scheme of decoration was the use of coats of arms, and one of the oldest mantelpieces to be seen there is in the Chateau Blois, famous as a favorite residence of the diabolical Catherine de Medici during her long reign of terror in France. It was built about the fifteenth century, probably by Louis XII., as it bears in one panel the porcupine of the house of Orleans, and in the other the ermine

of his queen, Anne of Brittany, and their initials. Francis I., who succeeded this king and was a great patron of Italian art, built a new wing to the chateau with mantelpieces much more ornate if less beautiful in proportion. One of the finest bears his device, the salamander, which, together with his motto, "I nourish the good and extinguish the evil," was very appropriate for a fireplace.

A visit to the mediaeval manor houses and chateaux is like digging around the roots of a family tree. These old fireplaces and chimney-pieces are the grand-daddies of our modern ones. After them many are today being fashioned, with such changes and improvements in interior construction as conditions require and inventive genius can contrive. There is no longer need of a roomy chamber for the chimney sweep, nor for the heavy beam which braced the chimney in many ancient fireplaces, and proved fatal to many great mansions in remote regions with no fire protection. When one thinks what these mediaeval monuments have been through, it is surprising that anything is left to tell the tale of their former glory. During the French Revolution the mobs vented their rage against the rulers by destroying as much of their costly work as possible; and during the revolution of taste to different centuries finely carved stone chimney-pieces have been carefully painted and grained to imitate wood, and others torn out and replaced with some fad of the moment.

In the early days of our own country, of necessity the pioneers went back to first principles. Fireplaces were ample in size and modest in decoration. How ample may be seen by the various adjuncts to a colonial fireplace—spits and big dogs, and kettles of all sorts and sizes swinging from the pot-hooks and hangers—some even having a seat inside them. How simple, may be seen in the few houses still standing that date back to colonial days.

Naturally, in early days the fireplaces showed the influence of the various mother countries. In the Dutch settlements tile was used about the opening. In English settlements a broad beam took the place of an arch, and in the South, where there were many English proprietors of means and refined taste, the decorations, though simple, were remarkable for delicacy and grace. Some were of delicately carved wood, others of cement composition decorated in low relief, and others of marble. Almost without exception they were white, with gold leaf on the relieved portions.

With the stove era fireplaces went out of fashion. A few houses had mock fireplaces where no fire was ever built, and showy mantelpieces as ugly as everything else about most American houses until within the past decade or two. About the only genuine thing in the way of a native American fireplace was that built in some Western prospector's cabin or mountain

After stoves the introduction of central heating made the open fireplace still more unnecessary, and odd enough the self-same thing has made possible the recent revival. Now, never before, the fireplace can be considered from the aesthetic rather than the practical view-point, and there are no two opinions as to the charm of the open fireplace. There is something so cheerful and inviting about it, something so companionable with the glow of the coals and crackling of wood, something so conducive to contentment and to dreaming, that no home is complete without at least one. And since one need no longer depend on the open fireplace for warmth in large rooms, it can fulfill its perfect mission—that of beauty and good cheer. Be sure, more than a hundred years ago Count Rumford invented a fireplace that he pledged his word, and proved would heat comfortably rooms more than ordinary size, but there are restrictions in the dimensions of opening that detract from the charm of Rumford fireplaces.

The fireplace of today may be traced to a varying ancestry. Just as good democrats like to think themselves of aristocratic origin, so as many as possible fashion their fireplaces after those of mediæval palaces. In the House reading room in the Congressional Library at Washington, we, the people, have blazoned our royal device in the center of a massive chimney-piece; and in private homes as well as public buildings there are mantelpieces that rival in splendor those built by the order of dukes.

Obviously, however, elaborate chimney-pieces are not suited to bungalows and other small houses, and in these modest homes, in country houses and mountain inns, are found the descendants of some humble cotager of Old England with heavy beam and cozy settle; some quaint Dutch burgher with pictured tiles; some half-savage Norman with low-eaved hood; and there are those who do not disdain the humble American origin of the western pioneer, built of rough logs picturesquely piled at the end of a cabin. Indeed this typical American fireplace and chimney of irregular shingles has attained a great popularity, and it should encourage architects to seek close at hand for inspiration, both in the matter of material and its use. Since fireplaces no longer have value in the form of carved bedsteads, in the olden days, they stand supreme as the conspicuous feature of the interior of a house, and to have been harmonious and satisfying is worth all the thought and effort that may be spent on them.—From *Radiator* published by the United States Radiator Corporation.

HARDWOOD FLOORING TROUBLES.

The laying of hardwood floors (kiln dried) requires a great deal more thought and mechanical skill than a great many imagine. When the carpenter has completed a nice, pleasing job of floors and shortly afterward he is asked to come back; and is shown where they have raised up, and he is told that he did not put in good stuff, his work was faulty and a hundred and no other things that he is not to blame for, it is most certainly very annoying.

What the writer proposes to discuss here is: what is the cause of this trouble, and how it may be overcome. In the first place, every carpenter knows that very dry lumber is easily acted upon by dampness, and he also knows that the only thing that will cause a floor to raise is that the floor has swelled up after being laid, and that the only thing that will make it swell is dampness. Tell the average lay person that dampness has caused their floor to raise and they will not believe you; they will say that cannot be, for there never was any water put on it, etc. I want to state right here that it not necessary to wash the floors with water or put any on them for them to absorb moisture enough to cause them to swell sufficient to THREE March 13 HOYT

throw them out. It will be observed that floors seldom act in this way in the winter time when there is heat in the building, but it usually happens in warm weather and after a period of wet weather, when the air is full of dampness. So much for the cause.

We will now see if anything can be suggested that will in any way tend to overcome this trouble. When the carpenter is called upon to put down hardwood floors, the first thing he should study is the existing conditions. He should investigate and see if there would be any likelihood of any dampness coming up from below through the under floor. If so, either of the following preventatives may be used: The hardwood flooring may be well painted on the under side with a good waterproof paint, or a good waterproof paper may be used between the floors. As soon as the floors have been laid, they should be finished on top with some reliable waterproof finish. They may be oiled with boiled linseed oil, or they may be filled with a good paste filler, then shellacked and varnished, or they may be given a wax finish.

Another precaution that should not be overlooked is to allow room for the floors to work. At least one-half inch space should be left at each wall, which would be covered up with the shoe. Then, in case the floors take up a little dampness, it will have room to push to the wall.

It will also most generally be found that when a floor does rise it is about the center of the room, showing that it pushes both ways to the walls and then to the center.

Considerable three-eighths inch thick veneer flooring is being used for floors in old buildings. The writer has found by experience that the narrower the flooring the less liable to give trouble, for the reason that there is very little nailing body to these three-eighths inch stuff, and you have to use a 4d or 1½-inch casing nail, and with the narrow stuff you get a better nailing surface.—The National Builder.

FLOOR HEATED ROOMS.

The beauty, the durability and the sanitary qualifications of the mosaic or tile floor has led to its introduction in the American home with a somewhat rapid progress since the concrete form of building has been so extensively used. With the advent of floors of this type the question of floor heating has been raised, and leads to a study of the methods of heating buildings in the ancient days,

when the floors were extensively used, not only in home, but in public buildings. In some of the Roman buildings there were piers 6 inches square placed on about 24-inch centers, on which the corners of the flat tiles, which were laid for a floor, met. The piers were high enough to leave a space of from 16 to 20 inches beneath the tiles. Over these tiles a more attractive and smoother wearing surface was laid. In the colder seasons arrangements were made to send the smoke and gases from a fire through the flues under the floor formed by this type of construction. In this way the floor was kept at a temperature comfortable to the occupants of the room. This method of heating a room was the only one employed. In the recent construction of one of the college buildings of Cornell University at Ithaca, N. Y., the floors are used throughout, and to avoid complaint from a cold floor steam pipes were laid in cases in the upper surface of the floor around the edge of the room. The pipes were then surrounded with concrete and covered with a decorated tile. It is pointed out that this eliminates the use of a radiator in the room. This experiment will be watched with some interest by architects and builders, especially by men associated with the heating trade. In the average American home, with its wooden floor, any heat that is lost from the heating apparatus, whether it is a warm-air furnace or a steam or hot water heater in the basement, is absorbed by the floor, adding substantially to its warmth, and goes a long way toward making the building comfortable for habitation. In such buildings the question of floor warming or floor heating is of no moment, but heating contractors having occasion to install their work in residences which have concrete floors are liable to meet a new experience, particularly where concrete or tile floors are extensively used.—The Building Age.

FORESTS OF THE WORLD.

By a recent estimate the forest area of the world is placed at 4,000,000,000 acres, or 24 per cent of the total land area. The countries estimated as having more than 10,000,000 acres of forest are as follows:

Country	Acres
Russia, European	464,610,000
Finland	52,500,000
Austria	23,996,266
Hungary	18,692,000
Sweden	40,390,325
Germany	34,989,673
France	24,021,587
Spain	16,065,000
Italy	10,115,404
Russia, Asiatic	348,030,000
India	149,000,000
Japan	57,718,410
Philippines	49,000,000
Australasia	126,720,000
Madagascar	25,000,000
South America	528,000,000
Central Africa	224,000,000
West Indies	42,668,500
Canada	799,360,000
Mexico	25,000,000

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, Milton Lichtenstein, 111 Ellis St. S. P. Owner, Hyme Jacobs. The building will be erected on Jackson street, west of Locust, and is designed for six apartments, each of which will consist of six rooms and two baths. Interiors will be finished to suit the tenants, who have already leased the suites. There will be steam heat, a vacuum cleaning system and dumb waiters. Much hardwood and tile will be used. All suites will have wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 5 story and base, brick and steel, \$75,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Calvin E. Knickerbocker and A. Boswick. The building will cover a ground area of $46\frac{1}{2} \times 65\frac{1}{2}$ feet, and is to be arranged for a total of 45 apartments of two three and four rooms each. All suites will have wall beds and private bath. Interior will be finished in pine and hardwoods with ornamental plaster in the lobby, reception hall and parlors. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Bath rooms will have tile wainscot. The exterior of the building will be faced with cement plaster. Plans are complete and segregated figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Miss D. Loaliza. The building will be erected at the corner of Washington and Taylor streets, and is to cover an area of $55 \times 127\frac{1}{2}$ feet. There will be a number of two and three room apartments with wall beds and private baths. Interior finish will be of pine and hardwood. Plans include steam heat and a hot water system. Tile will be used in the baths. An attractive lobby and entrance has been designed. The exterior of the building will be covered with rustic and metal lath and plaster. Plans are complete and figures are being taken by the architects.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$14,000. Architect, none. Owner, F. W. Lurmann, 1760 Hyde street, S. F. The building will be $27\frac{1}{2} \times 123$ feet with twelve apartments of three rooms and bath each. Interior finish will be largely of pine. Some elm panels will be used. There will be steam heat and a hot water supply system. All suites will have wall beds. Tile floors will be used in the baths and entrance lobby. The exterior of the building will be covered with brick veneer, and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. He is now purchasing all materials.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$40,000. Ar-

chitect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected in the Lakeside District and is planned for one of the most modern apartment house structures in the city. Preliminary plans have only been started and details have not been fully decided upon. Suites will probably be of two and three rooms each with bath. Interior will be handsomely finished, considerable hardwood and tile being used. There will be steam heat and a vacuum cleaning system. All suites will have wall beds. Exterior will be covered with cement plaster on metal lath. Complete details will be given as the plans progress.

SACRAMENTO, CAL.—Apartment house, 5 story and base, reinforced concrete, \$182,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Dr. Faris. This building, which is to be erected at the corner of 13th and N streets, will be the largest apartment house structure in the Capitol City, covering an area of 120×160 feet. There will be upwards of 100 suites, ranging from two to four rooms each. The plans embrace all of the modern conveniences, and a number of unique features, including sleeping porches for each of the apartments, a cooling system and fountains. There will be steam heat, oil burning plant, both freight and passenger elevators, dumb waiters, a vacuum cleaning system and hot water supply system. Interior will be finished in pine and hardwoods. All bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with terra cotta. Plans are complete and figures are being taken by the architects.

SAN JOSE, SANTA CLARA CO., CAL.—Apartment house, 2 story and base, brick and frame, \$13,000. Architect, Charles T. McKenzie, Bank of San Jose Bldg., San Jose. Owner, Julius Wesnitzer. The building will be erected at the corner of San Salvador and First streets, and is to contain stores on the first floor and a number of modern apartments on the second floor. Stores will have patent store fronts and plate glass windows. Interior finish on the upper floor will be of pine throughout. Some structural steel is specified. The exterior of the building will be faced with pressed brick. Plans have been completed and figures are now being taken.

PORTLAND, ORE.—Apartment house, 2 story and base, brick, \$25,000. Architects, Bridges & Welber, Hamilton Bldg., Portland. Owner's name withheld. The building will cover an area of 75×80 feet. The first floor will be arranged for four stores. The front portion of the upper floor will be subdivided into five large offices and the remainder of the space will be divided into five three-room suites with baths and wall beds. Interior finish will be of pine throughout. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are being prepared.

PORTLAND, ORE.—Apartment house, 2 story and base, brick, \$25,000. Architect, C. A. Duke, Failing Bldg.,

Portland. Owner, E. Kleist. The building will be erected on a corner lot and is to be arranged for stores on the first floor and a number of two and three room apartments on the upper floor. Interior will be finished in pine throughout. Plans provide for steam heat and a hot water system. All suites will be equipped with wall beds. There will be connecting baths. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$21,000. Architect, E. Kollofrath, Phelan Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Buchanan and Herman streets and has been arranged to contain fifteen suites of two and three rooms each. All apartments will have wall beds and private bath rooms. Interior finish will be of pine throughout. Baths will have tile wainscoting. A central heating system will be installed. The exterior will be covered with cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$25,000. Architects, Architectural Designing Co., Gross Bldg., L. A. Owner, J. D. Caldwell. The building will contain fifty rooms, which are to be arranged in suites of two and three rooms each with connecting baths. Interior will be finished in pine throughout. There will be steam heat and vacuum cleaning system. A hot water plant will also be installed. All suites will be equipped with wall beds. Tile will be used in the bath rooms. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will probably be done by Day Labor.

LOS ANGELES, CAL.—Apartment house, 1 story and base, brick and steel. Cost not stated. Architects, Kysor and Biggar, Wright and Callender Bldg., L. A. Owner, F. Lane. The building will have a street frontage of 48 feet and a depth of 125 feet. There will be a total of 66 rooms, which are to be arranged in two and three room suites, all of which will be equipped with wall beds and connecting baths. There will be steam heat, elevator service, vacuum cleaning system and a hot water heater. Interior will be finished in pine and hardwood. Tile and cement will be used in the baths. Entrance vestibule will be finished in marble and tile. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Apartment house, 3 story and base, frame, \$10,000. Architects, A. C. Swartz & Son, Fresno. Owner, P. S. Turnbull. The building will be erected on a corner site and will be arranged for two, three and four room suites with baths and wall beds. Interior will be finished in pine and some hardwood. There will be gas grates. Mantels will be of tile. Tile will also be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 10 story and base, reinforced concrete. Cost not stated. Architects name withheld. Owner, R. H. Arnold, President Alta Planning Mill

830 McGarry St., L. A. The building will be erected at the corner of 9th and Valencia streets, and will cover an area of 110x120 feet. Only preliminary sketches have been prepared and details are not available. Sketches show a building arranged for 40 rooms and of fireproof construction. Negotiations for financing the project are now underway.

WESTMORELAND, IMPERIAL CO., CAL.—Apartment house, 1 story and base, brick. Cost not stated. Architect, Fielder Slingluff, Jr., Security Bldg., L. A. Owner, E. D. Turner. The building will contain 40 rooms which are to be arranged in sixteen suites of two and three rooms. All suites will have private baths and wall beds. Interior will be finished in hardwood and tile. There will be steam heat, a vacuum cleaning system and hot water supply plant. Bath rooms will have tile wainscot. An attractive lobby has been designed. The exterior of the building will be faced with cement plaster. Plans are being prepared.

EUGENE, ORE.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Vincent, Russell & Prenske, Eugene. Owner, G. W. Irwin. The building will be erected on a corner lot and will cover an area of 56x86 feet. There will be 21 two-room suites, all of which will have connecting baths and wall beds. Plans include an automatic elevator and steam heat. A hot water plant will also be installed. Bath rooms will have cement floors and tile wainscot. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$55,000. Architects, C. F. Borton & Co., Hibernian Bldg., L. A. Owner, Julia A. Gove. Contractors, C. F. Borton & Co., Hibernian Bldg., L. A. Contract price, \$55,000.

BANKS.

DINUBA, TULARE CO., CAL.—Bank alterations 2 story and base brick. Cost not stated. Architect, J. Carl Thayer, Fresno. Owners, Commercial National Bank. The work will include the construction of a new front, complete new interior finish and fixtures, vaults and ornamental bronze work. Interior finish will be of hardwood, tile and marble. Plans are complete and figures are being taken.

BRIDGES, DAMS AND HARBOR WORK.

SANTA ROSA, SONOMA CO., CAL.—Bridge, concrete. Cost not stated. Engineer, C. Sherer, County Surveyor Santa Rosa. Owners, Sonoma County. Plans for a small concrete bridge over the Santa Rosa-Sebastopol Road have been approved by the Supervisors, and bids are to be opened on April 10th. Complete information, plans and specifications can be secured from the County Surveyor at Santa Rosa.

Contracts Awarded.

LA GRANGE, STANISLAUS CO., CAL.—Bridge, steel and concrete, \$25,000. Engineer, County Surveyor Anner, Modesto. Owners, Stanislaus County. Contractors, Willison & Fos-

ter, Oakland. Contract price, \$24,133. Other bids were submitted as follows: T. K. Beard, \$27,000; M. B. White, Stockton, \$22,500; Ross Construction Co., Sacramento, \$27,335; Midland Bridge Co., Kansas City, Mo., \$30,107; O. A. Wilson, San Francisco, \$29,516; and Chico Construction Co., Chico, \$30,280.

CHURCHES.

ORANGE, ORANGE CO., CAL.—Church, 1 story and base frame and brick \$25,000. Architect, Frederick H. Eley, Hervey-Finley Bldg., Santa Ana. Owners, German Evangelical Lutheran Church. The building will be of frame construction, faced with brick veneer and artificial stone trimming. Interior will be arranged for a large main auditorium and Sunday School rooms. Interior finish will be of pine and hardwood. A central heating system will be installed. Plans have just been started.

LONG BEACH, LOS ANGELES CO., CAL.—Church and school, 1 and 3 story, brick and steel, \$50,000. Architects, Frank T. Keglby and T. Foster Ema, associated, Consolidated Realty Bldg., L. A. Owners, St. Anthony's Roman Catholic Church. The church will be Gothic in style. It will be one story and basement, of brick construction with ruffled brick exterior facing, artificial stone trim, tile roof, steel roof trusses, art glass windows, concrete foundation and basement, etc. It will cost about \$50,000. The school will be a three-story structure of brick construction, and the pastor's residence two stories. It will contain twelve rooms and will be of brick and frame construction. Plans are being prepared.

WALLA WALLA, WASH.—Church, 1 story and base, brick and stone, \$60,000. Architects, Bezer Bros., Northern Bank Bldg., Seattle. Owners, First Congregational Church. The building will contain a large auditorium, Sunday school rooms, pastor's study, social rooms and kitchens. Interior will be finished in pine and hardwood. There will be a central heating system. Roof is to be of slate. The exterior of the building will be faced with stone and pressed brick. Plans are being prepared and the work will be done by Day Labor. The architects will let all sub-contracts and purchase all materials.

COURT HOUSES.

WALLA WALLA, WASH.—Court house, 2 story and base, brick and stone, \$150,000. Architects, Bezer Bros., Northern Bank Bldg., Seattle. Owners, Walla Walla County. Architects have just been selected to prepare plans for a new county building which will replace the old and dilapidated structure. No details of the building have been decided upon and the architects are now in Walla Walla making an investigation of the requirements.

FACTORIES & WAREHOUSES.

SAN FRANCISCO.—Factory, 1 story, steel and frame, \$4,000. Architect, none. Owners, West Coast Iron Works, 649 Monadnock Bldg., S. F. This building has been designed for a steel furnace shed. Some structural steel will be used and the exterior will be cov-

ered with corrugated iron. Plans are complete and the work will be done by Day Labor.

LIVERMORE, ALAMEDA CO., CAL.—Factory group, 26 buildings. Cost not stated. Architect, none. Owners, Coast Manufacturing and Supply Co., Livermore. This company is establishing a new plant. Several of the above mentioned buildings are already erected and construction on a number of others will follow at once. With the exception of the main administration building all other structures will be one story in height.

LOS ANGELES, CAL.—Warehouse, 3 story and base, brick and steel, \$30,000. Architect, A. W. Kiewit, California Bldg., L. A. Owners, J. M. Overell Furniture Co. The building will cover an area of 99x140 feet. Construction will include considerable structural steel, fireproof doors, metal window frames and sash, elevators and modern plumbing. Interior will be finished in pine. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

FLATS

FIRE HOUSES.

SAN FRANCISCO.—Fire house, 2 story and base, brick and steel, \$33,000. Architect, Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for Engine House No. 24, which is to be erected at the southwest corner of Hoffman avenue and Alvarado street, are complete and bids will be opened by the Board of Public Works on April 2nd. The exterior of the building will be faced with pressed brick and terra cotta. Interior will be finished in pine and hardwood. There will be special plumbing fixtures and electrical equipment. Steam heat will be installed. Plans can be secured from the Department of Architecture.

FLATS.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$7,500. Architect, C. O. Clausen, Philbin Bldg., S. F. Owner, E. Davis. A two-story frame building now occupying the property will be altered to contain six modern flats of four and five rooms each. The work will include new plumbing, electric work, plastering, interior trim and exterior work. Finish will be of pine and hardwood. Gas grates will be installed. The exterior of the building will be covered with cement plaster and rustic. Plans are complete and a contract will be awarded at once.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$8,000. Architect, none. Owner, David Condon, 4188 20th St., S. F. The building will be erected at the corner of 10th avenue and C street and is to cover an area of 28x80 feet. The first floor will be arranged for a store and upper floor for two or more flats of four and five rooms. Interior will be finished in pine and hardwood. The exterior of the building will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$4,500. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected in the Linda Vista Tract, and will be designed to

contain two modern flats of five and six rooms each. Interior finish will be of pine and redwood with some hardwood floors. There will be either open fire places or gas grates. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

GARAGES.

LOS ANGELES, CAL. — Garage, 2 story and base, reinforced concrete. Cost not stated. Architect, Myron Hunt, Hibernian Bldg. L. A. Owner, H. E. Huntington. The building will cover an area of 70x209 feet, and will be erected on the grounds of the Huntington Hotel at Oneonta Park. The first floor and part of the second will be used for storage space for automobiles. The balance of the second floor will be arranged for club rooms, baths and 40 living rooms. There will be metal window frames and sash, concrete floors and fireproof construction throughout. Heat will be supplied from the hotel. The exterior of the building will be faced with cement plaster. Plans are being prepared.

PORTLAND, ORE. — Garage, 1 story and base, reinforced concrete. Cost not stated. Architect, C. A. Duke, Failing Bldg., Portland. Owner's name not given. The building will cover an area of 68x100 feet and is designed for a commercial garage. There will be a cement floor over the entire area. Metal window frames and sash will be used. Interior of the front portion of the building will be finished in pine and hardwoods and is to be used for a sales room. The exterior will be faced with cement plaster. Plans will be complete and figures called for on April 15th.

PORTLAND, ORE. — Garage, 1 story and base, brick. Cost not stated. Architect, none. Owner's name not given. Contractor, J. S. Kilgren, Lewis Bldg., Portland. Contract price not stated. Note: This building will cover an area of 100x100 feet.

Contracts Awarded.

FRESNO, FRESNO CO., CAL. — Garage, 1 story and base, brick, \$8,000. Architect, none. Owners, Thompson Bros., Fresno. Contractor, E. J. Far, Fresno. Contract price, \$8,000.

GOVERNMENT WORK AND SUPPLIES.

Grand Junction, Colo., Public Building. The following bids were received by the supervising architect, Treasury Department, Washington, D. C., March 5 for the construction, complete, of the U. S. public building at Grand Junction, Colo.:

John J. Lumstem, Grand Junction, Colo., limestone, \$23,670; sandstone, \$125,670.

Campbell Building Co., Salt Lake City, Utah, sandstone, \$118,700.

Hiram Lloyd Building and Construction Co., St. Louis, Mo., limestone, \$121,839; sandstone, \$122,839.

J. H. Wiese, Omaha, Neb., limestone, \$104,335.

Dieter & Wenzell Construction Co., Wichita Kan., limestone, \$135,350; sandstone, \$134,800.

Wm. H. Maxwell, Phoenix, Ariz., limestone, \$98,738.

Puget Sound Hospital Building.

The contract for constructing contagious group buildings at the naval hospital, Puget Sound, Wash., bids for which were opened February 21, has been awarded to Geo. B. Eckman, Seattle, Wash., \$13,398.

Pier Work, Puget Sound.

On March 29 the chief, bureau of yards and docks, Navy Department, will open bids for pier 4 at the navy yard, Puget Sound.

It is the declared and acknowledged intention and meaning to provide and secure a concrete and timber pier, complete in every respect and ready for use; also certain dredging at the site of the pier. No piping is included in the specification.

The work consists of a reinforced concrete and steel superstructure supported on concrete cylinders, some of which are supported on wooden piles, the construction of a timber approach supported on cross-tied piles and includes all dolphins, fenders, fender springs, chocks, crane tracks, drains, snubbers, the furnishing and setting of all manhole covers and frames, the furnishing and installing of all bollards and cleats, and shall include all labor necessary to make the pier complete in all respects, and about 27,000 cubic yards of dredging. Proposals will be received for the whole work and for the pier and dredging separately.

The general dimensions of the pier shall be as follows: Width out to out of guard timber 80 feet; length of concrete portion 490 feet; length of approach 210 feet, all as shown on plans.

ESTIMATE FOR BARRACKS AND QUARTERS.

The Secretary of War has submitted to Congress supplemental estimates of appropriations required by the War Department for the service of the fiscal year 1914, as follows:

Barracks and quarters	\$115,428
Roads, walks, wharves, and drainage	30,000
Water and sewers at military posts	10,000
Military posts	625,000

Total

In this connection Mr. Stimson says: The amount estimated for "barracks and quarters" is required to construct the buildings enumerated in the footnote to the estimate, at the Presidio of San Francisco, to replace certain old frame buildings now occupying the site which has been approved for the Government Exhibit Building in connection with the Panama-Pacific International Exposition, while the estimates for "water and sewer" at military posts, and "roads, walks, wharves, and drainage" are submitted to provide funds necessary to complete the water and sewer system, and for roads, walks, and improvements, respectively, at the Army Supply Depot, Fort Mason, Cal.

With the amount estimated for "military posts" it is proposed to construct a regimental infantry barrack at the Presidio of San Francisco. The general condition of the cantonment at the Presidio, in which a regiment is now quartered, was not fully understood until after a personal inspection was

made after the estimates for 1914 had been submitted, and the proposed new barrack for better quartering the troops is considered a necessity second only to the quartering of troops in Hawaii and Panama. Provision is also made under this item for a large depot storehouse to take the temporary sheds now occupying the ground authorized to be used by the exposition on the Presidio reservation, and also for completing electrical and mechanical equipment for wharves and storehouses, including cranes, locomotives, etc.

The necessity for the erection of the buildings and other improvements contemplated by these estimates was not fully apparent when the regular annual estimates for 1914 were submitted.

Pocatello, Idaho, Public Building.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., February 28, for the construction, complete, of the United States public building at Pocatello, Idaho:

George Curley, Salt Lake City, Utah, limestone, \$104,900.

Campbell Building Company, Salt Lake City, Utah, limestone, \$105,300; sandstone, \$104,700.

Hiram Lloyd, St. Louis, Mo., limestone, \$109,254; sandstone, \$112,254.

J. E. Wiese, Omaha, Neb., limestone, \$101,180.

William H. Maxwell, Phoenix, Ariz., limestone, \$108,818.

Palmberg & Mattson, Astoria, Ore., limestone, \$95,700; sandstone, \$96,700.

H. E. Doering, Portland, Ore., limestone, \$92,829; sandstone, \$94,218.

William O'Neill & Son Company, Fairbault, Minn., limestone, \$109,339; sandstone, \$111,849.

W. D. Lovell, Minneapolis, Minn., limestone, \$99,450.

Dieter & Wenzel Construction Company, Wichita, Kan., limestone, \$116,450; sandstone, \$117,500.

Northern Construction Company, Milwaukee, Wis., limestone, \$109,900; sandstone, \$112,250.

Sound Construction & Engineering Company, Seattle, Wash., limestone, \$109,638; sandstone, \$109,638.

ARMY FORTIFICATION LAW.

The army fortification act, as signed by the President, provides for expenditures as follows:

Fortifications in Insular Possessions, Engineer Department.

For construction of seacoast batteries as follows:

In the Hawaiian Islands, \$70,000;

In the Philippine Islands, \$700,000;

In all, \$770,000.

For installation and replacement of electric light and power plants at the defenses of the following localities:

In the Hawaiian Islands, \$34,469.

For purchase and installation of searchlights for the defenses of most important harbors, as follows:

In the Hawaiian Islands, \$10,800;

In the Philippine Islands, \$20,600;

In all, \$31,400.

For protection, preservation, and repair of fortifications at the following localities:

In the Hawaiian Islands, \$500;

In the Philippine Islands, \$8,000;

In all, \$8,500.

For preservation and repair of structures erected for torpedo defense, and for maintaining channels for access to

torpedo wharves at the following localities:

In the Hawaiian Islands, \$500;
In the Philippine Islands, \$750;
In all, \$1,250.

For tools, electrical and other supplies and appliances, to be furnished by the Engineering Department for the use of the troops for maintaining and operating searchlights and electric light and power plants at seacoast fortifications:

In the Hawaiian Islands, \$750;
In the Philippine Islands, \$3,000;
In all \$3,750.

For construction of mining casemates, cable galleries, torpedo storehouses, cable tanks and other structures necessary for the operation, preservation, and care of submarine mines and their accessories and for providing channels for access to torpedo wharves at the defenses of the Philippine Islands, \$50,000.

HALLS AND SOCIETY BUILDINGS.

SAN FRANCISCO—City Hall. Class A construction, \$4,500,000. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids are now being called for on the first contracts in connection with the construction of the new City Hall. Bids will be opened on March 19th for the excavating and grading of the site. Plans are nearly complete for other parts of the work, and bids will be advertised for within a few weeks. All contracts will be let through the office of the Board of Public Works.

PASADENA, LOS ANGELES CO., CAL.—Club house, 4 story and base, brick, \$75,000. Architect, S. B. Mars-ton, Chamber of Commerce Bldg., Pasadena. Owners, Pasadena Athletic Club. Preliminary plans are being prepared for this building which is to be erected on Colorado street. The interior will be arranged for a large and modern gymnasium, dining rooms, club rooms and 46 sleeping apartments. There will be a large plunge and over 20 baths. Interior will be finished in pine and hardwoods. There will be steam heat and elevator service. The exterior will probably be faced with pressed brick. Plans have not progressed far enough to give further details.

NEWBERG, ORE.—City Hall, 2 story and base, brick. Cost not stated. Exchange Bldg., Portland. Owners, Town of Newberg. The building will be 50x50 feet in size. The first floor will contain the office of the Mayor, Council Chamber, offices of the Fire Department and several smaller offices. Second floor will also be arranged for a number of offices and the club rooms of the Newberg Commercial Club. Space has also been provided in the first floor for four fire trucks. The basement will be arranged for a jail. There will be steam heat. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SEATTLE, WASH.—Association building, 8 story and base. Class A construction, \$250,000. Architect, C. Frete Champney, Henry Bldg., Seattle. Owners, Young Women's Christian Association. Contractors, Grant Smith & Co., Henry Bldg., Seattle. Contract price, \$250,000.

LOS ANGELES, CAL.—Museum, 1 story and base, reinforced concrete, \$55,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Southwest Museum. Contractors, J. C. Kuhnrich Co., Pacific Electric Bldg., L. A. General construction, \$50,850; Southern California Electric Co., 625 South Main St., L. A., electric work, \$1,260; W. D. Newell, 218 West First St., L. A., plumbing. Contract price not stated.

Contracts Awarded.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Lodge hall, 3 story and base, brick and steel. Cost not stated. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owners, San Luis Obispo Masonic Hall Association. Contractor, W. J. Smith, San Luis Obispo, general construction; Union Hardware Co., San Luis Obispo, plumbing, and E. M. Payne, San Luis Obispo, heating.

HOTELS.

SAN FRANCISCO—Hotel, 7 story and base, reinforced concrete. Cost not stated. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, Mrs. Mary Hefferman. This building has been mentioned in these columns before when preliminary plans were started. The structure is to be erected at the southeast corner of Geary and Williams streets, and will cover an area of 56x87 feet. The entire first floor will be given over to an attractive entrance, lobby, offices and parlors. Upper floors will be arranged for about 90 guest rooms, all of which will have connecting baths. Plans include steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwoods. The exterior of the building will probably be faced with cement plaster. Construction will be carried out by the firm of Beach & Hefferman, David Hewes

SAN FRANCISCO—Hotel, 5 story and base, brick and steel. Cost not stated. Architects, C. M. and A. F. Rouseau, Monadnock Bldg., S. F. Owner, Theo. Rulfs. The building will be erected at the corner of Pine and Leavenworth streets, and will cover an area of 37x57 feet. Interior finish will be of pine and hardwoods. There will be in the neighborhood of ninety rooms and baths. The building will be heated by steam. There will be elevator service and a vacuum cleaning system. Lobby and parlors will be finished in hardwood and ornamental plaster. The exterior will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Hotel, 2 story and base, frame, \$22,000. Architects, Dunn & Kerns, Monadnock Bldg., S. F. Owner, Mrs. Ella May Burke. The building will be arranged for stores on the first floor and about fifty guest rooms on the upper floors. There will be a number of baths. Plans include steam heat and a hot water supply system. Interior will be finished in pine throughout. Tile will be used in the baths. The exterior will be covered with cement plaster on metal lath. Patent store fronts are specified. Plans are complete and figures are being taken by the architects.

SAN FRANCISCO—Hotel, 6 story and base, reinforced concrete, \$75,000. Architects, Miller & Colmesnil, Lick

Bldg., S. F. Owners, Prior Estate. The building will be erected at the northwest corner of Eddy and Mason streets and will cover a considerable ground area. The first floor will contain five stores and the basement a large cafe. Upper floors will be divided into 55 guest rooms all of which will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Metal window frames and sash will be used. Interior will be finished in pine, hardwood and ornamental plaster. Tile and cement will be used in the bath rooms. Exterior of the building will be faced with white cement plaster. Plans are nearly ready for figures.

SAN FRANCISCO—Hotel, 2 story and base, brick and steel, \$25,000. Architects, McDonagall Bros., Russ Bldg., S. F. Owner, I. Steinbart. The building is to be erected on Sutter street near Leavenworth, and will be arranged for stores on the first floor and rooms above. Interior will be finished in pine throughout. There will be several bath rooms which will have composition floors. A hot water system and steam heat will be installed. The stores will have patent fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$125,000. Architects, Bliss & Faville, Balboa Bldg., S. F. Owner, Robert L. Colman. This building is to be erected in the north line of Sutter street, between Taylor and Jones streets. There will be in the neighborhood of 150 rooms, all with private baths. The owner will occupy the top floor, which is to be handsomely furnished. Plans include steam heat, elevator service, hot water supply, vacuum cleaning system and all other modern conveniences. Interior will be finished in pine, hardwood and tile. All bath rooms will have composition floors and the wainscot. Besides the guest rooms there will be a large office and lobby and parlors. The exterior of the building will be faced with pressed brick. Plans are being prepared.

OAKLAND, CAL.—Hotel, 7 story and base. Class C construction, \$100,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner's name withheld. The building will be erected within three blocks of the new City Hall, and will contain in the neighborhood of 100 guest rooms and a large number of baths. There will be steam heat, elevators, a hot water supply system and vacuum cleaning. Interior will be finished in pine, hardwoods, and tile. There will be a large office and lobby on the first floor. Bath rooms will have composition floors and tile wainscot. The exterior of the building will probably be faced with pressed brick. Plans are being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel, 3 story and base, brick and steel, \$20,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Teherassy. This building will be erected on the corner property adjoining Mr. Teherassy's new theatre building, designed by the same architect. There will be three stories on the first floor and in the neighborhood of 28 rooms and six baths on the upper floors. Interior will be finished in

pine throughout. There will be a steam heating plant of sufficient capacity to supply the theatre. Foundations and walls have been designed to carry a fourth story. All rooms will be supplied with hot and cold running water. The exterior of the building will be faced with pressed brick. Plans are being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel, 3 story and base, reinforced concrete, \$13,000. Architect, J. B. Ogborn, Richmond. Owner, E. B. Anderson. Mr. Anderson owns a valuable piece of property on Richmond avenue, near Washington, which is to be improved at once. Plans show an attractive building, with stores on the first floor and a number of large light guest rooms on the upper floors. Patent store fronts will be used. Interior of the second and third floors will be finished in pine. Plans include a hot water supply system. The exterior of the building will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

LOS ANGELES, CAL.—Hotel, 6 story and base, Class A construction. Cost not stated. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Jacob Joseph. The building is to be erected on 6th street, between Hope and Flower streets, and will have a frontage of 100 feet and a depth of 120 feet. Interior has been arranged for 165 guest rooms, four large stores and the hotel lobby. A large percentage of the rooms will have private baths. Interior finish will be of hardwood. There will be steam heat, both freight and passenger elevators, a vacuum cleaning system and hot water supply. Entrance lobby will be finished in marble and ornamental plaster. A complete steel frame will be used with exterior walls of pressed brick and terra cotta. Bath rooms will have composition floors and the wainscot. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 12 story and base, reinforced concrete. Cost not stated. Architects, Ye Planny Building Co., L. A. Owner, N. W. Stowell. This work was mentioned here before. At that time it was stated that construction would be of steel and brick. Mr. Stowell has decided to use reinforced concrete throughout. Plans will be prepared at once and contracts let within three months.

LOS ANGELES, CAL.—Hotel, 8 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders International Bank Bldg., L. A. Owners, Biescar Estate. The building will occupy a corner site and is to cover an area of 60x150 feet. There will be stores and a hotel lobby on the first floor and a total of 165 guest rooms on the upper floors. Construction will be fireproof throughout. Nearly all of the rooms will have private baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine and hardwood. Tile will be used in the baths. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

PORTLAND, ORE.—Hotel and stores, 4 story and base, reinforced concrete, \$80,000. Architects, Investors' Building and Trust Co., Yeon Bldg., Portland. Owner, A. C. Pike. The building will cover an area of 100x100 feet. The

first floor will be arranged for eight stores besides the hotel lobby, entrance and billiard and pool room. Upper floors will contain 177 guest rooms and a large number of baths. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior will be finished in pine and hardwoods. Foundations and walls have been designed with sufficient strength to carry several more stories. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick, \$50,000. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. W. Rhodes. Contractors, Brerber-Bradley Construction Co., 1824 East 15th St., L. A., general construction, \$39,200; John Fennell, 351 East 3rd St., L. A., painting, \$1,250; Blumve & Jay Co., 514 East 9th St., L. A., plumbing, \$7,800; Foulkes & Gray-Lard, Security Bldg., L. A., electric work, \$1,200.

HOSPITALS.

SAN FRANCISCO — Hospital addition, 1 story and base, reinforced concrete, \$18,000. Architect, Constructing Quartermaster's Dept., U. S. A., Fort Mason. Owners, United States Government. Plans and specifications have been completed for the construction of a one story addition to the Letterman General Hospital at the Presidio. Bids will be taken through the Constructing Q. M. Department at Fort Mason within the next few days. An official proposal will appear in these columns shortly.

LOS ANGELES, CAL.—Hospital, 4 story and base, Class A construction, \$350,000. Architect, W. S. Garrett, Currier Bldg., L. A. Owners, Methodist Hospital Association. At the last meeting of the association the architect was instructed to proceed with the working drawings. None of the details of the building have been received in this city, and other than the fact that the structure will be fireproof and will contain the most modern equipment, nothing can be printed at this time. It is understood that construction will be of the reinforced concrete type and that the exterior will be faced with cement plaster. Further information will be printed as the plans progress.

LIBRARIES.

UKIAH, MENDOCINO CO., CAL.—Library, 1 story and base, brick and concrete. Cost not stated. Architect, John Davis Hatch, Humoldt Bank Bldg., S. F. Owners, Town of Ukiah. Architect Hatch has just been commissioned to prepare plans for a new library building in Ukiah. The structure will be classic in design and will contain a large public room, rack rooms and office for the librarian. Interior will be finished in pine and hardwood. A central heating system will be installed. The exterior of the building will probably be faced with pressed brick. Plans are now being prepared.

PANAMA -- PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Concession building, frame construction, \$15,000. Architect, G. Albert Lansburgh, Gunst Bldg., S. F. Owners, Orange Blossom Co. Plans for a concession building covering an area of 60x80 feet are being prepared. The building will be occupied by the famous Orange Blossom Candy Co. and is unique in its design. A large amount of art glass will be used. Exterior will be covered with cement plaster. Plans will be completed shortly.

SAN FRANCISCO — Educational Building, frame construction. Cost not stated. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened on March 11th by the Buildings and Grounds Committee of the Panama-Pacific Exposition Co. for the construction of the Educational Building, which will form one of the most important parts of the 1915 Exposition. Lange & Bergstrom were low men and will probably be awarded the contract. The building is a one story frame structure, covering an area of 205,100 square feet. Bids were taken for the construction with lumber furnished by the Exposition Company, for the construction with lumber furnished by the contractor, and for the plumbing. A complete list of all figures appears under San Francisco in this issue.

SAN DIEGO, CAL. — Exposition building, frame construction, \$67,000. Architect, Architectural Department Southern California Panama Exposition Co. Contractor, G. A. Simpson Construction Co., American Bldg., San Diego. Contract price, \$67,000.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Oil house equipment. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for the equipment for an oil house at the Geary Street Municipal Car Barns have been completed and figures are now being taken by the Board of Public Works. Bids will be opened on April 2nd. Plans can be secured from the Engineering Department.

SAN FRANCISCO—Tunnel construction, excavating and concrete work. Cost not stated. Engineer, City Engineer. Owners, City and County of San Francisco. The Board of Public Works will open bids on April 9th for the construction of the Stockton Street Tunnel from Sutter to Sacramento streets. The work will probably cost in the neighborhood of a million dollars when complete. Complete information can be secured from the City Department of Engineering, Temporary City Hall Bldg. The official proposal appears in another column of this issue.

RESIDENCES.

SAN FRANCISCO — Residence, 2 story and base, frame, \$2,800. Architect, none. Owner, T. Rorquist, 3931 21st St., S. F. The dwelling has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Oak floors will be used

the principal rooms. There will be a open fire place and brick mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

AKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, C. W. McCall. Central Bank Bldg., Oakland. Owner, Dr. G. B. W. The dwelling will contain eight principal rooms, bath and sleeping porch. Interior will be finished in pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Roof will be covered with asbestos shingles. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are out for figures.

AKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, A. A. Smith, 1610 Broadway, Oakland. Owner, Mrs. S. W. Hall. The dwelling will contain seven rooms and bath. Interior will be finished in pine, redwood and some hardwood. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$500. Architect, none. Owner, J. A. Men, 2626 Hillegass Ave., Berkeley. The dwelling has been designed for a 4-room house with bath and sleeping porch. Interior will be finished in pine and hardwood with hardwood floors in the living and dining rooms and reception hall. There will be a furnace and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will be finished in tile. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$500. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, C. Miller. The house will contain seven rooms and bath. Interior will be finished in pine and redwood with some hardwood veneer. There will be furnace heat and open fireplaces. Mantels will be of tile and brick. Oak floors will be used in the living rooms, reception hall and dining room. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are being prepared for the work.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$500. Architect, A. S. MacLellan, 2407 Santa Clara Ave., Alameda. Owner, George Gottstein. The house will contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered

with cement plaster and shingles. Plans are complete and out for figures.

ALAMEDA, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,200. Architect, A. S. MacLellan, 2407 Santa Clara Ave., Alameda. Owner, George Gottstein. The bungalow will contain five rooms and bath. Interior will be finished in pine throughout. Some oak floors will be used. There will be an open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. The exterior of the bungalow will be covered with cement plaster. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architects, Swartz, Hotchkin & Swartz, Fresno. Owner, E. B. Bullard. The dwelling is to be erected in Biola, a new town near Fresno, and will contain fourteen rooms, baths and sleeping porches. Interior will be finished in pine and hardwoods. Hardwood floors will be used in all principal rooms. There will be a central heating system and open fire places. Mantels will be of brick and tile. Tile will be used in the baths and kitchens. An automatic water heater will be installed. The exterior of the dwelling will probably be covered with cement plaster on metal lath. Plans are being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences, frame construction. Cost not stated. Architect, none. The following Day Labor jobs are about to be started in Stockton: John C. McCarty, Werner Station, 2 story, frame, \$3,800; R. R. Rollenstein, 409 Rose St., 2 story frame, \$1,000; C. H. Pease, 522 West Park St., 1½ story, frame, \$2,000, and A. L. Miner, 1320 North Hunter, 1 story, frame, \$1,800.

SCHOOLS.

OKLAND, CAL.—School group. Class A construction. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans and specifications for the main building of the new Commercial and Manual Training High School, to be erected at Forty-fifth and Broadway, Oakland, were presented to the Board of Education last evening by City Supervising Architect J. J. Donovan. In his communication accompanying the plans, which were referred to the business manager and the school said that the building should be ready for occupancy by January 1, 1914.

"We have spent a lot of time on the work since last May," said Donovan, "and I feel confident that the building will be without doubt the most splendid manual training and commercial high school building in this country."

Plans were prepared in three sections. Section A will be the administration part of the building, and will include a library, the principal's suite, an assembly hall with a gallery seating 1,500, teachers' lunch rooms, a kitchen and a band room, with practicing rooms.

Section B will include sixteen class rooms, six teachers' rooms and commercial rooms, and in section C will be included the lecture rooms and a girls' gymnasium and shower baths, a housekeeping suite, with kitchen, bedroom, living room and bath room, completely furnished and cared for by the girls. Cooking, sewing and other do-

mestic sciences will be taught here. In the basement of the third section will be located the boys' gymnasium.

FILLETON, ORANGE CO., CAL.—School, 1 story and base, brick, \$50,000. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Fullerton School District. The building has been designed in the shape of a letter T, and will cover an area of 180x200 feet. There will be twelve standard sized class rooms, library, principal's office and teachers' rooms. An auditorium with a seating capacity of 800 is also provided. Interior partitions will be of metal lath and plaster. Floors will be of maple with cork linoleum in the corridors. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with cement plaster. Plans are being prepared.

TULALIP, WASH.—School, 1 story frame. Cost not stated. Architect, Department of Indian Affairs, Washington, D. C. Owners, United States Government. Plans have been received at the local Indian Agency for a frame school building and extensions to the water supply system of the Tulalip Indian School. Bids will be opened in Washington on April 7th. Plans and specifications can be obtained from the local Agency. The official proposal appears in another column of this issue.

LOS ANGELES, CAL.—School group, brick and steel construction, \$600,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, State of California. Sealed bids will be received by State Engineer Willbur F. McClure, Sacramento, Cal., up to 12 o'clock, noon, of April 5, 1913, for the erection of the State Normal School buildings to be erected at Vermont and Willowbrook avenues. The plans were officially approved by the Governor, State Engineer and Advisory Board. The buildings planned include the Administration building, 260x202 feet containing auditorium seating 1,620; Library, 136x107 feet, with reading room to seat 250 and stack room for 50,000 books; Domestic Science, 170x150 feet; Fine Arts, 142x82 feet; Gymnasium, 140x82 feet, with 150 lockers, 34 dressing rooms and shower and needle baths for girls, lockers and showers for boys; Training School, 365x175 feet, with gymnasium for boys and girls attached; Kindergarten, 96x57; Cafeteria, 90x82, with dining hall to seat 300; Manual Arts, 226x83 feet. All the buildings will be two stories except the kindergarten, cafeteria and manual arts buildings, which will be one story. The construction will be brick walls with fireproof stairways and corridor floors, wood floor in rooms, tapestry brick facing, clay tile roofs, maple floors, central steam heating plant with underground ducts and fan room in each building, program clocks, vacuum cleaning, intercommunicating telephone system.

SEWERS, STREET WORK AND WATER SYSTEMS.

STANISLAUS COUNTY, CAL.—Highway work. Cost not stated. Engineer, State Highway Engineer, Sacramento. Owners, State of California. Plans are complete and bids are being called for on the construction of approximately 2½ miles of the State Highway in Stanislaus County. Bids will be

opened by the State Highway Commission on March 24th. Plans can be secured from the Secretary of the Highway Commission at Sacramento.

SEALED PROPOSALS.

PROPOSALS FOR BUILDING.

BUILDING—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Addition to Frame Schoolhouse and Extension of Water System, Tulalip Indian School, Washington," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office, until **2 o'clock p. m. April 7, 1913**, for furnishing materials and labor for the construction of an addition to frame schoolhouse and the installation of an extension to water system at the Tulalip Indian School, Wash., in strict accordance with the plans, specifications and instructions to bidders, which may be examined at this office, the offices of the supervisor of construction, Denver, Colo.; the U. S. Indian warehouse, San Francisco, Cal. and at the school. For further information apply to the superintendent of the Tulalip Indian School, Tulalip, Wash. **F. H. ABBOTT**, acting commissioner.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 765—Proposals for Railings for Spillways and Steel Doors for Entrances to the Operating Tunnels of All Locks on the Panama Canal.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m. March 27, 1913**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 765) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal., also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. **F. C. BOGGS**, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR BOILERS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 19th day of March, 1913**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of boilers, breeching and piping for the Relief Home on the Alms House Tract.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. **F. J. CHURCHILL**, Secretary.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of April, 1913**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit: The construction of Engine House No. 21 of the San Francisco Fire Department, to be located on the southwesterly corner of Hoffman avenue and Alvarado street.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. **F. J. CHURCHILL**, Secretary.

PROPOSALS FOR OIL HOUSE EQUIPMENT.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of April, 1913**, for doing the following work, to wit: The equipment of a Lubricating Oil House for the Geary Street Municipal Railway.

Progressive payments will be made. The amount of bond for faithful performance has been fixed at \$200.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. **F. J. CHURCHILL**, Secretary.

PROPOSALS FOR EXCAVATING AND GRADING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 19th day of March, 1913**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

Excavation and grading work for the City Hall, to be located on city property bounded by McAllister street, Polk street, Grove street and Van Ness avenue.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works and completed within one hundred (100) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$10,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. **F. J. CHURCHILL**, Secretary.

NOTICE FOR BIDS.

NOTICE is hereby given that the Hotel Placer Company will receive bids for the construction of a concrete Hotel Building, to be located on its lot in Auburn, Placer County, California, in accordance with plans and specifications adopted by said company.

Said plans and specifications may be found at the following places:

At Auburn Lumber Co., Auburn, Cal.
At Builders' Exchange, San Francisco, Cal.

At Contractors' Association, Sacramento, Cal.

Bids will be received up to **6 o'clock of Tuesday, March 25th, 1913**.

The company reserves right to reject any or all bids submitted.

HOTEL PLACER COMPANY,

S. G. WATTS, Secretary.

PROPOSALS FOR TUNNEL CONSTRUCTION.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 9th day of April, 1913**, for doing the following work to wit:

The construction and completion of a tunnel with approaches and appurtenances thereto in Stockton street, between Sutter and Sacramento streets in the City and County of San Francisco, State of California (being the construction referred to in the Resolution of Intention of the Board of Supervisors of said City and County of San Francisco in that behalf, being Resolution No. 8818, New Series, approved November, 9th, 1911).

Said tunnel shall be constructed in the place and in the manner specified delineated and shown in the "plans, profiles, cross-sections and general specifications of the work required for the completion of said tunnel and appurtenances thereto," adopted and confirmed by the Board of Supervisors of said City and County by a resolution

said Board of Supervisors, being resolution No. 9681, New Series, adopted September 23rd, 1912, and approved by the Mayor of said City and County, September 25th, 1912, pursuant to the provisions of "The Tunnel procedure Ordinance" of said City and County.

Progressive payments for said work, he made as provided for in the specifications.

Said work must be done in accordance with the plans and specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within three hundred and sixty-five (365) calendar days from the date of the contract to be made and entered into therefor. The amount of bond for the faithful performance of the contract has been fixed at \$100,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works,
F. J. CHURCHILL,
Secretary.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock noon, Saturday, April 5, 1913, said bids then and there to be publicly opened and read, for a group of ten buildings for the State Normal School, Los Angeles, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

FIRST—For Entire Work.

SECOND—For Mason Work, including All Brick, Stone, Terra Cotta, and Concrete Work, and All Necessary Excavating and Filling.

THIRD—For Iron Work.

FOURTH—For Carpentering, Electric and Glazing Work.

FIFTH—For Plastering.

SIXTH—For Plumbing and Gas Fitting.

SEVENTH—For Heating.

EIGHTH—For Tinning, Galvanized Iron and Slatting Work.

NINTH—For Painting and Graining.

A bond in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Twenty-five (\$25.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

FOOTE CONCRETE MACHINERY CO.

Telephone Sutter 1675 38-40 NATOMA ST., S. F.

Edward R. Bacon is positively not connected with any other firm.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for State Normal School Buildings, Los Angeles, California."

(Signed) W. F. MCCLURE,
State Engineer.

Capt. E. S. Walton, of the Quartermaster Corps, has taken the place of Lt. Col. George McK. Williamson, formerly in charge of the Constructing Quartermaster Department at Fort Mason. Col. Williamson has been transferred to the Department of the Gulf.

Bids will be called by the first of next week for the construction of the one story reinforced concrete addition to the Letterman General Hospital at the Presidio, and also for the construction of an electric light system for Fort Mason. This system will include overhead and underground power circuits, and will be a 3 wire 3 phase 60 cycle system. Included in the work will be the construction of a sub-station 24x24 feet, frame, with cement plaster on metal lath. There will be four marble switchboards and other complete sub-station equipment. All buildings at the Post will be wired and furnished with fixtures except those buildings now wired. Ornamental street electroliths will be installed.

Plans are being prepared for the construction of a 25-foot roadway connecting the Guardhouse at the Presidio with Fort Winfield Scott. The road will have an asphalt binder.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 A. M., on Tuesday, April 1, 1913, for the Installation of Plumbing, Sewers and Water Pipe of the Food Products Building, in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 367, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Building and Grounds Committee.

WILLIAM H. CROCKER,
Chairman.

Chairman.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 764—Proposals for Electric Traveling Cranes, Steel Rail, Angle Bars, Truck Bolts, Switches, Track Frogs, Flat Plates, Track Chisels, Rabbitt Metal, Poultry Netting, Steel Wire, Taps, Screws, Cotter Pins, Hammers, Wrench Parts, Pipe Fittings, Valves, Saws, Hinges, Tackle Blocks, Torches, Ladders, Rakes, Bars, Hose, Silica Sand, Fennell Clay Brick, Enamel and Lumber.—Sealed proposals will be received at the office of the general purchasing officer, Indianian Canal Commission, Washington, D. C., until 10:30 A. M. March 26, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Blank and general information relating to this circular (No. 764) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point Street, San Francisco, Cal.; also from the P. S. engineer office in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. army, a general purchasing officer.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores and offices, 20 story and base. Class A construction, \$1,500,000. Architect's name withheld. Owners represented by Kern-Neelan Co., 216 Bush St., S. F.

The reported sale of the southeast corner of Market and 14th streets, as announced in the morning press, has been substantiated, but further details of the improvements which will cost on this million dollar corner are given for the first time in these col-

umns. The firm of Kern & Neelan, 216 14th street, through whose offices the sale was made, state that a 20 story Class A office building is to be erected at a cost of considerably over \$1,000,000. It is further stated that a local architect has been selected, but his name will not be disclosed for the present. The building will have a frontage on Market street of 100 feet and 170 feet on 14th. The buyers are Eastern capitalists, and have announced their intention of spending far over a million dollars on the structure. The first nine stories of the new structure will be occupied by a company controlled by the owners. Preliminary sketches provide for a complete steel frame with reinforced concrete walls, floors, etc. Further information relative to the name of the architect and details of construction will be given in these reports at an early date.

OAKLAND, CAL.—Stores and offices, 2 story and base, brick and steel, \$30,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Morris and Muller. This building has been mentioned here before when plans were first started. There will be stores on the first floor and lofts above. Interior will be finished in pine. There will be patent store fronts, modern plumbing and electric work. The exterior of the building will be faced with glazed brick and terra cotta. The architect is now taking figures for the brick work, terra cotta, marble and the work.

FRESNO, FRESNO CO., CAL.—Stores and offices, 2 story and base. Cost not stated. Architect, E. J. Farr, Fresno. Owners, H. R. and W. B. Holland. The building will cover an area of 80x120 feet. The first floor is to be arranged for several stores and the upper floor for modern offices. Interior partitions will be of hollow tile. There will be steam heat. Patent store fronts will be used. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owners who are now taking figures for the work.

FRESNO, FRESNO CO., CAL.—Stores and offices, 3 story and base, brick, \$70,000. Architect, none. Owner, D. Yezdan, Demir Bros. and Tharpanian Bros., Fresno. The building will be erected at the corner of Kern and J streets and will cover an area of 100x130 feet. Several large stores will occupy the first floor and the upper two stories have been arranged for halls and offices. There will be a central heating system, elevator service and pine trim. The exterior of the building will be faced with pressed brick. Plans will be ready for figures within a day or two. Bids will be taken by the owners.

LOS ANGELES, CAL.—Stores and offices, Class A construction. Cost not stated. Architect's name not given. Owner, William R. Hearst. Mr. Hearst has just purchased twelve lots at the southwest corner of 11th and Hill streets at a cost of over one million dollars. The property covers an area of 322x216 feet. A portion of this building will be the site of a large Class A building to be used by the Los Angeles Examiner.

LOS ANGELES, CAL.—Offices, 8 story and base, Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, I. W. Hellman. The building will be erected on property adjoining

the present I. W. Hellman Building on Spring street. Construction will be fireproof throughout with hollow tile partitions and floor slabs. Interior finish will be of metal. There will be steam heat and elevator service, a vacuum cleaning system and mail chutes. All window frames and sash will be of metal. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PASADENA, LOS ANGELES CO., CAL.—Stores and offices, 6 story and base, reinforced concrete, \$100,000. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Citizens' Saving Bank. This work is in the nature of an addition to the present one story building, which was designed to carry ten stories. The first floor will be occupied by the bank. Upper floors will contain in the neighborhood of 95 offices. Interior finish will be of pine and hardwood. Floors will be of concrete. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. Plans are being prepared.

SEATTLE, WASH.—Stores and offices, 12 story and base, Class A construction, \$800,000. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owner's name withheld. None of the particulars of this enterprise have been given out and the owner's name and exact location of the structure cannot be learned at this time. Announcement of the complete details of the building will be made early next month.

LA GRANDE, ORE.—Stores and offices, 3 story and base, brick and steel. Cost not stated. Architects, Whidden & Lewis, Wilcox Bldg., Portland. Owners, N. K. West and C. S. Jacobsen. The building will be erected on one of the principal business corners in La Grande and will cover an area of 60x110 feet. There will be several stores on the first floor and a number of modern offices arranged ensuite on the two upper floors. Plans include steam heat, metal window frames and sash and patent store fronts. Interior finish will be of pine and marble. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

Contracts Awarded.

SEATTLE, WASH.—Stores and offices, 3 story and base, reinforced concrete, \$70,000. Architects, Bebb & Mendel, Haight Bldg., Seattle. Owner, George W. Fisher. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price, \$70,000.

SEATTLE, WASH.—Department store, 8 story and base, Class A construction, \$300,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, The Bon Marche. Contractors, Aldrich & Hunt, Central Bldg., Seattle. Contract price, \$200,000.

FRESNO, FRESNO CO., CAL.—Stores, 1 story and base, brick, \$10,000. Architects, A. C. Swartz & Son, Fresno. Owner, Mr. McLaughlin. Contractor, Dave Cowan, Fresno. Contract price, \$10,000.

FRESNO, FRESNO CO., CAL.—Department store, 3 story and base, brick and steel. Cost not stated. Architect, C. A. Menzies-Joffrey, Humboldt Bank Bldg., S. F. Owner, E. Gottschalk. Contractor, H. A. Hansen, Fresno. Contract price not stated.

Plans describing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, are carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, Milton Lichtenstein, 111 Ellis St., S. F. Owner, Hymie Jacobs. The building will be erected on Jackson street, west of Locust, and is designed for six apartments each of which will consist of six rooms and two baths. Interiors will be finished to suit the tenants who have already leased the suites. There will be steam heat, a vacuum cleaning system and dumb waiters. Much hardwood and tile will be used. All suites will have wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—5 story and base, brick and steel, \$75,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Calvin E. Knickerbocker and A. Boswick. The building will cover an area of $46\frac{1}{2} \times 65\frac{1}{2}$ feet, and is to be arranged for a total of 45 apartments of two, three and four rooms each. All suites will have wall beds and private bath. Interior will be finished in pine and hardwoods with ornamental plaster in the lobby, reception hall and parlors. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Bath rooms will have tile wainscot. The exterior of the building will be faced with cement plaster. Plans are complete and segregated figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$35,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Miss D. Loazia. The building will be erected at the corner of Washington and Taylor streets, and is to cover an area of $55 \times 127\frac{1}{2}$ feet. There will be a number of two and three room apartments with wall beds and private baths. Interior finish will be of pine and hardwood. Plans include steam heat and a hot water system. Tile will be used in the baths. An attractive lobby and entrance has been designed. The exterior of the building will be covered with rustic and metal lath and plaster. Plans are complete and figures are being taken by the architects.

APARTMENT HOUSE—3 story and base, frame, \$14,000. San Francisco. Architect, none. Owner, F. W. Lurmann, 1760 Hyde St., S. F. The building will be $27\frac{1}{2} \times 123$ feet with twelve apartments of three rooms and bath each. Interior finish will be largely of pine. Some elm panels will be used. There will be steam heat and a hot water supply system. All suites will have wall beds. Tile floors will be used in the baths and entrance lobby. The exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. He is now purchasing all materials.

APARTMENT HOUSE—3 story and base, frame, \$21,000. San Francisco. Architect, E. Kolofrath, Phelan Bldg., S. F. Owner's name withheld. The

building will be erected at the corner of Buchanan and Herman streets, and has been arranged to contain fifteen suites of two and three rooms each. All apartments will have wall beds and private bath rooms. Interior finish will be of pine throughout. Baths will have tile wainscoting. A central heating system will be installed. The exterior will be covered with cement plaster on metal lath. Plans are being prepared.

PIECE HOUSE—2 story and base, brick and steel, \$33,000. San Francisco. Architect, Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for Engine House No. 24, which is to be erected at the southwest corner of Hoffman avenue and Alvarado street, are complete and bids will be opened by the Board of Public Works on April 2nd. The exterior of the building will be faced with pressed brick and terra cotta. Interior will be finished in pine and hardwood. There will be special plumbing fixtures and electrical equipment. Steam heat will be installed. Plans can be secured from the Department of Architecture.

FACTORY—1 story, steel and frame, \$1,000. San Francisco. Architect, none. Owners, West Coast Iron Works, 549 Monadnock Bldg., S. F. This building has been designed for a steel furnace shed. Some structural steel will be used and the exterior will be covered with corrugated iron. Plans are complete and the work will be done by Day Labor.

TUNNEL CONSTRUCTION—Excavating and concrete work. Cost not stated. San Francisco. Engineer, City Engineer. Owners, City and County of San Francisco. The Board of Public Works will open bids on April 9th for the construction of the Stockton Street Tunnel from Sutter to Sacramento streets. The work will probably cost in the neighborhood of a million dollars when complete. Complete information can be secured from the City Department of Engineering, Temporary City Hall Bldg. The official proposals appears in another column of this issue.

FLATS—2 story and base, frame, \$7,500. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, E. Davis. A two-story frame building now occupying the property will be altered to contain six modern flats of four and five rooms each. The work will include new plumbing, electric work, plastering, interior trim and pine and hardwood. Gas grates will be installed. The exterior of the building will be covered with cement plaster and rustic. Plans are complete and a contract will be awarded at once.

FLATS—2 story and base, frame, \$,000. San Francisco. Architect, none. Owner, David Condon, 4188 26th St., S. F. The building will be erected at the corner of 10th avenue and C street, and is to cover an area of 28×80 feet. The first floor will be arranged for a store and upper floor for two or more flats of four and five rooms. Interior will be finished in pine and hardwood. The exterior of the building will be

covered with tile. Plans are in the hands of the owner and the work will be done by Day Labor.

CITY HALL—Class A construction, \$1,500,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids are now being called for on the first of the contracts in connection with the construction of the new City Hall. Bids will be opened on March 19th for the excavating and grading of the site. Plans are nearly complete for other parts of the work and bids will be advertised for within a few weeks. All contracts will be let through the office of the Board of Public Works.

HOSPITAL ADDITION—1 story and base, reinforced concrete, \$18,000. San Francisco. Architect, Constructing Quartermaster's Dept., U. S. A. Fort Mason, Owners, United States Government. Plans and specifications have been completed for the construction of a one-story addition to the Letterman General Hospital at the Presidio. Bids will be taken through the Constructing Q. M. Department at Fort Mason within the next few days. An official proposal will appear in these columns shortly.

HOTEL—7 story and base, reinforced concrete. Cost not stated: San Francisco. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, Mrs. Mary Hefferman. This building has been mentioned in these columns before when preliminary plans were started. The structure is to be erected at the southeast corner of Geary and Williams streets, and will cover an area of 55×87 feet. The entire first floor will be given over to an attractive entrance, lobby, offices and parlors. Upper floors will be arranged for about 90 guest rooms, all of which will have connecting baths. Plans include steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwoods. The exterior of the building will probably be faced with cement plaster. Construction will be carried out by the firm of Beach & Hefferman, David Hewes Bldg., S. F.

HOTEL—5 story and base, brick and steel. Cost not stated. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Theo. Rulfs. The building will be erected at the corner of Pine and Leavenworth streets, and will cover an area of 37×87 feet. Interior finish will be of pine and hardwoods. There will be in the neighborhood of 90 rooms and baths. The building will be heated by steam. There will be elevator service and a vacuum cleaning system. Lobby and parlors will be finished in hardwoods and ornamental plaster. The exterior will be faced with pressed brick. Plans are being prepared.

HOTEL—2 story and base, frame, \$22,000. San Francisco. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner, Mrs. Ella May Burke. The building will be arranged for stores on the first floor and about 50 guest rooms on the upper floors. There will be a number of baths. Plans include steam heat and a hot water system. Interior will be finished in pine throughout. Tile will be used in the baths. The exterior will be covered with cement plaster on metal lath. Patent store fronts are specified. Plans

are complete and figures are being taken by the architects.

HOTEL—6 story and base, reinforced concrete, \$75,000. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Prior Estate. The building will be erected at the northwest corner of Eddy and Mason streets and will cover a considerable ground area. The first floor will contain five stores and the basement a large cafe. Upper floors will be divided into 85 guest rooms, all of which will have connecting bath rooms. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Metal window frames and sash will be used. Interior will be finished in pine, hardwood and ornamental plaster. Tile and cement will be used in the bath rooms. Exterior of the building will be faced with white cement plaster. Plans are nearly ready for figures.

HOTEL—2 story and base, brick and steel, \$25,000. San Francisco. Architects, McDougall Bros., Russ Bldg., S. F. Owner, I. Steinhart. The building is to be erected on Sutter street near Leavenworth, and will be arranged for stores on the first floor and rooms above. Interior will be finished in pine throughout. There will be several bath rooms, which will have composition floors. A hot water system and steam heat will be installed. The stores will have patent fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—7 story and base, brick and steel, \$125,000. San Francisco. Architects, Bliss & Faville, Balboa Bldg., S. F. Owner, Robert L. Coleman. This building is to be erected in the north line of Sutter street, between Taylor and Jones streets. There will be in the neighborhood of 150 rooms, all with private baths. The owner will occupy the top floor, which is to be handsomely furnished. Plans include steam heat, elevator service, hot water supply, vacuum cleaning system and all other modern conveniences. Interior will be finished in pine, hardwood and tile. All bath rooms will have composition floors and tile wainscot. Besides the guest rooms there will be a large office and lobby and parlors. The exterior of the building will be faced with pressed brick. Plans are being prepared.

OIL HOUSE EQUIPMENT—Cost not stated. San Francisco. Engineer, Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for the equipment for an oil house at the Geary Street Municipal Car Barns have been completed and figures are now being taken by the Board of Public Works. Bids will be opened on April 2nd. Plans can be secured from the Engineering Department.

RESIDENCE—2 story and base, frame, \$2,800. San Francisco. Owner, T. Bergquist, 3931 21st St., S. F. The dwelling has been prepared for a six-room house with bath. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be open fire place and brick mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

STORES AND OFFICES—20 story

and base, Class A construction, \$1,500,000. San Francisco. Architect's name withheld. Owners, represented by Kern-Nellan Co., 316 Bush St., S. F. The reported sale of the southeast corner of Market and 14th streets, as announced in the morning press, has been substantiated, but further details of the improvements which will go on this million dollar corner are given for the first time in these columns. The firm of Kern & Nellan, 316 Bush street, through whose offices the sale was made, state that a 20 story Class A office building is to be erected at a cost of considerably over \$1,000,000. It is further stated that a local architect has been selected, but his name will not be disclosed for the present. The building will have a frontage on Market street of 100 feet and 170 feet on 14th. The buyers are Eastern capitalists, and have announced their intention of spending far over a million dollars on the structure. The first nine stories of the structure will be occupied by a company controlled by the owners. Preliminary sketches provide for a complete steel frame with reinforced concrete walls, floors, etc. Further information relative to the name of the architect and details of construction will be given in these reports at an early date.

CONCESSION BUILDING—Frame construction, \$15,000. San Francisco. Architect, G. Albert Lansburgh, Gunst Bldg., S. F. Owners, Orange Blossom Co. Plans for a concession building covering an area of 60x80 feet are being prepared. The building will be occupied by the famous Orange Blossom Candy Co. and is unique in its design. A large amount of art glass will be used. Exterior will be covered with cement plaster. Plans will be completed shortly.

EDUCATIONAL BUILDING—Frame construction. Cost not stated. San Francisco. Architects, Bliss & Faville. Balboa Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened on March 11th by the Buildings and Grounds Committee of the Panama-Pacific Exposition Co. for the construction of the Educational Building, which will form one of the important parts of the 1915 Exposition. Lange & Bergstrom were low men and will probably be awarded the contract. The building is a one story frame structure covering an area of 205,100 square feet. Bids were taken for the construction with lumber furnished by the Exposition Company, for the construction with lumber furnished by the contractor, and for the plumbing. A complete list of all figures appears under San Francisco in this issue.

NOTICE FOR BIDS.

Notice is hereby given that THE HOTEL PLACER COMPANY will receive bids for the construction of a concrete Hotel Building, to be located on its lot in AUBURN, PLACER COUNTY, CALIFORNIA, in accordance with plans and specifications adopted by said company.

Said plans and specifications may be found at the following places:

At Auburn Lumber Co., Auburn, Cal.
At Builders' Exchange, San Francisco, Cal.
At Contractors' Association, Sacramento, Cal.

Bids will be received up to 6 o'clock of Thursday, March 25th, 1915.

The Company reserves the right to reject any or all bids submitted.

HOTEL PLACER COMPANY,
S. G. Watts, Secretary. (*)

Exposition Company Opens Many Figures.

Work on the Educational Building Attracts Large Number of Bidders, Lange & Bergstrom Low.

Bids for the Palace of Education were received March 11th by the Building and Grounds Committee of the Panama-Pacific International Exposition.

This building will be a one-story structure, sixty-five feet high to the main cornice, and will have a dome eighty-two feet across, which will be one hundred and twenty feet from the floor.

It will contain 205,100 square feet. It will be 394x526 feet.

Its western front will face the Palace of Fine Arts. Its eastern front will face upon the west South Court and the court of Four Seasons.

The building must be completed within two hundred days after the contract has been signed. Bliss & Faville are the architects.

Three sets of bids were received: First for the erection of the building, lumber to be furnished by the Exposition Company; Second, for the erection of the building, lumber to be furnished by the contractor, and third for the plumbing in the building.

This Trade-Mark means "Perfection" if stamped on any veneered panel.

Wybro

Next time—Get a panel that is as "good" as it is Famous—ask for the Wybro, and you will then know what perfect panel means.

White Bros.

6th & Brannan Sts. San Francisco

Cut out the cost of curved form work

You can now specify curved or arched construction—admittedly the strongest type—without the prohibitive cost of form work.

This expense is no longer necessary. Eliminate it entirely by using a reinforcement which is also a centering.

Draw your plans on stronger, lighter lines, save money for your client and give freer scope to your own artistic ideas, by specifying

"Self-Centering" is a new form of expanded metal for concrete work and general fireproofing. It is a combined reinforcement and centering, which can be used with economy and advantage in all classes of buildings, for roofs, floors, walls, ceilings—practically every form of concrete construction.

"Self-Centering" is made regularly in sheets 28" wide and up to 14' long; or curved in the factory to any desired radius.

The Standard Fireproofing Reinforcement

Roofs constructed with "Self-Centering" are the lowest cost concrete roofs that can be built, requiring only 2" of concrete. **Floors** to carry heavy loads can be planned with arched slab construction without form work up to 12' spans. **Suspended Ceilings** may be built with supports 5' between centers. **Partitions** only 2" thick are strong, rigid and low in cost, if built with "Self-Centering".

Write For Our "Fireproofing Handbook"

We will be glad to send you a complimentary copy on request. It is a handsome 80-page illustrated book, published for Architects, Engineers and Contractors. It will give you concisely all the facts you want to have regarding "Self-Centering".

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—3 story and
 base, frame, \$40,000. Oakland, Cal.
 Architect, Clay N. Burrell, Albany
 Bldg., Oakland. Owner's name with-
 held. The building will be erected in
 the Lakeside District and is planned
 for one of the most modern apartment
 house structures in the city. Pre-
 liminary plans have only been started
 and details have not been fully de-
 cided upon. Suites will probably be
 of two and three rooms each with
 bath. Interior will be hand-some-
 ly finished, considerable hardwood and
 tile being used. There will be steam
 heat and vacuum cleaning systems.
 All suites will have wall beds. Exter-
 ior will be covered with cement plas-
 ter on metal lath. Complete details
 will be given as the plans progress.

FACTORY GROTT—26 frame build-
 ings. Cost not stated. Livermore,
 Alameda Co., Cal. Architect, none.
 Owners, Coast Manufacturing and Sup-
 ply Co., Livermore. This company is
 establishing a new plant. Several of
 the above mentioned buildings are al-
 ready erected and construction on a
 number of others will follow at once.
 With the exception of the main ad-
 ministration building all other struc-
 tures will be one story in height.

WAREHOUSE—3 story and base,
 brick and steel, \$30,000. Los Angeles,
 Cal. Architect, A. W. Riewe, Califor-
 nia Bldg. L. A. Owners, J. M. Overell

Furniture Co. The building will cover
 an area of 90X140 feet. Construction
 will include considerable structural
 steel, fireproof doors, metal window
 frames and sash, elevators and mod-
 ern plumbing. Interior will be fin-
 ished in pine. The exterior of the
 building will be faced with pressed
 brick. Plans are now being prepared.

FLATS—2 story and base, frame,
 \$1,500. Oakland, Cal. Architect, Clay
 N. Burrell, Albany Bldg., Oakland.
 Owner's name withheld. The building
 will be erected in the Linda Vista
 Tract, and will be designed to contain
 two modern flats of five and six rooms
 each. Interior finish will be of pine
 and redwood with some hardwood
 floors. There will be either open fire
 places or gas grates. Tile will be used
 in the bath rooms and kitchens. The
 exterior of the building will be cov-
 ered with cement plaster on metal
 lath. Plans are now being prepared.

HOTEL—7 story and base. Class C
 construction, \$100,000. Oakland, Cal.
 Architect, Clay N. Burrell, Albany
 Bldg., Oakland. Owner's name with-
 held. The building will be erected
 within three blocks of the new City
 Hall and will contain in the neigh-
 borhood of 100 guest rooms and a
 large number of baths. There will be
 steam heat, elevators, a hot water sup-
 ply system and vacuum cleaning. In-
 terior will be finished in pine, hard-
 woods and tile. There will be a large
 office and lobby on the first floor. Bath
 rooms will have composition floors
 and tile wainscot. The exterior of the
 building will probably be faced with
 pressed brick. Plans are being pre-
 pared.

RESIDENCE—2 story and base,
 frame. Cost not stated. Oakland, Cal.
 Architect, C. W. McCall, Central Bank
 Bldg., Oakland. Owner, Dr. G. B. N.
 Clow. The dwelling will contain eight
 or nine rooms, bath and sleeping porch.
 Interior will be finished in pine and
 hardwood with hardwood floors in the
 principal rooms. There will be fur-
 nace heat and open fire places. Man-
 tels will be of brick. Tile will be used
 in the bath room and kitchen. Roof
 will be covered with asbestos shingles.
 The exterior of the dwelling will be
 covered with cement plaster on metal
 lath. Plans are out for figures.

RESIDENCE—2 story and base,
 frame, \$3,500. Oakland, Cal. Architect,
 A. W. Smith, 1010 Broadway, Oakland.
 Owner, Mrs. S. W. Hall. The dwelling
 will contain seven rooms and bath. In-
 terior will be finished in pine, redwood
 and some hardwood. Hardwood floors
 will be used in the dining and living
 rooms. There will be furnace heat
 and open fire places. Mantels will be
 of brick. The exterior of the house
 will be covered with cement plaster.
 Tile will be used in the bath and
 kitchen. Plans are complete and fig-
 ures are being taken.

RESIDENCE—2 story and base,
 frame, \$1,000. Berkeley, Alameda Co.,
 Cal. Architect, none. Owner, J. A.
 Allen, 2926 Hillegass Ave., Berkeley.
 The dwelling has been designed for a
 six-room house with bath and sleep-
 ing porch. Interior will be finished in
 pine and hardwood with hardwood
 floors in the living and dining rooms
 and reception hall. There will be a
 hot air furnace and open fire places.
 Mantels will be of tile and brick. An
 automatic water heater will be in-
 stalled. Bath room will be finished in

tile. The exterior of the house will be
 covered with shingles. Plans are com-
 plete and the work will be done by Day
 Labor.

RESIDENCE—2 story and base,
 frame, \$4,500. Berkeley, Alameda Co.,
 Cal. Architect, Olin S. Grove, 2911
 Telegraph Ave., Berkeley. Owner, C.
 E. Miller. The house will contain
 seven rooms and bath. Interior will be
 finished in pine and redwood with
 some hardwood veneer. There will be
 furnace heat and open fire places.
 Mantels will be of tile and brick. Oak
 floors will be used in the living rooms,
 reception hall and dining room. Tile
 will be used in the bath and kitchen.
 Exterior of the dwelling will be cov-
 ered with cement plaster. Plans are
 being prepared for the work.

RESIDENCE—2 story and base,
 frame, \$3,000. Alameda, Alameda Co.,
 Cal. Architect, A. S. MacLellan, 2407
 Santa Clara Ave., Alameda. Owner,
 George Gottstein. The house will con-
 tain six rooms and bath. Interior will
 be finished in pine throughout. Hard-
 wood floors will be used in the prin-
 cipal rooms. There will be furnace
 heat and open fire places. Mantels
 will be of brick. Tile will be used in
 the bath room and kitchen. An auto-
 matic water heater will be installed.
 Exterior of the house will be covered
 with cement plaster and shingles.
 Plans are complete and out for figures.

BUNGALOW—1 story and base,
 frame, \$2,200. Alameda, Alameda Co.,
 Cal. Architect, A. S. MacLellan, 2407
 Santa Clara Ave., Alameda. Owner,
 George Gottstein. The bungalow will
 contain five rooms and bath. Interior
 will be finished in pine throughout.
 Some oak floors will be used. There
 will be an open fire place in the living
 room with brick mantel. Tile will be
 used in the bath room and kitchen.
 Exterior of the bungalow will be cov-
 ered with cement plaster. Plans are
 complete and figures are being taken.

SCHOOL GROUP—Class A construc-
 tion. Cost not stated. Oakland, Cal.
 Architect, J. J. Donovan, Security Bank
 Bldg., Oakland. Owners, City of Oak-
 land. Plans and specifications for the
 main building of the new Commercial
 and Manual Training High School, to
 be erected at Forty-fifth and Broad-
 way, Oakland, were presented to the
 Board of Education last evening by
 City Supervising Architect J. J. Dono-
 van. In his communication accom-
 panying the plans, which were refer-
 red to the business manager and the school
 board, he said that the building should be ready
 for occupancy by January 1, 1914.

"We have spent a lot of time on the
 work since last May," said Donovan,
 "and I feel confident that the building
 will be without doubt the most splen-
 did manual training and commercial
 high school building in this country."

Plans were prepared in three sec-
 tions. Section A will be the adminis-
 tration part of the building, and will
 include a library, the principal's suite
 an assembly hall with a gallery seating
 1500, teachers' lunch rooms, a kitchen
 and a band room, with practicing
 rooms.

Section B will include sixteen class
 rooms, six teachers' rooms and com-
 mercial rooms, and in section C will
 be included the lecture rooms and a
 girls' gymnasium and shower baths, a
 housekeeping suite, with kitchen, bed-
 room, living room and bath room, com-
 pletely furnished and cared for by the
 girls. Cooking, sewing and other do-

istic sciences will be taught here. In the basement of the third sections will be located the boys' gymnasium. STORES AND OFFICES—2 story base, brick and steel, \$30,000. Oakland, Cal. Architect, Clay N. Burrell, Bany Bldg., Oakland. Owners, Morand and Muller. This building has been mentioned here before when plans were first started. There will be stores on the first floor and lofts above. Interior will be finished in pine. There will be patent store fronts, modern plumbing and electric work. The exterior of the building will be faced with glazed brick and terra cotta. The architect is now taking figures for the brick work, terra cotta, marble and tile work.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

HOTEL—3 story and base, brick and steel, \$20,000. Richmond, Contra Costa Co., Cal. Architect, C. O. Cla

Phelan Bldg., S. F. Owner, Mr. Terrassy. This building will be erected on the corner property adjoining Mr. Terrassy's new theatre building, designed by the same architect. There will be three stories on the first and in the neighborhood of 28 rooms and 6 baths on the upper floors. The exterior will be finished in pine throughout. There will be a steam heating plant of sufficient capacity to supply the theatre. Foundations and plans have been designed to carry a fourth story. All rooms will be supplied with hot and cold running water. The exterior of the building will be finished with pressed brick. Plans are being prepared.

HOTEL—3 story and base, reinforced concrete, \$13,000. Richmond, Contra Costa Co., Cal. Architect, J. B. Chorna, Richmond. Owner, E. B. Anderson. Mr. Anderson owns a valuable piece of property on Richmond avenue near Washington, which is to be improved at once. Plans show an attractive building, with stores on the first floor and a number of large lightest rooms on the upper floors. Patent store fronts will be used. Interior of the second and third floors will be finished in pine. Plans include a hot water supply system. The exterior of the building will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

Contracts Awarded.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

APARTMENT HOUSE—2 story and base, reinforced concrete, \$28,000. Sacramento, Cal. Architects, Sant & Stewart, 241 Kearny St., S. F. Owner, Dr. Paris. This building, which is to be erected at the corner of 13th and N streets, will be the largest apartment house structure in the city. It will be covered in area of 1,000 sq. feet. The plan will be upwards of 100,000 sq. ft. ranging from two to four rooms. The plans embrace a complete plumbing system and a number of modern conveniences and features, including, for each of the apartments, a complete system of plumbing. There will be a steam heat and hot water system, and a vacuum sewerage system. The building will be finished in pine and oak.

All bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with terra cotta. Plans are complete and figures are being taken by the architects.

LIBRARY—1 story and base, brick and concrete. Cost not stated. Ukiah, Mendocino Co., Cal. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owners, Town of Ukiah. Architect Hatch has just been commissioned to prepare plans for a new library building in Ukiah. The structure will be classic in design and will contain a large public room, rack rooms and office for the librarian. Interior will be finished in pine and hardwood. A central heating system will be installed. The exterior of the building will probably be faced with pressed brick. Plans are now being prepared.

RESIDENCES—Frame construction. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, none. The following Day Labor jobs are about to be started in Stockton: John C. McCarty, Werner Station, 2 story, frame, \$3,800; R. R. Reibenstein, 409 Rose St., 2 story, frame, \$4,000; C. H. Pease, 522 West Park St., 1½ story, frame, \$2,000; and A. L. Miner, 1320 North Hunter, 1 story, frame, \$1,800.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

HIGHWAY WORK—Cost not stated. Stanislaus County, Cal. Engineer, State Highway Engineer, Sacramento. Owners, State of California. Plans are complete and bids are being called for on the construction of approximately 9½ miles of the State Highway in Stanislaus County. Bids will be opened by the State Highway Commission on March 24th. Plans can be secured from the Secretary of the Highway Commission at Sacramento.

RESIDENCE—2 story and base, frame, \$15,000. Fresno. Fresno Co., Cal. Architects, Swartz, Hotchkin & Swartz, Fresno. Owner, E. J. Bullard. The dwelling is to be erected in Biola, a new town near Fresno, and will contain fourteen rooms, baths and sleeping porches. Interior will be finished in pine and hardwoods. Hardwood floors will be used in all principal rooms. There will be a central heating system and open fire places. Mantels will be of brick and tile. Tile will be used in the baths and kitchen. Automatic water heater will be installed. The exterior of the dwelling will probably be covered with cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$10,000. Fresno. Fresno Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owner, P. S. Turnbull. The building will be erected on a corner site and will be arranged for two, three and four room suites with wall beds and baths. Interior will be finished in pine and some hardwood. There will be gas grates. Mantels will be of tile. Tile will also be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

STORES AND OFFICES—2 story and base, brick. Cost not stated. Fresno. Fresno Co., Cal. Architect, E. J. Farr, Fresno. Owners, H. W. and W. B. Holland. The building will cover an area

of 80x120 feet. The first floor is to be arranged for several stores and the upper floor for modern offices. Interior partitions will be of hollow tile. There will be steam heat. Patent store fronts will be used. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owners who are now taking figures for the work.

STORES AND OFFICES—3 story and base, brick, \$70,000. Fresno. Fresno Co., Cal. Architect, none. Owners, D. Yezdan, Damlir Bros. and Tharpanian Bros., Fresno. The building will be erected at the corner of Kern and J streets and will cover an area of 100x130 feet. Several large stores will occupy the first floor and the upper two stories have been arranged for halls and offices. There will be a central heating system, elevator service and pine trim. The exterior of the building will be faced with pressed brick. Plans will be ready for figures within a day or two. Bids will be taken by the owners.

Contracts Awarded.

BRIDGE—Steel and concrete, \$25,000. La Grange, Stanislaus Co., Cal. Engineer, County Surveyor Annear, Modesto. Owners, Stanislaus County. Contractors, Willison & Foster, Oakland. Contract price, \$24,133. Other bids were submitted as follows: T. K. Beard, \$27,000; M. B. White, Stockton, \$32,500; Ross Construction Co., Sacramento, \$27,336; Midland Bridge Co., Kansas City, Mo., \$30,107; O. A. Wilson, San Francisco, \$29,316, and Chico Construction Co., Chico, \$30,280.

LODGE HALL—3 story and base, brick and steel. Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owners, San Luis Obispo Masonic Hall Association. Contractor, W. J. Smith, San Luis Obispo, general construction; Union Hardware Co., San Luis Obispo, plumbing, and E. M. Payne, San Luis Obispo, heating.

GARAGE—1 story and base, brick, \$8,000. Fresno. Fresno Co., Cal. Architect, none. Owners, Thompson Bros., Fresno. Contractor, E. J. Farr, Fresno. Contract price, \$8,000.

STORES—1 story and base, brick, \$10,000. Fresno. Fresno Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owner, Mr. McLaughlin. Contractor, Dave Cowan, Fresno. Contract price, \$10,000.

DEPARTMENT STORE—3 story and base, brick and steel. Cost not stated. Fresno. Fresno Co., Cal. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, E. Gottschalk. Contractor, H. A. Hansen, Fresno. Contract price not stated.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, frame, \$25,000. Los Angeles, Cal. Architects, Architectural Designing Co., Grosso Bldg., L. A. Owner, J. D. Caldwell. The building will contain fifty rooms which are to be arranged in suites of two and three rooms each with connecting bath. Interior will be finished in pine throughout. There will be steam heat and vacuum cleaning system. A hot water plant will also be installed. All suites will be equipped with all beds. Tile will be used in the bath rooms. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will probably be done by Day Labor.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owner, F. Lane. The building will have a street frontage of 48 feet and a depth of 125 feet. There will be a total of 66 rooms, which are to be arranged in two and three room suites, all of which will be equipped with wall beds and connecting baths. There will be steam heat, elevator service, vacuum cleaning system and a hot water heater. Interior will be finished in pine and hardwood. Tile and cement will be used in the baths. Entrance vestibule will be finished in marble and tile. The exterior of the building will be faced with pressed

gek. Plans are complete and figures are being taken.

BARAGE—2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Myron Hunt, Bernian Bldg., L. A. Owner, H. E. Huntington. The building will cover an area of 70x209 feet, and will be erected on the grounds of the Huntington Hotel at Oneonta Park. The first floor and part of the second will be used for a storage space for automobiles. The balance of the second floor will be arranged for club rooms, baths and forty living rooms. There will be metal window frames and sash, concrete floors and fireproof construction throughout. Heat will be supplied from the hotel. The exterior of the building will be faced with cement plaster. Plans are being prepared.

CLUB HOUSE—1 story and base, brick, \$75,000. Pasadena, Los Angeles, Cal. Architect, S. B. Marston, Chamber of Commerce Bldg., Pasadena. Owners, Pasadena Athletic Club. Preliminary plans are being prepared for this building, which is to be erected on Colorado street. The interior will be arranged for a large and modern gymnasium, dining rooms, club rooms and 16 sleeping apartments. There will be a large plunge and over 20 baths. Interior will be finished in pine and hardwoods. There will be steam heat and elevator service. The exterior will probably be faced with pressed brick. Plans have not progressed far enough to give further details.

HOSPITAL—1 story and base. Class construction, \$350,000. Los Angeles, Cal. Architect, W. S. Garrett, Currier Bldg., L. A. Owners, Methodist Hospital Association. At the last meeting of the association the architect was instructed to proceed with the working drawings. None of the details of the building have been received in this city and other that the fact that the picture will be absolutely fireproof and will contain the most modern equipment, nothing can be printed at this time. It is understood that construction will be of the reinforced concrete type, and that the exterior will be faced with cement plaster. Further information will be printed as the plans progress.

HOTEL—6 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Jacob Joseph. The building is to be erected on 6th street, between Hope and Flower streets, and will have a frontage of 100 feet and a depth of 20 feet. Interior has been arranged for 165 guest rooms, four large stores and the hotel lobby. A large percent of the rooms will have private baths. Interior finish will be of hardwood. There will be steam heat, both freight and passenger elevators, a vacuum heating system and hot water supply. Entrance lobby will be finished in marble and ornamental plaster. A complete steel frame will be used with exterior walls of pressed brick and terra cotta. Bath rooms will have composition floors and tile wainscot. Plans are being prepared.

SCHOOL—1 story and base, brick, \$6,000. Fullerton, Orange Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Fullerton School District. The building has been designed in the shape of a letter T and will cover an area of 180x200 feet.

There will be twelve standard sized class rooms, library, principal's office and teachers' rooms. An auditorium with a seating capacity of 800 is also provided. Interior partitions will be of metal lath and plaster. Floors will be of maple with cork linoleum in the corridors. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with cement plaster. Plans are being prepared.

EXPOSITION BUILDING—Frame construction, \$67,000. San Diego, Cal. Architect, Architectural Department, Southern California Panama Exposition Co., San Diego. Owners, Southern California Panama Exposition Co. Contractor, G. A. Simpson Construction Co., American Bldg., San Diego. Contract price, \$67,000.

APARTMENT HOUSE—10 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect's name withheld. Owner, R. H. Arnold, President Alta Planing Mill Co., 830 McGarry St., L. A. The building will be erected at the corner of 9th and Valencia streets and will cover an area of 110x120 feet. Only preliminary sketches have been prepared and details are not available. Sketches show a building arranged for 300 rooms and of fireproof construction. Negotiations for financing the big project are now underway.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Westmoreland, Imperial Co., Cal. Architect, Fielder Slingsluff, Jr., Security Bldg., L. A. Owner, F. D. Turner. The building will contain 40 rooms, which are to be arranged in 16 suites of two and three rooms. All suites will have private baths and wall beds. Interior will be finished in hardwood and pine. There will be steam heat, a vacuum cleaning system and hot water supply plant. Bath rooms will have tile wainscot. An attractive lobby has been designed. The exterior of the building will be faced with cement plaster. Plans are being prepared.

BANK ALTERATIONS—2 story and base, brick. Cost not stated. Dinuba, Tulare Co., Cal. Architect, J. Carl Thayer, Fresno. Owners, Commercial National Bank. The work will include the construction of a new front, complete new interior finish and fixtures, vaults and ornamental bronze work. Interior finish will be of hardwood, tile and marble. Plans are complete and figures are being taken.

CHURCH—1 story and base, frame and brick, \$25,000. Orange, Orange Co., Cal. Architect, Frederick T. Eley, Hervey-Pinley Bldg., Santa Ana. Owners, German Evangelical Lutheran Church. The building will be of frame construction faced with brick veneer and artificial stone trimming. Interior will be arranged for a large main auditorium and Sunday school rooms. Interior finish will be of pine and hardwood. A central heating system will be installed. Plans have just been started.

CHURCH AND SCHOOL—1 and 3 story, brick and steel, \$50,000. Long Beach, Los Angeles Co., Cal. Architects, Frank T. Kelsey and T. Foster Emel, associated, Consolidated Realty Bldg., L. A. Owners, St. Anthony's Roman Catholic Church. The church will be Gothic in style. It will be one story and basement, of brick construction with ruffled brick exterior facing, artificial stone trim, tile roof, steel

roof trusses, art glass windows, concrete foundation and basement, etc. It will cost about \$55,000. The second will be a three-story structure of brick construction and the pastor's residence two stories. It will contain twelve rooms and will be of brick and frame construction. Plans are being prepared.

HOTEL—8 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Blescar Estate. The building will occupy a corner site and is to cover an area of 60x50 feet. There will be stores and a total of 160 guest rooms on the upper floors. Construction will be fireproof throughout. Nearly all of the rooms will have private baths. There will be steam heat, elevator service and a vacuum heating system. Interior will be finished in pine and hardwood. The tile will be used in the baths. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

SCHOOL GROUP—Brick and steel construction, \$600,000. Los Angeles, Cal. Architects, Allison & Allison, Bernian Bldg., L. A. Owners, State of California. Sealed bids will be received by Stat Engineer William F. McClure, Sacramento, Cal., until 12 o'clock, noon, of April 5, 1915, for the erection of the State Normal School buildings to be erected at Vermont and Willowbrook avenues. The plans were officially approved by the Governor, State Engineer and Advisory Board. The buildings planned include the Administration building, 260x292 feet, containing auditorium seating 1620; Library, 136x107 feet, with a reading room to seat 250, and stock room for 50,000 books; Domestic Science, 170x170 feet; Fine Arts, 142x82 feet; Gymnasium, 110x82 feet, with 100 lockers, 34 dressing rooms and showers; needle baths for girls lockers and showers for boys; Training School, 305x175 feet, with gymnasium for boys and girls attached; Kindergarten, 90x57; Cafeteria, 90x82, with dining hall to seat 300; Manual Arts, 226x82 feet. All the buildings will be two stories except the kindergarden, cafeteria and one story. The construction will be of brick walls with fireproof stairways and corridor floors, wood floors in rooms, tapestry brick facing clay tile roofs, maple floors, central steam heating plant with underground distribution fan room in each building, power clocks, vacuum cleaning, intercommunicating telephone system.

STORES AND OFFICES—Class A construction. Cost not stated. Los Angeles, Cal. Architect's name withheld. Owner, William R. Hearst. Mr. Hearst has just purchased twelve lots at the southwest corner of 11th and 14th streets at a cost of over one million dollars. The property covers an area of 222x316 feet. A portion of this holding will be the site of a new Class A building to be used as the Los Angeles Examiner.

OFFICES—8 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan Walls & Morgan, State Bldg., L. A. Owner, L. W. Hillman. The building will be erected on property at the corner of the present L. W. Hillman Building on Spring street. Construction will be

fireproof throughout with hollow tile partitions and floor slabs. Interior finish will be of metal. There will be steam heat and elevator service, a vacuum cleaning system and mail chutes. All window frames and sash will be of metal. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES AND OFFICES—6 story and base, reinforced concrete, \$100,000. Esaulena, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Citizens' Savings Bank. This work is in the nature of an addition to the present one story building, which was designed to carry ten stories. The first floor will be occupied by the bank. Upper floors will contain in the neighborhood of 95 offices. Interior finish will be of pine and hardwood. Floors will be of concrete. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, brick, \$55,000. Los Angeles, Cal. Architects, C. F. Borton & Co., Hibernian Bldg., L. A. Owner, Julia A. Gove. Contractors, C. F. Borton & Co., Hibernian Bldg., L. A. Contract price, \$55,000.

CHURCH—2 story and base, reinforced concrete, \$52,547. Long Beach, Los Angeles Co., Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ, Scientist. Contractors, Frank Graves & Son, 11 Park Place, Venice. Contract price, \$52,547. Note: This contract does not include the plumbing, heating, electric work, art glass, vacuum cleaning, the floors or elevator.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 2 story and base, reinforced concrete, \$52,547. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ, Scientist. Contractors, Frank Graves & Son, 11 Park Place, Venice. Contract price, \$52,547. Note: This contract does not include the plumbing, heating, electric work, art glass, vacuum cleaning, the floors or elevator.

HOTEL—2 story and base, brick, \$50,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. W. Rhodes. Contractors, Barber-Bradley Construction Co., 1824 East 15th St., L. A., general construction, \$39,200; John Kennell, 351 East 3rd St., L. A., painting, \$1,250; Blumie & Jay Co., 514 East 9th St., L. A., plumbing, \$7,800; Foulkes & Grayford, Security Bldg., L. A., electric work, \$1,200.

MUSEUM—1 story and base, reinforced concrete, \$55,000. Los Angeles, Cal. Architect, H. Hunt & Burns, Laughlin Bldg., L. A. Owners, Southwest Museum. Contractors, J. C. Kubach Co., Pacific Electric Bldg., L. A., general construction, \$50,850; Southern California Electric Co., 625 So. Main St., L. A., electric work, \$1,260; W. D. Newell, 218 West First St., L. A., plumbing. Contract price not stated.

HOTEL—12 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Ye Planny Building Co., L. A. Owner, N. W. Stowell. This work was mentioned here before. At that time it was stated that construction would be of steel and

brick. Mr. Stowell has decided to use reinforced concrete throughout. Plans will be prepared at once and contracts let within three months.

PORTLAND AND OREGON.

HOTEL AND STORES—4 story and base, reinforced concrete, \$80,000. Portland, Ore. Architects, Investors' Building and Trust Co., Yeon Bldg., Portland. Owner, A. C. Pike. The building will cover an area of 100x100 feet. The first floor will be arranged for eight stores besides the hotel lobby, entrance and billiard and pool room. Upper floors will contain 177 guest rooms and a large number of baths. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior will be finished in pine and hardwoods. Foundations and walls have been designed with sufficient strength to carry several more stories. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

STORES AND OFFICES—3 story and base, brick and steel. Cost not stated. La Grande, Ore. Architects, Whidden & Lewis, Wilcox Bldg., Portland. Owners, N. K. West and C. S. Jacobsen. The building will be erected on one of the principal business corners in La Grande and will cover an area of 60x110 feet. There will be several stores on the first floor and a number of modern offices arranged ensuite on the two upper floors. Plans include steam heat, metal window frames and sash and patent store fronts. Interior finish will be of pine and marble. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

APARTMENT HOUSE—6 story and base, reinforced concrete, \$230,000. Portland, Ore. Architects, Johnson & Mayer, Selling Bldg., Portland. Owner, Charles H. Lehman, Yeon Bldg., Portland. This building will occupy a corner site and will cover an area of 125x100 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof. Interior partitions will be of tile or metal lath and plaster. Interior will be arranged for 5 apartments of from four to six rooms each. All suites will have private baths and wall beds. Interior will be finished in pine and hardwoods, the bath rooms in tile and composition. Plans provide for steam heat, elevator service, hot water system, vacuum cleaning and dumb waiters. Besides the suites there will be a large lobby, amusement room and social hall. All suites will have outside sleeping porches. The exterior of the building will be faced with cement plaster. Plans are being prepared.

TELEPHONE EXCHANGE AND OFFICES—11 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Architectural Dept., Pacific States Tel. and Tel. Co., New Montgomery St., S. F. Owners, Pacific States Tel. and Tel. Co. This building was originally planned for a 14-story structure, but only the first 11 stories will be erected at this time. A contract for the excavating has been completed and another contract for the steel work has been awarded to Proffers & Deane Co. Plans for the balance of

the contracts are complete and bids will be called for within the next six weeks.

SEATTLE AND WASHINGTON.

CHURCH—1 story and base, brick and stone, \$60,000. Walla Walla, Wash. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, First Congregational Church. The building will contain a large auditorium, Sunday school rooms, pastor's study, social rooms and kitchens. Interior will be finished in pine and hardwood. There will be a central heating system. Roof is to be of slate. The exterior of the building will be faced with stone and pressed brick. Plans are being prepared and the work will be done by Day Labor.

COURT HOUSE—2 story and base, brick and stone, \$150,000. Walla Walla, Wash. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Walla Walla County. Architects have just been selected to prepare plans for a new county building, which will replace the old and dilapidated structure. No details of the building have been decided upon and the architects are now in Walla Walla making an investigation of the requirements.

STORES AND OFFICES—12 story and base. Class A construction, \$800,000. Seattle, Wash. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owner's name withheld. None of the particulars of this enterprise have been given out and the owner's name and exact location of the structure cannot be learned at this time. Announcement of the complete details of the building will be made early next month.

BRIDGES—8 reinforced concrete and steel, \$2,000,000. Seattle, Wash. Engineer, City Department of Engineering, Seattle. Owners, City of Seattle. The question of providing suitable ways and means for handling traffic in certain sections of the city, and especially in the neighborhood of the Lake Washington Canal has been recently decided by the City Council. Instead of constructing a system of subways, the Council went on record at its last meeting as being in favor of constructing the following bridges: Fremont and Westlake; 15th NW at Ballard; Eastlake and 6th avenue N.; Mountlake avenue and University Grounds; Spokane avenue and East Waterway; Westlake and Stone Way, and 3rd avenue W. at Ross. Plans will be ordered at once.

HOTEL—3 story and base, brick and steel, \$75,000. Seattle, Wash. Architect, A. Wisckersham, 703 22nd Ave., Seattle. Owners, Vesler Estate. The building will cover an area of 96x100 feet, and the nature of the soil on which it is to be erected makes it necessary to carry the building on a pile foundation. Concrete piles will be used. The first floor will be arranged for a number of stores besides the hotel entrance and lobby. Upper floors will contain a total of about 150 rooms. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior will be finished in pine and hardwoods. Bath rooms will have tile floors. The exterior of the building will be faced with pressed brick. Plans will be ready for figures about April 1st.

Editorial Comment.

Reforms like misfortunes never come singly. What with the agitation against the abuses of special privilege and the return of the government to the people which has been the object of progressive citizenship for a number of years there has of late come up a multitude of side issues which have a more or less potent bearing upon the life of the nation. The social evil, the white slave business and the minimum wage for women are now engrossing the attention of a great body of reformers and commanding the attention of the public through the press.

The question of a minimum wage is of vital import. We levy a protective tariff to protect home industries but heretofore we have done nothing to support home citizenship other than to extend charity to those unable to support themselves. In the fierce struggle for existence those poorest equipped by nature or opportunity will be forced to the lowest level in the industrial organization. If that level is below the limit of respectable existence, the chances become less and less that the person so situated will ever be able to rise above it. This fact is borne out by the investigation of the tenement districts and the factory places in every large city. An investigator recently returning from the Panama canal zone reported upon the agricultural possibilities of the place and commented upon the fact that the poor were huddled together in hopeless poverty in the large cities, while the opportunity there presented itself for any man who was capable and willing to work of making a living and eventually acquiring property for his age.

The question that would confront the factory worker in such a case would be the saving of enough money to pay for his passage to Panama, provided he had the ambition to go, if the grinding labor had not deprived him of whatever initiative he ever possessed and left him a veritable "Man with the hoe."

There will always be those who are fitted only for the lowest round on the industrial ladder. But that round should be sufficiently high to allow any one who works to earn a wholesome living and those who are defenseless should be protected against the iron law of competition to such an extent as to insure some happiness and self respect. Insofar as this question of the minimum wage affecting the possibility of right living, the question is one for governmental investigation and control. Every woman should be able to support herself and retain her respectability if she is able to work and is productive in the industrial organi-

zation. The social evil and the scarlet woman we will always have with us if we are to judge the future by the past. Crime and poverty can be lessened just as disease has been by intelligent action in its cure and prevention. The present reforms are along the right line. The thing to guard against is in preventing the pendulum from swinging too far and adopting things that are impracticable and will prove a boomerang to the reformers.

The disclosure of the fact that some of the trusted employees of the banks of San Francisco were short in their accounts, has come as a shock to the community and their employers. Still it is worthy of passing comment that the attitude of these same employers toward the people generally and their use of the people's money is a constant example to the employees to go and do likewise. Graft begets graft and where the standard of morals prevails that anything is fair in finance as in war as long as you don't get caught, the trusted employee is tempted to take a chance in the hope that he will be able to make his pile and get away with it.

The California Development Board has submitted a preliminary report which shows the value of the products of the State for the past year to have been the greatest in the history of the State. Figures from some parts of the State have not yet reached the board, but the total of all products so far reported reach the tremendous figure of \$1,089,044,771.

In recapitulation the statement shows the total valuation of orchard products, including deciduous, citrus and dried fruits, olives, olive oil and nuts, to be \$96,958,090, an increase of \$10,000,000 over the year 1911. The amount of vineyard products for 1912 is placed at \$26,380,100; dairy products, \$19,620,500, and farm products estimated at \$11,398,000. The value of minerals is \$46,425,000, and petroleum \$41,000,000.

One of the last acts of Secretary Meyer before he left the head of the Navy Department was to sign an order which places the Navy Yard at Mare Island in the second class of such establishments. That means that San Francisco or some place that has sufficiently deep water on the bay will get an establishment of the first rank where large battleships can be docked. The opening of the canal will make the establishment of a first class navy yard imperative. The logical place for it is on San Francisco Bay. It is to be hoped that San Francisco will get the station as here is deep water accommodations and the logical place for the docks.

The Physical and Chemical Properties Of Portland Cement.

A paper on "The Physical and Chemical Properties of Portland Cement," by W. C. Reiblin and F. D. Rye, Bureau of Science, Manila, P. I., read at the Eighth International Congress for Applied Chemistry, gives an account of a very extended investigation. The main effort of this work was directed toward a study of those characteristics of Portland cement regarding which there exists the greatest amount of misconception and diversity of opinion, the object being to assist in the universal effort to formulate cement specifications so drawn as to guarantee the manufacture and use of Portland cement of the quality sought for.

A brief summary of all the important conclusions arrived at cannot be made, the interdependent nature of such conclusions preventing a brief statement of fact. However assuming that the quality in Portland cement which we need is constancy in volume and setting properties, and reliability in strength, and that it is of vital importance that this material both hardens rapidly and maintains great strength, we believe that the enforcement of the following recommendations will increase the efficiency of the present standard cement specifications of the American Society for Testing Materials:

"A. Concerning the constancy of volume: (a) We cannot hope to secure the desired efficiency in Portland cement unless the manufacturer is induced to burn his materials so that no seasoning is required to produce a sound cement. Therefore, it is necessary to demand a perfect soundness in conjunction with a high specific gravity, and we recommend: (b) That failure to meet the requirements of the accelerated tests shall (in place of 'need not' as now specified) be sufficient cause for rejection.

"B. Concerning the specific gravity: (a) That the best burning and proper storing produces a product which has a high specific gravity (or low loss by ignition). Therefore, (b) That the specific gravity of the cement as received (i. e., dried but not ignited) shall not be less than 3.10 unless the loss by ignition is less than 2.00 per cent. (c) That the above recommendation provides for the possibility of a well burned cement with a lower specific gravity provided the low gravity is not due to subsequent absorption of volatile constituents; but our experience does not include such a possibility. (d) That the clause 'Should the test of cement as received fall below this requirement a second test may be made upon a sample ignited at a low red heat' be omitted. (e) That the clause 'A low specific gravity in conjunction with a high loss by ignition is positive proof of undesirable burning, adulteration or seasoning' be substituted for the present paragraphs concerning the significance of the specific gravity.

"C. Concerning the fineness: (a) As the specifications now stand, there is little incentive to induce the manufacturer to grind to the degree of pulverization that modern improvements

in grinding machinery has made practicable unless his cement is so poor that extreme fineness is necessary to enable it to pass the requirements for strength and soundness. Therefore, (b) That the cement shall leave a residue of not more than 5.00 per cent by weight on the No. 100, and not more than 20 per cent on the No. 200 sieve.

"D. Concerning the tensile strength: (a) That the average of at least four briquettes representing at least two separate mixtures of the same sample shall be taken for each test, excluding any results which are manifestly faulty.

"E. Concerning retests: (a) Manufacturers should be impressed with the fact that these are minimum requirements; that ample provision has been made in the specifications for lack of uniformity in testing as well as in real quality; and that we demand a quality so superior that, regardless of the variable factors, the ability of the cement to pass all requirements shall be a certainty. Therefore, (b) That the results obtained from the original test shall be considered as final unless it becomes evident that a serious error in sampling or testing has resulted in totally misrepresenting the quality of the cement. In other words, that 'border-line' cements should be avoided as much as possible.

"F. Concerning the practical significance of the above recommendations: (a) Manufacturing conditions are such that we cannot hope to secure Portland cement which contains no free lime. Also, it is realized that the proposed specifications are not perfect. However, we believe that the enforcement of the above recommendations will support and promote the best practice in grinding and burning, and accordingly, secure greater uniformity and efficiency than the present specifications. (b) Without the hearty, honest co-operation of both manufacturer and user little can be accomplished. The degree of fineness and burning are important financial considerations to the manufacturer, and the consumer should buy on a basis of quality. (c) The testing of a great number of commercial Portland cements from many parts of the world has convinced us of the feasibility of these recommendations from both an economic and practical standpoint, and the results obtained have repudiated all claims to the contrary. For instance a certain manufacturer in America stated that owing to a long sea voyage he could not guarantee his cement to pass the 3.10 requirement for specific gravity. Our work showed conclusively that cement stored in good barrels undergoes very little change due to atmospheric influences and many cements imported from Europe and America show consistently a gravity above 3.10 and a low loss by ignition. There are cements, which, as stated in the 'Introduction' of our work, show the most remarkable uniformity in physical properties.

"We desire to emphasize the importance of the calcium hydroxide-phenol microscopic test for free lime,

as in every instance the physical and chemical properties of the different products examined demonstrated the accuracy and usefulness of this test. As stated, we believe that in the hands of an expert it gives more definite and reliable information regarding the constancy of strength and volume than the usual 28-day test or even 3 or 6-month test. However, there is one undesirable feature to this test; namely, that it requires considerable experience and ability correctly to interpret the significance of the phenolate crystals formed on the microscopic slide. Therefore, in order to make this test generally practicable and universally dependable it must be simplified or made quantitative. Certainly, its possibilities and importance warrant much more extended research in this direction than we have had opportunity to accomplish."

AN ARCHITECT'S RESPONSIBILITY.

This very pertinent question suggests itself in connection with the collapse of the Home Theatre in Chicago. The writer after a continuous practice of his profession in Chicago for thirty-five years, during which time he has prepared plans for thirty-seven theatres and opera houses, is brought to a realization of the faulty provision of the law regulating the practice of architecture in this State.

The laws of Illinois are very explicit and exacting; no architect can practice his profession or call himself an architect unless he has first passed an examination before a commission appointed by the Governor as to his ability and experience in the building business. The public, therefore, is assured that any work given to a licensed architect will be carefully carried out. The law, while it holds an architect strictly accountable for the manner in which he conducts his business, is exceedingly lame in that it does not hold him responsible for the safe construction of the building according to his plans and drawings. A case in point is the collapse of the Home Theatre a small insignificant building calling for no extended practical construction experience.

David Saul Klarf, the architect, holds a license granted him after examination under the Illinois law. His experience and ability as an architect can not be questioned. He was employed to prepare the plans of the Home Theatre, having nothing to do with the construction of the building, that matter being taken care of by the owner and his contractor. The plans were complete according to the building ordinances of Chicago, examined by the Commissioner of Buildings and a permit for the construction issued to the owner. At this point the responsibility of the architect ceased. He had no control over the construction of the building after he had delivered the plans to the owner.

The facts in this case are that the owner, to save expense, ignored the

system of construction as called for by the plans and specifications, substituting inferior and lighter material in the roof trusses, hence the accident. An architect under the present law is not liable for the safe construction of a building after the plans are delivered to the owner, the supervision of the work being left to other parties.

The law should be amended so as to provide a penalty for any architect furnishing working plans without including the supervision of the construction. The public would then very soon understand that when an architect is employed he is responsible, not only for the manner in which the plans have been prepared, but for the safe construction of the building according to his plans, drawings and specifications as approved by the Commissioner of Buildings.

GEO. O. GARNSEY, Architect.

WATERPROOF CONCRETE.

Some experiments on impervious concrete were made at Husum, Germany, recently in connection with preparations for the construction of a new lighthouse. Various mixtures of cement and fine dune sand in ratios of 1 up to 1:6 and mixtures of 1:3 with the addition of various waterproofing material, such as soft soap, oil and patented mixtures were prepared and were molded into pot-shaped vessels about 15 inches high and 2½-inch walls. When these pots had set, some of them were filled with water, others (empty) were set into water; and the density of the walls was judged by noting the time required to empty or fill, the water acting under a maximum head of about 10 inches. The experiments showed that a satisfactory degree of imperviousness was not reached, since in every test the vessels filled or emptied within an hour. The relative success of the richer mixtures then induced tests of rich rubbed surfacing. To this end the surfaces were first wet, then thickly coated with cement paste, and with a soft brush the cement paste was then rubbed into the surface of the concrete. Repeating this procedure several times until the pores were closed, a very satisfactory imperviousness was reached, the pressure tests (as above) continued for three days showing no water passing through the walls of the pots. On the basis of these tests it was decided to build the lighthouse sub-structure of 1:3 mixture which surface made impervious by the grout-rubbing process as used in the experiments.

A good deal of criticism seems to have been aroused by Secretary Bryan's St. Patrick's Day speech. Some of the London papers regard it as "a gratuitous and unwarrantable interference in the domestic affairs of the United Kingdom." So far as a layman is able to judge Mr. Bryan said nothing that any lover of self government might be expected to say on any like occasion. It had no reason to bid for votes or seek popular favor in any degree.

The British are certainly self-righteous and touchy. In speaking of interference in the domestic affairs of a nation how about the British attempt to dictate Panama canal regulations?

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete, \$65,000. Architects, O'Brien Bros., Clunie Bldg., S. E. Owner, J. W. O'Brien. The building has been mentioned in these reports before when preliminary drawings were first started. The structure will be erected on Bush street 137½ feet west of Powell, and will be arranged to contain 25 apartments of two rooms each and 10 three room apartments. Plans include steam heat, wall beds, a vacuum cleaning system and elevator service. Private baths will be arranged for all suites. Interior finish will be of pine and hardwood. The exterior of the building will be faced with red pressed brick trimmed with white artificial stone. The building will be 46x136½ feet. Plans are complete and segregated figures are being taken.

SAN FRANCISCO—Apartment houses, 2, 3 story and base, frame, \$11,000 each. Architect, none. Owner, Phillip Yager, 129 Carl St., S. E. These buildings will each have a street frontage of 30 feet and a depth of 90 feet. Interiors will be arranged for two and three room suites with private baths. Interior will be finished in pine throughout. There will be a central heating system and wall beds. The exteriors will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

OAKLAND, CAL.—Apartment house additions, 3 story, frame, \$10,000. Architects Mitchell & Hodges, Bankers' Investment Bldg., S. E. Owner, M. Davoust, 768 8th St., Oakland. This work will include new foundations and exterior finish, plumbing, electric work and plastering. Interior finish will be of pine throughout. There will be a central heating system installed. All suites, which have been designed for the two and three room type, will have connecting baths and wall beds. Tile will be used in the bath rooms. The exterior of the building will be covered with shingles and shakes. Plans are complete and figures are being taken.

STOCKTON, SAN JOAQUIN CO., CAL.—Apartment house, 3 story and base, frame, \$10,000. Architect, Rae B. Wilson, San Joaquin Bldg., Stockton. Owners, Hawes and Dobson. The building will be arranged for a number of two and three room apartments all of which will have private baths and wall beds. Interior finish will be of pine throughout. There will be steam heat. The exterior of the building will be faced with rustic and shiplap. Plans are being prepared. Bids will be called for within a week or ten days.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and tile. Cost not stated. Architect, Edgar H. Dorn 1811 So. Main St., L. A. Owner, R. H. Raphael. The building will occupy a corner site and will cover an area of 130x130 feet. The interior will be arranged for 52 apartments which will consist of three, four and

five rooms each. There will be private baths and wall beds. Steam heat, elevator service, a vacuum cleaning system and hot water plant will be installed. Interior finish will be of pine and hardwoods. Tile and cement will be used in the bath rooms. Plans are nearly complete and segregated bids will be called for shortly.

EUGENE, ORE.—Apartment house, 3 story and base, brick, \$10,000. Architects, Vincent, Russell & Preusse, Eugene. The building will be arranged for a number of modern two and three room suites, all of which will be equipped with wall beds. There will be private bath rooms, steam heat and a vacuum cleaning system. Baths will be finished in tile and will have cement floors. The interior of the building will be finished in pine with some hardwood floors. Exterior will be faced with pressed brick. Plans are being prepared.

BANKS.

KALAMA, WASH.—Bank, 2 story and base, reinforced concrete, \$25,000. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owner's name withheld. The building will be devoted to the exclusive use of the bank. Interior finish will be of hardwoods, marble, tile and ornamental plaster. There will be special bank fixtures and both coin and safe deposit vaults. Construction will be fireproof throughout. A central heating system will be installed. Besides the work space and public room there will be a private office for the president and a directors' room. The exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Bank and offices, 12 story and base. Class A construction, \$860,000. Architects, William Cullett & Son, Phelan Bldg., S. E., and Title Insurance Bldg., L. A. Owners, Merchants Fireproof Building Co. The entire ground and mezzanine stories and basement will be occupied by the Merchants National Bank. There will be about 450 offices in the upper stories. The building will be 120x156 feet and will have a central light court. It will be of steel frame construction. The first two stories will be faced with granite. Terra cotta will be used for facing above the granite on the Spring street and Sixth street elevations and for returns on the alley and north sides. The alley wall and the north wall above the second story will be faced with pressed brick. The central light court will have white enameled brick facing. There will also be terra cotta cornice, composition roofing, hollow tile and reinforced concrete floors, metal studs and metal lath and plaster partitions throughout, suspended ceilings in the first mezzanine and twelfth stories, ornamental staff work, marble lobby and stairs, six elevators, hardwood trim, marble corridors, steel frame and marble stairs, plate glass windows on street fronts, metal frames and sash and wired glass on light courts and exposed glass, lavatory in each office, toilets, plumbing, vacu-

am cleaning, electric wiring and fixtures, steam heating system, mail chutes etc. The steel contract has been let to the Llewellyn Iron Works; granite to the Raymond Stone Co.; and excavating and foundation to Weymouth Crowell. Bids on the general contract will be taken this week.

BRIDGES, DAMS AND HARBOR WORK.

ABERDEEN, WASH.—Bridge, steel and concrete, \$95,000. Engineer, City Engineer. Aberdeen. Owners, City of Aberdeen. Bonds to the amount of \$35,000 have been voted for the construction of a steel bridge over the Washkah River at this point. Plans will be completed as rapidly as possible and bids will be called.

HALL

SAN BERNARDINO, SAN BERNARDINO CO., CAL.—Bridges, reinforced concrete, \$50,000. Engineer, County Engineer. San Bernardino. Owners San Bernardino County. The Board of Supervisors have been notified by the State Highway Commission to proceed with the construction of a number of small bridges in this county. Plans are being prepared by the County Surveyor and plans will be ready for figures within a month.

NEWPORT BEACH, ORANGE CO., CAL.—Jetty work, rock and concrete, \$100,000. Engineer, City Engineer. Newport Beach. Owners, City of Newport Beach. Bonds are to be voted on within the next few weeks for the construction of a jetty at the entrance of Newport Bay. The Board of Trustees have secured preliminary plans and an estimate on the work, and no time will be lost in completing the project. Full particulars will be given in these columns as the work progresses.

CHURCHES.

PORTLAND, ORE.—Chapel addition, 2 story and base, brick and concrete, \$15,000. Architects, Jacobberger & Smith, Board of Trade Bldg., Portland. Owners, Baptist Fathers. The building will be in the nature of an addition to the present chapel, and will be of mill construction with a concrete foundation. Interior finish will be of pine throughout. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

COURT HOUSES.

NEWBERG, ORE.—City Hall, 2 story and base, brick and concrete, \$20,000. Architect, E. E. McClaren, Lumber Exchange Bldg., Portland. Owners, Town of Newberg. Plans have been approved for the construction of a City Hall building covering an area of 80x36 feet. The structure will house the fire and police departments, Mayor, City Clerk, Treasurer and other city officials. A large council room will occupy the greater portion of the second floor. Interior finish will be of pine throughout. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

CHINOOK, MONT.—Court House, 2 story and base, reinforced concrete, \$50,000. Architect's name not given.

Owners, Chouteau County. Contractors, Lease & Richards, Harve, Mont. General construction. Contract price, \$13,896.75.

FACTORIES & WAREHOUSES.

SAN FRANCISCO.—Machine shop, 2 story frame. Cost not stated. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owners, Auld and Blackman. The building will be erected at the corner of Bryant and Harriet streets, and will cover a considerable area. No interior finish will be used. A cement floor will be used on the ground floor. Special machinery will be purchased. The exterior of the building will be covered with rustic and galvanized iron. Plans are complete and the work will be done by Day Labor.

PORTLAND, ORE.—Laundry, 2 story and base, brick, \$80,000. Architect, Ellis F. Lawrence, associated with W. J. Holford, Chamber of Commerce Bldg., Portland. Owners, Troy Laundry Co. The building, which is to be erected by the largest laundry company in Portland, will cover a ground area of 110x200 feet. Construction will be of the mill type with brick exterior walls, faced with stock brick. A full basement will be excavated and the power plant will be placed in the basement. Several thousand dollars worth of special laundry machinery will be ordered. There will be metal window sash and frames. Concrete floors will be used. Plans are complete and figures will be called for at once.

Contracts Awarded.

SPRINGFIELD, ORE.—Cold storage plant, 2 story and base, brick and concrete, \$25,000. Architect, none. Owners, Winhardt Ice and Cold Storage Co. Contractor, A. Lombard, Eugene. Contract price, \$25,000.

FLATS.

SAN FRANCISCO.—Flats 3 story and base, frame, 9,000. Architect, none. Owners, McKillop Bros., 340 Cole St., S. F. The building will cover an area of 25x83 feet, and has been designed to contain six apartment flats, each of which will consist of three rooms and bath. Interior finish will be of pine and redwood. There will be a central heating system and gas grates. Tile will be used in the bath rooms and kitchens. Mantels will be of brick. The building will be located on Golden Gate avenue near Divisadero. The exterior will be covered with rustic and shiplap. Plans are complete and in the hands of the owners, who are now purchasing all materials. The work will be done by Day Labor.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Charles A. Rushton, 711 9th Ave., S. F. The building will have a frontage of 25 feet and a depth of 60 feet. The interior has been arranged for two modern flats of five and six rooms each with bath. All interior finish will be of pine. Some oak floors will be used. Baths will have the wainscot and cement floors. There will be gas grates and the mantels. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO., CAL.—Flat alterations, 2 story and base, frame. Cost not stated. Architect, W.

M. B. Thomas, San Joaquin Bldg., Stockton. Owner, F. H. Frederick, 825 East Lindsay St., Stockton. The present building will be raised and altered to contain four flats. Interior finish will be of pine and redwood. Open fire places will be used with tile or brick mantels. Tile will also be used in the bath rooms and kitchens. The work will include new exterior finish, plastering, plumbing, electric work and painting. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

GARAGES.

SEATTLE, WASH.—Garage, 3 story and base, reinforced concrete, \$50,000. Engineer, John M. Baird, White Bldg., Seattle. Owner, R. H. Gray. The building will cover an area of 65x120 feet, and has been designed for a commercial garage. Front portion of the first floor will be fitted up for a sales room and offices. Rear of the first floor and the basement will be used for storage purposes. A completely equipped machine shop and repair department will be located on the second and third floors. Concrete floor on the first floor and basement. There will be metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Garage, 1 story and base. Class C construction. Cost not stated. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owner, Charles E. Bergin. The building will have a frontage of 50 feet and a depth of 150 feet. A cement floor will be used and metal window frames and sash. Special gasoline storage tanks will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, Arthur L. Acker, 1127 Story Bldg., L. A. Owner, J. W. Fowler. The building will be designed for a commercial garage and is to be 65x100 feet. A cement floor will be used. Special gasoline storage tanks are specified. The interior of the building will be finished in pine. The exterior will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

TAFT, KERN CO., CAL.—Lodge hall, 2 story and base, brick, \$20,000. Architect, J. Saffell, Bakersfield. Owners, Taft Odd Fellows Hall Association. Plans for a building which is to be erected on Center street and containing two stories and a lodge hall banquet room and offices, have been approved by the Building Committee, and bids will be called for at once. Interior finish will be of pine and hardwood. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Bids will be taken by the architect.

GOVERNMENT WORK AND SUPPLIES.

The President has approved the following acts which are of interest to contractors in this locality:

S. 8575—An act to authorize the town of Okanogan, Wash., to construct a bridge across the Okanogan River.

S. 3947.—An act to provide a bridge across the Snake River in Jackson's Hole, Wyo.

Cement.

Under proposals for Portland cement the following awards have been made:

February 25, 1913, contract for 20,000 barrels was awarded the Union Portland Cement Co., of Ogden, Utah, for delivery f. o. b. Devil's Slide, Utah, at 99 cents per barrel for the Truckee-Carson project, Nevada.

March 8, 1913, contract for 30,000 barrels awarded to Standard Portland Cement Corp., San Francisco, Cal., for delivery f. o. b. Napa Junction, Cal., at \$1.40 per barrel for Klamath, Umatilla, and Orland projects, Oregon, and Yakima storage and Okanogan projects, Washington.

Mare Island as a Secondary Navy Yard.

One of the last acts of Mr. Meyer as Secretary of the Navy was to sign an order which places the navy yard at Mare Island, Cal., in the second class of such establishments. The Mare Island yard has practically been a secondary plant for many years, but the departmental order on the subject officially defines its position and relative value as a repair station and dock yard. It will be available for ships drawing 24 feet and less, and no attempt will be made to expend the public funds in improving the channel of approach to the 40-foot depth, which was suggested by the naval general board. The army engineers, in the meantime, will proceed with their work of improving that part of the channel which is of commercial value. There will be required constant dredging in Mare Island waters to an extent, it is estimated, of about \$10,000 a year. This is a maintenance which is inevitable on account of the local conditions. The action of the late Secretary of the Navy would seem to indicate that sooner or later it will be necessary for the Navy Department to urge Congress to provide for a new navy yard, with adequate docking facilities for big ships, at some accessible point on San Francisco Bay. The attempts in that direction have hitherto been quite successfully frustrated by the influence at Vallejo, exerted in the futile plan of bringing Mare Island navy yard into the first class of naval repair establishments.

Reclamation Tunnel.

The Secretary of the Interior has authorized the Reclamation Service to construct tunnel No. 2 on the main supply canal of the Grand Valley Irrigation project, Colorado, by Government forces. The sum of \$142,500 has been allotted for this work. This is a short tunnel and it may be possible that it can be most economically excavated by hand drilling. If on trial the material proves too hard for economical working by hand drills, it will be possible to operate air drills from the present power plant at tunnel No. 1, which is but 7,000 feet distant.

Sewers, Vancouver Barracks.

The bid of S. P. White & Son, Vancouver, Wash., \$1,828.65 in amount, has been accepted for constructing storm sewer at Vancouver Barracks.

Navy Fuel Stations.

The naval authorities are considering the increase in the facilities for the storage of fuel oil, gasoline and coal. It is probable that the existing tanks at the various stations will be enlarged in view of the additional amount of fuel oil which is destined to be used on naval ships. The present plans call for tank capacity of 5,000 tons each at the stations at Bradford, Norfolk, Charleston, Key West, and Pearl Harbor. Contracts will shortly be awarded for the extension of the plant at Guantanamo so that there will be capacity there for 30,000 tons. At each of these stations there will be storage facilities for 90,000 gallons of gasoline. The original intention was to provide for fuel oil capacity to the extent of 2,500 tons at each station, but it has been realized that this must be materially increased, with what final results no one may predict. That is one of the questions which is being considered by the Navy Department. There will probably be special arrangements made for meeting conditions at Pearl Harbor, where there is now under construction a coal plant of 100,000 tons capacity. The design of the plant is such that it may be easily increased to 200,000 tons by increasing the height of the walls. The storage plant is a concrete basin which may be easily filled with water.

Naval Coal Depots.

The clause in the naval appropriation act aiming to prevent the establishment of new coaling stations and depots under the Navy Department will not interfere in any way with the development of existing plants or with the acquisition of facilities for the improvement of those places. The act contains an item amounting to \$62,550 as a contingent fund to meet the cost of repairs and additions to existing depots; in addition to which there is the general appropriation for fuel and transportation to meet any extraordinary demands in the same direction. It will be impossible, however, for the Navy Department to install new depots without express authority of Congress, which has now gone on record in a positive way in favor of further limitation of appropriations for the naval-military establishment. There would be additional restrictions upon the application of service appropriations if it were possible to impose them, and it need surprise no one if efforts to that end were manifest during the sessions of the 63rd Congress. It is in the line of this policy that the naval appropriation act contains some specific items, \$500,000 in the aggregate, for the coaling stations. They are: \$306,350 to continue the coaling plant at Pearl Harbor, \$30,000 for additional fuel oil tanks at the same place, \$57,700 for a fuel oil tank at Boston, the contingent fund of \$62,550 hitherto described, and \$13,500 for heater coils in fuel oil tank. This last mentioned item is the result of a practical test of the system of separating oil from water, which has been conducted at the Melville coaling depot and found to operate with success at least in the case of the smaller tanks. It is a question among some of the experts whether the extension of the system to the larger receptacles will be justified by the increased expense involved.

FORT ROSECRANS, SAN DIEGO CO.,

CAL.—Oil burning system. Cost not stated. Architect, Constructing Q. M. Dept., P. S. A., Fort Rosecrans, Lieut. C. A. Lehr officer in charge. Plans have been completed and bids will be opened on April 7th for a complete oil burning system, including pipe line and oil burners for all buildings at this post. Plans and specifications can be obtained from Lieut. Lehr. The official proposal appears in another column of this issue.

PEARL HARBOR, HAWAII.—Coal towers. Cost not stated. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans and specifications have been completed for the construction of two coal towers for the Naval Station at Pearl Harbor. Bids for this work are now being taken and will be opened on April 19th. Plans and specifications can be secured from either the Commandant of the Navy Yard or from the Bureau of Yards and Docks, Washington, D. C. The official proposal appears in another column of this issue.

HOTELS.

SAN FRANCISCO.—Hotel, 5 story and base, brick and steel. Cost not stated. Architect, W. H. Weeks, 75 Post St., S. F. Owner, Hiram B. Fisher. This building is to be erected in the north line of Mission street, between 4th and 5th streets. The first floor will be arranged for two modern stores besides the entrance to the hotel. Upper floors will be divided into 72 guest rooms and a number of baths. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior will be finished in pine. Some tile will be used in the baths. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO.—Hotel, 2 or 7 story and base, reinforced concrete. Cost not stated. Architect, Creighton Withers, California and Powell Sts., S. F. Owner, R. S. Brown. Preliminary sketches have been prepared for both a two and a seven story building which is contemplated for the southwest corner of Geary and Mason streets. The owner is considering leases on both of these structures, and until the height is decided nothing definite will be done with working drawings. Complete particulars will be given in an early issue of the Building and Industrial News.

SAN FRANCISCO.—Hotel, 8 story and base, brick and steel. Cost not stated. Architect, Philip Schwerdt, Phelan Bldg., S. F. Owner, B. Hirsch and B. Heskins. This building will be erected at the northwest corner of Post and Taylor streets. The structure has been designed to contain in the neighborhood of 150 guest rooms, a large percentage of which will have connecting baths. Interior will be finished in pine and hardwoods. There will be steam heat, elevator service and vacuum cleaning system. All rooms will be supplied with hot and cold running water. The exterior of the building will be faced with pressed brick. Plans are complete, bids have been taken and are now under advisement in the offices of the architect.

SAN FRANCISCO.—Hotel, 1 story and base, brick and steel, \$75,000. Architects, Ross & Burgin, 310 California St., S. F. Owners, Hamburger Invest-

ment Co. The building will be erected at the corner of 6th and Clara streets and will cover a large area. The first floor will be arranged for a number of stores besides the hotel lobby and entrance. Upper three floors will be divided into about 200 rooms and a number of baths. There will be steam heat and elevator service. A hot water plant will be installed. Interior finish will be of pine. The bath rooms will be wainscoted with tile and will have cement floors. Exterior of the building will be faced with pressed brick. Stores will have patent fronts and plate glass windows. Plans for the work will be completed at once.

SAN FRANCISCO—Hotel, 3 story and base, brick, \$10,000. Architect, none. Owner, Max Goldberg, 320 Market St., S. F. The building is to be erected on Stockton street north of Washington, and will cover an area of 25x110 feet. There will be a total of about 50 rooms and baths. Interior will be finished in pine throughout. A central heating system will be installed. Hot and cold running water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel, 3 story and base, brick, \$20,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, John Gerlack. This building has been mentioned here before when plans were first started. Working drawings are now complete and figures are being taken. The structure will cover an area of 40x90 feet. The first floor will be arranged for a public dining room, office, lobby and bar. Upper floors will contain about 40 rooms and several baths. Interior will be finished in pine. There will be a hot water system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PORTLAND, ORE.—Hotel, 3 story and base, brick. Cost not stated. Architects, Bennes & Hendricks, Henry Bldg., Portland. Owner, Otto W. Nelson. The building will be 50x95 feet. The first floor will be arranged for stores and the hotel entrance and lobby. Upper floors will contain a total of 90 rooms and a number of baths. There will be steam heat, hot and cold running water in all rooms and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOSPITAL

PEARL HARBOR, HAWAII—Hospital group, 2 story and base, reinforced concrete, \$280,000. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans for a large general hospital which will be erected at the Navy Station at Pearl Harbor are complete and out for figures. Construction will be fire proof throughout. The most modern of all appliances will be installed. Complete information, plans and specifications can be secured from either the Bureau of Yards and Docks in Washington or from the Commandant of the Naval Station at Pearl Harbor. Bids will be opened on May 10th.

VANCOUVER, B. C.—Seamen's Home, 7 story and base, reinforced concrete, \$100,000. Architects, Helyer & Archer, 207 Hastings W. Vancouver. Owner,

Robert F. Scott Memorial Seamen's Home. The building will be erected on a lot 50x85 feet, and will be arranged for a large number of sleeping rooms, baths, large reading and social rooms, office and billiard room. The plans provide for steam heat, elevator service and other modern conveniences. Interior will be finished in pine throughout. Tile will be used in the bath rooms. The exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

LOS ANGELES, CAL.—Hotel, 3 story and base. Class C construction. Cost not stated. Architect, F. H. Gentry, Pacific Electric Bldg., L. A. Owner, G. Bloom. The building will cover an area of 75x138 feet. The first floor will be arranged for the hotel entrance, lobby and offices and a large store. Plans provide for 90 rooms on the upper floors and a number of baths. Interior finish will be of pine and hardwood. A hot water heater and steam heat will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

HOSPITALS.

OAKLAND, CAL.—Hospital, 2 story and base, frame. Cost not stated. Architect, John Baur, Clunie Bldg., S. F. Owners, Fabiola Hospital. The addition has been designed for a hydrotherapeutic department and will contain the most modern equipment in this line. Tile will be used extensively in the interior. There will be a central heating plant and elevator service. Interior finish will be of pine. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures are being taken.

LIBRARIES.

Contracts Awarded.

AUBURN, WASH.—Library, 1 story and base, concrete and brick, \$10,000. Architect, David J. Meyer, Central Bldg., Seattle. Owners, Town of Auburn. Contractor, F. L. Berner, Auburn. Contract price, \$10,000.

PORT TOWNSEND, WASH.—Library, 1 story and base, reinforced concrete, \$10,500. Architect, C. Lewis Wilson & Co., Northern Bank Bldg., Seattle. Owners, Town of Port Townsend. Contractor, A. F. Mowatt & Co., Seattle. Contract price, \$10,630.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SEATTLE TO SUMAS, WASH.—Railroad construction, \$1,000,000. Engineers Engineering Dept. Northern Pacific R. R. Co., St. Paul, Minn. Owners, Northern Pacific R. R. Co. Bids are now being taken for the reconstruction of the company's road from Seattle to to Sumas. Those who will bid are: Grant Smith & Co., Henry Bldg., Seattle; Twoby Bros., Wells Fargo Bldg., Spokane; Porter Bros., Railway Exchange Bldg., Portland; and Sims & Cray of St. Paul. Representatives of the above are registered at the Butler Hotel, Seattle.

SEWERS, STREET WORK AND

LINNTON, ORE.—Water system, \$100,000. Engineer, Lewis Kelsey, Portland. Owners, City of Linnton. Plans are complete and have been approved for the construction of a municipal water system. Bids will be called for early in April. Plans and full particulars can be secured from either the City Clerk or from the Engineer.

Contracts Awarded.

CHARLESTON, WASH.—Sewer construction, \$40,000. Engineer City Engineer, Charleston. Owners, City of Charleston. Contractor, L. L. Lent, Bremerton. Contract price, \$37,201.

RESIDENCES.

SAN FRANCISCO—Residences, 5, 2 story and base, frame, \$2,500 each. Architect, Edward E. Young, 251 Kearny St., S. F. Owners, Howard and Hill, 163 Sutter St., S. F. These houses are to be erected on 25th avenue, in the neighborhood of Irving street. Each will be arranged for six rooms and bath. Interior finish will be of pine and redwood with some oak floors. There will be open fire places and brick and tile mantels in the living rooms. Tile will be used in the baths and kitchens. Exteriors will be covered with brick veneer and rustic. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,500. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The dwelling will contain seven rooms and bath. Interior will be finished in pine and hardwoods. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Bungalows, 4 1 story and base, frame, \$1,500 each. Architect, none. Owner, St. George Holden, 2567 Filbert St., S. F. These houses will be arranged to contain five rooms and bath each and are to be erected at the northwest corner of Anderson and Tompkins streets. Interiors will all be finished in pine or redwood. Some hardwood floors will be used. All living rooms will have a large brick fire place and coal grate. Some tile will be used in the bath rooms and kitchens. Exteriors will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 1½ story and base, frame, \$2,500. Architect, none. Owner, Ernest E. Dunn, 2631 Anza street, S. F. The dwelling has been designed for a six room house with bath. Interior finish will be of pine and redwood with hardwood floors in the living and dining rooms. An open fire place with brick mantel will be used in the living room. Bath room will be finished in tile. The exterior of the house will be covered with rustic and shingle. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—School group, 2 and 3 story and base, reinforced concrete, \$650,000. Architect, J. J. Donovan. Security Bank Bldg., Oakland Owners, City of Oakland. Plans for the Manual Training and Commercial High School have been approved by the Board of Education and bids for the construction will be opened on April 21st. The buildings will be the most modern of any commercial and manual training school on the coast. Construction will be practically fireproof throughout. Plans and specifications of the work can be secured from the architect after March 24th. A general contract, including plumbing and electric work will be let. Plans were prepared in three sections. Section A will

be the administration part of the building, and will include a library the principal's suite, an assembly hall with a gallery seating 1,500, teachers' rooms, a kitchen and a band room, with practicing rooms. Section B will include sixteen class rooms, six teachers' rooms and commercial rooms, and in section C will be included the lecture rooms and a girls' gymnasium and shower baths, a housekeeping suite, with kitchen, bedroom living room and bath room, completely furnished and cared for by the girls. Cooking, sewing and other domestic sciences will be taught here. In the basement of the third section will be located the boys' gymnasium.

TACOMA, WASH.—School, 3 story and base, stone and concrete, \$300,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, City of Tacoma. The structure will occupy a whole city block, and has been designed for a manual training and high school. There will be accommodations for 1,500 pupils. Plans include two swimming tanks, a complete gymnasium, domestic science departments and manual training rooms. There will be a central heating system, three boilers and five fans. Metal window frames and sash are specified. The exterior of the building will be faced with stone and pressed brick. Plans are complete and figures are being taken. Bids will be opened on April 15th.

HOQUIAM, WASH.—School, 2 story and base, reinforced concrete, \$90,000. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, Hoquiam School District. Plans for this building have been completed for some time, but bonds for the construction were not voted until recently. Final plans and specifications have received the approval of the School Board and bids will probably be called for not later than April 1st. The building will contain 14 class rooms, principal's offices, teachers' rooms and a large auditorium. There will be steam heat. The exterior of the building will be faced with cement plaster.

PULLMAN, WASH.—School, 2 story and base, brick, \$35,000. Architect, William Swain, Pullman. Owners, Pullman School District. The Board of School Trustees have just selected the plans prepared by Architect Swain for a two story, eight-room building. Interior finish will be of pine and hardwood with maple floors. A steam heating system will be installed. There will be program clocks and special ventilation. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LA GRANDE, ORE.—School, 2 story and base, brick and concrete, \$25,000. Architect, John L. Slater, La Grande. Owners, La Grande School District. The building will cover an area of 94x63 feet, and will be arranged for eight class rooms. Interior will be finished in pine throughout. Some maple floors will be used. A central heating system, and modern ventilation will be installed. The exterior will be faced with pressed brick. Plans will be completed and bids will be called for by April 1st.

PORTLAND, ORE.—Schools, 2, 2 story and base, reinforced concrete, \$75,000 each. Architect, F. A. Naramore, Supt. of School Properties, Portland. Owners, City of Portland. Plans

for two new buildings are complete and figures are being taken.

The Hoffman school, which will be a two-story, fireproof structure, will be of reinforced concrete construction, with eight class rooms, a boiler and fan room. The site for this building is located at East 59th and Powell Valley Road.

The Kenton school will be located on the corner of Lombard and Findley streets, and will have only six class rooms, an assembly room and boiler room.

Both structures will be of the same type of architecture and Mr. Naramore stated that all the latest and most modern conveniences used in school buildings will be installed in these structures.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores and offices, 3 story and base, brick and steel. Cost not stated. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner represented by Kutty Realty Co., First National Bank Bldg., S. F. The building will be erected on property recently purchased on East street, south of Market. The property has a frontage of 80 feet and a depth of 120 feet. The first floor will be arranged for a number of stores and upper floors for modern offices. Interior finish will be of pine throughout. Patent store fronts will be used. There will be a hot water heating system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

OAKLAND, CAL.—Store additions, brick construction, \$10,000. Architect, Charles Mau, Macdonough Bldg., Oakland. Owners, Hansen and Kahler. This work will consist of new interior finish, new store fixtures, plumbing and electric work. The exterior of the building will also be considerably altered. Plans are complete and figures are being taken for the work by the architect.

SAN FRANCISCO—Stores and offices, 25 story and base. Class A construction, \$1,500,000. Architects, Reid Bros. California-Pacific Bldg., S. F. Owner, John D. Spreckels. Following the purchase last week of the southeast corner of Fourth and Market streets, comes one of the most interesting announcements made in local building circles in many months. John D. Spreckels, the new owner, who purchased the property through an eastern Trust Company, has selected Reid Bros. as the architects to prepare plans for the new 25 story skyscraper, which is to become the new home of the Call. The property has a Market street frontage of 100 feet and a frontage on Fourth street of 175 feet. The sale price is quoted at \$1,100,000, which shows a valuation of \$14,000 per front foot for Market street property which is the highest figure ever reached on that street. The main portion of the building will be seven stories in height and will cover the entire lot. A large tower 25 stories will front Market street. Construction plans call for a complete steel frame with reinforced concrete floors and walls. Interior partitions will be of hollow tile and interior trim will be of metal, making the building fireproof throughout. The most modern mechanical equipment will be installed. What material will be used for the facing is still an un-

settled question. Working drawings are now being prepared, and it is hoped that construction will be started within the next four months. Further particulars will be given in these columns shortly.

OAKLAND, CAL.—Stores and offices, 7 story and base. Class B construction, \$200,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owners, Dalziel Estate. This building was mentioned in these columns some months ago when the architects were first commissioned to prepare plans. The structure will be erected on 15th street, between San Pablo and Clay streets, and will be one of the most modern commercial structures of Oakland. A number of stores will occupy the first floor and upper floors will be arranged for offices both en suite and single. Mechanical plans include steam heat, elevator service, vacuum cleaning system and mail chutes. Hardwood and tile will be used for interior finish. Interior partitions will be of metal lath and plaster. Metal window frames and sash are specified. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken. Bids will close on March 29th.

CERES, STANISLAUS CO., CAL.—Stores, 1 story and base, brick, \$10,000. Architect, Ralph P. Morrill, Yosemite Theatre Bldg., Stockton. Owners, Clark and Service. The building will occupy the most important business corner in Ceres and will cover an area of 70x90 feet. Plans provide for five modern stores, which will have plate glass windows and patent store fronts. Interiors will be finished in pine and some hardwood. Floor will be of cement. The exterior of the building will be faced with pressed brick. Considerable marble, tile and structural steel will be used. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and lofts, 3 story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, S. M. Newmark. The building will have a frontage of 50 feet and a depth of 152 feet. The first floor will be arranged for stores and upper floors for light lofts. There will be elevator service and steam heat. Metal window frames and sash will be used. Interior finish will be of pine throughout. Stores will have plate glass windows and patent fronts. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Stores and offices, 2 story and base. Class A construction. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, F. W. Braun. The building will cover an area of 55x90 feet. The structure has been designed for the use of the United States Custom Appraisers, and will be handsomely finished in hardwood, marble and tile. There will be a central heating system. Exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, W. G. Kerckhoff. The building will be erected on property adjoining the present Kerckhoff building, and will cover an area of 112x155

fect. Construction and architecture will be similar to the present building. The new structure will be fireproof throughout. There will be a complete steel frame, exterior walls of brick and terra cotta, metal lath and plaster interior partitions and concrete floors. Plans will include steam heat, elevator service, vacuum cleaning and mail chutes. Plans will be prepared shortly and the work will probably be undertaken this year. Full particulars will be given in these columns later.

Contracts Awarded.

HCQUIAM, WASH.—Stores and offices 2 story and base, reinforced concrete, \$25,000. Architect not stated. Owner, A. S. Hodgdon. Contractor, Edward Hannan, 1928 6th avenue, west, Seattle. Contract price, \$25,000.

SEALED PROPOSALS.

PROPOSALS FOR STEEL TOWERS.

STEEL TOWERS—Sealed proposals indorsed "Proposals for Radio Station" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. April 12, 1913**, and then there publicly opened, for steel towers for high-power radio station to be erected at Calmito, Canal Zone, including radio equipment under the cognizance of the bureau of steam engineering. Plans and specifications may be obtained on application to the bureau of yards and docks. A deposit of \$100 will be required as security for the return of plans and specifications. **H. R. STANFORD**, chief of bureau.

PROPOSALS FOR TRANSFORMERS AND MOTOR.

TRANSFORMERS AND MOTOR—Fort Bayard, N. M.—Sealed proposals for furnishing and delivering here three transformers and one motor will be received until **6 p. m. April 4, 1913**, and then opened. Information furnished on application. Envelopes containing proposals should be indorsed "Proposals for Transformers and a Motor" and addressed to quartermaster.

PROPOSALS FOR BUILDING.

BUILDING—Sealed proposals indorsed "Proposals for Hospital Buildings" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. May 10, 1913**, and then there publicly opened, for naval hospital buildings at the naval station, Pearl Harbor, Hawaii. Amount authorized, \$280,000. Plans and specifications may be obtained on application to the bureau or to the commandant of the naval station named upon the deposit of \$25 as security for the return of the plans. **H. R. STANFORD**, chief of bureau.

PROPOSALS FOR STEEL BRIDGE.

STEEL HIGHWAY BRIDGE—Department of the Interior, Office of Indian Affairs, Washington D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Steel Highway Bridge Across the Deschutes River, Warm Springs Reservation, Ore." and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until **2 o'clock p. m. April 14, 1913**, for furnishing materials and labor for the erection of a steel highway bridge across the Deschutes River, abutting on the Warm Springs Indian

Reservation, Ore., in strict accordance with the plans, specifications and instructions to bidders, which may be examined at this office, the offices of the supervisor of construction, Denver, Colo.; the U. S. Indian warehouse at San Francisco, Cal., and at the school. For further information apply to the superintendent of the Warm Springs Indian School, Warm Springs, Ore. **E. H. ABBOTT**, acting commissioner.

PROPOSALS FOR TOWERS.

TOWERS—Sealed proposals, indorsed "Proposals for Coal Towers," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. April 19, 1913**, and then and there publicly opened, for two coal-holding towers for the naval station, Pearl Harbor, Hawaii. Plans and specifications may be obtained on application to the bureau. **H. R. STANFORD**, chief of bureau.

PROPOSALS FOR PIPE LINE.

PIPE LINE AND OIL-BURNING APPARATUS—Office of Quartermaster, Fort Rosecrans, Cal.—Sealed proposals, in triplicate, will be received in this office until **11 a. m. April 7, 1913**, and then opened, for laying pipe line and installing oil-burning apparatus in buildings at this post. Further information may be obtained by applying at this office. **C. A. LOHR**, first lieutenant, coast artillery corps, quartermaster.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 766—Proposals for Reversing Motor Planer Equipments, Motors, Structural Steel, Galvanized Roofing, Steel Pipe, Cast Iron Pipe and Fittings, Babbitt Metal, Sheet Lead, Lead Pipe, Solder, Nails, Nuts, Wrenches, Hack saw Blades, Valves, Cocks, Stable Brooms, Hammer Handles, Candles, Soap and Canvas.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m. April 5, 1913**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 766) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. **E. C. BOGGS**, major, corps of engineers, U. S. army, general purchasing officer.

NOTICE INVITING PROPOSALS.

The Board of Education of the City of Oakland, State of California, requests and will receive bids for the furnishing of all the materials, labor and workmanship required in connection with the construction and completion of a two (2) and three (3) story and basement Reinforced Concrete School Building to be known as the Manual Training and Commercial High School, and to be erected on the western side of Broadway between Forty-second (42nd) and Forty-fifth (45th) streets in the City of Oakland, Alameda County, California.

All said materials, labor and workmanship is to consist of that required by and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of John J. Donovan, the Supervising

Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for Manual Training and Commercial High School," addressed to the Board of Education, and a posted by the bidder, or his agent, with the Board, while in session, between 4:30 and 5:30 o'clock p. m., Pacific Time, on the 21st day of April, 1913, in the rooms of the Board in the City Hall Annex, No. 1728 Broadway, Oakland, California, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Board.

The contract for the furnishing of all the labor and material entering into the construction and completion of the work, including Plumbing, Heating, Ventilating, Electric Work and other Equipment indicated on the drawings or called for in the specifications, is to be let or awarded as a whole or general contract.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of H. E. Magill, City Clerk, in an amount not less than ten per centum (10%) of the aggregate amount of the proposal. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty (20) days after receiving notice of award.

A bound set of the Forms of Proposal, and of the required Affidavits, Agreement, Bonds, Acknowledgements and Specifications will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Building, corner 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after March 24, 1913, within a reasonable time after application, and upon the deposit of Fifty and no 100 Dollars (\$50.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition one complete set of plans and drawings required for the work will be furnished each applicant for the General Contract Work. Additional copies will, however be furnished provided the applicant pays the cost of reproduction, such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Board in accordance with the provisions of the Charter of the City of Oakland to reject any or all bids submitted.

By order of the Board of Education of the City of Oakland, California.

A. L. HANNAFORD,
Secretary of the Board of Education of the City of Oakland.

PROPOSALS FOR SEWERS.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Said proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of April, 1913, for doing the following work, to wit:

The construction of sewers and appurtenances in Ottawa avenue from San Jose avenue to Winnipeg avenue. Progressive payments will be made. The amount of bond for faithful performance has been fixed at \$1,000.00. Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Said proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general construction of the Le Conte School Building, to be situated at the southwesterly corner of Norwich and Alabama streets.

Progressive payments will be made.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within three hundred (300) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$12,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR PLUMBING AND GAS FITTING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Said proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The plumbing and gas fitting for the Le Conte School Building.

Progressive payments will be made. The amount of bond for faithful per-

formance of contract has been fixed at \$5,000.00.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR ELECTRIC WORK.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Said proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The electrical work for the Le Conte School Building.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$2,000.00.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR PLASTERING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Said proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The plastering of the Le Conte School Building.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$1,000.00.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR VAPOR HEATING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Said proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 2nd day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The installation of a vapor heating system in the Le Conte School Building.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$3,000.00.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and

all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 1030 A. M. Thursday, April 10, 1913, for the installation of a Conduit System for Exhibit Building Section in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut streets, San Francisco, by depositing \$10.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee. WILLIAM H. CROCKER, Chairman. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 1030 A. M. Thursday, April 3rd, 1913, for the construction of a Pile Foundation for the Agriculture Building in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Pile foundation. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for a pile foundation for the transportation Building are complete and now out for figures. Bids will be opened by the Buildings and Grounds Committee in the Exposition Bldg. on March 27th. Plans and specifications can be secured from the Director of Works. The official proposal appears in another column of this issue.

SAN FRANCISCO—Exposition building 2 story, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the Food Products Building, another of the most important of the big exposition buildings, have been completed and are now out for figures. The structure will occupy a conspicuous place on the Harbor View site and will cover an area of 210 feet by 160 feet. Bids will be opened on April 1st. Separate figures are being taken for the general construction and for the plumbing and water piping. The official proposal appears in another column of this issue.

THEATRES.

SAN FRANCISCO Theatre, 1 story and base, \$12,000. Architects C. M. and A. E. Roussau, Monadnock Bldg., S. F. Owners, Mutual Amusement and Investment Co. The building has been

designed for a moving picture show and stores. The site is at the southwest corner of Clay and Fillmore streets and covers an area of 60x119 feet. Interior of the theatre will be finished in pine and ornamental plaster. Considerable tile and glass will be used. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, and carefully classified as to locality. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCES—3, 2 story and base, frame, \$2,500 each. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owners, Howard and Hill, 163 Sutter St., S. F. These houses are to be erected on 25th avenue, in the neighborhood of Irving street. Each will be arranged for six rooms and bath. Interior finish will be of pine and redwood with some oak floors. There will be open fire places and brick and tile mantels in the living rooms. Tile will be used in the baths and kitchens. Exteriors will be covered with brick veneer and rustic. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$1,500. San Francisco. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The dwelling will contain seven rooms and bath. Interior will be finished in pine and hardwoods. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOWS—4, 1 story and base, frame, \$1,500 each. San Francisco. Architect, none. Owner, St. George Holden, 2567 Filbert St., S. F. These houses will be arranged to contain five rooms and bath each, and are to be erected at the northwest corner of Anderson and Tompkins streets. Interiors will all be finished in pine or redwood. Some hardwood floors will be used. All living rooms will have a large brick fire place and coal grate. Some tile will be used in the bath rooms and kitchens. Exteriors will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—1½ story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Ernest E. Dunn, 2631 Anza St., S. F. The dwelling has been designed for a six-room house with bath. Interior finish will be of pine and redwood with hardwood floors in the living and dining rooms. An open fire place with brick mantel will be used in the living room. Bath room will be finished in tile. The exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, Joseph A. Leonard, Union Bldg., S. F. Owners, Lorian Realty Co. This house will be similar in design to a number of others recently erected by the Lorian Realty Co., and it is to be located at the corner of Head and Holloway avenues. The dwelling will contain seven rooms and bath. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open

fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story, attic and basement, frame, \$10,000. San Francisco. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling has been designed for an eight-room house with bath, laundry and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used throughout. Plans include a central heating system, open fire places and brick and tile mantels. Bath rooms will have tile wainscoting and composition floors. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

BUNGALOW—1 story and base, frame, \$2,000. San Francisco. Architect, none. Owners, Schroder and Allis, 460 Duboce Ave., S. F. The dwelling will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living and dining rooms. There will be an open fire place in the living room with a brick mantel. The bath and kitchen will have some tile wainscoting. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

BUNGALOWS—10, 1½ story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, J. P. Fletcher, 310 Lick Bldg., S. F. These houses will be erected on property in the neighborhood of Santa Vasil avenue and San Jose avenue. Each dwelling will contain five rooms and bath. Interiors will be finished in pine and redwood. Oak floors will be used in the two principal rooms. There will be an open fire place in each living room. Mantels will be of tile or brick. Exteriors of the dwellings will be covered with rustic and shingles. Plans are in the hands of the owner who is now purchasing all materials and who will do the work by Day Labor.

HOTEL—5 story and base, brick and steel. Cost not stated. San Francisco. Architect, W. H. Weeks, 75 Post St., S. F. Owner, Hiram B. Fisher. This building is to be erected in the north line of Mission street between 14th and 5th streets. The first floor will be arranged for two modern stores besides the entrance to the hotel. Upper floors will be divided into 72 guest rooms and a number of baths. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior will be finished in pine. Some tile will be used in the baths. The exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—2 or 3 stories and base, reinforced concrete. Cost not stated. San Francisco. Architect, Creighton Withers, California and Powell Sts., S.

F. Owner, R. S. Brown. Preliminary sketches have been prepared for both a two story and a seven story building which is contemplated for the southwest corner of Geary and Mason streets. The owner is considering leases on both of these structures, and until the height is decided nothing definite will be done with the working drawings. Complete particulars will be given in an early issue of the Building and Industrial News.

HOTEL—3 story and base, brick and steel. Cost not stated. San Francisco. Architect, Philip Schwerdt, Phelan Bldg., S. F. Owners, B. Hirsch and B. Heskins. This building will be erected on the property at the northwest corner of Post and Taylor streets. The structure has been designed to contain in the neighborhood of 150 rooms, a large percentage of which will have connecting baths. Interior will be finished in pine and hardwoods. There will be steam heat, elevator service and a vacuum cleaning system. All rooms will be supplied with hot and cold running water. The exterior of the building will be faced with pressed brick. Plans are complete, bids have been taken and are now under advisement in the offices of the architect.

HOTEL—1 story and base, brick and steel, \$75,000. San Francisco. Architects, Ross & Burgren, 310 California St., S. F. Owner, Hamburger Investment Co. The building will be erected at the corner of 6th and Clara streets and will cover a large area. The first floor will be arranged for a number of stores besides the hotel lobby and entrance. Upper three floors will be divided into about 200 guest rooms and a number of baths. There will be steam heat and elevator service. A hot water plant will be installed. Interior finish will be of pine. The bath rooms will be wainscoted with tile and will have cement floors. The exterior of the building will be faced with pressed brick. Stores will have patent fronts and plate glass windows. Plans for the work will be completed at once.

HOTEL—3 story and base, brick, \$10,000. San Francisco. Owner, Max Goldberg, 320 Market St., S. F. The building is to be erected on Stockton street, north of Washington, and will cover an area of 25x110 feet. There will be a total of about 50 rooms and baths. Interior will be finished in pine throughout. A central system of heating will be installed. Hot and cold running water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

HOSPITAL GROUP—2 story and base, reinforced concrete, \$280,000. Pearl Harbor, Hawaii. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans for a large general hospital, which will be erected at the Navy Station at Pearl Harbor, are complete and out for figures. Construction will be fireproof throughout. The most modern of all appliances will be installed. Complete information, plans and specifications can be secured from either the Bureau of Yards and Docks in Washington or from the Commandant of the Navy Station at Pearl Harbor. Bids will be opened in May 1916.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$65,000. San

Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, J. W. O'Brien. The building has been mentioned in these reports before when preliminary drawings were first started. The structure will be erected on Rush street, 137½ feet west of Powell, and will be arranged to contain 25 apartments of two rooms each and 10 three room apartments. Plans include steam heat, wall beds, a vacuum cleaning system and elevator service. Private baths will be arranged for all suites. Interior finish will be of pine and hardwood. The exterior of the building will be faced with red pressed brick trimmed with white artificial stone. The building will be 46x136½ feet. Plans are complete and segregated figures are being taken.

APARTMENT HOUSES, 2, 3 story and base, frame, \$11,000 each. San Francisco. Architect, none. Owner, Phillip Yager, 129 Carl St., S. F. These buildings will each have a street frontage of 30 feet and a depth of 90 feet. Interiors will be arranged for two and three room suites with private baths. Interior will be finished in pine throughout. There will be a central heating system and wall beds. The exteriors will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

MACHINE SHOP—2 story frame. Cost not stated. San Francisco. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owners, Auld and Blackman. The building will be erected at the corner of Bryant and Harriet streets and will cover a considerable area. No interior finish will be used, on the ground floor. Special machinery will be purchased. The exterior of the building will be covered with rustic and galvanized iron. Plans are complete and the work will be done by Day Labor.

FLAT—3 story and base, frame, \$9,000. San Francisco. Architect, none. Owners, McKillip Bros., 540 Cole St., S. F. The building will cover an area of 25x83 feet, and has been designed to contain six apartment flats, each of which will consist of three rooms and bath. Interior finish will be of pine and redwood. There will be a central heating system and gas grates. Tile will be used in the bath rooms and kitchens. Mantels will be of brick. The building will be located on Golden Gate avenue near Devisadero. The exterior will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who are now purchasing all materials. The work will be done by Day Labor.

FLAT—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Charles A. Rushton, 714 9th Ave., S. F. The building will have a frontage of 25 feet and a depth of 60 feet. The interior has been arranged for two modern flats of five and six rooms each with bath. All interior finish will be of pine. Some oak floors will be used. Baths will have tile wainscot and cement floors. There will be gas grates and tile mantels. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

COAL TOWERS—Cost not stated. Pearl Harbor, Hawaii. Architects, Bureau of yards and docks, Washington, D. C. Owners, United States Govern-

ment. Plans and specifications have been completed for the construction of two coal towers for the Naval Station at Pearl Harbor. Bids for this work are now being taken and will be opened on April 19th. Plans and specifications can be secured from either the Commandant of the Navy Yard or from the Bureau of Yards and Docks, Washington, D. C. The official proposal appears in another column of this issue.

SCHOOL—2 story and base, frame, \$52,000. San Francisco. Architect, Architectural Dept. City of San Francisco, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. The building will be known as the Le Conte School, and is to be located at the corner of Norwich and Alabama streets. There will be 12 class rooms, principal's office and teachers' rooms. Interior finish will be of pine and hardwood. Composition blackboards will be used. A vapor system of heating is specified. The exterior of the building will be covered with shakes. Separate bids are wanted for the general construction, plumbing, heating, plastering, and electric work.

Bids will be opened by the Board of Public Works on April 2nd. Plans can be secured from the Dept. of Architecture. The official proposal appears in another column of this issue.

THEATRE—1 story and base, \$12,000. San Francisco. Architects, C. M. and A. F. Rounsau, Monadnock Bldg., S. F. Owners, Mutual Amusement and Investment Co. The building has been designed for a moving picture show and stores. The site is at the southwest corner of Clay and Fillmore streets and covers an area of 60x118 feet. Interior of the theatre will be finished in pine and ornamental plaster. Considerable tile and glass will be used. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

STORES AND OFFICES—3 story and base, brick and steel. Cost not stated. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, represented by Kuty Realty Co., First National Bank Bldg., S. F. The building will be erected on property recently purchased on East street, south of Market. The property has a frontage of 30 feet and a depth of 120 feet. The first floor will be arranged for a number of stores and upper floors for modern offices. Interior finish will be of pine throughout. Patent store fronts will be used. There will be a hot water heating system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES AND OFFICES—25 story and base. Class A construction, \$1,500,000. San Francisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owner, John D. Spreckels. Following the purchase last week of the southeast corner of Fourth and Market streets comes one of the most interesting announcements made in local building circles in many months. John D. Spreckels, the new owner, who purchased the property through and Eastern Trust Company, has selected Reid Bros. as the architects to prepare plans for the new 25 story skyscraper which is to be come the new home of the Call. The property has a Market street frontage of 100 feet and a frontage on Fourth street of 175 feet. The sale price is quoted at \$1,100,000, which

shows a valuation of \$11,000 per front foot for Market street property which is the highest figure ever reached on that street. The main portion of the building will be seven stories in height and will cover the entire lot. A large tower 25 stories will front Market street. Construction plans call for a complete steel frame with reinforced concrete floors and walls. Interior partitions will be of hollow tile and interior trim will be of metal, making the building fireproof throughout. The most modern mechanical equipment will be installed. What material will be used for the facing is still an unsettled question. Working drawings are now being prepared, and it is hoped that construction will be started within the next four months. Fuller particulars will be given in these columns shortly.

PILE FOUNDATION—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for a pile foundation for the Transportation Building are complete and now out for figures. Bids will be opened by the Buildings and Grounds Committee in the Exposition Bldg. on March 27th. Plans and specifications can be secured from the Director of Works. The official proposal appears in another column of this issue.

EXPOSITION BUILDING—2 story, frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the Food Products Building, another of the most important of the big exposition buildings have been completed and are now out for figures. The structure will occupy a conspicuous place on the Harbor View site, and will cover an area of 210 feet by 160 feet. Bids will be opened on April 1st. Separate figures are being taken for the general construction and for the plumbing and water piping. Plans and specifications can be secured from the Director of Works. The official proposal appears in another column of this issue.

BUILDING SUPERINTENDENT.

Glacken, Edw. E. General building superintendent, architectural and structural; supervision of any class of building construction. Expert in reinforced concrete, including cost data, design, floor load, quantity surveying, etc. Address 363 Golden Gate Ave. Phone Franklin 7619.

Eliminate Form Work in your concrete construction

The cost of form work doubtless has often caused you to make alterations in plans you would have liked to carry out. It is especially so in curved or arched construction—admittedly the strongest and most pleasing.

"Self-Sentering" will enable you to plan roofs, floors, ceilings, walls, partitions, etc., without form work of any kind. It is adapted with equal facility to flat, inclined or curved surfaces. Concrete roofs of any character may be constructed with it. Floors can be planned with arched slab construction on spans up to 12' in width. Partition built with it need be only 2" thick—a great saving of floor space in large lofts.

"Self-Sentering" is a new reinforcement and centering combined. It is manufactured in sheets 28" wide and up to 12' long, or curved in the factory to any desired radius. It is made up of a series of cold-drawn heavy ribs connected with the most efficient form of expanded metal, all cut and drawn from one sheet of special steel.

Write for our Fireproofing Handbook

We shall be glad to send you a complimentary copy on request. It is a handsome 80-page illustrated book, published for Architects, Engineers and Contractors. It will give you concisely all the facts you want to have on file regarding "Self-Sentering."

Frank Neidick

Carpenter and Builder

Phone Mission 5126

**2669A Howard St., Bet. 22nd and 23rd
San Francisco**

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Mar. 17, 1913—E TWENTY-NINTH
Ave 225 N Anza (A) N 25xE 120.
Joseph Bar Levy and Fannie Levy
with W A Miller, Cancelled.....
.....Feb. 27, 1912

OAKLAND AND ALAMEDA
COUNTY.

RESIDENCE — 2 story and base,
frame, \$3,500. Oakland, Cal. Archi-
tect, none. Owner, C. J. Pfingr, 5487
Claremont Ave., Oakland. The dwell-
ing has been designed for an eight-
room house with bath and sleeping
porch. Interior finish will be of pine
and redwood with hardwood floors in
the living room, dining room and re-
ception hall. Furnace heat will be in-
stalled. There will be an open fire
place in the living room with brick or
tile mantel. An automatic water heater
is specified. Bath room will have
tile wainscot and composition floor.
The exterior of the dwelling will be
covered with cement plaster on metal
lath. Plans are complete and the work
will be done by Day Labor.

RESIDENCE — 2 story and base,
frame, \$6,000. Piedmont, Alameda Co.,
Cal. Architects, Cunningham & Polito-
to, First National Bank Bldg., S. E.
Owner, H. S. Polito. This dwelling
has been mentioned here before. Plans
show a house designed to contain eight
rooms, bath and sleeping porches. In-
terior finish will be of pine and hard-
wood. There will be a central heating
system and open fire places. Mantels
will be of tile and brick. Tile will be
used in the bath rooms and kitchen.
An automatic water heater will be in-
stalled. The exterior of the building
will be covered with shiplap. Plans
are complete and figures are again be-
ing taken for the work.

RESIDENCE — 2 story and base,
frame, \$3,000. Oakland, Cal. Archi-
tects, Thomas & Oliver, Pantages The-
atre Bldg., Oakland. Owner, Paul
Schneider. The dwelling will contain 18
rooms and bath. Interior finish will be
largely of pine. Hardwood floors will
be used in the principal rooms. A central
system of heating will be installed.
There will be an open fire place in the
living room with a brick mantel. Tile
will be used in the bath room and
kitchen. The exterior of the house
will be covered with cement plaster on
metal lath. Plans are complete and
the work will be done by Day Labor.

APARTMENT HOUSE ADDITIONS—
3 story, frame, \$10,000. Oakland, Cal.

BUILDING AND INDUSTRIAL NEWS

Architects, Miller & Hodges, Bankers' Investment Bldg., S. F. Owner, M. Davison, 768 8th St., Oakland. This work will include new foundations and exterior finish, plumbing, electric work and plastering. Interior finish will be of pine throughout. There will be a central heating system installed. All suits, which have been designed for the two and three room type, will have connecting baths and wall beds. Tile will be used in the bath rooms. The exterior of the building will be covered with shingles and shakes. Plans are complete and figures are being taken.

HOSPITAL—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, John Baur, Clunie Bldg., S. F. Owners, Fabiola Hospital. The addition has been designed for a hydrotherapeutic department and will contain the most modern equipment in this line. Tile will be used extensively in the interior. There will be a central heating plant and elevator service. Interior finish will be of pine. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$2,400. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a six-room house and will be finished in pine throughout. There will be an open fire place in the living room and a brick mantel. Oak floors will be used in the living and dining rooms. The bath will have tile wainscot and tile will also be used in the kitchen. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

SCHOOL GROUP—2 and 3 story and base, reinforced concrete, \$650,000. Oakland, Cal. Architect J. J. Donovan, Security Bank Bldg., Oakland Owners. City of Oakland. Plans for the Manual Training and Commercial High School have been approved by the Board of Education, and bids for the construction will be opened on April 21st. The buildings will be the most modern of any commercial and manual training school on the coast. Construction will be practically fireproof throughout. Plans and specifications can be secured from the architect after March 24th. A general contract, including plumbing and electric work will be let. Plans were prepared in three sections. Section A will be the administration part of the building, and will include a library, the principal's suite, an assembly hall with a gallery seating 1,500, teachers' lunch rooms, a kitchen and a band room, with practicing rooms. Section B will include sixteen class rooms, six teachers' rooms and commercial rooms, and in section C will be included the lecture rooms and a girls' gymnasium and shower baths, a housekeeping suite, with kitchen, bedroom living room and bath room, completely furnished and cared for by the girls. Cooking, sewing and other domestic sciences will be taught here. In the basement of the third section will be located the boys' gymnasium.

STORE ADDITIONS—Brick construction, \$10,000. Oakland, Cal. Architect Charles Mau, Macdonough Bldg., Oakland. Owners, Hansen and Kahler. This work will consist of new interior

finish, new store fixtures, plumbing and electric work. The exterior of the building will also be considerably altered. Plans are complete and figures are being taken for the work by the architect.

STORES AND OFFICES—7 story and base. Class B construction, \$200,000. Oakland, Cal. Architects, Milwain Bros, Delger Bldg., Oakland. Owners, Daizel Estate. This building was mentioned in these columns some months ago when the architects were first commissioned to prepare plans. The structure will be erected on 15th street, between San Pablo and Clay streets, and will be one of the most modern commercial structures of Oakland. A number of stories will occupy the first floor and upper floors will be arranged for offices, both ensuite and single. Mechanical plans include steam heat, elevator service, vacuum cleaning system and mail chutes. Hardwood and tile will be used for interior finish. Interior partitions will be of metal lath and plaster. Metal window frames and sash are specified. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken. Bids will close on March 29th.

Building Contracts Awarded. Oakland.

LOS ANGELES AND SOUTHERN CALIFORNIA.

OIL BURNING SYSTEM—Cost stated. Fort Rosecrans, San Diego. Dept. U. S. A., Fort Rosecrans, Cal. C. A. Lehr officer in charge. Plans have been completed and bids will be opened April 7th for a complete oil burning system, including pipe line and burners for all buildings at this station. Plans and specifications can be obtained from Lieut. Lehr. The oil proposal appears in another column this issue.

APARTMENT HOUSE—4 story base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Edga Dorn, 1811 So. Main St., L. A. Owner, R. H. Raphael. The building will occupy a corner site and will cover area of 130x130 feet. The interior will be arranged for 52 apartments with consist of three, four and rooms each. There will be private baths and wall beds. Steam heat, radiator service, a vacuum cleaning system and hot water plant will be installed. Interior finish will be of tile and hardwoods. Tile and cement will be used in the bath rooms. Plan nearly complete and segregated will be called for shortly.

BANK AND OFFICES—12 story base. Class A construction, \$350,000. Los Angeles, Cal. Architects, W. L. Carlett & Son, Phelan Bldg., S. F. Title Insurance Bldg., L. A. Owner, W. L. Carlett & Son, Phelan Bldg., S. F.

Shants' Fireproof Building Co. The ground and mezzanine stories basement will be occupied by the Shants' National Bank. There will be 450 offices in the upper stories.

The building will be 120x156 feet and will have a central light court. It is of steel frame construction. The two stories will be faced with tile. Terra cotta will be used for the space above the granite on the Spring and Sixth street elevations and returns on the alley and north side. The alley wall and the north side above the second story will be faced with pressed brick. The central light court will have white enameled tile facing. There will also be terra cotta cornice, composition roofing, hollow tile and reinforced concrete floors, and studs and metal lath and plaster divisions throughout, suspended ceiling in the first, mezzanine and twelfth stories, ornamental staff work, marble sash and stairs, six elevators, hard tile trim, marble corridors, steel beams and marble stairs, plate glass windows on street fronts, metal frames of sash and wired glass on light fixtures and exposed sides, lavatory in office, toilets, plumbing, vacuum cleaning, electric wiring and fixtures, steam heating system, mail chutes, etc. The steel contract has been let to the W. H. Iron Works; granite to the Diamond Stone Co.; and excavating to the foundation to Weymouth Crowell. The general contract will be let in this week.

RIDGES—Reinforced concrete, \$50,000. San Bernardino, San Bernardino Cal. Engineer, County Engineer, San Bernardino. Owners, San Bernardino. The Board of Supervisors have been notified by the State Highway Commission to proceed with construction of a number of small bridges along the route of the State Highway in this county. Plans are being prepared by the County Surveyor. Plans will be ready for figures in a month.

JETTY WORK—Rock and concrete, \$10,000. Newport Beach, Orange Co., Engineer, City Engineer, Newport Beach. Owners, City of Newport Beach. Bonds are to be voted on within the next few weeks for the construction of a jetty at the entrance of Newport Bay. The Board of Trustees have secured preliminary plans and an estimate on the work, and no estimate will be lost in completing the project. Full particulars will be given in these columns as the work progresses.

HAFEL ADDITION—2 story and garage—1 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architects, Kysor & Gar, Wright and Callender Bldg., L. A. Owner, Charles E. Berghin. The building will have a frontage of 50 feet and a depth of 150 feet. A central floor will be used and metal window frames and sash. Special gasoline storage tanks will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

STORAGE—1 story and base, brick, Cost not stated. Los Angeles, Cal. Architect, Arthur L. Acker, 1127 Story St., L. A. Owner, J. W. Fowler. The building will be designed for a commercial garage and is to be 65x100 feet. A cement floor will be used. Special gasoline storage tanks are

specified. The interior of the building will be finished in pine. The exterior will be faced with pressed brick. Plans are complete and in the hands of the owner who will do the work by Day Labor.

HOTEL—3 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, F. H. Gentry, Pacific Electric Bldg., L. A. Owner, G. Bloom. The building will cover an area of 75x138 feet. The first floor will be arranged for the hotel entrance, lobby and office and a large store. Plans provide for 90 rooms on the upper floors and a number of baths. Interior finish will be of pine and hardwood. Hot water heater and steam heat will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

RESIDENCE—1 story and base, frame and concrete, \$55,000. Hollywood, Los Angeles Co., Cal. Architect, Franklin M. Small, 265 Broadway, New York. Owner, Adolph L. Bernheimer. The dwelling is to be designed in the Japanese style and will cover an area of 112x118 feet with a court 40x40 feet. Construction will be handled through the office of Architect Walter Weber, Ferguson Bldg., Los Angeles.

RESIDENCE—2 story, attic and base, frame and concrete, \$60,000. Los Angeles, Cal. Architects, Edelman & Barnett Blanchard Bldg., L. A. Owner, S. Aronson, H. W. Hellman Bldg., L. A. The dwelling will contain 15 rooms and 4 baths, and will cover an area of 72x86 feet. Interior will be finished in hardwood throughout. A central heating system will be installed. All bath rooms will be finished in tile. A number of special features will be introduced. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

STORES AND LOFTS—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Morgan, Wallis & Morgan, Story Bldg., L. A. Owner, S. M. Newmark. The building will have a frontage of 50 feet and a depth of 152 feet. The first floor will be arranged for stores and upper floors for light lofts. There will be elevator service and steam heat. Metal window frames and sash will be used. Interior finish will be of pine throughout. Stores will have plate glass windows and patent fronts. The exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES AND OFFICES—2 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, E. W. Braun. The building will cover an area of 55x90 feet. The structure has been designed for the use of the United States Custom Appraisers, and will be handsomely finished in hardwood, marble and tile. There will be a central heating system. Exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

STORES AND OFFICES—12 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Wallis & Morgan, Story Bldg., L. A. Owner, W. G. Kerckhoff. The building will be erected on property adjoining the present Kerckhoff building, and will cover an area of 112x155 feet. Construction and architecture will be similar to the present

building. The new structure will be fireproof throughout. There will be a complete steel frame, exterior walls of brick and terra cotta, metal lath and plaster interior partitions and concrete floors. Plans will include steam heat, elevator service, vacuum cleaning and mail chutes. Plans will be prepared shortly and the work will probably be undertaken this year. Full particulars will be given in these columns later.

PORTLAND AND OREGON.

HOTEL—3 story and base, brick. Cost not stated. Portland, Ore. Architects, Bennes & Henricks, Henry Bldg., Portland. Owner, Otto W. Nelson. The building will be 50x95 feet. The first floor will be arranged for stores and the hotel entrance and lobby. Upper floors will contain a total of 90 rooms and a number of baths. There will be steam heat, hot and cold running water in all rooms and a vacuum cleaning system. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LAUNDRY—2 story and base, brick, \$80,000. Portland, Ore. Architect, Ellis F. Lawrence associated with W. G. Holford, Chamber of Commerce Bldg., Portland. Owners, Troy Laundry Co. The building, which is to be erected by the largest laundry company in Portland, will cover a ground area of 110x200 feet. Construction will be of the mill type with brick exterior walls faced with stock brick. A full basement will be excavated and the power plant will be placed in the basement. Several thousand dollars worth of special laundry machinery will be ordered. There will be metal window sash and frames. Concrete floors will be used. Plans are complete and figures will be called for at once.

CITY HALL—2 story and base, brick and concrete, \$20,000. Newberg, Ore. Architect, E. E. McLaren, Lumber Exchange Bldg., Portland. Owners, Town of Newberg. Plans have been approved for the construction of a City Hall building covering an area of 80x96 feet. The structure will house the fire and police departments, Mayor, City Clerk, Treasurer and other city officials. A large council room will occupy the greater portion of the second floor. Interior finish will be of pine throughout. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—2 story and base, brick, \$40,000. Eugene, Ore. Architects, Vincent, Russell & Pruse, Eugene. The building will be arranged for a number of modern two and three room suits all of which will be equipped with wall beds. There will be private bath rooms, steam heat and a vacuum cleaning system. Baths will be finished in tile and will have cement floors. The interior of the building will be finished in pine with some hardwood floors. Exterior will be faced with pressed brick. Plans are being prepared.

BASE, BRICK AND CONCRETE, \$15,000. PORTLAND, ORE. ARCHITECTS, JACOBSON & SMITH, BOARD OF TRADE BLDG. PORTLAND. OWNERS, PORTLAND EATERS. THE BUILDING WILL BE IN THE NATURE OF AN ADDITION TO THE PRESENT CHAPEL AND WILL BE

of mill construction with a concrete foundation. Interior finish will be of pine throughout. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick and concrete, \$25,000. La Grande, Ore. Architect, John L. Slater, La Grande. Owners, La Grande School District. The building will cover an area of 94x63 feet, and will be arranged for eight class rooms. Interior will be finished in pine throughout. Some maple floors will be used. A central heating system and modern ventilation will be installed. The exterior will be faced with pressed brick. Plans will be completed and bids will be called for by April 1st.

SCHOOLS—2, 2 story and base, reinforced concrete, \$75,000 each. Portland, Ore. Architect, F. A. Naramore, Supt. of School Properties, Portland. Owners, City of Portland. Plans for two new buildings are complete and figures are being taken.

The Hoffman school, which will be a two-story, fireproof structure, will be of reinforced concrete construction, with eight class rooms, a boiler and fan room. The site for this building is located at East 59th and Powell Valley Road.

The Kenton school will be located on the corner of Lombard and Findley streets, and will have only six class rooms, an assembly room and boiler room.

Both structures will be of the same type of architecture and Mr. Naramore stated that all the latest and most modern conveniences used in school buildings will be installed in these structures.

WATER SYSTEM—\$100,000. Linton, Ore. Engineer, Lewis Kelsey, Portland. Owners, City of Linton. Plans are complete and have been approved for the construction of a municipal water system. Bids will be called for early in April. Plans and full particulars can be secured from either the City Clerk or from the Engineer.

Contracts Awarded.

COLD STORAGE PLANT—2 story and base, brick and concrete, \$25,000. Springfield, Ore. Architect, none. Owners, Weinhardt Ice and Cold Storage Co. Contractor, A. Lombard, Eugene. Contract price, \$25,000.

SEATTLE AND WASHINGTON.

SCHOOL—3 story and base, stone and concrete, \$300,000. Tacoma, Wash. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, City of Tacoma. The structure will occupy a whole city block, and has been designed for a manual training and high school. There will be accommodations for 1,500 pupils. Plans include two swimming tanks, a complete gymnasium, domestic science departments and manual training rooms. There will be a central heating system, three boilers and five fans. Metal window frames and sash are specified. The exterior of the building will be faced with stone and pressed brick. Plans are complete and figures are being taken. Bids will be opened on April 15th.

BRIDGE—Steel and concrete, \$95,000. Aberdeen, Wash. Engineer, City

Engineer, Aberdeen. Owners, City of Aberdeen. Bonds to the amount of \$85,000 have been voted for the construction of a steel bridge over the Washkah River at this point. Plans will be completed as rapidly as possible and bids will be called.

SEAMEN'S HOME—7 story and base, reinforced concrete, \$100,000. Vancouver, B. C. Architects, Hoyer & Archer, 207 Hastings W. Vancouver. Owner, Robert F. Scott Memorial Seamen's Home. The building will be erected on a lot 50x85 feet, and will be arranged for a large number of sleeping rooms, baths, large reading and social rooms, office and billiard room. The plans provide for steam heat, elevator service and other modern conveniences. Interior will be finished in pine throughout. Tile will be used in the bath rooms. The exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

RAILROAD CONSTRUCTION—\$1,000,000. Seattle to Sumas, Wash. Engineers, Engineering Dept. Northern Pacific R. R. Co., St. Paul, Minn. Owners, Northern Pacific R. R. Co. Bids are now being taken for the reconstruction of the company's road from Seattle to Sumas. Those who will bid are: Grant Smith & Co., Henry Bldg., Seattle; Twolby Bros., Wells Fargo Bldg., Spokane; Porter Bros., Railway Exchange Bldg., Portland; and Sims & Cray of St. Paul. Representatives of the above are registered at the Butler Hotel, Seattle.

SCHOOL—2 story and base, reinforced concrete, \$90,000. Hoquiam, Wash. Architects, Stephen & Stephen, New York Bldg., Seattle. Owners, Hoquiam School District. Plans for this building have been completed for some time, but bonds for the construction were not voted until recently. Final plans and specifications have received the approval of the School Board, and bids will probably be called for not later than April 1st. The building will contain fourteen class rooms, principal's offices, teachers' rooms and a large auditorium. There will be steam heat. The exterior of the building will be faced with cement plaster.

BANK—2 story and base, reinforced concrete, \$25,000. Kalama, Wash. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owner's name withheld. The building will be devoted to the exclusive use of the bank. Interior finish will be of hardwoods, marble, tile and ornamental plaster. There will be special bank fixtures and both coin and safe deposit vaults. Construction will be fire proof throughout. A central heating system will be installed. Besides the work space and public room there will be a private office for the president and a directors' room. The exterior of the building will be special bank fixtures and both plans are being prepared.

GARAGE—2 story and base, reinforced concrete, \$50,000. Seattle, Wash. Engineer, John M. Baird, White Bldg., Seattle. Owner, R. H. Gray. The building will cover an area of 65x120 feet, and has been designed for a commercial garage. Front portion of the first floor will be fitted up for a sales room and offices. Rear of the first floor and the basement will be used for storage purposes. A completely equipped machine shop and repair department will be located on the second

and third floors. Concrete floor on the first floor and basement. There will be metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are being prepared.

SCHOOL—2 story and base, brick, \$35,000. Pullman, Wash. Architect, William Swain, Pullman. Owners, Pullman School District. The Board of School Trustees have just selected the plans prepared by Architect Swain for a two story, eight room building. Interior finish will be of pine and hardwood with maple floors. A steam heating system will be installed. There will be program clocks and special ventilation. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

SEWER CONSTRUCTION—\$40,000. Charleston, Wash. Engineer, City Engineer, Charleston. Owners, City of Charleston. Contractor, L. L. Lent, Bremerton. Contract price, \$7,201.

STORES AND OFFICES—2 story and base reinforced concrete, \$25,000. Hoquiam, Wash. Architect not stated. Owner, A. S. Hodgdon. Contractor, Edward Hannan, 1928 6th Ave., West, Seattle. Contract price, \$25,000.

COURT HOUSE—2 story and base, reinforced concrete, \$50,000. Chinook, Mont. Architect's name not given. Owners, Chouteau County. Contractors, Lease & Richards, Harve, Mont., general construction. Contract price, \$42,896.75.

LIBRARY—1 story and base, concrete and brick, \$10,000. Auburn, Wash. Architect, David J. Meyer, Central Bldg., Seattle. Owners, Town of Auburn. Contractor, F. L. Berner, Auburn. Contract price, \$10,000.

LIBRARY—1 story and base, reinforced concrete, \$10,500. Port Townsend, Wash. Architects, C. Lewis Wilson & Co., Northern Bank Bldg., Seattle. Owners, Town of Port Townsend. Contractors, A. F. Mowatt & Co., Seattle. Contract price, \$10,630.

CONSTITUTIONAL SENSE.

It is all good—what Judge Bradley C. Sargent of the Superior Court of San Francisco said of the law, the constitution and the common sense of the people.

The case before the judge involved the constitutionality of an ordinance limiting the hours of work and conditions of work in laundries. The judge upheld the ordinance.

The constitutional bugaboo has reached its limit, he said.

That is constitutional which is best for society, the judge declared.

Men who are themselves in contact with life, he said, and who represent in the legislature the people who are in contact with life are better qualified to determine what is best for society than are judges who do not touch the conditions of life and labor.

A contract of killing labor or of injurious labor forced by the necessities of the worker is not a free contract. The protection of men and women from entering such contracts is not a violation of the constitutional right of individual liberty and freedom of contract, the judge ruled.

Yes; it is all good. It might well be printed in big letters and framed and hung in the courtroom, every legislative hall and every schoolroom of the country.—Kansas City Star.

Honorary Committee For Big Exhibition.

Many Prominent People Will Act In
Advisory Capacity for Architectural
Club Exhibition.

Governor Johnson and Mrs. Johnson, Mayor Rolph and Mrs. Rolph, President David Starr Jordan, of Stanford University, and Mrs. Jordan; President Benjamin Ide Wheeler, of the University of California, and Mrs. Wheeler; William H. Crocker, Leon Sloss and Mrs. Sloss, John S. Drum and Mrs. Drum, John Martin and Mrs. Martin, Senator Francis J. Newlands have accepted an invitation to act as an honorary committee, to act in an advisory capacity in connection with the 15th Exhibition of the San Francisco Architectural Club, which will be held in the Hale Building, Fifth and Market streets, March 22 to April 5.

Admission to this exhibition will be free to the public from 10 A. M. to 10 P. M. every day except March 22, when it will be by invitation only, to the members of the press and club members.

Exhibits are arriving daily, from the East and abroad, as well as from the Pacific Coast, and are being rapidly installed under the supervision of W. B. Faville, Chairman of the Exhibition Committee and his colleagues.

Big Architectural Club Exhibition.

Drawings and Models for the Annual
Display Being Received From All
Parts of the World.

Exhibition Opened On March 24.

Designs for Panama-Pacific Ex-
position Will be Shown For the
First Time.

At the forthcoming exhibition of the San Francisco Architectural Club, which will be held from March 22 to April 5 on the fourth floor of the Hale Building, Fifth and Market streets, there will be the products of both the local chapter of the American Institute of Architects, which has headquarters in Washington, D. C., and the San Francisco atelier of the League of Pacific Coast architects, both of which organizations are working together for event.

In addition to the display from these bodies, there will be offerings from other architectural organizations and individual architects from all over the country, and from abroad as well. The exhibits are arriving daily and are being rapidly installed under personal supervision of W. B. Faville, chairman of the committee in charge. The Panama-Pacific International Exposition Company has detailed one of its employees to arrange the construction of models and drawings of the exposition, which the company has agreed for the occasion. Some of these models will be shown at the exhibition the first time.

The Club lays emphasis upon its designation that the exhibition shall

be made up entirely of high class designs, and to insure this an honorary committee has been invited to scrutinize the offerings. This committee is composed of prominent public officials, artists, and others competent to judge of the merits of the exhibits.

Seattle, Portland, Spokane, Tacoma, Denver, Salt Lake City, Los Angeles and San Diego are among the western cities that will be represented in the show, while New York, Chicago, Philadelphia, Washington, D. C., and a few foreign cities will send their quotas of exhibits.

The exhibition will be open from 10 A. M. to 10 P. M. every day beginning next Monday, March 24, with admission free to the public. The opening day, Saturday, March 22, admission will be by invitation only, from 2 to 5 P. M., and from 8 to 10 P. M., for the press and Club members.

The exhibition committee is composed of the following: W. B. Faville (chairman), G. W. Kelham, E. H. Hildebrand, August G. Headman, John Bakewell, Jr., Charles P. Weeks, Harry E. Nye, George Greenwood, Percy K. Simpson, Charles F. Pratt, Ed. F. Frick, Carl I. Warnecke, Edwin Flanders, Stanley Flawn, William Garren and H. A. Thomsen Jr.

Which Will Result In Erection of
Substantial Buildings.

Kern-Nellan Company, 316 Bush street, have recently made two important leases on buildings which are to be erected in the business section of the city. One of these leases covers a building which is to be erected in the north line of Mission street, between 4th and 5th streets. The structure will be a five-story and basement brick building to be erected on the property of Hiram B. Fisher. The first floor of the building will be arranged for two large stores besides the entrance to a hotel which is to occupy the upper four floors. Plans provide for a total of 72 rooms and a number of baths. There will be steam heat, elevator service and hot and cold running water in all rooms. The exterior will probably be faced with pressed brick. Plans are being prepared by Architect W. H. Weeks, 75 Post street.

The second lease of importance made by Kern-Nellan Company calls for the construction of a three-story and basement reinforced concrete store and hotel building at the northeast corner of Bush and Grant avenue, plans for which are being drawn by Architect Joseph Cahen, 45 Kearny street. There will be seven stores on the first floor and in the neighborhood of 50 modern hotel rooms on the upper floors. Louis Friedman is the owner of the property to be improved.

Leases on both of these buildings have been made for long terms and at rentals which insure the owners of the properties handsome returns on their investments.

TWENTY-FIVE STATES VOTE "YES."

The resolution proposing the constitutional amendment for the direct election of senators was fifty years in getting through Congress. In less than a year since it was submitted it has been ratified by the legislatures of twenty-five states. It has been rejected in only one state—Georgia.

The twenty-five ratifying states are:

Arizona,	New Hampshire,
Arkansas,	New York,
California,	North Carolina,
Colorado,	North Dakota,
Idaho,	Oregon,
Illinois,	South Dakota,
Iowa,	Texas,
Kansas,	Vermont,
Massachusetts,	Washington,
Michigan,	West Virginia,
Minnesota,	Wisconsin,
Montana,	Wyoming,
Nevada,	

The amendment is being blocked by special interests in New Mexico, Pennsylvania, Delaware and Rhode Island. New Jersey and Tennessee are expected to ratify soon. Action by Kentucky, Maryland, Mississippi and Maine is expected next year. The legislatures of Alabama, Florida, Kentucky, Louisiana, Maryland, Mississippi and Virginia are not now in session.

Prompt action by some of the states now hesitating would make possible the adoption of the amendment this year so that it could be effective in the election of senators in the general elections of 1914. Eleven more ratifications are needed.

The reports on the Mexican situation seem to indicate that big business had a hand in financing the revolution which resulted in the death of Madero and established the descendant of Diaz in the seat of astensible power in the Republic. Certain it is that Madero was not favorable to foreign capital as was Porfirio Diaz and so far as newspaper reports are concerned there seems to have been a revolution not among the common people at all but an intrigue of the military and aristocracy to place in control those who favored the moneyed interests that have heavy investments in that country.

The Maderists charge that the Pearson syndicate furnished 14 million dollars to finance the revolution. Jos. H. Wilkins has written a communication to the Bulletin in which he plainly infers that the Morgan interests and those interested in the Santa Cruz oil fields are responsible for the revolution. Wilkins has long been interested in mines in Mexico and is familiar with the situation down there. He is a man of marked ability and has been identified with the public institutions of California. He was for years owner and editor of the Marin County Times, published at San Rafael, and had a wide reputation throughout the State as an editorial writer. The Mexican situation still presents many uncertainties. The present government has thought to establish itself by assassinating the leaders who represented the other faction. Undoubtedly the big interests are with them. If the claim is true that the American Ambassador winked at the overthrow of the Maderist government and condoned the assassination of Madero there is no excuse for his action. American and foreign capital that has gone into

Mexico went in with its eyes open and knew the uncertainties of investments there. There is no excuse for this government interfering because some interests are threatened or the exploitation of oil fields is proposed to be curtailed.

It is said that if the alien land bills before the legislature pass that Japan will retaliate by refusing to participate in the Exposition or allow any of her countrymen so to do.

It is highly improbable that any such thing is contemplated or that the "official sources" from which the report emanated is any higher than the brain of the reporter that wrote the article. The alien land bill before the legislature has no more application to the Japanese than any other race. And it is certain the coming exposition will mean much to Japan. She will have a chance to advertise her products in a way she never had before. And the act of the California Legislature will in no way affect her treaty rights with this country.

If the alien land bills are correct they should be passed whether the Japanese exhibit or not. They should not be smothered until after the exposition and then passed. Nor should Japan take offense at laws passed which do not discriminate against them in particular and which do not violate any treaty obligation.

A FATAL SAWDUST EXPLOSION.

The falling of a bolt among the cutters on a machine for grinding sawdust in a box factory at Philadelphia is stated to have caused a shower of sparks which ignited the finely divided dust and caused an explosion which injured six employees and killed one. Explosions of this character are common in coal mines and they have occasionally occurred in flour mills and other industrial establishments where inflammable dust is generated.—Scientific American.

The redlight abatement measure has passed the Assembly and will no doubt become a law from all prospects. Whether this is a wise measure or not is a question upon which assemblymen differ and upon which the people generally differ in a great degree. This measure is based upon and follows the Iowa and Nebraska laws. The Sacramento Bee, which has gone to much trouble in the matter of investigating the subject, has reports from the editors of the principal papers of Iowa and Nebraska and also from the police departments of the same cities to the effect that these laws have only scattered the evil instead of lessening it. That it has increased disease and prevented any kind of regulation of the evil.

The white slave discussion has led to attempts to remedy this evil. That the redlight abatement act will help matters is a question of grave doubt. That it will not act a good deal like the abolition of the canteen in army posts is a question. The evidence seems to be against it. At the time Iowa Abatement Act and Injunction Law was passed, the Board of Commissioners of Washington, D. C., protested against it and said:

"The Commissioners do not believe that the method proposed by the bill

would eradicate the evil, but fear that, on the contrary, it would result in its distribution to points which are now free from it and correspondingly extending the area of its temptations, very much like a proposition to prevent the pollution of a river by closing up the mouths of the sewers."

One trouble of a measure of this kind is that it is not approached with impartial mind. Sentiment and inexperienced public opinion has much to do with it. Many Assemblymen voted against it on the ground that it was against their best judgment, but that their constituents demanded it. No doubt others did the same thing, but did not express themselves openly.

It is doubtful if this measure will prove of any benefit to California. The reports of the people best able to judge in the Agricultural States of Iowa and Nebraska show it to have been at most a very doubtful success there. It is less liable to succeed in a state like California and it is doubtful whether the fire will not be spread instead of smothered. Time will demonstrate the truth or fallacy of the argument when the facts are determined.

ARTIFICIAL MARBLE.

The following are directions for making artificial marble: 1. Burnt gypsum is saturated with a solution of lime in alum water, burnt again, ground finely, or rather pulverized, adding 1-12 by weight of the gypsum of alum; and cast in the mold. These harden very slowly, but attain the hardness and transparency of marble. Different pigments may be added to obtain different colored marbles. 2. Pieces of burnt gypsum, the size of a fist, are put for 3 hours in a 12 per cent solution of alum in water of a temperature of 85 to 104 degrees Fahr., burnt again, pulverized, adding 1-16 powdered alum, and lastly worked into molds with water containing 1-16 sal ammoniac for each part of gypsum. Castings made of this combination possess great hardness and brilliancy, and it may, therefore, be used for fine statues.—Neueste Erfindungen und Erfahrungen

COMMENT ON THE VICE COMMITTEE.

Lieutenant-Governor Wallace has turned down Dominick Beban and Senatorial courtesy, both at once, and was well justified in both turn-downs. When Beban introduced a resolution calling for the appointment of a certain committee, custom and courtesy dictated that he be made chairman of that committee. But when it became evident that Beban had not introduced the resolution in good faith, and that his purpose was to side-track moral legislation which he did not dare oppose, the Lieutenant-Governor was quite right in defying both custom and courtesy, and packing the committee against the Senator from the Barbary Coast district. The remainder of the Wallace committee was composed of absolutely the highest type of men in the Senate. The only "picking" there was consisted in putting aggressively decent men on a committee to investigate a resolution whose purpose was not in the interest of decency. The result was, of course, that the committee found it physically impossible to carry out Beban's obstructive investigation, but propose a later and constructive

one, which shall however not mean-time interfere with the consideration of bills intended to curtail the activities of some of Mr. Beban's constituents.—Fresno Republican.

The movement toward the City Beautiful and Art in Architecture has found expression in the California Legislature in a resolution presented by Assemblyman Bohnett. The purpose of the resolution is to elevate the standard of architecture, adornment and equipment of public buildings in California and provides for a commission of three members from each house besides a painter, a sculptor and a lawyer who are to report to the Governor before the next session of the Legislature on ways and means to artistically improve our public buildings.

The resolution states that: "California, with its rich heritage of climate and all inspiring scenery, is pregnant with an art that should rival ancient Greece and Italy," and is "entitled to the development of standards of architecture, sculpture and painting equal to if not better than those existing in the eastern and middle western sections of these United States."

That sounds sonorous both in sentiment and diction and it will at least call public attention to the artist's side of public buildings and tend to establish a sentiment and educational beauty in public as well as private buildings.

California leads the world in the production of oil. While the prices have not been such as to warrant the exploitation of untold fields and develop new country, the steady increase in proven districts has made the year 1911 outstrip all other years in the production of fuel oil. Not only did the production increase in 1912 over 1911 from 82,744,044 barrels to 90,074,439 barrels but an increased number of wells were in operation last year as against those in operation in 1911, the figures being December 31, 1912, 5,025; December 31, 1911, 5,138. The average production per well was greater by 1500 barrel in 1912 than in 1911.

This shows an increase in consumption of oil all over the country. The marked efficiency of oil as a fuel has become so well known that wherever practicable it has become the staple article. The increased production per well shows greater efficiency and the number of wells shows increase activity in the line.

The Midway field in Kern county leads in production, being credited by the California Derrick, a journal devoted to the oil industry, with 28.5 per cent of the total production for the year, or 25,948,980 barrels; Conanga is second with a percentage production of 21.70, or 19,548,122 barrel and Kern river third, with 13.82 per cent of the production, or 12,446,111 barrels.

The oil industry in California netted the state approximately \$41,000,000 for the year 1912, or more than \$10,000,000 above the yield of our gold mines.

These figures taken in conjunction with the marvelous increase in hydroelectric power places California in the front rank as a power producing state. Taking into consideration these facts and figures there is no reason why this should not become one of the foremost manufacturing states of the Union.

Editorial Comment.

President Wilson has put his veto on dollar diplomacy insofar as the Chinese loan is concerned. So radical has been the change of the state department in this regard that the Assistant Secretary of State has offered his resignation. So far as the present administration is concerned it is evident that his resignation is acceptable. As any one wedded to the idea that the moneyed interests should control the world and have the support of governments to enforce their conditions is not likely to find favor with a man who appears to be as fair minded as President Wilson and certainly not with W. J. Bryan, the present Secretary of State. Taft and Knox and Wilson and Bryan are about as near opposite in many respects as it would be possible to find men. The attempt to saddle on the Chinese republic the six power loan would give these great banking houses the power to put on the screws on the new government and control trade and Commercial Situations. President Wilson has expressed his desire to have the loan made, but not with the consent of this government to enforce conditions that will control the revenues of the new republic and hinder its untrammelled development.

Mt. Tamalpais is to be the scene of a miracle play and part of Shakespeare's drama of As You Like It. No place in the world could furnish a more romantic setting or a stage of more wonderful scenic beauty than Marin County. It is expected to call attention to scenic beauty spots which lie at San Francisco's door and impress upon people the wonderful variety of panoramic views that can be had in a day's trip from San Francisco.

The recent exploration of the canyon of the Middle Fork of the Feather River has called attention to another of the scenic wonders of the State. Few realize that the Sierra Nevada Mountains are the "roof of the continent," and the highest mountains in the United States. Not only are they the highest but they are clothed with some of the greatest timber in the world and the open country and variety of vegetation gives them a variety of color and a scenic grandeur that is excelled nowhere in the world. The State is indeed a wonderland. It will always remain so and there will always be inaccessible places where only the hardy mountain climber will attempt to go and where only wild game will live.

The Chronicle is much concerned about the possibility of harm being done by a legislature of Progressive cranks. It enumerates a score of bills

that have apparently been introduced in good faith that have neither rhyme nor reason, sense or object in their construction. Perhaps there have been more freak bills than ordinary put in at this legislature. It is a question whether or not there will be any more passed.

There may be some that will be of doubtful benefit put through by over enthusiastic reformers. But there will not be legislation put through by political bosses as in the old regime and in all probability the freak legislation will be confined to narrow bounds.

And in this regard the proposition to exclude the sale of California wines from the exposition grounds seems to be striking at one of the great industries of the State. If wine booths or places where it could be sampled and only the best California vintages could be had were established it would serve to advertise this far famed industry of the State. Of course this would meet the objection of the prohibitionists who look upon wine as unmitigated evil and one of the devil's means of seduction. But for those who regard wine for what it is without religious or family prejudice, the fruit and flowers and wine of California are the distinctive products that made the State famed round the world. To prohibit wine at the exposition is to advertise a product that we admit ought to be prohibited in its use; that we are willing to sell to other people what we are unwilling to permit to be used at home.

Old Boreas seems to have been going on a wild rampage in the middle west. Wind uncontrolled has wrought havoc with the construction of man and cities have been leveled and forests and farms devastated in its path. That there was no ships of the air in its path is fortunate as in all probability they would have had to make record time getting away or would have been sailing along with an indiscriminate lot of bricks, wire fences, trees and grave-stones.

The tremendous velocity of the wind of these storms is something incredible. Strange havoc is wrought an incredible things performed. Trees are blown through stone walls, pine timber blown through standing trees and many things of similar nature performed.

No country is without its drawbacks. The great interior from the Gulf of Mexico to the Mackenzie river is subject to storms and tornadoes. The east has its bleak cold and storm. The Pacific Coast has its equable climate, but is subject to earthquakes. But considering the rarity of occurrence it is probable that the aggregate amount of loss by earthquake is far less than

that by storms. At any rate we who have gone through the biggest shake in the history of the west are willing to chance it against the storms and inclement weather of the less favored eastern states.

Safeguarding human life in building construction is being perfected through the liability laws that have been enacted and the increased risk of insurance companies. In the case of the construction of the Woolworth building, the largest and tallest office building in the world, the advanced ideas which underlie modern liability insurance were exemplified in an interesting manner, the inspection service being particularly worthy of mention.

"The insurance company that carried the liability kept two inspectors on duty continuously, and immediately upon noting a condition which was likely to result in an accident, they notified the proper foreman or superintendent, and saw that the danger was removed. Their recommendations were also reported to the office of the engineering and inspection division of the insurance company, and written copies were then sent to the contractors.

Patent scaffolds were used for the brick-laying throughout the work, and these were covered, so far as possible, with substantial wire-mesh roofs, to protect the men at work upon the platforms from tools and materials that might fall from above. The sides of all the scaffold platforms were also protected by guard rails and by wire-mesh screens. Substantial bridges for the protection of pedestrians and others were built over the sidewalks, and these were made stout enough to resist the impact of any material that might fall upon them. Platforms 20 feet wide were also built out from the building at four different heights, to catch any material that might fall, and prevent it from descending into the street. Wire-mesh screens were arranged along their outer edges to give still further security.

All the hoisting apparatus was examined frequently and thoroughly by expert elevator inspectors; employees were not allowed to ride on material hoists, and the maximum number of persons who might be permitted to ride on a passenger hoist was definitely specified in each case. All hoists, whether used for the transportation of men or materials, were covered overhead, to prevent accidents from falling objects. The hoist openings were effectively fenced, and were guarded by rails where the materials were loaded or unloaded. Openings in the floors were thoroughly guarded by rails or fences or otherwise. All stairways, whether temporary or permanent, were required to be rail-guarded. Proper lighting was insisted upon, particularly at work places, along gangways and passages, and at every other important point. Warning signs were put up at all dangerous places. Laborers engaged in cutting concrete and other similar substances were obliged to use chisels fitted with protective handles, so that their own hands would not be injured if the strikers should miss the heads of the chise's. An effective watch was kept for nails and other similar sharp metal points projecting from the wood-work or from loose planks or boards or elsewhere. These are prolific sources of injury, and the men were required

to remove them at once. First-aid cabinets were also provided, at the suggestion of the liability inspectors."

The construction of the Woolworth building was comparatively free from accident. It was not the result of chance, but of intelligent supervision. When the liability is definite and the responsibility is definitely fixed, then only do we get intelligent supervision. The state liability and industrial insurance laws are bringing this about. It is a problem before the present California Legislature and one in which they need the assistance of all parties interested.

The unprecedented floods in Ohio and Indiana, with their great destruction of property and awful loss of life, have been lightened in several instances by the breaking of dams and the bursting of reservoirs.

At this writing definite information is lacking. But it has been told in the dispatches that the flood at Dayton, Ohio, was made uncontrollable by the breaking of the Laramie reservoir, fifty miles above that city, discharging a vast body of water into the Miami River, or some other of the several streams that come together at that point.

It is also reported that a dam at Piqua, and another at Hamilton, both in Ohio, also went out, in each case with much loss of life.

Instances like these, and the historical disasters at Johnstown, Pennsylvania, and other localities, are warnings which should not pass unheeded here.

So far, in California, there has been no State control of dam-building. Immense reservoirs have been made in the mountains, to serve the purpose of mining, irrigation or generation of electricity, but all without State supervision, regulation or control.

In all cases it has been assumed that self-interest would suffice to make the dams secure. But experience in other States and countries has demonstrated the folly of such reliance.

In many instances flood catastrophes have shown that corporations often begrudge the expenditure of money needed to make reservoirs permanent and safe. Mining companies commonly do not build dams in fact for long periods, and even the builders of dams for electric power purposes may look forward to a sale of their entire plant and water rights, rather than to a permanency.

So it is useful for the State to take measures for the protection of the public, against possible loss of life and property.

No person or corporation should be permitted to build a dam in the mountains or hills where its rupture might cause disaster to any community, save by consent of a State Board or official, acting under law and authority created by the Legislature.

The State, through such agency, should require the plans to ensure ample and lasting security. It also should supervise construction and the quality of the materials used, and make annual inspections, reserving in all permits the right at any time to require repairs or betterments.

It has been proposed to lodge such powers in the State Engineering Department directly. But there is a bill before the Legislature to include them explicitly in the jurisdiction of the Railroad Commission, which body by Constitutional Amendment has been given general control of all public utilities in California.

This measure would seem in principle to serve the desired end. Presumably, the Railroad Commission would be aided at all times by the State Engineer, or could employ such expert engineering services as it might from time to time require.

The terms and details of the needed legislation must be left to the judgment of the Legislature.

But there is no room for doubt that effective State law and regulation, to ensure safety of dams and reservoirs, are urgently needed.

It would be a sad reproach to the Legislature, and a fearsome responsibility, were it to fail in its duty in this regard.

There is now building at Big Meadows in Plumas County, on the headwaters of the Feather River, one of the largest reservoirs in the world. Its capacity will be so enormous that a collapse of the dam would send down the Feather River a flood wave whose destructiveness it is appalling to contemplate. And it is well known that capable civil engineers have expressed grave doubts as to the safety of the dam, as planned and partly constructed.

Assuredly the inhabitants of Oroville, Marysville and Yuba City, and all the farmers and communities along the Sacramento below the mouth of the Feather River, have a right to be protected from the possible or certain consequence of the breaking of this Nevils dam, or any similar structure.

In other parts of the State, likewise, there is similar peril to be guarded against, or now existing, and also demanding legislative action.

The Legislature should lose no time in doing all that the situation and the conditions demand.

It is an imperative and pressing duty.—Sacramento Bee.

Advertising when properly directed is not an expense but an investment and a good one, more permanent and enduring than any building or factory equipment that brings immediate and ample returns on the outlay and piles up a reserve fund often fabulous in its proportions.

Every one can not write advertising copy of equal merit, but every man can be frank and honest in his advertising announcement. And what a splendid asset it is to any business to be taken at its word. If there are no other returns from your advertising than the creation of a feeling in your community that every statement you make could be depended upon it would be worth more than its costs.

We are just peeping over the horizon of the greatest era of commercial prosperity and business activity that the world has ever seen, and advertising is destined to play its proper and important part in the commercial achievements of the future.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$5,000. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner's name withheld. The building will be erected on Cypress, between Grant avenue and Stockton street, and has been arranged for apartments of three rooms and bath each. Interior finish will be of pine throughout. There will be wall beds. The exterior of the building will be covered with shiplap and rustic. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base. Class A construction. Cost not stated. Architect, John Galen Howard, 601 Mission St., S. F. Owners, Selah Chamberlain and John W. Proctor. These two men have recently purchased property from three separate owners located on California street and Mason. The property combined will have a frontage of 105 feet and a depth of 170 feet. The entire lot will be covered by a Class A building designed along the lines of the most modern apartment houses in New York City. Suites will comprise a number of rooms and will be elaborately finished. There will be steam heat, elevator service, dumb waiters, vacuum cleaning and all other modern conveniences. Interior partitions will be of hollow tile and floors of concrete. The exterior will probably be faced with pressed brick and terra cotta. Preliminary plans have been prepared and working drawings will be started shortly.

SAN FRANCISCO—Apartment house, 2 story and base, frame, \$5,000. Architect, none. Owner, S. Larsen, 79 Cortland Ave., S. F. The building will cover an area of 23x57 feet. The first floor will be arranged for a store and upper floor will contain three small apartments of three rooms and bath each. All interior finish will be of pine and redwood. There will be wall beds. The exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 6 story and base. Class C construction. Cost not stated. Architect not selected. Owner, L. C. Larsen, Crocker Building, Mr. L. C. Larsen, President of the L. C. Larsen Construction Co., has purchased the southeast corner of Sutter and Jones streets and will erect a seven or eight story Class C apartment house. The building will cover an area of 100x107½ feet. No architect has been selected.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 3 story and base, frame, \$25,000. Architect, W. H. Hatcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Investment Co. The building will be arranged for a number of two and three room apartments and will be erected on Channing Way near College avenue. The interior will be finished in pine with some hardwood veneer and floors. There will be steam heat and open fire places. Mantels will be of brick and tile. All suites will be

equipped with wall beds and will have private bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick. Cost not stated. Architect, Anton Reif, Higgins Bldg., L. A. Owner, Adolph Jalnke. The building will cover a lot 56x75 feet. There will be a number of two room apartments, all of which will have private baths and will be equipped with wall beds. Interior finish will be of pine with some oak veneer and floors. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and artificial stone. Plans are complete and figures are being taken on the work.

PORTLAND, ORE.—Apartment house, 6 story and base, reinforced concrete, \$70,000. Architect, J. S. Atkins, Henry Bldg., Portland. Owner's name withheld. The building is to be erected on a corner site and will cover an area of 50x140 feet. Construction will be fireproof throughout. The interior will be arranged for a total of 120 rooms, mostly two-room suites. There will be steam heat, elevator service, wall beds, private baths and a vacuum cleaning system. The exterior will be faced with cement plaster. Bids will be called for next week.

SEATTLE, WASH.—Apartment house addition, 2 story, brick and concrete, \$50,000. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owner, H. S. Amon. The two-story addition will be made to a five-story building. The present building will be raised and the additional stories constructed on a grade with the street. The exterior will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

PORTLAND, ORE.—Apartment house, 4 story and base, reinforced concrete. Cost not stated. Architect, Fred S. Allerton, Wilcox Bldg., Portland. Owner, Harry Howard. Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price not stated.

BANKS.

Contracts Awarded.

ROSEBURG, ORE.—Bank, 2 story and base, brick. Cost not stated. Architect, Earl A. Roberts, Selling Bldg., Portland. Owners, First Trust and Savings Bank. Contractor, W. C. Arthur, Portland. Contract price not stated.

BRIDGES, DAMS AND HARBOR WORK.

ORLAND, GLENN CO., CAL.—Bridge, reinforced concrete, \$115,000. Engineer, County Surveyor, Orland. Owners, Glenn County. The Glenn County Supervisors have adopted plans for the construction of a reinforced concrete

bridge across Stony Creek near Orland. A patented system, known as the Luten system, which was presented by the Losen Construction Co. of Sacramento was approved. The structure will cost \$145,000. Bids will be called for shortly.

NAPLES, SANTA BARBARA CO., CAL.—Bridges, 4, reinforced concrete. Cost not stated. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Naples Company. Two of the bridges will be 20 feet wide and 70 feet long and are to be constructed over Toledo street. The other two bridges will be 15 feet wide and 70 feet long and are to be erected at Neapolitan Lake. Plans are being prepared and bids for the construction will be called for within a few days.

SEATTLE, WASH.—Pier and warehouses, concrete and frame construction, \$500,000. Engineer, Paul P. Whitlam, Port of Seattle Commission, Seattle. Owners, Port of Seattle Commission. Bids will be opened on April 9th for the construction of the central waterfront improvement, which is to consist of a wharf 1200 feet long and two frame warehouses. Other large improvements will be made under the direction of the same commission during the year which will total \$1,000,000.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Mill, 1 story, frame, \$3,500. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans are complete and work will be done by Day Labor for the construction of a one-story mill building, which is to be erected at the northeast corner of Kentucky and South streets. The owners are now purchasing all materials.

OAKLAND, CAL.—Power station extension, 1 story, reinforced concrete and steel, \$15,000. Architect, none. Owners, Pacific Gas and Electric Co., 415 Sutter St., S. F. A large addition to the present building at the southwest corner of 1st and Jefferson streets is to be constructed at once. Plans are complete and provide for a building with a complete steel frame, reinforced concrete floors and walls. The exterior of the building will be faced with cement plaster. There will be metal window frames and sash. Plans and specifications can be secured from the Purchasing Department at 415 Sutter street. The work will be done by Day Labor.

LOS ANGELES, CAL.—Laundry, 2 story and base. Class C construction, \$100,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owners, Excelsior Laundry Co. The building will occupy a corner site and will cover an area of 200x300 feet. Floors will be of cement. There will be metal window frames and sash and fireproof doors. The estimated cost does not include special machinery. The exterior of the building will be faced with pressed brick. Plans are being prepared.

TACOMA, WASH.—Warehouse, 4 story and base, brick and terra cotta, \$10,000. Architect, J. C. Irwin, Chamber of Commerce Bldg., Tacoma. Owners, California Wine House. The building will be designed for stores and office of the company on the first floor and warehouse on the upper floors. Interior finish will be of pine and hardwood. There will be steam heat and

elevator service. Metal window sash and frames will be specified. The exterior of the building will be faced with terra cotta. Plans are nearly complete and figures will be called for shortly.

Contracts Awarded.

LOS ANGELES, CAL.—Warehouse, 3 story and base, Class A construction, \$120,000. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owners, John A. Roehling Sons Co., Contractors, Alta Planning Mill, general construction; Baker Iron Works, structural steel; Otis Elevator Co., elevator work.

PORTLAND, ORE.—Brewery Group, 2 story and base, mill construction, \$75,000. Architect, Aaron H. Gould, Worcester Bldg., Portland. Owners, Weinhard Brewery Co., Contractors, George Langford & Sons, Builders' Exchange Bldg., Portland. Contract price, \$75,000.

FIRE HOUSES.

TURLOCK, STANISLAUS CO., CAL.—Jail, 1 story and base, steel and reinforced concrete, \$6,000. Architect, none. Owner, City of Turlock. The building will be 25x70 feet, containing seven cells and has been designed for a city and county jail. Considerable structural steel will be used. Interior finish will be of pine. Special cell work will be called for. The exterior of the building will be faced with cement plaster. Plans are complete and bids will be advertised shortly.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$14,000. Architect, none. Owner, B. J. Hooper, 450 12th Ave., S. F. The building will have a frontage of 32 feet and a depth of 75 feet. There will be two stores on the first floor and two modern flats on the upper floor. Interiors will be finished in pine throughout. Elm panels will be used in the dining rooms. Tile will be used in the baths. The exterior of the building will be covered with pressed brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,400. Architect, none. Owner, L. A. Giusti, 732 Montgomery St., S. F. The building will be erected on Union street at a point where the street grade will necessitate a large concrete retaining wall. The building will have a frontage of 22 feet and a depth of 34 feet. Interior finish will be of pine throughout. There will be gas grates and tile mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$8,000. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Paul De Martini. The building will be erected on Broadway between Mason and Taylor streets and will be arranged for three flats of five and six rooms each. Interior finish will be of pine and elm. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with shiplap and rustic. Plans are being prepared and when complete the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame. Cost not stated. Architects, C. M. and A. F. Rousseau, Mon-

nock Bldg., S. F. Owner, J. Rodgers. The building will be erected at the northwest corner of Pacific and Mason streets, and will be arranged for a store and 12 flats of 4 and 5 rooms each with bath. Interior finish will be of pine with some elm panels. There will be either open fire places or gas grates. The exterior of the structure will be covered with cement plaster on metal lath. Plans are being figured.

SAN FRANCISCO—Flat, 2 story and base, frame, \$4,500. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Greenwich street near Baker and will contain a store on the first floor and one five-room flat above. Interior finish will be of pine throughout. There will be open fire places and brick mantels. Some oak flooring will be used. The exterior of the building will be covered with brick veneer and cement plaster. Plans are being prepared.

SAN FRANCISCO—Flats, 3 story and base, Class C construction, \$12,000. Architect, none. Owner, J. G. Kincannon, 1676 Pulton St., S. F. The building will cover an area of 25x58 feet. There will be one store and the entrance to the flats above on the first floor. Upper floors will contain seven flats. Exterior walls will be of reinforced concrete faced with white cement plaster. Interior finish will be of pine and hardwood. There will be open fire places and tile mantels. Tile will also be used in the bath rooms. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$8,500. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Edward McKeever. The building will have a street frontage of 27 feet and a depth of 68½ feet. The first floor will be arranged for one store. Upper floors will contain four and five room flats with baths. Interior finish will be of pine throughout. Plate glass display windows will be used in the store. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Flats, 3 story and base, frame, \$6,000. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, John Kucich. The building is to be erected on Mason street, between Chestnut and Lombard streets, and has been designed to contain a number of four-room flats with baths. All interior finish will be of pine. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic and shiplap. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, L. Pavani. The building will be arranged for two stores on the first floor and two modern flats on the upper floors. Interior finish will be of pine throughout. All flats will have connecting baths. The exterior of the building will be covered with rustic and shiplap. Plans are nearly complete and figures will be taken this week.

SAN FRANCISCO—Flats, 2 story and base, frame, \$7,000. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner's name withheld. The building will be erected on the south side of

Greenwich street, between Stockton and Grant avenues. Plans provide for four modern flats of five and six rooms each with bath. Interior will be finished in pine and hardwood veneer. Bath rooms will be finished in tile. There will be coal grates with tile or brick mantels. The exterior of the building will be covered with rustic brick veneer and shiplap. Plans are being prepared and when complete the work will be done by Day Labor.

Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Flat, 2 story and base, frame, \$5,400. Architects, Swartz, Hotchkin & Swartz, Fresno. Owner, P. S. Turnbull. Contractor, K. P. Smith, Fresno. Contract price, \$5,400.

GARAGES.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owner, Charles E. Bergin. The building will be used for a commercial garage and will cover an area of 50x150 feet. The greater portion of the floor space will be used for storage purposes. Interior finish of the office will be of pine. There will be a cement floor and metal window frames and sash. The exterior of the building will be faced with plaster and tile. Plans are complete and figures are being taken.

TACOMA, WASH.—Garage, 2 story and base, brick and concrete, \$25,000. Architect, I. C. Irwin, Chamber of Commerce Bldg., Tacoma. Owner, August Von Boecklin. The building will occupy a corner site and will be designed for a commercial garage. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. The exterior of the building will be faced with cement plaster. Plans are nearly ready for figures.

GOVERNMENT WORK AND SUPPLIES.

Buildings at Pearl Harbor.

On May 10 bids are to be opened at the bureau of yards and docks, Navy Department, Washington, D. C., for the construction of buildings at the naval station, Pearl Harbor, Hawaii. The amount authorized for the work is \$250,000. The project provides for an administration building, two ward buildings, subsistence building, laboratory, operating building, laundry, stable, mortuary, two officers' quarters, bachelor officers' quarters, hospital corps quarters, four civil employees' quarters, connecting passages, servants' quarters, and wash houses.

The main hospital buildings, consisting of the administration building, two ward buildings, subsistence building, laboratory, and operating building, shall be of reinforced concrete construction with terra cotta partitions and curtain walls. The roofing shall be of asbestos shingles carried on wood lathing supported by steel framing, except in operating building, where framing is of wood. Terra cotta shall be plastered on both sides. Administration building is three stories and loft in height, wards two stories and loft in height, operating building two stories and loft in height, and laboratory and subsistence building one story in height. The remaining buildings in the group, except the mortuary, shall

be of wood construction with wooden roof shingles, as indicated. The mortuary shall have hollow terra cotta walls and asbestos shingled roof. Plastering, in general, will be required only in the main hospital buildings, mentioned above, and in bath rooms of two officers' quarters. Floors shall be, in general, of wood. Marblework will be required in operating rooms. Exterior trim and woodwork will, in general, require stain. Interior woodwork of main hospital building will require varnish, and remaining buildings will require stain. Heating will not be required in the buildings except in a few cases in the main hospital buildings for sterilizers, hot water heaters, etc. Lighting will be done by electricity. Mechanical ventilation will be required for operating building, second story.

Arapaho Indian School.

The following bids were received March 15 by the commissioner of Indian Affairs, Washington, D. C., for the construction of a frame day school building at the Arapaho Indian School, Shoshone reservation, Wyo.:

W. D. Lovell, Minneapolis, Minn., \$3,400.

T. R. Leavell & W. W. Engle, Lander, Wyo., \$2,948.97.

W. W. Stroul, Lander, Wyo., \$2,972.

W. J. Welseck, Cheyenne, Wyo., \$2,200.

Robert Burns, Lander, Wyo., \$1,540.
J. H. Arnold, Riverton, Wyo., \$2,490.
R. J. Allison, Cheyenne, Wyo., \$3,850.

Asbestos Shingles.

The following bids were opened November 19, 1912, by the lighthouse inspector, 18th district, San Francisco, for furnishing asbestos shingles:

Item 1, shingles for Point Loma fog signal; item 2, do, dwelling.

Magnesia Supply Co., San Francisco, Cal., item 1, \$229; 2, \$300; accepted for both items.

H. W. Johns-Manville Co., item 1, \$275.41; 2, \$322.08.

Building Material, Hawaiian Islands.

The following bids were received by the depot quartermaster, U. S. army, Washington, D. C., on March 17 for furnishing steel, roofing and plumbing material for delivery at Honolulu:

J. L. Mott Iron Works, Washington, D. C., 10 water closets No. 54-IL, f. o. b. factory, \$339.60; f. o. b. San Francisco, \$369.60; 10 water closets No. 54-I, factory, \$327.99; San Francisco or Seattle, \$357.99; 10 lavatories, \$236.31 and \$260.31; 10 bath tubs, \$214.29 and \$384.29; 10 kitchen sinks, \$189.53 and \$209.53; 20 pantry sinks, \$517.19 and \$532.19; 20 laundry tubs, \$711.46 and \$911.46; 10 range boilers, \$139.66 and \$169.66; 10 tumble holders, \$11.30 and \$12.30; 10 towel racks, \$24.22 and \$25.22; 10 glass shelves, \$32.59 and \$34.59. The above prices are for deliveries f. o. b. factory and San Francisco or Seattle, Wash.

H. W. Johns-Manville Co., New York City, roofing for one double officers' quarters, f. o. b. factory, \$235; five double officers' quarters, f. o. b. factory, \$1,150.

L. Wolf Manufacturing Co., Washington, D. C., for plumbing items, total f. o. b. factory, \$3,049; if no drain boards are required for No. 40 B sinks allowance of \$8.50 each will be made; if no wood top and drain board is required for pantry sinks allowance of \$12 on each sink will be made.

Haynes, Jones & Cadbury Co., Phila-

delphia, Pa., prices are f. o. b. San Francisco; 10 water closets No. 54-IL, \$509.11; 10 water closets No. 54-I, \$170.29; 10 lavatories, \$215.16; 10 bath tubs, \$156.87; 10 kitchen sinks, \$350.88; 10 pantry sinks, \$589.12; 20 laundry tubs, \$821.83; 10 range boilers, \$211.18; 10 tumble holders, \$21.17; 10 towel racks, \$22.78; 10 glass holders, \$10.11.

John Douglas Co., Washington, D. C., prices are f. o. b. factory and San Francisco, respectively: 10 water closets No. 54-IL, \$32.40 and \$57.80; 10 water closets No. 54-B, \$26.20 and \$42.32; 10 lavatories, \$22.75 and \$26.50; 10 bath tubs, \$32.50 and \$39; 10 kitchen sinks, \$14.40 and \$16.80; 10 pantry sinks, \$30.83 and \$36; 20 laundry tubs, \$31.85 and \$37.15; 10 tumble holders, \$1.55 and \$1.80; 10 towel racks, \$1.75 and \$2.05; 10 glass shelves, \$6 and \$7.

O. A. Deuzenbaker, Washington, D. C., roofing for one house, delivery at Honolulu, \$227; for five houses, delivery at Honolulu \$1,135 for one double quarters, f. o. b. factory, \$165; f. o. b. San Francisco or Seattle, \$252; for five double quarters f. o. b. factory, \$825; f. o. b. San Francisco or Seattle, \$1,260.

Berger Manufacturing Co., Canton, Ohio, for pressed steel framing joints, etc., for one double quarters, f. o. b. Canton, \$1,493; f. o. b. San Francisco, \$1,893; for five double quarters, f. o. b. Canton, \$6,930; f. o. b. San Francisco, \$8,930.

Repairing Iron Buoys, Etc.

Bids were opened March 7 by the lighthouse inspector, 11th district, Portland, Ore., as follows, for repairing iron buoys and ballast balls and furnishing shackles for moorings in connection with light vessel No. 67:

Pacific Iron Works, \$1,837.50.

Astoria Iron Works, Astoria, Ore., \$1,666.50; accepted.

Albina Engine & Machine Works, \$1,672.25.

Pearl Harbor Dry Dock.

The Navy Department expects to obtain some definite information early in the coming week concerning the accident which befell the big dry dock at the naval station at Pearl Harbor. A report from the officers in charge of the work, mailed from Honolulu shortly after the disaster, should reach Washington within a few days. In addition to that information the Navy Department will have the benefit of the views of the president of the San Francisco Bridge Company, which has the contract for the construction of the work. The head of the concern went at once to Pearl Harbor when he heard of the accident and has returned to this country and is on his way to Washington, where he is expected to arrive today. In the meantime, the naval authorities are entertaining the hope that the damage is of such a character that it will not prove an appreciable detriment to the progress of the work, although it is realized that there must necessarily be some delay on account of the accident.

Coal Towers, Pearl Harbor.

Bids are to be opened April 19 at the bureau of yards and docks, Navy Department, Washington, D. C., for two coal hoisting towers for the naval station, Pearl Harbor. The towers shall be self propelling, steeple, coal-hoisting towers of steel framing, erected upon 65-lb. rails on a

floating wharf trestle. Each tower shall be capable of handling a grab bucket holding 2½ tons of coal. The tower rails are 30 feet from center to center. The arms of the towers shall be capable of raising and lowering and allowing the center of the bucket to travel 62 feet beyond the center of the outboard lower rail. The towers shall be steam operated, and the fuel shall be coal.

Ventilating Ducts, Vancouver Barracks.

All bids received March 5 by the depot quartermaster, Vancouver Barracks, for ventilating ducts in eight barracks have been rejected and the work readvertised.

Rebuilding Frankwater.

Bids for rebuilding Deadman's Island breakwater light structure were opened March 3 by the lighthouse inspector, 18th district, San Francisco, Cal., as follows:

Mercreau Bridge and Construction Co., Los Angeles, Cal., \$525; accepted.
Charles W. Corbaley, \$855.

River and Harbor Works.

The law making appropriations for the construction, repair and preservation of certain public works on rivers and harbors provides as follows:

California. — Humboldt harbor and bay, maintenance, \$20,000; Los Angeles harbor, completion of 30-foot channel, \$101,000; Oakland harbor, continuing improvements, \$275,000, provided that a dredge be constructed unless suitable bids for the work are received; San Diego harbor, maintenance, \$35,000 and continuing improvements, \$208,786; San Pablo Bay, maintenance, \$40,000; Mokelumne River, maintenance, \$1,000; Petaluma Creek and Napa River, maintenance, \$18,000; Redwood Creek maintenance, \$5,000; Sacramento and Feather Rivers, continuance, \$40,000; San Joaquin River, maintenance, \$26,500 and continuance, \$159,632; Suisun, completing improvement, \$14,500; Coos Bay, Ore., maintenance of completed channel and equipping dredge, \$80,000.

Oregon. — Nehalem Bay, continuing improvement, \$100,000; Tillamook Bay and Bar, improvement, \$100,000; Coquille River, maintenance, \$5,000; Willamette and Yamhill Rivers, maintenance, \$40,000; Yaquina River, completion, \$28,000; Columbia and Lower Willamette, continuing, \$160,000; Columbia River, Oregon and Washington, continuing improvements, including repairs to dredge, \$1,000,000; Columbia River at Cascades, continuing, \$100,000; Columbia River between the foot of the Dalles Rapids and the head of Celilo Falls, Oregon and Washington, continuance, \$1,200,000; Columbia River and tributaries above Celilo Falls, continuing, \$60,000; Columbia River between Bridgeport and Kettle Falls, Wash., \$40,000; Snake River, Oregon, Washington and Idaho, continuance, \$25,000.

Washington. — Grays Harbor and Chehalis River, maintenance, \$20,000; Cowlitz and Lewis Rivers, continuance, \$23,500; Grays River, maintenance, \$300; Skagit River, maintenance, \$10,000; Puget Sound, continuance, including tributary waters, \$25,000; Port Townsend Bay and Oak Bay, completion, \$62,500; Puget Sound and Lake Union, Wash., completion, \$5,000.

Honolulu, Hawaii. — Continuing improvement, \$225,000, provided that if

bids are expensive so much as may be necessary shall be expended for the purchase or construction of a suitable dredging plant.

Boring and Turning Mill.

Navy schedule 5253, bureau of steam engineering, class 1, calls for delivery at Puget Sound, under bids to be opened April 22, of one vertical boring and turning mill, 16-21 foot, motor-driven, with two heads and a boring reach and bar. Specifications state the machines to be driven by a 3-phase, 220-volt, 60-cycle, self-starting constant speed A. C. motor of 50 horsepower, attached to the base of the machine, to be started, stopped, reversed, or otherwise controlled at either side of the machine. All necessary controlling apparatus to be furnished by the contractor. Motors and all electrical apparatus to conform to specification 17M2.

Hydraulic and Electric Apparatus.

All bids received January 22 by the Reclamation Service for furnishing hydraulic and electric apparatus for the St. Mary's storage unit, Milk River project, Mont., have been rejected.

HALLS AND SOCIETY BUILDINGS.

TAFT, KERN CO., CAL.—Lodge hall, 2 story and base, brick. Cost not stated. Architect, J. M. Safell, New Fish Bldg., Bakersfield. Owners, Odd Fellows' Hall Association. The building has been designed for stores on the first floor and large lodge hall and offices on the second floor. Interior will be finished in pine and hardwood. There will be patent store fronts. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be opened on April 4th. Plans and specifications can be secured from the architect. A check for 10% must accompany all bids and be made payable to S. A. White.

PASADENA, LOS ANGELES CO., CAL.—Lodge hall, 3 story and base, Class C construction. Cost not stated. Architects, Foss Building and Designing Co., 100 East Colorado St., Pasadena. Owners, Odd Fellows' Hall Association. This work has been mentioned here before when the plans were first being prepared. Working drawings are complete and figures will be called for at once. The building will cover an area of 50x98 feet. Kitchen and banquet rooms will be located in the basement; first floor will be arranged for stores and upper floors for club rooms, library, billiard hall and lodge rooms. Interior finish will be of pine and hardwood. There will be a central heating system. The exterior of the building will be faced with pressed brick.

PUYALLUP, WASH.—City hall, 2 story and base, reinforced concrete, \$17,500. Architect, R. E. Borhek, Savage-Scofield Bldg., Tacoma. Owners, Town of Puyallup. The building will be in the classic style and will be arranged to contain the police and fire department headquarters, council chamber and executive offices. Interior finish will be of pine and hardwood. There will be a central heating system. The exterior of the structure will be faced with cement plaster. Plans are being prepared.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, \$25,000. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Bruce Cornwall. The building will be erected on the north line of Market street, west of Gough. The first floor will be arranged for stores and the hotel lobby. Upper floors will be divided into modern hotel rooms with a number of private baths. There will be steam heat, hot and cold running water and elevator service. Interior finish will be of pine. Patent store fronts are to be specified. The exterior of the building will probably be faced with cement plaster. Plans are being prepared and figures will be called shortly.

SAN FRANCISCO—Hotel, 5 story and base, Class C construction, \$40,000. Architect, Henry Shermund, Mills Bldg., S. F. Owners, Mersing Estate. The building will cover an area of 75x75 feet, and is to be erected at the northwest corner of 8th and Polson streets. There will be five stores on the first floor besides a large hotel lobby and office. Upper floors will be arranged for 96 rooms and several baths. Interior finish will be of pine with some oak veneer in the lobby. Steam heat, elevator service and hot and cold running water will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete, \$32,000. Architect, Philip Schwerdt, Phelan Bldg., S. F. Owners, Wolf Bros. This building is to be erected on the west line of 6th street south of Howard, and will have a frontage of 25 feet and a depth of 155 feet. The entire first floor will be used for the hotel office, lobby and parlors. Upper floors will contain a large number of guest rooms and baths. Interior will be finished in pine throughout. Some hardwood veneer will be used in the lobby and offices. Plans include steam heat, elevator service and a hot water plant. The exterior of the structure will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, F. Hill. The building will cover an area of 79x120 feet. The first floor will contain four stores besides the hotel office and lobby. Upper floors will be arranged for a total of 165 guest rooms and 38 baths. Plans include steam heat, elevator service, hot water plant, vacuum cleaning, tile bath rooms. Interior finish will be of pine and hardwood. Cement floors will be used in the baths. Metal window frames and sash are specified. The architect is now completing the working drawings. The exterior of the building will be faced with pressed brick.

LOS ANGELES, CAL.—Hotel, 3 story and base, Class C construction. Cost not stated. Architect, Henry L. Wilson, Story Bldg., L. A. Owner, E. Avery McCarthy. The building is to cover an area of 50x110 feet. The first floor will contain office and lobby and upper floors a total of 64 rooms and 18 baths. Interior finish will be of pine throughout with tile used in the bath rooms and some ornamental plaster in the lobby. There will be steam heat

and hot and cold running water. The exterior of the building will be faced with pressed brick. Plans for the work are now nearly complete.

LOS ANGELES, CAL.—Hotel, 12 story and base, reinforced concrete, \$300,000. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. The building is to be erected on the east side of Spring street and will have a frontage on that street of 60 feet and a depth of 165 feet. Preliminary plans have been prepared and show a total of 300 guest rooms, about 50 per cent of which will have private baths. Construction is to be fireproof throughout. William Richards, Wright and Callender Bldg., is the engineer in charge of the reinforced concrete design. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior finish will be of metal and hardwoods. Floors and roof will be of concrete. Interior partitions will be of hollow tile. The exterior of the building will probably be faced with pressed brick and terra cotta. Preliminary plans only have been prepared and further notice will be given in these reports as soon as working drawings are ready.

HOSPITALS.

PORTLAND, ORE.—Hospital, 4 story and base, reinforced concrete, \$400,000. Architect's name not given. Owners, City of Portland. Preliminary plans for a new City and County Hospital have been approved by the commissioners and working drawings will be ordered prepared. Funds for the construction will not be available until next year. The building will be erected on the site of the present City and County Hospital and will be built in unites. Further announcement will be made of the work in these columns.

Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Hospital, 2 story and base, brick and steel, \$35,000. Architects, Starbuck & Clarke, Fresno. Owner, Dr. Sample, Contractor, Allen, Fresno. Contract price, \$35,000.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Agriculture Building, frame construction. Cost not stated. Architect, Director of Works P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and bids will be opened on April 15th at 11 a. m. for the general construction of the Agriculture Building. Separate bids are being taken for the general construction, the installation of plumbing, water pipes and sewers. Plans can be secured from the Director of Works. The official proposal appears in another column of this issue.

SAN FRANCISCO—Pile foundation. Cost not stated. Architect, Director of Works P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on April 3rd for the construction of a pile foundation for the Agriculture Building. Plans can be secured from the Director of Works. Official proposal appears in this issue under the heading of Official Proposals.

SAN FRANCISCO—Conduit system. Cost not stated. Architect, Director of Works P. P. I. E. Co., Service Bldg., S.

E. OWNERS, Panama-Pacific International Exposition Co. Plans can be secured from the Director of Works.

SAN FRANCISCO—Pile foundation. Cost not stated. Architect, Director of Works P. P. I. E. Co., Service Bldg., S. F. **OWNERS, Panama-Pacific International Exposition Co.** Bids will be opened on April 3rd for the construction of a pile foundation for the Manufactures Building. Plans can be secured from the Director of Works at the Service Building. Official proposal appears in this issue under the head of Official Proposals.

Contracts Awarded.

SAN FRANCISCO—Pile foundation. Cost not stated. Architect, Director of Works P. P. I. E. Co., Service Bldg., S. F. **OWNERS, Panama-Pacific International Exposition Co. Contractors, Healy-Tibbitts Construction Co., S. F.** Contract price 243-10 cents per lineal foot. The contract calls for furnishing 205,000 lineal feet.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO — Track specials and materials. Cost not stated. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. **OWNERS, State of California.** Bids are now being called for by the State Board of Harbor Commissioners for furnishing a large amount of track specials. A complete list of these specials can be seen by consulting the Official Proposal, which appears in another column of this issue. Bids will be opened on April 3rd. Plans and specifications can be had from the Assistant State Engineer.

COALINGA, FRESNO CO., CAL.— Railroad station, 1 story, brick and concrete. Cost not stated. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. **OWNERS, Southern Pacific Company.** Contractor, W. J. Ochs, Bakersfield. Contract price not stated. The same company will shortly have plans out for figures for the construction of a similar station which is to be erected at Lemoore.

Contracts Awarded.

SEATTLE TO SUMAS, WASH.—Railroad construction, \$4,000,000. Engineers, Engineering Dept. Northern Pacific R. R. Co. **OWNERS, Northern Pacific R. R. Co. Contractors** Seattle Construction Co., Seattle. Note: It is generally assumed that the Seattle Construction Company is composed of Grant-Smith & Co. and Stillman.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,000. Architect, Edward G. Bolles, 660 Market St., S. F. **Owner, S. A. Born.** The dwelling will be erected in West Clay Park on property adjoining that on which Mr. Born has already constructed several handsome homes. There will be eight rooms and two baths, sleeping porch and a laundry in the house. Plans provide for a central heating system, open fire places and brick mantels. An automatic water heater will be in-

stalled. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. Tile will be used in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. **Owner, E. Nelson, 30 Presidio Terrace, S. F.** The dwelling has been designed for a six-room house with bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be an open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 3, 2 story and base, frame, \$3,000 each. Architect, none. **Owners, L. E. Edwards and J. B. Brewster, Mills Bldg., S. F.** These houses, each of which has been designed for a seven-room dwelling, will be erected in the Crown Terrace District. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in all bath rooms and kitchens. The exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owners are now purchasing all materials.

SAN FRANCISCO—Residences, 3, 2 story and base, frame, \$4,500 each. Architect, none. **Owners, Conservative Building and Investment Co., Foxcroft Bldg., S. F.** The houses will contain seven rooms and bath each. All interiors will be finished in pine and redwood. Oak floors will be used in the living and dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the baths and kitchens. The exteriors of the houses will be covered with cement plaster on metal lath. Owners are now in the market for all kinds of materials. The work will be done by Day Labor.

SAN FRANCISCO—Bungalows, 2, 1½ story and base, frame, \$2,000 each. Architect, none. **Owner, J. S. Purcell, 556 Presidio Ave., S. F.** The houses will be erected on Diamond street near 22nd street, and each has been designed for a six-room house with bath. Interiors will be finished in pine throughout. There will be open fire places and tile mantels. Hardwood floors will be used in the living and dining rooms. Tile will be used in the baths and kitchens. The exteriors will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Bungalows, 4, 1 story and base, frame, \$1,500 each. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. **Owner's name withheld.** These dwellings will be erected on property recently purchased on Lisbon street, and each will contain five rooms and bath. Interior finish will be of pine throughout. There will be open fire places and tile or brick mantels. Some oak flooring is specified. There will be tile in the baths and kitchens. Exteriors

will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Community house, 2 story and base, frame and concrete, \$50,000. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. **Owner's name withheld.** Preliminary plans are being prepared for a building which will house 18 dwellings, each designed for from five to six rooms. The structures will be in the Spanish Mission style and will occupy the center of a full Fifty Vara lot on Leavenworth street near Green. A large central court, which is to be laid out in gardens, will be a feature of the design. Interior finish will be of pine and hardwood with oak floors in the principal rooms. A central heating system will be housed in a separate building. Bath rooms will be finished in tile and tile will be used extensively in the kitchens. There will be open fire places and brick mantels. The exterior of the building will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are being prepared and when completed figures will be taken by the architects.

SAN FRANCISCO—Parish house, 2 story and base, frame, \$6,000. Architects, Welsh & Carey, Western Metropolitan Bank Bldg., S. F. **Owner, Father John Cullen.** The house will contain seven or eight rooms and baths. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, O. E. Evans, 2132 Mission St., S. F. **Owner, James Welsh.** The dwelling will contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath and shiplap. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, Joseph Leonard, Phelan Bldg., S. F. **OWNERS, Urban Realty Co., Phelan Bldg.** The dwelling will be similar to a number of other houses which have recently been erected by the same owners on property at De Soto and Holloway streets. Plans call for a seven-room house with bath and sleeping porch. Interior will be finished in pine with some hardwood veneer and hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architect, Earl E. Scott, Humboldt Bank Bldg., S. F. **Owner's name withheld.** The dwelling has been designed for an

eight-room house with bath. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with cement plaster. Tile will be used in the bath room and kitchen. Plans are now being prepared for the work.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The bungalow will contain five rooms, bath and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the living and dining rooms and reception hall. Furnace heat will be installed. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are being prepared and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, E. Greenhood. The house will contain eight rooms, sleeping porch, bath and laundry. Interior will be handsomely finished in pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, John A. Bischoff, 349 62nd St., Oakland. The house has been designed for an eight room dwelling with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, F. R. Peake & Co., 2127 University Ave., Berkeley. The house will contain eight rooms and bath and is to be located on Mariposa street. Interior trim will be largely of pine with some hardwood veneer. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and an open fire place. Mantel will be of brick. Bath room will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owners are now in the market for all materials.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$18,000. Architect, William Knowles, Hearst Bldg., S. F. Owner, William Ede. The house will contain ten rooms, baths, sleeping porches and a laundry. Interior will be finished in pine and hardwoods. Hardwood and composition floors will be used. There will be

furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Baths will be finished in tile and will have composition floors. The exterior of the dwelling will be covered with cement plaster. Some clay tile will be used on the roof. Plans are complete and the work is being done by Day Labor under the personal direction of the architect.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, A. Wellman and John Holm, 2321 10th St., Berkeley. The dwelling has been designed for eight rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, C. E. Crane, 1600 La Loma Ave., Berkeley. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now in the market for all materials.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architect, Edward G. Garden. Phelan Bldg., S. F. Owner, Mrs. E. G. Garden. The dwelling will contain eight rooms, bath and a garage. Interior will be handsomely finished in pine and redwood. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath rooms and kitchen. The exterior will be covered with cement plaster on metal lath. A clay tile roof will be used. An automatic water heater will be installed. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owners, Oakland Building and Mortgage Co., 1106 Broadway, Oakland. The house has been designed for an eight-room dwelling with bath and sleeping porch. The interior will be finished in pine and redwood with oak floors in the living and dining rooms and reception hall. There will be furnace heat and a large open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, W. E. Jason. The dwelling is to contain five rooms and bath. All inter-

ior trim will be of pine. Hardwood floors will be used in the principal rooms. There will be an open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

ALBANY, ALAMEDA CO., CAL.—Bungalows, 2, 1 story and base, frame, \$2,000 each. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The dwellings will each contain five rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be large open fire places in the living rooms with tile or brick mantels. Some tile will be used in the bath rooms and kitchens. Exteriors will be covered with shingles. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$4,500. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The house has been designed for a seven-room dwelling with all modern conveniences. Interior finish will be of pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. A cement floor will be used in the bath room. There will be a large sleeping porch. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO., CAL.—Bungalows, 1 story and base, frame. Cost not stated. The following Day Labor jobs are reported as about ready to be started in Stockton: A. L. Healey, 527 East Anderson St., 1 story frame, \$1,200; Cowell Bros., 618 Miner, 1 story frame, \$2,000; H. H. Thomson, 410 East Market, 1 story frame, \$2,000; N. H. Thomson, 410 Market, 1 story frame, \$2,000; Miller, Stockton, 1 story frame, \$2,500, and B. F. Ames, 420 McCloud, 1 story frame, \$2,000.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalows, 1 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are about to be started in San Jose: W. F. Gillman, So. Hull Ave., 1 story frame, \$1,800 and Alex. York, Puss House, 1 story frame, \$1,800.

LOS ANGELES, CAL.—Residence, 2 story and base, brick and frame, \$40,000. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owner, J. C. Rivers. The dwelling will be erected on a large tract and has been designed to contain twelve rooms, baths and sleeping porches. A two-story garage will also be erected on the property. Interior finish of the dwelling will be of pine and hardwoods. Tile will be used in all the bath rooms. A central heating system will be installed. There will be a number of open fire places with brick and tile mantels. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster and brick veneer. Plans are complete and figures are being taken.

SCHOOLS.

LOS ANGELES, CAL.—School group. Class A construction, \$650,000. Architects, Allison & Allison, Hilbernia Bldg., L. A. Owners, State of California. Information received from the State Architect's office in Sacramento states that on March 26th the following firms had applied for plans and specifications on the State Normal School at Los Angeles. Over \$650,000 will be available for construction. Bids will be opened in Sacramento on April 5th: Gladding-McBean & Co., Crocker Bldg., San Francisco; Latourrette-Fical Co., Sacramento; Sound Construction Co., San Francisco; Arthur Arlett, Oakland; McLaren & Petersen, San Francisco; Lewis A. Hicks Co., Rialto Bldg., San Francisco; Builders' Exchange of Alameda Co., Oakland; D. Zelinsky, San Francisco; Southwestern Construction Co., Los Angeles; Creller & Seaman, Pasadena; J. F. Atkinson, Los Angeles; F. W. Walton & Son, Hollywood; Alta Planning Mill Co., Los Angeles; W. A. Schumacher Construction Co., Los Angeles; Los Angeles Planning Mill Co., Los Angeles; F. O. Engstrom, Los Angeles; Somers & Lund, Los Angeles; Thomas Havery, Los Angeles; James H. Jacobs Co., 336 South Spring, Los Angeles; C. Leonard, 708-10 H. W. Hellman Bldg., Los Angeles; James L. McLaughlin, 244 Kearny, San Francisco; Grant Fee, 2440 16th St., San Francisco; Western Construction Co., 538 Bradbury Bldg., Los Angeles; Munger & Munger, 174 East Union, Pasadena; F. Roland, 550 Montgomery, San Francisco; Wm. Simpson Construction Co., 728 Tinklin Bldg., San Diego.

MODESTO, STANISLAUS CO., CAL.—School, 1 story, frame, \$5,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Shiloh School District. The building is to be designed for a district school and will contain two standard size class rooms. Interior will be finished in pine. There will be composition blackboards. Two Lenox heaters are to be installed. The exterior of the building will be covered with rustic and shingles. Plans are being prepared.

TAFT, KERN CO., CAL.—School, 1 story and base, brick, \$20,000. Architect, O. L. Clark, Bakersfield. Owners, Taft School District. All bids for the construction of building have been rejected as being above the amount available for construction. Plans are now being revised and new bids will be called for in the course of the next two weeks.

LOS ANGELES, CAL.—School, 2 story and base, brick and frame construction, \$28,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Women's Board of Home Missions. The building has been designed as a school for Spanish girls and will contain accommodations for 12 pupils. Interior finish will be of pine. There will be a steam heating system. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will be taken by the architect within a short time.

VENICE, LOS ANGELES CO., CAL.—School, 1 story and base, concrete and frame, \$25,000. Architects, Eager & Eager, Story Bldg., L. A. Owners, Venice School District. The building will be built around the three sides of a court and will cover an area of 100x112 feet. The central portion will contain

an auditorium equipped with stage and dressing rooms. One of the wings will contain four standard class rooms and the other the domestic science and manual training departments. The building will have concrete foundation, cement plaster over metal lath on the exterior, composition roofing, pine trim, lavatories, separate power plant for steam heating system. Plans are being prepared.

LA GRANDE, ORE.—School, 2 story and base, brick. Cost not stated. Architect, John L. Slater, La Grande. Owners, La Grande School District. No particulars of this building have been given out as yet. Mr. Slater has just received the commission to prepare plans and it will be sometime before bids are called.

SEATTLE, WASH.—Schools, 2, 2 story and base, brick and concrete, \$77,000 and \$78,000 respectively. Architect's name not given. Owners, City of Seattle. Subfigures are wanted on the mill work, lumber and ornamental iron work on two new schools being constructed by the Manhattan Co., Inc., Central Bldg., Seattle.

FOREST GROVE, ORE.—School, 2 story and base, brick, \$30,000. Architects, W. B. Bell and J. Jerry Widing, associated, Worcester Bldg., Portland. Owners, Forest Grove School District. Plans are nearly complete and bids will be called for early in this month for the construction of a twelve-room school building. There will be a central heating system and other modern improvements. The exterior will be faced with pressed brick.

Contracts Awarded.

EXETER, TULARE CO., CAL.—School, 1 story and base, brick, \$25,600. Architect's name not given. Owners, Exeter School District. Contractor, J. C. Thurman, Exeter. Contract price, \$24,652. Note: The building will contain six class rooms, auditorium and offices. A central heating system will be installed.

SEWERS, STREET WORK AND WATER SYSTEMS.

MENDOCINO AND SAN MATEO COUNTIES—State Highway work. Cost not stated. Engineer, State Highway Commission, Sacramento. Owners, State of California. The following contracts were awarded at the last meeting of the State Highway Commissioners:

In Santa Clara County, from Edendale to Morgan Hill, 13 miles, concrete base with bituminous top, to Richard Keating & Sons, San Francisco, \$49,396.

In Stanislaus County, from a point near Modesto to the northern county boundary, 7 miles, oiled concrete to Considine & Bates, Los Angeles, \$32,389.

In Mendocino County, between Ukiah and Forsyth Creek, macadam, two miles, to David Sawyers and Charles Whitely, \$53,313.

In San Mateo County, between Redwood City and the south county boundary, asphalt concrete on old macadam, 3.3 miles, to S. F. Doyle, \$41,720.

Bids will be called for at once on five sections more located as follows:

In San Mateo County, between San Mateo and Beresford, macadam base and asphaltic concrete surface, 2 miles.

In Santa Clara County, between San Jose and Edendale, macadam, with

asphaltic top, 4.35 miles.

In Ventura County, between south county boundary and Newberry Park, oiled concrete, 7.34 miles.

In Stanislaus County, various parts of the highway between Turlock and Ceres.

In Yuba County, various parts of the highway between Morrison's Crossing and Marysville.

VISALIA, TULARE CO., CAL.—Sewer system, \$25,000. Engineer, City Engineer, Visalia. Owners, Town of Visalia. Plans have been adopted for the construction of a sewer system embracing 25,000 lineal feet of sewers. Funds for the construction of the work are to be obtained from a bond election which will be held shortly.

FOKKS, WASH.—Reservoir, steel and concrete. Cost not stated. Engineer's name not given. Owners, Washington Oil Co., represented by Gerard-Fillio Co., Etel Bldg., Seattle. Bids will be called for at once for the construction of a steel and concrete reservoir of one million gallons capacity. Plans and specifications are on file at the offices of the representatives.

Contracts Awarded.

FULLERTON, ORANGE CO., CAL.—Municipal water system, \$16,000. Engineer, City Engineer, Fullerton. Owners, City of Fullerton. Contractor, R. C. Lowell, Monrovia. Contract price, \$16,000.

DINUBA, TULARE CO., CAL.—Sewer system, \$35,000. Engineer, City Engineer, Dinuba. Owners, City of Dinuba. Contractors Hall & Hunt, San Francisco. Contract price, \$32,469.74. Other bidders on the work were as follows: Redman & Bier, \$33,434.98; Coalinga Tank and Pump Co., \$39,009.82; Chambers & Heafy, \$33,818.76; Cowden & Glacklin, \$36,614.33.

STORES AND OFFICES.

SAN FRANCISCO—Stores and offices, 2 story and base, brick. Cost not stated. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, James T. Sweeney. The building is to be erected on the south side of Geary street east of Van Ness avenue. The first floor has been leased to an automobile firm. Upper floor will be used for either lofts or may be subdivided into living rooms. Interior finish will be of pine and some hardwood. Considerable tile and marble will be used. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Stores and lofts, 6 story and base, brick and steel. Cost not stated. Architect, John Reid, Jr., Chronicle Bldg., S. F. Owners, Hind Estate. The building will be erected on California street west of Front, and will cover an area of 60 feet 8 1/2 inches by 127 1/2 feet. A complete steel frame will be used. There will be several stores on the first floor and upper floors will be arranged for lofts and offices. Metal window frames and sash are specified. There will be steam heat, elevator service and fireproof doors. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken on the various parts of the work.

SAN FRANCISCO—Office building, 10 or 12 story and base. Class A construction, \$1,000,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owners, Hobart Estate. This building will be erected on the north side of

Market street just east of Montgomery and adjoining the Nevada Bank Bldg. The lot has a Market street frontage of 92 feet and is irregular in shape, extending through to Sutter where it has a frontage of 118 feet. Construction will be fireproof throughout with a complete steel frame, interior partitions of hollow tile, concrete floors and brick filler walls. The matter of height is still an open question and plans will be prepared with a steel frame of sufficient strength to carry twelve stories at the least. Interior will be arranged for about 500 modern offices. There will be metal trim and metal window frames and sash. Steam heat, elevator service, vacuum cleaning system and mail chutes will be incorporated in the plans. The exterior of the building will probably be faced with pressed brick and terra cotta. Working drawings have been started and construction will probably be underway within four months.

OAKLAND, CAL.—Stores and offices, 15 story and base, Class A construction. Cost not stated. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Carlson and Snyder. The building is to be erected at the gore corner of 15th and Broadway, and has been fully described in these columns when plans were first started. Construction will include a steel frame, exterior walls of concrete faced with terra cotta, hollow tile interior partitions, fireproof doors, metal trim and metal window sash and frames. There will be steam heat, elevator service, a vacuum cleaning system and mail chutes. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Stores and offices, 7 story and base, Class A construction, \$180,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Isaac Hellman. The building will be erected on Spring street adjoining the Hibernian Building, and will have a frontage of 39 feet and a depth of 160 feet. There will be a complete steel frame, reinforced concrete walls, floor and roof, hollow tile interior partitions and suspended metal ceilings. The exterior will be faced with mat glazed terra cotta with a granite base. Interior trim will be of metal and oak with marble wainscoting. There will be metal window sash and frames. Steam heat, elevator service, a vacuum cleaning system and mail chutes are specified. Plans are complete and figures will be called for at once.

PASADENA, LOS ANGELES CO., CAL.—Stores and offices, 8 story and base, reinforced concrete. Cost not stated. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Matthew Slavin. The building will occupy one of the most important business corners and will cover an area of 50x90 feet. Construction will be of the reinforced concrete type throughout. There will be two stories on the first floor and a total of 100 offices on the upper floors. Interior partitions will be of metal lath and plaster. Interior finish will be of mahogany with marble wainscot and tile floors. There will be steam heat, elevator service and a vacuum cleaning system. Metal window sash and frames will be used. The exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL. Store and lofts, 3 story and base, Class C construction. Cost not stated. Architect,

W. S. Garrett, Currier Bldg., L. A. Owner, H. O. Vogel. The building will have a street frontage of 61 feet and a depth of 141 feet. The first floor will be fitted for store purposes and upper floors for light lofts. Interior finish will be of pine. There will be patent store fronts, metal window frames and sash and fireproof doors. A freight elevator will be installed. Exterior of the building will be faced with pressed brick. Plans are being revised and figures will be called for shortly.

LOS ANGELES, CAL.—Lofts, 3 story and base, reinforced concrete. Cost not stated. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owner, Billicke. The building is to be occupied partly by a laundry and the upper floors will be used for lofts. Construction will be of reinforced concrete throughout with metal window sash and frames. Interior will be finished in pine. The exterior of the building will be faced with cement plaster. The structure will cover an area of 45x74 feet. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, Class B construction, \$42,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Edward D. Silent & Co. Contractor, J. P. Atkinson, Story Bldg., L. A. Contract price, \$43,000.

THEATRES.

MARTINEZ, CONTRA COSTA CO., CAL.—Theatre, 2 story and base, Class C construction, \$25,000. Architects, Altwain Bros., Delger Bldg., Oakland. Owner, H. J. Curry. The building has been designed for a modern theatre and stores. The location is one of the best in the city. The theatre will have a seating capacity of 800 and will be properly ventilated and equipped with the most modern appliances. Interior will be finished in pine throughout. Patent store fronts will be used. The exterior of the building will be faced with pressed brick. Plans are being prepared.

FRESNO, FRESNO CO., CAL.—Theatre, 1 story and base, Class A construction, \$200,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owners, W. Parker Lyons and L. L. Cory. The building will be designed for a combination store and theatre building and will be fireproof throughout. A complete steel frame will be used with walls of brick faced with pressed brick and terra cotta. Interior finish will be of pine, hardwood and ornamental plaster. There will be a modern system of heating and ventilation. Floors will be of concrete. Complete stage equipment will be included in the building. Plans are being prepared.

IMPERIAL, IMPERIAL CO., CAL.—Theatre, 1 and 2 story and base, brick. Cost not stated. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, W. J. McHenry, Imperial. The building will cover an area of 50x135 feet and will contain several stories besides the main theatre portion, which will have a seating capacity of 800 people. Complete stage equipment will be included in the building. Interior finish will be of pine and ornamental plaster. There will be a modern ventilating system installed. The exterior of the building will be faced with pressed brick and cement plaster. Plans

are complete and in the hands of the owner who will take all figures on the work.

PORTLAND, ORE.—Theatre, 4 story and base, Class A construction. Cost not stated. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, Calvin Held. This building will replace the old Pittcock Block and will contain besides the theatre the offices and an auxiliary steam plant of the Northwestern Electric Co. Construction will be of the Class A type throughout. Complete details of the building will be given in the next issue of the Building and Industrial News.

Contracts Awarded.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Fine and Battery Streets, San Francisco, California, at 10:30 A. M., Thursday, April 3rd, 1913, for the construction of a **Pile Foundation for the Manufacturers Building** in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207, Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee,

WILLIAM H. CROCKER,
Chairman. (*)

be taken by the architects.

PARISH HOUSE—2 story and base, frame, \$6,000. San Francisco. Architects, Welsh & Carey, Western Metropolitan Bank Bldg., S. F. Owner, Father Cullen. The house will contain seven or eight rooms and baths. Interior finish will be of pine and redwood with oak floors in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, O. E. Evans, 2132 Mission St., S. E. Owner, James Welsh. The dwelling will contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath and ship-lap. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$1,000. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co., Phelan Bldg. The dwelling will be similar to a number of other houses which have been erected by the same owner on property at De Soto and Holloway streets. Plans call for seven rooms with bath and sleeping porch. Interior will be finished in pine with some hardwood veneer and hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling has been designed for an eight-room house with bath. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with cement plaster. Tile will be used in the bath room and kitchen. Plans are now being prepared for the work.

APARTMENT HOUSE—3 story and base, frame, \$5,000. San Francisco. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner's name withheld. The building will be erected on Cypress between Grant avenue and Stockton street, and has been arranged for apartments of three rooms and bath each. Interior finish will be of pine throughout. There will be wall beds. The exterior of the building will be covered with ship-lap and rustic. Plans are now being prepared.

APARTMENT HOUSE—8 story and base, Class A construction. Cost not stated. San Francisco. Architect, John Galen Howard, 601 Mission St., S. F. Owners, Selah Chamberlain and John W. Proctor. These two men have recently purchased property from three separate owners, located on California

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base, frame, \$7,000. San Francisco. Architect, Edward G. Bolles, 660 Market St., S. F. Owner, S. A. Born. The dwelling will be erected in West Clay Park on property adjoining that on which Mr Born has already constructed several handsome homes. There will be eight rooms and two baths, sleeping porch and a laundry in the house. Plans provide for a central heating system, open fire places and brick mantels. An automatic water heater will be installed. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. Tile will be used in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a six-room house with bath. Interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be an open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with rustic and ship-lap. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCES—3, 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owners, L. B. Edwards and J. B. Brewster, Mills Bldg., S. F. These houses, each of which has been designed for a seven room dwelling, will be erected in the Crown Terrace District. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in all bath rooms and kitchens. The exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owners are now purchasing all materials.

RESIDENCES—3, 2 story and base, frame, \$1,500 each. San Francisco. Architect, none. Owners, Conservative Building and Investment Co., Foxcroft Bldg., S. F. The houses will contain seven rooms and bath each. All interiors will be finished in pine and redwood. Oak floors will be used in the living and dining rooms and reception halls. There will be furnace heat and

open fire places. Mantels will be of brick. Tile will be used in the baths and kitchens. The exteriors of the houses will be covered with cement plaster on metal lath. Owners are now in the market for all kinds of materials. The work will be done by Day Labor.

BUNGALOWS—2, 1½ story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, J. S. Purcell, 856 Presidio Ave., S. F. The houses will be erected on Diamond street near 22nd street, and each has been designed for a six-room house with bath. Interiors will be finished in pine throughout. There will be open fire places and tile mantels. Hardwood floors will be used in the living and dining rooms. Tile will be used in the baths and kitchens. The exteriors will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOWS—4, 1 story and base, frame, \$1,800 each. San Francisco. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. These dwellings will be erected on property recently purchased on Lishon street and each will contain five rooms and bath. Interior finish will be of pine throughout. There will be open fire places and tile or brick mantels. Some oak flooring is specified. There will be tile in the baths and kitchens. Exteriors will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

COMMUNITY HOUSE—2 story and base, frame and concrete, \$50,000. San Francisco. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. Preliminary plans are being prepared for a building which will house 18 dwellings, each designed for from five to six rooms. The structures will be in the Spanish Mission style and will occupy the center of a full Fifty Vara lot on Leavenworth street near Green. A large central court, which is to be laid out in gardens, will be a feature of the design. Interior finish will be of pine and hardwood with oak floors in the principal rooms. A central heating system will be housed in a separate building. Bath rooms will be finished in tile and tile will be used extensively in the kitchens. There will be open fire places and brick mantels. The exterior of the building will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are being prepared and when complete figures will

street and Mason. The property combined will have a frontage of 195 feet and a depth of 170 feet. The entire lot will be covered by a Class A building designed along the lines of the most modern apartment houses in New York city. Suites will comprise a number of rooms and will be elaborately finished. There will be steam heat, elevator service, dumb waiters, Vacuum cleaning and all other modern conveniences. Interior partitions will be of hollow tile and floors of concrete. The exterior will probably be faced with pressed brick and terra cotta. Preliminary plans have been prepared and working drawings will be started shortly.

APARTMENT HOUSE—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, S. Larsen, 79 Cortland Ave., S. F. The building will cover an area of 23x57 feet. The first floor will be arranged for a store and upper floor will contain three small apartments of three rooms and bath each. All interior finish will be of pine and redwood. There will be wall beds. The exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

APARTMENT HOUSE—6 story and base. Class C construction. Cost not stated. San Francisco. Architect not selected. Owner, L. C. Larsen, Crocker Bldg. Mr. Larsen, president of the L. C. Larsen Construction Co., has purchased the southeast corner of Sutter and Jones streets, and will erect a seven or eight story Class C apartment house. The building will cover an area of 160x107½ feet.

MILL—1 story, frame, \$3,500. San Francisco. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans are complete and work will be done by Day Labor for the construction of a one-story mill building, which is to be erected at the northeast corner of Kentucky and South streets. The owners are now purchasing all materials.

FLATS—3 story and base, frame, \$8,500. San Francisco. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Edward McKeever. The building will have a street frontage of 27 feet and a depth of 68½ feet. The first floor will be arranged for one store. Upper floors will contain four and five room flats with baths. Interior finish will be of pine throughout. Plate glass display windows will be used in the store. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures will be called for at once.

FLATS—3 story and base, frame, \$6,000. San Francisco. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, John Kucish. The building is to be erected on Mason street between Chestnut and Lombard streets and has been designed to contain a number of four room flats with baths. All interior finish will be of pine. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic and shiplap. Plans are being prepared and figures will be called for shortly.

FLATS—3 story and base, frame, \$6,000. San Francisco. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, L. Pavan. The building will

be arranged for two stores on the first floor and two modern flats on the upper floors. Interior finish will be of pine throughout. All flats will have connecting baths. The exterior of the building will be covered with rustic and shiplap. Plans are nearly complete and figures will be taken this week.

FLATS—2 story and base, frame, \$7,000. San Francisco. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner's name withheld. The building will be erected on the south side of Greenwich street between Stockton and Grant avenue. Plans provide for four modern flats of five and six rooms each with bath. Interior will be finished in pine and hardwood veneer. Bath rooms will be finished with tile or brick mantels. The exterior of the building will be covered with rustic, brick veneer and shiplap. Plans are being prepared and when complete the work will be done by Day Labor.

HOTEL—5 story and base, brick and steel, \$25,000. San Francisco. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Bruce Cornwall. The building will be erected on the north line of Market street west of Gough. The first floor will be arranged for stores and the hotel lobby. Upper floors will be divided into modern hotel rooms with a number of private baths. There will be steam heat, hot and cold running water and elevator service. Interior finish will be of pine. Patent store fronts are to be specified. The exterior of the building will probably be faced with cement plaster. Plans are being prepared and figures will be called shortly.

HOTEL—5 story and base. Class C construction, \$40,000. San Francisco. Architect, Henry Shermund, Mills Bldg., S. F. Owners, Mersing Estate. The building will cover an area of 75x75 feet, and is to be erected at the northwest corner of 5th and Folsom streets. There will be five stores on the first floor besides a large hotel lobby and office. Upper floors will be arranged for 96 rooms and several baths. Interior finish will be of pine with some oak veneer in the lobby. Steam heat, elevator service and hot and cold running water will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—4 story and base, reinforced concrete, \$32,000. San Francisco. Architect, Philip Schwerdt, Pheasant Bldg., S. F. Owners, Wolf Bros. This building is to be erected on the west line of 6th street, south of Howard, and will have a frontage of 25 feet and a depth of 155 feet. The entire first floor will be used for the hotel office, lobby and parlors. Upper floors will contain a large number of guest rooms and baths. Interior will be finished in pine throughout. Some hardwood veneer will be used in the lobby and offices. Plans include steam heat, elevator service and a hot water plant. The exterior of the structure will be faced with cement plaster. Plans are being prepared.

TRACK SPECIALS AND MATERIALS—Cost not stated. San Francisco. Engineer, Assistant State Engineer, Jerome Newman, Ferry Bldg., S. F. Owners, State of California. Bids are now being called for by the State Board of Harbor Commissioners for furnishing a large amount of track

specials. A complete list of these specials can be seen by consulting the Official Proposal which appears in another column of this issue. Bids will be opened on April 3rd. Plans and specifications can be had from the Assistant State Engineer.

STORES AND OFFICES—2 story and base, brick. Cost not stated. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, James T. Sweeney. The building is to be erected on the south side of Geary street east of Van Ness avenue. The first floor has been leased to an automobile firm. Upper floor will be used for either lofts or may be subdivided into living rooms. Interior finish will be of pine and some hardwood. Considerable tile and marble will be used. The exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES AND LOFTS—6 story and base, brick and steel. Cost not stated. San Francisco. Architect, John Reid, Jr., Chronicle Bldg., S. F. Owners, Hind Estate. The building will be erected on California street, west of Front, and will cover an area of 60 feet 8½ inches by 127½ feet. A complete steel frame will be used. There will be several stores on the first floor and upper floors will be arranged for lofts and offices. Metal window frames and sash are specified. There will be steam heat, elevator service and fireproof doors. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken on the various parts of the work.

OFFICE BUILDING—10 or 12 story and base. Class A construction, \$1,000,000. San Francisco. Architect, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owners, Hobart Estate. This building will be erected on the north side of Market street, just east of Montgomery and adjoining the Nevada Bank Building. The lot has a Market street frontage of 92 feet and is irregular in shape, extending through to Sutter street where it has a frontage of 118 feet. Construction will be fireproof throughout with a complete steel frame, interior partitions of hollow tile, concrete floors and brick filler walls. The matter of height is still an open question and plans will be prepared with a steel frame of sufficient strength to carry twelve stories at the least. Interior will be arranged for about 300 modern offices. There will be metal trim and metal window frames and sash. Steam heat, elevator service, vacuum cleaning system and mail chutes will be incorporated in the plans. The exterior of the building will probably be faced with pressed brick and terra cotta. Working drawings have been started and construction will probably be underway within four months.

AGRICULTURAL BUILDING—Frame construction. Cost not stated. San Francisco. Architect, Director of Works P. L. K. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and bids will be opened on April 15th at 11 a. m. for the general construction of the Agricultural Building. Separate bids are being taken for the general construction, the installation of plumbing, water pipes and sewers. Plans can be secured from the Director of Works. The official proposal appears in another column of this issue.

PILE FOUNDATION—Cost not stated. San Francisco, Architect, Director of Works P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on April 3rd for the construction of a pile foundation for the Agriculture Building. Plans can be secured from the Director of Works. Official proposal appears in this issue under the heading of Official Proposals.

CONDUIT SYSTEM—Cost not stated. San Francisco, Architect, Director of Works P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened in accordance with the official proposal which appears in another column of this issue on April 10th for the construction of a conduit system in the Exhibit Building Section of the Harbor View Site. Plans can be secured from the Director of Works.

PILE FOUNDATION—Cost not stated. San Francisco, Architect, Director of Works P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on April 3rd for the construction of a pile foundation for the Manufactures Building. Plans can be secured from the Director of Works at the Service Bldg. Official proposal appears in this issue under the head of Official Proposals.

Contracts Awarded.

PILE FOUNDATION—Cost not stated. San Francisco, Architect, Director of Works P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, 24.3-10c per lineal foot. The contract calls for furnishing 205,000 lineal feet.

Largest Barracks For The Presidio.

Citadel Barracks, Latest in Military Architecture, Will be Erected at The Presidio.

To House A Whole Regiment.

Plans for Largest Barracks Building in United States Have Been Sent to Washington For Approval.

Plans have been prepared in the Constructing Quartermaster's Office at Fort Mason for the largest barracks building ever designed for the War Department. Plans for the building, which is to be erected at the Lombard street entrance of the Presidio, are the outgrowth of many careful study and experience on the part of General Murray and embody many unique ideas. The building will be known as a Citadel Barracks and will house one complete infantry regiment.

The building has been designed in the Mission style and will cover a ground area of 550 feet square. The structure will be three stories in height, arranged around an inner court 300 feet square. There will be two towers on the front facade with large heavy buttresses at the corners. Three sides of the building will be devoted to quarters for the twelve companies, each side being arranged for a battalion. Administration section, sixteen lieutenants' quarters, officers' club, ma-

chine and band section, a large gymnasium, exchange, shooting gallery, bowling allies and quartermaster's store will occupy the main facade.

Reinforced concrete construction will be used throughout and the building will be fireproof. Magnesite will be used over all concrete floors. The latest and most improved oil burning system will be used for heating and cooking. A total of over 450 plumbing fixtures will be required. The exterior will be faced with cement plaster.

One of the unusual features of the design is that the building will have but one main entrance, thus enabling one sentry stationed at the main gate to control the entire building. All entrances to each section open off of the main court and access to the building can be gained only through the main gate.

Preliminary estimates have placed the cost of the building at \$689,000 and while no special appropriation has been asked for it is expected that this amount will be provided for in the Sundry Civil Bill.

Plans have been completed by the Constructing Quartermaster's Office at Fort Mason and proposals are being called for on the grading of the parade grounds at Fort Winfield Scott. Bids will be opened on April 4th. The parade ground will cover about 12½ acres. Concrete drainage gutters will be constructed on the lower side. After the ground has been brought to grade it will be seeded to Australian rye grass and creeper and rolled.

Architects' Exhibit Draws Big Crowds.

Special Evenings Have Been Allotted to Various Improvement Clubs and Attendance is Large.

Tuesday evening was Mission Improvement Club right at the exhibition of the San Francisco Architectural Club in the Hale Building, Fifth and Market streets. Each night henceforth, throughout the period of the exhibition, which will close April 5, there will be some special social feature devoted to some improvement or other civic club or association. Wednesday night will be given to the Fillmore Street Improvement Club; Thursday night to the various women's clubs of the city; Friday to the Down Town Association; Saturday to the Civic League of Improvement Clubs.

Next week, Monday will be Ashbury Heights Improvement Club night; Tuesday, San Francisco Real Estate Board night; Wednesday, Sunset Improvement Club night; Thursday, Richmond Improvement Club night.

Music will be provided every night as well as every afternoon. The crowds in attendance at the exhibition grow large daily. The models and drawings of the buildings and other structures of the Panama-Pacific Exposition and of the new San Francisco Civic Center, attract great interest and, in addition, there are striking displays of the best architectural and decorative art work of this country as well as of some foreign countries. The display of building materials is the best ever shown in this city.

The exhibition is open from 10 A. M. to 10 P. M., and admission is free.

General Contractors' Ass'n. Subscribe Aid.

Large Sum From The Association and Members Will be Sent to Relief of Flood Victims.

The General Contractors' Association at its meeting of Stockholders held last Thursday night voted \$1000 from its general fund and the members present pledged another \$1000. At yesterday's general gathering of Stockholders and Associate Members another \$1000 was pledged, making in all over Three thousand dollars from the General Contractors' Association for the benefit of the sufferers in the late floods in the East.

The General Contractors' Association is a wide awake organization and a power for good in this city.

State Highway Con- tracts Are Awarded.

Four Contracts Let For State Highway Work and Bids will Shortly Be Called on More Work.

The following contracts were awarded at the last meeting of the State Highway Commission:

In Santa Clara county, from Edenvale to Morgan Hill, 13 miles, concrete base with bituminous top, to Richard Keating & Sons, San Francisco, \$49,396.

In Stanislaus county, from a point near Modesto to the northern county boundary, 7 miles, oiled concrete, to Considine & Bates, Los Angeles, \$32,389.

In Mendocino county, between Ukiah and Forsyth Creek, macadam, two miles, to David Sawyers and Charles Whited, \$53,313.

In San Mateo county, between Redwood City and the south county boundary, asphalt concrete on old macadam, 3.3 miles, to S. P. Doyle, \$41,720.

Bids will be called for at once on five sections more located as follows:

In San Mateo county, between San Mateo and Beresford, macadam base and asphaltic concrete surface, 2 miles.

In Santa Clara county, between San Jose and Edenvale, macadam with asphaltic top, 4.35 miles.

In Ventura county, between south county boundary and Newberry Park, oiled concrete, 7.34 miles.

In Stanislaus county, various parts of the highway between Turlock and Ceres.

In Yuba county, various parts of the highway between Morrison's Crossing and Marysville.

Architectural Exhibit Opens Final Week.

Sixth Annual Exhibit of the San Francisco Architectural Club Draws Record Crowds.

The first week of the exhibition of the San Francisco Architectural Club, which ended last Saturday, was eminently successful in every way. Every afternoon and evening the exhibition

rooms, on the fourth floor of the Hale Building, Fifth and Market streets, were thronged with visitors, attracted not only by the array of models, plans, sketches and prints of the Panama-Pacific Exposition and Civic Center buildings, but by the wide variety of other architectural and decorative art exhibits.

Designs of buildings contemplated or under construction, photographs of noted structures already completed, decorative statuary and bas-relief, parkings, courts, arcades, fountains, interiors, stairways, colonnades and other features of highest merit elicited much commendation from all.

A notable feature of the exhibition is the display of building materials, which is one of the best ever seen on the Pacific Coast. It includes materials for practically every structural use and a wide range of ornamental materials, for use in public, business and private buildings. The latest advance in structural work have been given due prominence and the general arrangement of all the exhibits, both individually and collectively, is most effective.

The exhibition will be open every day this week, from 10 A. M. to 6 P. M. and from 8 to 10 P. M. The evenings of the week have been allotted to several of the local improvement clubs and their friends, although the general public is admitted at all times. It is planned during the week to have lectures delivered on appropriate subjects by competent architects, artists and builders.

Admission to the exhibition is free.

Buiders' Exchange Elect Officers.

The following officers have been chosen to conduct the affairs of the Builders' Exchange of San Francisco for the ensuing year:

President, James A. Wilson.
Vice-President, R. H. Forbes.
Secretary, R. J. H. Forbes.
Treasurer, C. W. Withington.
Financial Secretary, S. A. D. Schenck.
Assistant Financial Secretary, Wm. J. Carberry.

Door Keeper, B. R. Wolcott.
DIRECTORS—Alex. Mennie, J. J. Phillips, M. F. Gale, O. E. Brady, H. Maundrell, R. A. Chisholm and Robt. Dewar.

The Exchange also voted \$1000 as a donation to the Red Cross Society for the benefit of the sufferers of the recent Eastern floods.

The Builders' Exchange now has a membership of five hundred firms representing all crafts in the building line.

Award First Contract For New City Hall.

Contra Costa Construction Company
Will Excavate Site For New Building For Sum of \$23,950.

The Board of Public Works, at their meeting Wednesday afternoon, formerly awarded the contract for the excavating of the foundation of the new City Hall to the Contra Costa Construction Company on their bid of \$23,950. Due consideration was given to the claim of the Daniel O'Day Company that their bid of \$24,000 was lower when considered on a unit basis, but the original award of the work made last week was upheld, the bid of \$23,950 appearing to be to the best interest of the City and County.

Work will be started at once on the excavating and the first contract for the construction of the new City Hall will be under way within a few days.

Contract Awarded On Pile Foundation.

Healy-Thibbitts Construction Company
Will Put Pile Foundation Under
Transportation Building.

Bids were opened Thursday morning for the pile foundation for the Transportation Building, which is to be erected on the Harbor View site for the Panama-Pacific International Exposition Company. Bids were opened by the Buildings and Grounds Committee. Figures were asked for on a unit price per linear foot. The total amount of piling to be furnished is 205,000 linear feet. The following bids were received:

Pile Foundation Work.

Foster-Voigt Co., \$26 3-8 per linear foot.

J. Mott, \$26 per linear foot.
Pacific Construction Co., \$24 3-8 per linear foot.

Contra Costa Constr. Co., \$24 7-10 per linear foot.

Healy-Thibbitts Constr. Co., \$24 3-10 per linear foot.

Mercer-Fraser Co., \$24 9-10 per linear foot.

F. Rolandi, \$29 7-8 per linear foot.
Hyde-Hodges Co., \$26 per linear foot.

The contract has been awarded to Healy-Thibbitts Construction Company on their bid of \$24 3-10.

BUILDING SUPERINTENDENT.

Glacken, Edw. E. General building superintendent, architectural and structural; supervision of any class of building construction. Expert in reinforced concrete, including cost data, design, floor load, quantity surveying, etc. Address 568 Golden Gate Ave. Phone Franklin 7619.

Eliminate Form Work in your concrete construction

The cost of form work doubtless has often caused you to make alterations in plans you would have liked to carry out. It is especially so in curved or arched construction—admittedly the strongest and most pleasing type.

Self-Sentering will enable you to plan roofs, floors, ceilings, walls, partitions, etc., without form work of any kind. It is adapted with equal facility to flat, inclined or curved surfaces. Concrete roofs of any character may be constructed with it. Floors can be planned with arched slab construction on spans up to 12' in width. Partitions built with it need be only 2" thick—a great saving of floor space in large lofts.

Self-Sentering is a new reinforcement and centering combined. It is manufactured in sheets 28" wide and up to 12' long, or curved in the factory to any desired radius. It is made up of a series of cold-drawn heavy ribs connected with the most efficient form of expanded metal, all cut and drawn from one sheet of special steel.

Write for our Fireproofing Handbook

We shall be glad to send you a complimentary copy on request. It is a handsome 80-page illustrated book, published for Architects, Engineers and Contractors. It will give you concisely all the facts you want to have on file regarding Self-Sentering.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

OAKLAND AND ALAMEDA COUNTY.

BUNGALOW — 1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick Nelson Co., 2025 Addison St., Berkeley. The bungalow will contain five rooms, bath and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the living and dining rooms and reception hall. Furnace heat will be installed. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are being prepared and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$5,000. Piedmont, Alameda Co., Cal. Architect, Joseph Caben, 45 Kearny St., S. F. Owner, E. Greenhood. The house will contain eight rooms, sleeping porch, bath and laundry. Interior will be handsomely finished in pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, John A. Bischoff, 349 62nd St., Oakland. The house has been designed for an eight-room dwelling with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base,

frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, F. P. Peake & Co., 2127 University Ave., Berkeley. The house will contain eight rooms and bath, and is to be located on Mariposa street. Interior trim will be largely of pine with some hardwood veneer. Hardwood floors will be used in the living and dining rooms. There will be furnace heat and an open fire place. Mantel will be of brick. Bath room will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owners are now in the market for all materials.

RESIDENCE — 2 story and base, frame, \$18,000. Piedmont, Alameda Co., Cal. Architect, William Knowles. Hearst Bldg., S. F. Owner, William Ede. The house will contain ten rooms, baths, sleeping porches and a laundry. Interior will be finished in pine and hardwoods. Hardwood and composition floors will be used. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Baths will be finished in tile and will have composition floors. The exterior of the dwelling will be covered with cement plaster. Some clay tile will be used on the roof. Plans are complete and the work is being done by Day Labor under the personal direction of the architect.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owners, A. Wellman and John Holm, 2321 10th St., Berkeley. The dwelling has been designed for eight rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor.

BUNGALOW — 1½ story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. B. Crane, 1600 La Loma Ave., Berkeley. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now in the market for all materials.

RESIDENCE — 2 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, Edward G. Garden. Phelan Bldg., S. F. Owner, Mrs. E. G. Garden. The dwelling will contain eight rooms, bath and garage. Interior will be handsomely finished in pine and redwood. Hardwood floors will be used in throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath rooms and kitchen. The exterior will be covered with cement plaster on metal lath. A

clay tile room will be used. An automatic water heater will be installed. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owners, Oakland Building and Mortgage Co., 1106 Broadway, Oakland. The house has been designed for an eight room dwelling with bath and sleeping porch. The interior will be finished in pine and redwood with oak floors in the living and dining rooms and reception hall. There will be furnace heat and a large open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

BUNGALOW — 1 story and base, frame, \$2,000. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, W. E. Jason. The dwelling is to contain five rooms and bath. All interior trim will be of pine. Hardwood floors will be used in the principal rooms. There will be an open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOWS — 2, 1 story and base, frame, \$2,000 each. Albany, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The dwellings will each contain five rooms and bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be large open fire places in the living room with tile or brick mantels. Some tile will be used in the bath rooms and kitchens. Exteriors will be covered with shingles. Plans are complete and the work will be done by Day Labor.

BUNGALOW — 1½ story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The house has been designed for a seven-room dwelling with all modern conveniences. Interior finish will be of pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. A cement floor will be used in the bath room. There will be a large sleeping porch. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE — 3 story and base, frame, \$35,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Investment Co. The building will be arranged for a number of two and three room apartments, and will be erected on Channing Way near College avenue. The interior will be finished in pine with some hardwood veneer and floors. There will be steam heat and open fire places. Mantels will be of brick and tile. All suites will be equipped with wall beds and will have private bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are

complete and the work will be done by Day Labor.

FLATS — 2 story and base, frame, \$4,400. San Francisco, Architect, none. Owner, R. J. Hooper, 159 12th Ave., S. F. The building will have a frontage of 32 feet and a depth of 75 feet. There will be two stores on the first floor and two modern flats on the upper floor. Interior will be finished in pine throughout. Elm panels will be used in the dining rooms. Tile will be used in the baths. The exterior of the building will be covered with pressed brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS — 2 story and base, frame, \$6,100. San Francisco, Architect, none. Owner, L. A. Ginst, 732 Montgomery St., S. F. The building will be erected on Union street at a point where the greatest grade will necessitate a large concrete retaining wall. The building will have a frontage of 22 feet and a depth of 54 feet. Interior finish will be of pine throughout. There will be gas grates and tile mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

FLATS — 3 story and base, frame, \$8,000. San Francisco, Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Paul De Martini. The building will be erected on Broadway between Mason and Taylor streets, and will be arranged for three flats of five and six rooms each. Interior finish will be of pine and elm. There will be open fire places and tile or brick mantels. The exterior of the building will be covered with shiplap and rustic. Plans are being prepared and when complete the work will be done by Day Labor.

FLATS — 2 story and base, frame, Cost not stated. San Francisco, Architects, C. M. and A. F. Rousseau, Madanack Bldg., S. F. Owner, J. Rodgers. The building will be erected at the northwest corner of Pacific and Mason streets and will be arranged for a store and twelve flats of four and five rooms each with bath. Interior finish will be of pine with some elm panels. There will be either open fire places or gas grates. The exterior of the structure will be covered with cement plaster on metal lath. Plans are being figured.

FLAT — 2 story and base, frame, \$1,500. San Francisco, Architect, C. O. Clausen, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Greenwich street near Baker, and will contain a store on the first floor and one five-room flat above. Interior finish will be of pine throughout. There will be open fire places and brick mantels. Some oak flooring will be used. The exterior of the building will be covered with brick veneer and cement plaster. Plans are being prepared.

FLATS — 2 story and base, Class C construction, \$12,000. San Francisco, Architect, none. Owner, J. G. Kinnaman, 1676 Fulton St., S. F. The building will cover an area of 2 x 8 feet. There will be one store and the entrance to the flat above on the first floor. Upper floors will contain seven flats. Exposed walls will be of reinforced concrete faced with white cement plaster. Interior finish will be of pine and hardwood. There will be open fire places and tile mantels. Plans

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

SCHOOL—1 story and base, frame, \$5,000. Modesto, Stanislaus Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, Shiloh School District. The building is to be designed for a district school and will contain two standard size class rooms. Interior will be finished in pine. There will be composition blackboards. Two Lenox heaters are to be installed. The exterior of the building will be covered with rustic and shingles. Plans are being prepared.

JAIL—1 story and base, steel and reinforced concrete, \$6,000. Turlock, Stanislaus Co., Cal. Architect, none. Owner, City of Turlock. The building will be 25x70 feet, containing seven cells, and has been designed for a City and County Jail. Considerable structural steel will be used. Interior finish will be of pine. Special cell work will be called for. The exterior of the building will be faced with cement plaster. Plans are complete and bids will be advertised shortly.

LODGE HALL—2 story and base, brick. Cost not stated. Taft, Kern Co., Cal. Architect, J. M. Saffell. New Fish

Bldg., Bakersfield. Owners, Odd Fellows' Hall Association. The building has been designed for stores on the first floor and large lodge hall and offices on the second floor. Interior will be finished in pine and hardwood. There will be patent store fronts. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be opened on April 4th. Plans and specifications can be secured from the architect. A check for 10% must accompany all bids and be made payable to S. A. White.

SCHOOL—1 story and base, brick, \$20,000. Taft, Kern Co., Cal. Architect, O. L. Clark, Bakersfield. Owners, Taft School District. All bids for the construction of this building have been rejected as being above the amount available for construction. Plans are now being revised and new bids will be called for in the course of the next two weeks.

THEATRE—4 story and base. Class A construction, \$200,000. Fresno, Fresno Co., Cal. Architect, C. A. Neussdorfer, Humboldt Bank Bldg., S. F. Owners, W. Parker Lyons and L. L. Cory. The building will be designed for a combination store and theatre building and will be fireproof throughout. A complete steel frame will be used with walls of brick faced with pressed brick and terra cotta. Interior finish will be of pine, hardwood and ornamental plaster. There will be a modern system of heating and ventilation. Floors will be of concrete. Complete stage equipment will be included in the building. Plans are being prepared.

Contracts Awarded.

FLAT—2 story and base, frame, \$5,400. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkin & Swartz, Fresno. Owner, P. S. Turnbull. Contractor, E. P. Smith, Fresno. Contract price, \$5,400.

LOS ANGELES AND SOUTHERN CALIFORNIA.

RESIDENCE—2 story and base, brick and frame, \$10,000. Los Angeles, Cal. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owner, J. C. Rivers. The dwelling will be erected on a large tract and has been designed to contain twelve rooms, baths and sleeping porches. A two-story garage will also be erected on the property. Interior finish of the dwelling will be of pine and hardwoods. Tile will be used in all the bath rooms. A central heating system will be installed. There will be a number of open fire places with brick and tile mantels. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster and brick veneer. Plans are complete and figures are being taken.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Anton Reif, Higgins Bldg., L. A. Owner, Adolph Jahnske. The building will cover a lot 56x75 feet. There will be a number of two room apartments, all of which will have private baths and will be equipped with wall beds. Interior finish will be of pine with some oak veneer and floors. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and artificial stone. Plans are complete and figures are being taken on the work.

LAUNDRY—2 story and base. Class C construction, \$100,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owners, Excelsior Laundry Co. The building will occupy a corner site and will cover an area of 200x300 feet. Floor will be of cement. There will be metal window frames and sash and fireproof doors. The estimated cost does not include special machinery. The exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner, F. Hill. The building will cover an area of 79x120 feet. The first floor will contain four stores besides the hotel office and lobby. Upper floors will be arranged for a total of 105 guest rooms and 38 baths. Plans in-

clude steam heat, elevator service, hot water plant, vacuum cleaning, tile bath rooms. Interior finish will be of pine and hardwood. Cement floors will be used in the baths. Metal window frames and sash are specified. The architect is now completing the working drawings. The exterior of the building will be faced with pressed brick.

HOTEL—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, Henry L. Wilson, Story Bldg., L. A. Owner, E. Avery McCarthy. The building is to cover an area of 50x110 feet. The first floor will contain office and lobby and upper floors a total of 64 rooms and 18 baths. Interior finish will be of pine throughout with tile used in the bath rooms and some ornamental plaster in the lobby. There will be steam heat and hot and cold running water. The exterior of the building will be faced with pressed brick. Plans for the work are now nearly complete.

HOTEL—12 story and base, reinforced concrete, \$300,000. Los Angeles, Cal. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. The building is to be erected on the east side of Spring street, and will have a frontage in that street of 60 feet and a depth of 165 feet. Preliminary plans have been prepared and show a total of 300 guest rooms, about 50 per cent of which will have private baths. Construction is to be fireproof throughout. William Richards, Wright and Callender Bldg., is the engineer in charge of the reinforced concrete design. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Interior finish will be of metal and hardwoods. Floors and roof will be of concrete. Interior partitions will be of hollow tile. The exterior of the building will probably be faced with pressed brick and terra cotta. Preliminary plans only have been prepared and further notice will be given in these reports as soon as working drawings are ready.

SCHOOL GROUP—Class A construction, \$650,000. Los Angeles, Cal. Architects, Allison & Allison, Hillernan Bldg., L. A. Owners, State of California. Information received from the State Architect's office in Sacramento states that on March 26th the following firms had applied for plans and specifications on the State Normal School at Los Angeles. Over \$650,000 is available for construction. Bids will be opened in Sacramento on April 5th: Gladding-McBean & Co., Crocker Bldg., San Francisco; Latourette-Fical Co., Sacramento; Sound Construction Co., San Francisco; Arthur Arlett, Oakland; McLaren & Petersen, San Francisco; Lewis A. Hicks Co., Rialto Bldg., San Francisco; Builders' Exchange of Alameda County, Oakland; D. Zelinsky, San Francisco; Southwestern Construction Co., Los Angeles; Creller & Seaman, Pasadena; J. F. Atkinson, Los Angeles; F. W. Walton & Son, Hollywood; Alta Planning Mill Co., Los Angeles; W. A. Schumacher Construction Co., Los Angeles; Los Angeles Planning Mill Co., Los Angeles; P. O. Engstrom, Los Angeles; Somers & Lund, Los Angeles; Thomas Haverly, Los Angeles; James H. Jacobs Co., 356 South Spring, Los Angeles; C. Leonardt, 708-10 H. W. Hellman Bldg., Los Angeles; James L. McLaughlin, 244 Kearny, San Fran-

also; Grant Fee, 2440 16th St., S. F.; Western Construction Co., 538 Bradbury Bldg., Los Angeles; Munger & Munger, 174 E. Union, Pasadena; P. Rolandi, 550 Montgomery, San Francisco; Wm. Simpson Construction Co., 728 Tinklin Bldg., San Diego.

STORES AND OFFICES—7 story and base. Class A construction, \$180,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Isaac Hellman. The building will be erected on Spring street adjoining the Ilbernian Building, and will have a frontage of 39 feet and a depth of 160 feet. There will be a complete steel frame, reinforced concrete walls, floor and roof, hollow tile interior partitions and suspended metal ceilings. The exterior will be faced with mat glazed terra cotta with a granite base. Interior trim will be of metal and oak with marble wainscoting. There will be metal window sash and frames. Steam heat, elevator service, a vacuum cleaning system and mail chutes are specified. Plans are complete and figures will be called for at once.

STORES AND OFFICES—8 story and base, reinforced concrete. Cost not stated. Pasadena, Los Angeles Co., Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Matthew Slavin. The building will occupy one of the most important business corners and will cover an area of 50x90 feet. Construction will be of the reinforced concrete type throughout. There will be two stores on the first floor and a total of 100 offices on the upper floors. Interior partitions will be of metal lath and plaster. Interior finish will be of mahogany with marble wainscot and tile floors. There will be steam heat, elevator service and a vacuum cleaning system. Metal window sash and frames will be used. The exterior of the building will be faced with cement plaster. Plans are being prepared.

STORE AND LOFTS—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, W. S. Garrett, Currier Bldg., L. A. Owner, H. O. Vogel. The building will have a street frontage of 61 feet and a depth of 144 feet. The first floor will be fitted for store purposes and upper floors for light lofts. Interior finish will be of pine. There will be patent store fronts, metal window frames and sash and fireproof doors. A freight elevator will be installed. Exterior of the building will be faced with pressed brick. Plans are being revised and figures will be called for shortly.

LOFTS—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owner, Billike. The building is to be occupied partly by a laundry and the upper floors will be used for lofts. Construction will be of reinforced concrete throughout with metal window sash and frames. Interior will be finished in pine. The exterior of the building will be faced with cement plaster. The structure will cover an area of 45x71 feet. Plans are being prepared.

BRIDGES—1, reinforced concrete. Cost not stated. Naples, Santa Barbara Co., Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Naples Company. Two of the bridges will be 20 feet wide and 70 feet long and are to be constructed over Toledo street. The other two bridges

will be 15 feet wide and 70 feet long and are to be erected at Neapolitan Lake. Plans are being prepared and bids for the construction will be called for within a few days.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owner, Charles E. Bergin. The building will be used for a commercial garage and will cover an area of 50x150 feet. The greater portion of the floor space will be used for storage purposes. Interior finish of the office will be of pine. There will be a cement floor and metal window frames and sash. Plans are complete and figures are being taken.

LODGE HALL—3 story and base. Class C construction. Cost not stated. Pasadena, Los Angeles Co., Cal. Architects, Foss Building and Designing Co., 100 East Colorado St., Pasadena. Owners, Odd Fellows' Hall Association. This work has been mentioned here before when the plans were first being prepared. Working drawings are complete and figures will be called for at once. The building will cover an area of 50x98 feet. Kitchen and banquet rooms will be located in the basement; first floor will be arranged for stores and upper floors for club rooms, library, billiard hall and lodge rooms. Interior finish will be of pine and hardwood. There will be a central heating system. The exterior of the building will be faced with pressed brick.

SCHOOL—2 story and base, brick and frame construction, \$28,000. Los Angeles, Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Women's Board of Home Missions. The building has been designed as a school for Spanish girls, and will contain accommodations for 72 pupils. Interior finish will be of pine. There will be a steam heating system. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and figures will be taken by the architect within a short time.

SCHOOL—1 story and base, concrete and frame, \$25,000. Venice, Los Angeles Co., Cal. Architects, Eager & Eager, Story Bldg., L. A. Owners, Venice School District. The building will be built around the three sides of a court and will cover an area of 100x112 feet. The central portion will contain an auditorium equipped with stage and dressing rooms. One of the wings will contain four standard class rooms and the other the domestic science and manual training departments. The building will have concrete foundation, cement plaster over metal lath on the exterior, composition roofing, pine trim, lavatories, separate power plant for steam heating system. Plans are being prepared.

THEATRE—1 and 2 story and base, brick. Cost not stated. Imperial, Imperial Co., Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, W. J. McHenry, Imperial. The building will cover an area of 50x135 feet and will contain several stores besides the main theatre portion, which will have a seating capacity of 800 people. Complete stage equipment will be included in the building. Interior finish will be of pine and ornamental plaster. There will be a modern ventilating system installed. The exterior of the building will be faced with pressed brick and cement plaster. Plans

are complete and in the hands of the owner who will take all figures on the work.

Contracts Awarded.

WAREHOUSE—3 story and base. Class A construction, \$120,000. Los Angeles, Cal. Architect, Hudson & Munsell, Simon Bldg., L. A. Owners, John A. Reelings Sons Co. Contractors, Alta Planning Bldg. general construction; Baker Iron Works, structural steel; Otis Elevator Co., elevator work.

STORES AND LOFTS—5 story and base. Class B construction, \$43,000. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, Edward D. Silent & Co. Contractor, J. P. Atkinson, Story Bldg., L. A. Contract price, \$43,000.

THEATRE—3 story and base. Class A construction, \$105,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owners, Little Theatre and Institute of Fine Arts. Contractor, E. O. Engstrom, 5th and Seaton Sts., L. A. Contract price, \$105,000.

MUNICIPAL WATER SYSTEM—\$16,000. Fullerton, Orange Co., Cal. Engineer, City Engineer, Fullerton. Owners, City of Fullerton. Contractor, R. C. Lowell, Monrovia. Contract price, \$46,000.

PORTLAND AND OREGON.

APARTMENT HOUSE—6 story and base, reinforced concrete, \$70,000. Portland, Ore. Architect, J. S. Atkins, Henry Bldg., Portland. Owner's name withheld. The building is to be erected on a corner site and will cover an area of 50x140 feet. Construction will be fireproof throughout. The interior will be arranged for a total of 120 rooms, mostly two-room suites. There will be steam heat, elevator service, wall beds, private baths and a vacuum cleaning system. The exterior will be faced with cement plaster. Bids will be called for next week.

HOSPITAL—4 story and base, reinforced concrete, \$400,000. Portland, Ore. Architect's name not given. Owners, City of Portland. Preliminary plans for a new City and County Hospital have been approved by the commissioners and working drawings will be ordered prepared. Funds for the construction will not be available until next year. The building will be erected on the site of the present City and County Hospital and will be built in units. Further announcement will be made of the work in these columns.

SCHOOL—2 story and base, brick. Cost not stated. La Grande, Ore. Architect, John L. Slater, La Grande. Owners, La Grande School District. No particulars of this building have been given as yet. Mr. Slater has just received the commission to prepare plans and it will be some time before bids are called.

SCHOOL—2 story and base, brick \$30,000. Forest Grove, Ore. Architects, W. E. Bell and J. Jerry Willing, associated; Worcester Bldg. Portland. Owners, Forest Grove School District. Plans are nearly complete and bids will be called for early in this month for the construction of a twelve room school building. There will be a central heating system and other modern improvements. The exterior will be faced with pressed brick.

THEATRE—1 story and base. Class A construction. Cost not stated. Portland, Ore. Architect, Benj. G. McPhee.

rail, Sheldon Bldg., S. F. Owner, Calvin Helz. This building will replace the old Pittock Block and will contain the theatre the offices and an auxiliary steam plant of the Northwestern Electric Co. Construction will be of the Class A type throughout. Complete details of the building will be given in the next issue of the Building and Industrial News.

Contracts Awarded.

BANK—2 story and base, brick. Cost not stated. Roseburg, Ore. Architect, Earl A. Roberts, Selling Bldg., Portland, Ore. Owners, First Trust and Savings Bank. Contractor, W. C. Arthur, Portland. Contract price not stated.

APARTMENT HOUSE—1 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Fred S. Allerton, Wilcox Bldg., Portland. Owner, Harry Howard. Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price not stated.

BREWERY GROUP—3 story and base. Mill construction, \$75,000. Portland, Ore. Architect, Aaron H. Gould, Worcester Bldg., Portland. Owners, Weinhard Brewery Co. Contractors, George Langford & Sons, Builders' Exchange Bldg., Portland. Contract price, \$75,000.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE ADDITION—2 story, brick and concrete, \$50,000. Seattle, Wash. Architects, Blackwell & Brown, Northern Bank Bldg., Seattle. Owner, H. S. Amon. The two-story addition will be made to a five-story building. The present building will be raised and the additional stories constructed on a grade with the street. The exterior will be faced with pressed brick. Plans are now being prepared.

PIER AND WAREHOUSES—Concrete and frame construction, \$500,000. Seattle, Wash. Engineer, Paul P. Whitman, Port of Seattle Commission, Seattle. Owners, Port of Seattle Commission. Bids will be opened on April 9th for the construction of the central waterfront improvement, which is to consist of a wharf 1200 feet long and two frame warehouses. Other large improvements will be made under the direction of the same commission during the year which will total \$1,000,000.

GARAGE—2 story and base, brick and concrete, \$25,000. Tacoma, Wash. Architect, I. C. Irwin, Chamber of Commerce Bldg., Tacoma. Owner, August Boecklin. The building will occupy a corner site and will be designed for a commercial garage. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. The exterior of the building will be faced with cement plaster. Plans are nearly ready for figures.

WAREHOUSE—4 story and base, brick and terra cotta, \$100,000. Tacoma, Wash. Architect, I. C. Irwin, Chamber of Commerce Bldg., Tacoma. Owners, California Wine House. The building will be designed for stores and office of the company on the first floor and warehouse on the upper floors. Interior finish will be of pine and hardwood. There will be steam heat and elevator service. Metal window frames and sash will be specified. The exterior of the building will be faced with terra cotta. Plans are nearly complete and figures will be called for shortly.

CITY HALL—2 story and base, rein-

forced concrete, \$17,500. Puyallup, Wash. Architect, R. E. Borhek, Savage-Seofield Bldg., Tacoma. Owners, Town of Puyallup. The building will be in the classic style and will be arranged to contain the police and fire department headquarters, council chamber and executive offices. Interior finish will be of pine and hardwood. There will be a central heating system. The exterior of the structure will be faced with cement plaster. Plans are being prepared.

SCHOOLS—2, 2 story and base, brick and concrete, \$77,000 and \$78,000, respectively. Seattle, Wash. Architect's name not given. Owners, City of Seattle. Subfigures are wanted on the mill work, lumber and ornamental iron work on two new schools being constructed by the Manhattan Co., Inc., Central Bldg., Seattle.

RESERVOIR—Steel and concrete. Cost not stated. Forks, Wash. Engineer's name not given. Owners, Washington Oil Co., represented by Gerard-Phillip Co., Eitel Bldg., Seattle. Bids will be called for at once for the construction of a steel and concrete reservoir on one million gallons capacity. Plans and specifications are on file at the offices of the representatives.

Contracts Awarded.

RAILROAD CONSTRUCTION—\$1,700,000. Seattle to Sumas, Wash. Engineers, Engineering Dept. Northern Pacific R. R. Co. Owners, Northern Pacific R. R. Co. Contractors, Seattle Construction Co., Seattle. Note: It is generally assumed that the Seattle Construction Co. is composed of Grant Smith & Co. and Stillman.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10570. Tools for working in wood, metals, and stone.—A report from an American consulate in a European country states that a local business man desires to import light hand tools for working in wood, metals, and stone. Correspondence should be in Italian, German, or French.

No. 10572. Lighthouse and bouys.—The American consul at Montevideo, Uruguay, reports that a call for tenders has been issued by the Minister for Public Works for 1 bouy- lighthouse and 30 bouys of 4 meters (13.12 feet) focal height. Well known and reliable houses only may tender for these bouys. Bids will be received until April 28, 1913, at the Oficina de Obras Publicas, Montevideo, Uruguay.

No. 10573. Supplies for manufacturers and electrical establishments.—A report from an American consular officer in a European country states that a resident of his district has requested to be placed in communication with American manufacturers of the following articles: Asbestos rope and twine, boiler mountings and valves, leatheroid, leather and rubber belting, cotton clippings, electric apparatus, electric wire and cord, bolters, india rubber and gutta-percha insulating material, iron and

steel bars, plates, rails, and commercial iron, lubricating rope, vaseline, paraffin, wire rope, rosin, cottonseed oil, nitrate of soda. The inquirer desires to act as representative of manufacturers of the above articles. He states that he is in a position to handle them successfully and can furnish fully satisfactory references. Correspondence maybe in English.

No. 10575. Flexible gas tubing.—A business man in Germany informs an American consular office that he desires to hear from American manufacturers of flexible gas tubing, a sample of which accompanied the report and can be obtained from the Bureau of Foreign and Domestic Commerce. The inquirer has been importing this class of tubing from a well-known American firm which recently discontinued that part of its business.

No. 10469. Dredge buckets.—The Roads and Bridge Department, Boulogne, France, invites tenders for 36 dredge buckets. Particulars may be obtained of M. Viosin, Ponts et Chaussées Boulogne, France.

No. 10471. Steam launch.—The Home Office, Rio de Janeiro, invites tenders for a steam launch, the cost of which is estimated at \$3,450. Tenders will be received through local agents only.

No. 10472. Gas stoves, meters, and installations.—The Corporation, Macclesfield, Cheshire, England, will receive tenders for gas stoves, meters, and automatic installation at an estimated cost of \$73,000.

No. 10473. Bridge construction.—Tenders are invited for the construction of three bridges over the Rhine River and other works at an estimated cost of \$632,645. Particulars may be obtained of the International Rheingrullungs Kommission, Rorschach, Switzerland.

No. 10474. Timber sales.—The American consul general at Vancouver, British Columbia, has forwarded copies of notices stating that tenders will be received by the Minister of Lands, until April 23, for the purchase of a license to cut 7,000,000 feet of timber. Tenders will be received until May 8th for purchase of a license to cut 900,000 feet of timber. Particulars in each case can be obtained of the Chief Forester, Vancouver, British Columbia, Canada.

No. 10476. Mineral, vegetable, and animal oils.—A firm of large importers and wholesale dealers in mineral, vegetable, and animal oils in a Mediterranean country informs an American consulate that it desires to represent American exporters of these oils.

No. 10447. Electric heating and specialties.—A report from an American consular officer in a European country states that a resident of his district has inquiries for small special articles in the electric heating and lighting branches. Price should be quoted c. l. f. Hamburg, including boxing. The inquirer requests that manufacturers will not write and ask him what he wants, but will inform him what they have to offer. Correspondence may be in English.

No. 10505. Harbor improvements.—The American consulate at Mazatlan, Mexico, reports that bids will be opened in Mexico City at the end of April for the harbor improvements at Mazatlan. If this work is undertaken, it will also mean the completion of the railroad from Durango to Mazatlan, and assures the importance of the port of Mazatlan as the most important between San Francisco and Panama.

Two Latest Additions to San Francisco's Theatre Buildings. 2	

Editorial Comment.

Building in San Francisco for the month of March showed a healthy tone. Permits and recorded contracts on private construction looked up more than 2 million dollars on the month's work and City contracts and Exposition work raised this by more than a million more so that the grand total for March, 1913, amounted to \$3,576,376. Tabulated the figures would read as follows:

PRIVATE CONSTRUCTION

Brick	\$1,032,751
Frame	955,761
Alterations and additions.	153,341

Total	\$2,171,853
To this add	
Exposition contracts	\$ 266,479
Street work	271,561
City construction	866,483

Grand Total

\$3,576,376
This shows a healthful gain over last month and for that matter a favorable comparison with other years. As to the grand total of last month the figures amounted to \$2,736,813 which included harbor work for \$456,400 during the month of February while this month no contract was let on the water front.

Compared to former years the month of March in private construction runs as follows:

March, 1904	\$1,342,858
March, 1905	1,879,394
March, 1906	3,096,561
March, 1907	5,173,905
March, 1908	2,954,287
March, 1909	2,956,308
March, 1910	2,381,909
March, 1911	2,819,727
March, 1912	2,146,011
March, 1913	2,171,583

So far this year has shown a steady increase. In private construction January recorded \$1,553,355; February, \$1,979,043, and March, \$2,171,583. January recorded \$172,000 for Exposition work. \$389,334 for government buildings and \$475,200 for Harbor construction. So, also, February recorded \$456,400 for Harbor work while March had no report from either the United States Government or the State Board of Harbor Commissioners.

Altogether building seems to be going on at an encouraging rate of growth. If the coming months continue the good work. The outlook generally seems to be good for San Francisco and the prospects for the builders of the City are hopeful to say the least.

Warden Hoyle comes back at the investigation committee and Fremont Older of the Bulletin to the effect that the investigation at San Quentin is the result of a scheme by Older to discredit Hoyle because he would not give special privileges to Abraham Ruef.

Older is certainly going the limit in trying to free Ruef. And he is using methods that are anything but fair and right. To begin with he was unfair in his methods even in the graft prosecutions and what convictions were secured were secured in spite of Older rather than with his aid and support except that he gave publicity in the Bulletin to a side of a question that might otherwise have been suppressed in the news.

Now he is flooding the Bulletin with a lot of maudlin slush about prisoners and the brutality of prison punishment that in the main obscures the really commendable points that may be made in support of prison reform.

The other day he came out with an open letter to Judge Lawler that read more like the utterance of an imbecile than the statement of a sane man. In it he told the Judge that Christ forgives Older. Perhaps he does. Perhaps he needs it. In any event that is no reason why Abe Ruef should be pardoned any more than any other person who was convicted of a similar crime.

The only plea that has the semblance of reason in the case, Older does not make. And that is that those who were equally guilty with him in the bribery cases remain unpunished. So far as Hoyle is concerned his statement that those who wish to attack him are proceeding by indirect means seems to be borne out by developments.

J. Pierpont Morgan has passed to the Great Beyond and the world moves on just the same. The statement by his doctor that the investigations of the Pujo Committee hastened his death has little or no foundation of fact. If it did it was his own fault for if his acts were fair and proper he need not fear publicity. Morgan belonged to the Aristocracy of Money and represented the power and exclusiveness of wealth. He was the antithesis of Lincoln. He was perhaps a good man in his way, but his way was not the way of democracy. He perhaps thought he was divinely chosen to rule in finance. He was an autocrat in his own realm.

The great financial machine that he built up is probably more a menace to free institutions than a benefit. Certain it is that it is a power within the state that is oftentimes more powerful than the government itself and the men who direct it are in no way directly amenable to the people.

The collection of art and antiquities by Morgan will be a distinct addition to the new world. He collected treasures from the entire world. His great wealth was not expended in the erection of libraries like Carnegie but was invested in the rare products of the old masters. Estimates of the good or evil effects of the life of such a man will differ with the individual. He represented the autocrat in the financial world and such a figure will always be at variance with a democracy.

The Two Latest Additions To San Francisco's Theatre Buildings, The New Tivoli And G. M. Anderson Theatre.

Tivoli Theatre.

The new Tivoli Opera House is a model of convenience and arrangement, embodying as it does many features new to San Francisco theatre patrons. The interior is treated in the Spanish Renaissance with walls decorated with mural paintings. The ceiling is divided into panels by deep beams, which support a glass filled lattice work over which is a false ceiling designed to reflect the electric rays through the glass lattice and thus spread a soft light throughout the auditorium. Ample exits are provided. The stage is the largest in the city and will give splendid accommodation for large productions. In connection with the orchestra is a pipe organ located on either side of the proscenium, but concealed from view.

Entrance to the theatre is gained through a wide vestibule opening direct from Eddy street, and is decorated with California marble and mural paintings. This leads to the auditorium floor proper and also to the loges boxes and balcony by means of an incline, affording easy access to the upper part of the house.

Just above the auditorium is the lodge balcony, which is given up entirely to boxes, having a seating capacity of from eight to ten people each with retiring room and a broad promenade in the rear of them. Above the balcony is the main balcony and, like the main floor, has an unobstructed view of the stage. Still higher, as if to commemorate the days of the Old Tivoli Theatre, the management has provided a promenade gallery, a place that was dear to the Old Theatre goers, where formality was a stranger, and one gave himself over to the complete enjoyment of the opera.

This building has been completed in record breaking time, one hundred working days in all. This would have been impossible in any other city. The reason of completion on time is the result of perfect labor conditions in San Francisco.

Anderson's Theatre.

O'Brien & Werner have been commissioned by G. M. Anderson to prepare plans and specifications for his new theatre to be constructed in O'Farrell street between Powell and Stockton, on the site of the old Alcazar theatre. This theatre will be one of the finest and costliest in San Francisco. Both the exterior and interior will be treated in the Spanish Renaissance, with the walls of the interior decorated with mural paintings.

The light will be of indirect type, thus giving a soft effect throughout. Ample exits are provided, eight from the auditorium and eight from the balcony. On the mezzanine floor will be located the offices of the management and a large promenade foyer.

Entrance to the theatre will be through a wide vestibule finished in beautiful California marble.

The seating capacity will be 1,600. The stage will be one of the largest in the city, with the proscenium opening 30 by 38 feet. The dressing rooms will be located on either side of the stage and will be well lighted and ventilated and fitted with the latest modern conveniences. The basement will be arranged for a cafe.

Thomas O'Day will be Mr. Anderson's personal representative for the construction of the theatre. The cost of building and ground will be about \$550,000.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 9 story and base. Class A construction, \$250,000. Architects, Ross & Burgen, 310 California St., S. F. Owners represented by Harrigan-Weidemuller Co. A large site has been purchased, fronting 87½ feet on Broadway and extending back 137½ feet. The lot is just east of Fillmore street and is held by the Man Estate. A lease has been secured through the offices of Harrigan-Weidemuller Company, for the purpose of erecting thereon a nine-story Class A apartment building to be financed under the New York co-operative system. These agents report meeting with great encouragement in this enterprise, and to date have a number of applications from some of the most prominent families for apartments in the building. The lot was

selected owing to the grand panoramic marine view it commands, its accessibility and its excellent environment. The building will contain sixteen apartment suites of ten rooms, two suites to each floor, with fast running passenger and service elevators, opening into private halls. The interior is to be finished entirely in hardwood with oak floors. The plumbing and steam heating are to be of the best and latest, and all bath rooms and kitchens are to be tiled throughout. Refrigerating and vacuum cleaning plants will be installed and large private safes will be in each apartment and jewel safes in each chamber. A large assembly room, suitable for dances, etc., will be an additional feature.

SAN FRANCISCO—Apartment house, 3 story and base, frame \$12,000. Architect, C. M. Cook, Riata Bldg., S. F.

Owner Mrs. Ida M. Bender. The building is to be erected at the southwest corner of Broderick and O'Farrell streets, and has a frontage on one street of 35 feet and of 75 feet on the other. The interior has been arranged for twelve apartments of three and four rooms each with private bath. Wall beds are to be used. There will be a central heating system. Interior finish will be of pine and elm panels. Some hardwood floors are specified. A hot water system will be installed. The exterior of the building will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 5 story and base, brick and steel. Cost not stated. Architects, A. F. and C. M. Rousseau, Monadnock Bldg., S. F. Owner H. C. Newhall. The building will be erected at the northeast corner of Washington and Leavenworth streets and will cover a considerable ground area. There will be a complete steel frame with reinforced brick walls, faced with pressed brick. The building has been designed for a residential apartment flats, each apartment containing five rooms and bath. Each apartment will be finished in pine, hardwood panels and will have hardwood floors. There will be built in buffets and open fire places. Plans provide for steam heat, elevator service, a hot water system and all other modern conveniences. Servants' rooms will be located in the basement. There will also be a large billiard room, wine room and social hall. A garage will be erected at one end of the lot containing room for three machines. H. C. Newhall is the owner of the property and he has spared no expense in making the building one of the finest residential apartments in the city.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Brownlee. A general contract for this building has been awarded to M. Marcusen, Royal Insurance Bldg., and he is now taking figures for a number of the special parts of the work. Firms interested in tile, both floor and wall, beds, ornamental iron, painting and electric work should see Mr. Marcusen.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$16,000. Architect, none. Owner, J. V. Campbell, 1040 Bryant St., S. F. The dwelling is to be erected on the south side of California street, east of Hyde, and will be 28x118 feet. Interior has been arranged to contain 18 apartments of two and three rooms each. There will be private bath rooms and wall beds. Interior will be finished in pine and some hardwood. Oak floors will be used in the principal rooms. A central heating system and hot water plant will be installed. The exterior of the building will be covered with rustic, shiplap and tapestry brick veneer. Plans are complete and the work will be done by Day Labor. The owner is now in the market for all of the various materials.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$20,000. Architect, J. Cather Newman, 1424 Broadway, Oakland. Owner, George T. Dunlap. The building will be erected on 1st avenue and 16th street. The work will include moving the present building to the rear of the lot and completely altering the same. Front por-

tion of the lot will be covered by the new structure. Apartments will be arranged in suites of two and three rooms each. All apartments will have connecting baths and wall beds. Interior will be finished in pine. Some hardwood floors will be used. Bath rooms will have the wainscot. There will be a central heating system and hot water supply. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the architect is taking subfigures on all parts of the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, W. G. Hinds, 46 Kearny St., S. F. Owner, J. Dening. The building is to be erected on Hyde street between Vallejo and Green streets, and will have a street frontage of 25 feet and a depth of 87½ feet. Floor plans have been arranged for five apartments of three rooms and bath each. Interior will be finished in pine with some elm panels and hardwood floors. There will be gas radiators. The will be used in the baths. All suites will be equipped with wall beds. Entrance vestibule will be finished in marble. The exterior of the building will be covered with shingles. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, W. G. Hinds, 46 Kearny St., S. F. Owner, Mrs. Picard. The house will be erected on the east side of Taylor street between Pacific and Broadway. Interior will be arranged to contain six apartments of four rooms and bath. All suites will have wall beds. The interior will be finished in pine and elm with hardwood floors in the principal rooms. Gas radiators will be installed. The entrance vestibule will be finished in marble and tile. Tile will also be used in the bath rooms. The exterior of the building will be covered with brick veneer. Plans are just started for this work. Bids will be called for on the various parts of the work within a month.

STOCKTON, SAN JOAQUIN CO., CAL.—Apartment house alteration and addition, \$3,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mrs. Blanchard. A frame building which now occupies the site will be raised and an addition of considerable size will be added. Interior finish will be of pine and some hardwood with oak floors in the principal rooms. Suites will consist of two and three rooms. All apartments will have wall beds and private bath rooms. Open fire places and brick mantels are specified. The work will include new plumbing, painting and mill work. The exterior of the building will be covered with rustic. Plans are being prepared.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick and frame, \$40,000. Architect, A. Burnside Sturges, Story Bldg., L. A. Owner, Dalkas M. Cate. The building has been designed in the shape of a letter U and will cover an area of 125x96 feet. Interior has been arranged for 105 rooms which are to be divided into two, three and four room apartments. All suites will have connecting baths and wall beds. A central heating system, hot water supply, vacuum cleaning and elevators will be installed. Interior finish will be of pine. The exterior of the build-

ing will be covered with veneer brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$40,000. Architect, A. W. Riewe, California Bldg., L. A. Owner, A. S. O'Neil. The building will be 50x132 feet and will contain 75 rooms which are to be arranged in two and three room suites with wall beds and private baths. Interior will be finished in pine and some hardwood. Bath floors will be of cement. There will be steam heat, automatic elevator and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick, \$70,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Sidney Goldman. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$70,000.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, E. J. Borgmeyer, Stinson Bldg., L. A. Owner, Julius P. Smith. Contractor, C. S. Blodgett, 336 North Burlington Ave., L. A. Contract price not stated.

BANKS.

OKADALE, STANISLAUS CO., CAL.—Bank, 2 story and base, brick and steel, \$12,000. Architect, Ralph P. Morrell, Odd Fellows' Bldg., Stockton. Owners, Commercial Bank. The building will be erected on one of the principal business corners in Okadale and will cover an area of 25x78 feet. The first floor is to be fitted for the exclusive use of the bank and will be finished in hardwood and tile. There will be coin and safety deposit vaults. Considerable ornamental iron and bronze will be used. The upper floor will be arranged for a number of modern offices. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

ROSEBURG, ORE.—Bank, 2 story and base, reinforced concrete, \$25,000. Architect, Earl A. Roberts, Selling Bldg., Portland. Owners, First Trust and Savings Bank. This work has been mentioned here before. Plans are complete and were put out for figures on April 7th. Bids are being taken by the architect. Vaults and bank fixtures are not included in the general contract.

BRIDGES, DAMS AND HARBOR WORK.

COLMA, SAN MATEO CO., CAL.—Culverts and walls, iron and concrete. Engineer, County Surveyor, James V. Neuman, Redwood City. Owners, San Mateo County. Plans are complete and figures will be opened on April 21st by the Board of Supervisors for the construction of culverts and walls over San Bruno avenue at Colma. The work includes corrugated iron pipe and concrete end walls. Plans and specifications can be secured from Engineer Neuman, Redwood City.

SAN FRANCISCO—Bridge, steel bascule type. Cost not stated. Engineer, Engineering Dept. Atchison, Topeka

and Santa Fe R. R. Co., S. F. Owners, Atchison, Topeka and Santa Fe. Co. The Board of Public Works have approved plans and specifications for a new bascule bridge which is to be erected by the Atchison, Topeka and Santa Fe Company over Islals Creek at Kentucky street. With the construction of this bridge 1500 additional feet of dockage will be opened up along Islals Creek Channel. Bids will be called for shortly. Working drawings are now being made.

NEWBERG, ORE.—Bridge, steel and concrete, \$85,000. Engineer, County Surveyor Marlon County, Newberg. Owners, Marlon and Yemhill Counties. Plans for the construction of a steel span bridge 735 feet in length with two approaches 1,150 feet in length have been approved. Bids for the construction will be called for at once. The structure is to be 90 feet above low water. Full particulars can be secured from the County Surveyor of either county.

PORTLAND, ORE.—Bridge, steel and concrete, \$1,700,000. Engineers, Waddell & Harrington, Portland. Owners, Multnomah and Clarke Counties. Waddell & Harrington, engineers, submitted estimates as to the probable cost of a bridge across the Columbia River, to the joint interstate bridge committee of Multnomah and Clarke Counties, at the Commercial Club Wednesday. They figured that the bridge proper could be built for \$1,200,000 and that \$1,700,000 would pay the cost including the long approach over the sloughs on the Oregon side. The estimates contemplate a lift span rather than a swing draw, and it was stated that this type was favored by the Government engineers. The figure included all construction, including carlines, electric lights and other features.

CHURCHES

SAN FRANCISCO—Church, 2 story and base, brick and steel, \$50,000. Architects, Shea & Lofquist, Bank of Italy Bldg., S. F. Owners, St. Patrick's Parish. The present building on Mission street, between Third and Fourth streets, was reconstructed after the fire and has been made to do until the present time. Plans for the complete rehabilitation of the edifice have been prepared and money is to be raised at once for the construction. There will be a large amount of structural steel used. Interior will be finished in pine and ornamental plaster. The exterior will be faced with brick. Plans are being prepared and work will be started within a few months. Father Rodgers is in charge of the building.

FLATS.

SAN FRANCISCO—Flats, 2 story, attic and base, frame, \$14,000. Architect, Albert Schroepfer, Foxcroft Bldg., S. F. Owner, Henry Eisenberg. The building will be erected on Pacific street west of Fillmore, and has been designed for residential flats. Each of the flats will consist of five or six rooms and bath. Interior finish will be of pine, redwood and hardwood with oak floors in the principal rooms. There will be a central heating system. Tile will be used in the baths and kitchen. There will be some marble and tile used in the entrance vestibules. Exterior of the building will be cov-

ered with tapestry brick veneer and shiplap. Plans are complete and figures are being taken by the architect.

OAKLAND, CAL.—Flats, alteration and addition, frame construction, \$3,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, P. E. Lint. The work will consist of raising the present two-story frame dwelling and adding another story underneath. Floor plans provide for a number of three and four room apartments with baths. Interior finish will be of pine and some hardwood. Oak floors will be used in the principal rooms. There will be gas grates and brick mantels. Wall beds are specified. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken for the work.

FACTORIES & WAREHOUSES.

Contracts Awarded.

LOS ANGELES, CAL.—Warehouse, 3 story and base. Class A construction, \$100,000. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owners, John A. Roebbing Sons Co. Contractors, Alta Planing Mill, 830 McGarry St., L. A., general construction, \$60,000; Baker Iron Works, structural steel, \$38,500; Thomas H. Hogan, plumbing, \$1,500; Southern California Electric Co., electric work, \$1,504.

LOS ANGELES, CAL.—Factory addition, 2 story and base, brick. Cost not stated. Architect, J. E. Kunst, Higgins Bldg., L. A. Owners, Buffalo Baking Co. Contractor, J. M. Connors, Builders' Exchange, L. A. Contract price not stated.

FIRE HOUSES.

SAN FRANCISCO — Fire house, 2 story and base, brick and steel, \$55,000. Architect, City Dept. of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works show Commary-Peterson low men at \$33,262, and they will probably be awarded the contract. Eight figures in all were submitted. A complete list of these figures can be found under the reading of San Francisco in this issue.

GARAGES.

LOS ANGELES, CAL.—Garage, 2 story and base. Class A construction. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, Charles E. Anthony. The building will cover an area of 50x165 feet and is to be designed for a commercial garage. The front portion of the first floor will be arranged for offices and will be handsomely finished. The balance of the building will be given over to storage space and machine shops. Reinforced concrete construction will be used throughout. There will be metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are ready for figures.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architects, R. D. King and Edward C. Taylor, Consolidated Realty Bldg., L. A. Owner, Mark G. Jones. The building is being designed for a commercial garage. There will be a concrete floor, metal window frames and sash

and special gasoline storage tanks. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Garage, 2 story and base, brick, \$12,000. Architect, A. W. Riewe, California Bldg., L. A. Owners, P. V. St. Clair and A. E. Gordon. The building will be 45x145 feet and is to be used for storage purposes only. Interior finish will be of pine. There will be metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are being prepared.

SEATTLE, WASH.—Garage, 1 story and base, brick and concrete, \$30,000. Architect, V. W. Voorhees, Ellet Bldg., Seattle. Owner, L. W. Roe, Roe Apts., Seattle. This building will cover an area of 121x118 feet and has been fully described in these columns before. The owner has determined to construct the building by Day Labor and is now purchasing all materials.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owner, C. E. Bergin. Contractors, Davidson Construction Co., 16th and Tennessee Sts., L. A. Contract price not stated.

GOVERNMENT WORK AND SUPPLIES.

Canal Requisitions

The Isthmian Canal Commission has received requisitions for furnishing the following supplies and material:

320 louver panels to be made of No. 20 gauge sheet copper for Cristobal terminal docks, each to be 3 feet 6 inches wide, 2 feet 7 inches high by 4½ inches thick.

One lot of 10 induction motors, slip ring type, with polar-wound motors; for use on 220-volt, 3-phase, 25-cycle circuits.

One lot of 16 slip-ring polar-wound motors, 220-volt, 3-phase, 25-cycle, fully enclosed, induction motors for use on overhead traveling crane.

One lot of 13 220-volt, direct-current adjustable speed motors, having the rated horsepower; speed range not to exceed the maximum speed given in accompanying specifications. These motors are for driving the machine tools indicated in drawings and are to be of the design, type, and construction most suitable for the purpose.

One lot of 10 220-volt, direct-current adjustable speed motors, having the rated horsepower, speed range, and not to exceed the maximum speed given in accompanying table. These motors are for driving the lathes in accompanying table and are to be of the design, type, and construction most suitable for the purpose.

178 hard rubber valves.

534 medium rubber valves.

186 soft rubber valves.

Garbage Crematory, Monterey, Cal.

The bid of Charles F. Walther, 714 Fulton Building, Pittsburgh, Pa., \$1,590 in amount, has been accepted for the construction of a garbage crematory at the Presidio of Monterey, Cal.

Canal Circular 769.

The Isthmian Canal Commission will open bids April 15, 1913, under circular

769 for furnishing the following material and supplies:

Class 1. 56 induction motors, 43 auto starters, and 3 automatic oil switches.

Class 2. 40,000 feet single conductor copper wire.

Class 3. 1,350 standard bearings.

Class 4. 5,000 brake-rod connection pins and 4,000 steel or malleable iron keys.

Class 5. 1,000 malleable iron brake-shoe bolts.

Class 6. 1,400,000 pounds low phosphorus pig iron.

Class 7. 4,000 pounds aluminum paint.

Class 8. 20,000 pounds ferrosilicon.

Class 9. 10,000 pounds ferromanganese.

Class 10. Yellow pine or Douglas fir as follows: 200,000 feet B. M. flooring, 200,000 feet B. M. ceiling, 90,000 feet B. M. siding, 25,000 feet B. M. 1x3 inch, 12 to 24 feet, S. 4 S. and 10,000 feet B. M. 4x4 inch, 22 feet S. 4 S.

Class 11. 300 pieces yellow pine or Douglas fir rough lumber.

Arapaho Indian School.

The contract for the construction of a frame day school building at the Arapaho Indian Day School, Shoshone reservation, Wyo., has been awarded to W. J. Wilseck, of Cheyenne, Wyo., at \$2,200. The bids for the above were opened March 15.

Pearl Harbor, H. T., Locomotives.

The contract for furnishing 4 switching locomotives for delivery at the naval station, Pearl Harbor, H. T., bids for which were opened March 1, have been awarded to the Vulcan Iron Works, Wilkesbarre, Pa., at a total price of \$23,800.

Pearl Harbor, Generator Set, Etc.

The following bids were received by the chief of bureau of yards and docks, Navy Department, Washington, D. C., for furnishing one 200-kilowatt motor generator set and switchboard accessories at the U. S. naval station, Pearl Harbor, H. T.:

Item 1, motor generator set and switchboard accessories, complete; 2, do on bidder's specifications.

General Electric Co., Schenectady, N. Y., item 1, \$6,249.

Ridgway Dynamo and Engine Co., Washington, D. C., item 1, \$6,325 for General Electric Co.'s switchboard, \$6,495 for Westinghouse; item 2, \$6,275 for General Electric Company's switchboard and \$6,445 for Westinghouse.

Westinghouse Electric and Mfg. Co., Hibbs Bldg., Washington, D. C., item 1, \$6,604; 200 days.

Coeur d'Alene Indian School.

The following bids were opened at the office of the commissioner of Indian Affairs, Washington, D. C., for the erection of seven frame cottages, warehouse, office, pump house, guard house, and installing water and sewer system at the Coeur d'Alene Indian Agency, Idaho:

Shulind & Co., Alexandria, Minn., \$27,474.

Critter & Young, Lawrence, Kans., office, \$5,063; frame quarters No. 85, \$1,160; guardhouse, \$1,753; warehouse, \$783; police quarters, \$2,069; pump house, water and sewer system, \$5,765; quarters No. 96, \$6,807; quarters No. 86, \$11,780.

J. L. Murphy & Sons, Tacoma, Wash., \$33,189.

J. M. Merrilees & Co., Berkeley, Cal.,

Two frame quarters, \$5,950; three frame quarters, \$11,850.

Joseph Mersch, Everett, Wash., quarters No. 96, \$6,768; police quarters, \$2,590; warehouse, \$900; pump house, water and sewer system, \$5,296; guard house, \$1,900; office, \$5,870; quarters No. 85, \$5,599.

R. D. Shinn, Spokane, Wash., warehouse, \$923; police quarters, \$2,237; quarters No. 96, \$6,290; quarters No. 86, \$11,580; superintendent's residence, \$5,685; guardhouse, \$2,230; pump house sewer and water system, \$7,738.

P. K. Eddy, Four Lakes Wash., quarters No. 86, \$2,764; quarters No. 96, \$3,094; police quarters, \$1,940; warehouse, \$580; quarters No. 85, \$4,205; quarters No. 14, \$4,482.

W. D. Lovell, Minneapolis, Minn., \$33,000.

Chris Irving Plumbing and Heating Co., Denver, Colo., this firm bids on the plumbing for the various quarters only, police quarters, \$196; quarters No. 85, \$399; heating, \$463; water and sewer systems, \$4,743; guardhouse, \$350; quarters No. 96, \$950; quarters No. 85, \$1,494; quarters No. 85, \$1,089; quarters No. 14, \$492; office, \$238.

Colonial Building Co., Spokane, Wash., three frame quarters, \$10,805; guardhouse, \$2,026.20; two frame quarters, \$5,677.10; warehouse, \$850; frame quarters No. 85, \$4,237.15; office, \$4,598.25; pump house, water and sewer systems, \$5,369.63.

B. W. Young, Spokane, Wash., \$32,220.

Handy & Bate, Denver, Colo., warehouse, \$922; guardhouse, \$1,963; pump house, water and sewer system, \$6,173; police quarters \$2,180; office, \$5,327; quarters No. 96, \$6,988; quarters No. 85, \$4,815; quarters No. 86, \$12,884; all, \$41,252.

M. J. Hursen Co. Seattle, Wash., \$42,000.

William Bruce, San Francisco, Cal., warehouse, \$1,415; guardhouse, \$2,330; pump house, water and sewer systems, \$8,535; office, \$6,955; police quarters, \$2,810; three frame quarters, \$10,535; two frame quarters, \$5,915; one frame quarters, \$5,517.

J. B. Sweatt & Co., Spokane, Wash., three frame quarters, \$10,695.21; office, \$4,007.20; warehouse, \$692.72; pump house, water and sewer systems, \$7,736.32; two frame quarters, \$6,638.24; guardhouse, \$1,581.16; police quarters, \$2,746.76; frame quarters No. 85, \$4,419.70.

Prospective Bidders.

The following firms have applied for plans and specifications for work at the Navy Training Station, Pearl Harbor, which consists of the construction of a \$665,000 hospital. Bids will be opened May 10th:

Ed O. Hamilton, 24th and Farnam streets, Omaha, Neb.

Connors Bros. Co., Lowell, Mass.

W. N. Concannon Co., Monadnock Building, San Francisco, Cal.

Crane Co., Washington, D. C.

HOSPITALS.

SEATTLE, WASH.—Hospital, 5 story and base, reinforced concrete, \$500,000. Architect, P. A. Baillargeon, New York Bldg., Seattle. Owners, St. Joseph's Hospital, Contractor, P. A. Baillargeon, New York Bldg., Seattle. Contract price, \$500,000. Plans for this work are complete but construction will not be started until June.

Contracts Awarded.

LOS ANGELES, CAL.—Hospital, 3 story and base, reinforced concrete, \$15,000. Architect, Frank L. Suh, Grosse Bldg., L. A. Owners, Westlake Hospital Association. Contractor, Weymouth Crowell, Story Bldg., L. A., general construction, \$35,200; Thomas Haverly Co., 517 So. Los Angeles St., L. A., plumbing and heating, \$7,860.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$10,000. Architect, none. Owner, G. Passio, 868 Vallejo St., S. F. The building is to be erected on Lombard street west of Baker, and will be arranged for stores on the first floor and a number of hotel rooms on the upper floors. Interior will be finished in pine and redwood. There will be a hot water system but no heat. The exterior will be covered with rustic. Patent store fronts are specified. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Hotel, 8 or 9 story and base, brick and steel, \$250,000. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Lachman Estate. A lease will shortly be made on a building which is to be erected by the Lachman Estate at the corner of Mason and Sutter streets. The property has three frontages and covers a large area. The proposed building will be seven or eight stories high and of Class A construction. A preliminary estimate places the construction at about \$200,000. Cunningham & Politeo, First National Bank Bldg., will probably be commissioned to prepare plans and specifications. Further details will be given in these columns later.

SAN FRANCISCO—Hotel, 5 story and base, reinforced concrete. Cost not stated. Architects, A. F. and C. M. Rousseau, Monadnock Bldg., S. F. Owner, Florentina Wankowski. The building is to be erected on the north line of Geary street west of Jones. There will be a store and the hotel lobby and offices on the first floor and a large number of single rooms on the upper floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Many of the rooms will have connecting baths. Interior finish will be of pine and hardwood. Some ornamental plaster will be used in the lobby. Marble and tile are to be used in the entrance. A hot water plant will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and a contract will be awarded at once.

SAN FRANCISCO—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, William Knowles, Hearst Bldg., S. F. Owners, Hind Estate. The building is to be erected on the southeast corner of 5th and Minna streets, the lot having a frontage of 80 feet on 5th street and 147 feet 10 inches on Minna. The entire building has been leased for a term of ten years to N. V. Doran and A. E. Baldwin through the offices of Kern-Nellian Co. Plans provide for five stories on the first floor besides a large and attractive office and lobby. Upper floors will contain about 180 rooms besides a number of baths and toilets. There will be steam heat, elevator service, a hot water system and vacuum cleaning. Interior

will be finished in pine and some hardwood. Tile and marble will be used in the lobby and entrance. The exterior of the building will probably be faced with pressed brick. Plans are complete and figures are to be taken shortly.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabichl. The building will cover an area of 50x150 feet, and will be arranged for stores on the first floor, upper floors will contain about 65 guest rooms and a number of baths. Interior finish will be of pine and some hardwood. There will be steam heat and elevator service and a hot water system. The exterior will be faced with pressed brick. Plans are complete and figures will be called for at once.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, none. Owner, T. J. Douglass, Jr., Grant Bldg., L. A. The building will cover an area of 50x100 feet, and is to be arranged with stores and the hotel lobby on the first floor. Upper floors will contain a number of baths besides the guest rooms. Plans include steam heat, elevator service and a hot water supply system. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

PORTLAND, ORE.—Hotel, 4 story and base, brick, \$35,000. Architect, Aaron H. Gould, Worcester Bldg., Portland. Owner, W. W. Margulls. The building will be arranged for stores and the hotel lobby on the first floor and about 75 guest rooms and a number of baths on the upper floors. Interior finish will be of pine. Plans include steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

PORTLAND, ORE.—Hotel and resort, 3 story frame construction, \$100,000. Architect, Aaron Gould, Worcester Bldg., Portland. Owner's name withheld. Contractors, Langford & Sons, Portland. Contract price, \$100,000. Note: The building will cover practically a city block, fronting on three streets and an alley. Plans have not been completed, but a contract has been awarded on the percentage basis. Construction will be started as soon as plans are complete.

OCEAN PARK, LOS ANGELES CO., CAL.—Hotel, 4 story and base, brick. Cost not stated. Architect, W. S. Garrett, Currier Bldg., L. A. Owners, Messrs. Edward and John Newell, Contractor, E. P. Chapman, 724 Maple Ave., L. A. Note: This contract has been awarded on the percentage basis.

LIBRARIES.

GLENDALE, LOS ANGELES CO., CAL.—Library, 1 story and base, brick, \$12,000. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, City of Glendale. Plans for a Carnegie Library have just been approved. The building will cover an area of 36x70 feet and will contain general and children's reading rooms, librarian's office, reference room and lobby. There will be a central heating system. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SEATTLE, WASH.—Libraries, 2, 2 story, and base, concrete and brick, \$35,000 each. Architect, W. Marbury Somerville, White Bldg., Seattle. Owners, City of Seattle. Plans for both of these buildings, which have been designed for branch city libraries, will be completed shortly and bids will be called. Both buildings will be fire-proof throughout. Exteriors will be faced with cement plaster. Interior finish will be of pine and hardwood. There will be central heating systems.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Fire houses, 3, 1 story, frame. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of three fire houses which are to be erected on the Exposition grounds at Harbor View have been completed and are now out for figures. Bids will close on April 22nd. Plans can be secured from the Director of Works. Official proposal appears in another column of this issue.

SAN FRANCISCO—Exposition building, 2 story, frame, \$220,000. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened for the construction of the Pure Foods Building and show Neil A. McLean low on the general construction at \$219,000. John G. Sutton low on the plumbing at \$16,350. A complete list of all figures received appears under San Francisco in this issue.

Contracts Awarded.

SAN FRANCISCO—Pile foundations. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Pile foundation for Agriculture Building awarded to Mercer-Frazer Co. at 24¢ cents per lineal foot and the contract for the pile foundation for the Manufactures Building was awarded to the Contra Costa Construction Co. at 25 cents per lineal foot.

Compromise joints, award reset for meeting of April 10th.	
65 T rails and splices, United States Steel,	\$21,842.50.
Guard rails, Pennsylvania Steel,	\$67,000, subject to terms of bid.
Roll joints, H. B. Green,	\$5.65 each.
T rail frogs, Pennsylvania Steel,	\$3,474.75.
Switches, United States Steel,	\$862.50.
Guard rail, United States Steel.	\$675.50.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner Mrs. Wilhelmina Taylor. The dwelling is to be erected on a beautiful lot at the corner of 18th ave-

nue and Revere street. Floor plan provides for eight rooms, two baths and sleeping porch. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,600. Architect, none. Owner, Frank Pegel, 366 10th Ave. S. F. The house will contain seven rooms and bath. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath, shingles and brick veneer. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, C. Howe, 110 Ord St. S. F. The house will be arranged for seven rooms and bath. All interior finish will be of pine with hardwood floors in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath and kitchen. An automatic water heater will be installed. Some elm panels will be used in the dining room and reception hall. The exterior of the house will be covered with rustic and shiplap with a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 1½ story and base, frame, \$3,000. Architect, none. Owner, Andrew Lyon, 182 Liberty St. S. F. The dwelling is to be erected on Carmel street near Cole, and will contain seven rooms and bath. Interior will be finished in pine, redwood and some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be open fire places and furnace heat. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are complete and the work is to be done by Day Labor. Owner is now in the market for all kinds of material.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,700. Architect, one. Owner, Nils N. Hagan, 377 Cumberland St. S. F. The dwelling has been designed for a six-room house with bath. All interior finish will be of pine or redwood. There will be an open fire place in the living room with a brick mantel. Floors in the principal rooms will be finished in hardwood. Tile will be used in the bath and kitchen. Exterior of the dwelling will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 1 and 2 story and base, frame, \$8,000. Architect, Theo. W. Lenzen, Humboldt Bank Bldg., S. F. Owner Dr. Emil Herwig. The house has been designed for a combination residence and private bath treatment sanitarium. The one-story

portion will be used for a sun room. Interior will be finished in pine, hardwoods and considerable tile. There will be a special heating system and open fire places. Mantels will be of brick. There will be hardwood floors. Baths will be finished in tile and will have cement floors. The exterior of the dwelling will be covered with shiplap and rustic. The architect is taking figures on the work.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Al. J. Mazurette 1522 Broadway, Oakland. Owner, Roger Coit, 1522 Broadway. The dwelling will be similar to a great many other houses recently erected by Mr. Coit, and is to be erected on Grand avenue. The house will contain seven rooms and bath. Interior finish will be largely of pine with some elm panels in the dining and living rooms. There will be hardwood floors in the principal rooms. Furnace heat and open fire places will be used. Mantel will be of brick. Tile will be used in the bath and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner H. S. Butler, 63rd and Shattuck Ave., Oakland. The dwelling will be arranged for seven rooms, bath and sleeping porch. Interior will be finished in pine and some hardwood veneer. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. There will be an automatic water heater installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$6,000. Architects, Milwain Bros. Delger Bldg., Oakland. Owner, A. B. Stephens. The dwelling has been mentioned in these columns before when plans were first prepared. The house has been designed to contain eight rooms, baths and sleeping porch. A garage will be erected in the rear. Interior finish will be of pine and hardwood with hardwood floors throughout. Two baths will be finished in tile. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. The exterior of the dwelling will be covered with rustic. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$2,000. Architect, Al. J. Mazurette 1522 Broadway, Oakland. Owner, Peter Lindblad. The house will contain seven rooms and bath. Interior will be finished in pine and elm with hardwood floors in the living and dining rooms and reception hall. There will be furnace heat and an open fire place. Mantel will be of brick. There will be tile wainscot in the bath and kitchen. Exterior will be finished with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Charles J. Rogers 24 California St., S. F. Owner, D. A. O'Brien. The house

has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Furnace heat and open fire places will be installed. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater is specified. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,300. Architect, none. Owners, United Home Builders 1762 Broadway, Oakland. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the living and dining rooms and reception hall. There will be tile wainscot in the bath room. Furnace heat and open fire places are to be used. Mantels will be of brick. Tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,950. Architect, none. Owner H. N. Turrell, 456 Jean St., Oakland. The dwelling will contain six rooms bath and sleeping porch. Interior finish will be largely of hardwood. Oak floors will be used throughout, except in the bath rooms which will have composition floors and tile wainscot. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will also be used in the kitchen. There will be an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, R. H. Madden. The dwelling is to be erected in Berkeley Square Park and will contain seven rooms and bath. Interior finish will be of pine and some oak veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Bungalows, 5, 1 and 1½ story and base, frame, \$2,500 each. Architect, none. Owners F. R. Peake Co., 2127 University Ave., Berkeley. These houses will be erected in the Grove M. Berryman Tract and each is arranged for six rooms and bath. Interior finish will be entirely of pine with some oak floors. There will be large open fire places in the living rooms and attractive tile or brick mantels. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster, rustic and shingles. Plans are complete and in the hands of the owners who will do the work by Day Labor. They are now in the market for various materials.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame

\$2,000. Architect, none. Owners, F. R. Peake Co., 2127 University Ave., Berkeley. The house will contain eight rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,900. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, E. Greenhood. The dwelling has been mentioned in the columns before when plans were first prepared. The dwelling will contain in the neighborhood of eight rooms, sleeping porch and baths. Interior will be finished in pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. There will be an automatic water heater installed. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

MODESTO, STANISLAUS CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Ralph P. Morrell, Odd Fellows' Bldg., Stockton. Owner, G. C. Nelson. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior will be finished in pine with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will also be used in the bath room and kitchen. The exterior of the dwelling will be covered with pressed brick veneer, rustic and cedar shakes. Plans are being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 3 story and base, frame, \$11,000. Architects, Newsom, Dixon & Meeker, 812 Broadway, Oakland. Owner, Mrs. Henshaw. The dwelling is to be erected in Walla Vista and is unique in its design. Interior will be arranged for nine or ten rooms, including several baths, sleeping porch and laundry. Interior finish will be of pine and hardwoods with oak floors in the main living room, dining room and reception hall. There will be steam heat and open fire places. Mantels will be of tile. Tile will also be used in the bath rooms and kitchen. An automatic water heater and vacuum cleaning system are to be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, Mr. Carrigan. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling is to be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architects. All materials

are now being purchased.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, M. B. Conley. The house will be erected on Hillside avenue, and has been designed to contain seven rooms, bath and sleeping porch. All interior finish will be of pine or elm. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken for various parts of the work. The dwelling will be erected by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, Louis Johnson, 1732 Ward St., Berkeley. The house has been designed for a seven-room dwelling with all modern conveniences. Interior will be finished in pine with hardwood floors and some hardwood wainscot. Bath room will have tile wainscot and some tile will be used in the kitchen. There will be furnace heat and open fire places. Mantels will be of brick or tile. The exterior of the dwelling will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased by Mr. Johnson.

RIPON, SAN JOAQUIN CO., CAL.—Bungalow, 1 story and base, frame, \$3,500. Architect, Walter King, Elks' Bldg., Stockton. Owner, H. L. Dickey. The dwelling will be erected on Mr. Dickey's ranch and will contain seven rooms and bath. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of brick. Brick chimneys are to be used. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic. Plans are now being prepared and bids will be called for shortly.

SAN PABLO, CONTRA COSTA CO., CAL.—Residence, 2 story and base, frame, \$6,500. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, Mr. Gooddale. The house has been designed for an eight-room dwelling with all modern conveniences. Interior will be finished in pine with some hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room and kitchen. There will be an automatic water heater. Exterior of the house will be covered with shingles. Plans are being prepared and when complete a contract will be let through the architects' offices.

Contracts Awarded.

PASADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, brick and frame, \$23,000. Architect, Frederick L. Roehrig, American Bank Bldg., L. A. Owner, Mrs. Elizabeth Reighard. Contractor, L. P. Pomeroy, 458 So. Madison Ave., L. A. general construction, \$18,269.60. Separate contracts have been awarded for the plumbing and painting.

—SCHOOLS—

SAN FRANCISCO—Academic building, polytechnic group, 2 story and base, Class A construction. Cost not stated. Architect, Architectural Department City and County of San Francisco, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures will be opened on April 30 for the finishing construction of this building. The building is one of the most important of the polytechnic group, and will be from 80 to 160 feet in width and 360 feet long. Construction is to be of the Class A type throughout. Excavation, foundation work and steel frame are now complete. Bids for the remainder of the work the being taken separately as follows: (a) for the general construction, including fireproofing, masonry, carpentry and mill work; (b) plumbing and gas fitting; (c) heating and ventilating; (d) furnishing and installing boilers and boiler auxiliaries, and (e) for the electric work. The official proposal appears in another column of this issue. Plans and specifications can be obtained from the Department of Architecture, Temporary City Hall.

OAKLAND, CAL.—School, 1 and 2 story and base, reinforced concrete. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owner, City of Oakland. Bids will be opened on April 21st for the construction of the Commercial High School, which is to be erected on Broadway between 41st and 42nd streets. The work has been previously described in these columns. The following list contains the names of firms who had applied for plans and specifications up to April 2nd.

SAN FRANCISCO—School, 2 story and base, frame, \$80,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The following were low on the various parts of the work for the Le Conte School, bids for which were opened on April 2nd by the Board of Public Works: General construction, J. W. Carr, \$52,842 and \$52,123; lathing and plastering, Bradley & O'Reiley, \$3,900; plumbing and gas fitting, J. E. O'Mara, \$4,634; electric work, Standard Electric Construction Co., \$1,944; and water heating system, John G. Sutton Co., \$2,790. A complete list of all figures submitted for the work appears under the heading of San Francisco in this issue.

CORCORAN, KINGS CO., CAL.—School, 1 story and base, brick, \$35,000. Architect, George M. Easton, Los Angeles Investment Bldg., L. A. Owners, Corcoran School District. The building will contain five standard class rooms, auditorium, lecture room, two commercial rooms, drawing room and principal's office. Interior will be finished in pine. There will be a central heating system. Exterior of the building will be faced with cement plaster. Plans are being prepared.

HOQUAN, WASH.—School, 3 story and base, brick and steel, \$90,000. Architects, Stephen and Stephen, New York Bldg., Seattle. Owners, Hoquian School District. This work has been mentioned here before when the plans were first out for figures. Drawings have been revised and new bids are being taken. Bids will be opened on April 15th. The building covers an

area of 89x175 feet. Plans can be secured from the architects.

FOREST GROVE, ORE.—School, 2 story and base, brick. Cost not stated. Architects, W. B. Bell and J. W. Wilding, associated, Forest Grove. Owners, Forest Grove School District. No particulars of this work have been received. The building is to contain six class rooms and an auditorium. There will be a central heating system. Exterior will probably be faced with pressed brick. Further announcement of the work will be made when figures are called.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Pipe laying, \$20,000. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids were opened on April 2nd by the Board of Public Works for laying pipe in Van Ness avenue, Bay street, Fort Mason, etc. Nine figures were submitted. The lowest bid came from E. Mallory and is for \$18,000. No contract has been awarded. A complete list of all figures appears in this issue under San Francisco, City Bids Opened.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Office building, 12 story, Class A construction, \$1,200,000. Architect's name withheld for the present. Owners, British and French capital, local representation. Definite announcement is made for the first time in the Daily Pacific Builder of another million-dollar commercial structure which is shortly to be erected in this city. A site has been secured on the south side of Pine street between Montgomery and Sansome streets, and construction will be undertaken this year. The site has a frontage on Pine street of 145 feet and extends back 120 feet to a rear street. The local representative of the owners has been interviewed and states that a local architect has prepared sketches and estimates for the building. The announcement of the project makes the fifth large commercial structure which is to be erected in San Francisco during the coming year, the four other buildings of this nature previously mentioned in these columns being the 25 story Class A office for John D. Spreckels, Reid Bros., Architects, cost, \$1,200,000; 12 story Class A office for the Hobart Estate, Willis Polk, Architect, cost, \$1,000,000; Meyer and Liebes offices, 10 story, Class A, Havens & Toepke, Architects, cost, \$500,000, and a 10 or 12 story Class A building at Second and Market streets, architect not selected, \$500,000.

SAN FRANCISCO—Stores and offices, 2 story and base, brick and steel, \$52,000. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owners, Macdonough Estate. The building is to be erected on the north side of Bush street east of Grant avenue, and will have a frontage of 53 feet 9 inches by a depth of 107½ feet. The first floor will be arranged for handsomely finished retail stores and upper floors for offices. Interior finish will be of pine and hardwood. There will be steam heat and elevator service. Metal window frames and sash are to be used. There will be sidewalk doors and lights. The

exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Stores, 1 story and base, brick, \$10,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Water Front Realty Co. The building is to be erected at the northwest corner of Washington and East streets and will cover an area of 80x75 feet. The structure will be carried on a pile foundation. Plans provide for six stores with pine trim, large display windows and patent store fronts. Mexican onyx will be used. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Store addition, 1 story and base, Class C, \$3,000. Architect, John Baur, Clunie Bldg., S. F. Owner, H. N. Cauwet. This work will include raising the present building and constructing the additional story on the street grade. This story will be finished for stores. Interior trim will be of pine. There will be plate glass display windows and patent fronts. Exterior will be faced with pressed brick. An ornamental marquee will be erected. Plans are being prepared.

OAKLAND, CAL.—Stores and offices, 10 or 12 story and base, Class A construction. Cost not stated. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, Hesseman and Hoff. This building is to be erected at the corner of 15th and San Pablo avenue. Only preliminary plans have been prepared and details of the construction cannot be published at this time. The preliminary sketches show a high class office building of fireproof construction and containing in the neighborhood of 200 modern offices. Several stores will occupy the first floor. The owners state that construction will probably be undertaken this year. Further particulars will be given in these columns as the plans progress.

OAKLAND, CAL.—Stores, offices and auditorium, 6 story and base, reinforced concrete, \$180,000. Architect, William H. Judson, Albany Bldg., Oakland. Owner's name withheld for the present. This building, which is to be known as the Arts and Crafts Building, will be erected on Harrison street. Besides the stores and offices the structure will contain an auditorium with a seating capacity of 350 people. Construction will be fireproof throughout. There will be reinforced concrete walls faced with artificial stone. Interior partitions will be of hollow tile and metal lath and plaster. Plans include elevator service, steam heat, a vacuum cleaning system, some metal trim and metal window frames and sash. Interior finish will be of pine, hardwood, metal and marble or tile wainscot. The site is 50x100 feet and the building will occupy the entire lot. Plans are now being prepared. Further announcement will be made here when plans are ready for figures.

LOS ANGELES, CAL.—Stores and lofts, 2 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, J. Burton. The building will cover an area of 50x140 feet. The first floor will contain two stores and upper floor a large loft. Interior will be finished in pine. There will be patent store fronts and metal window sash and frames. The

exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, reinforced concrete, \$120,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabich. The building will be erected on Los Angeles street and will cover an area of 116x140 feet. Construction will be fireproof. There will be metal window frames and sash. Four elevators and a steam heating system will be installed. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Offices, 12 story and base, Class A construction. Cost not stated. Architect, J. Martyn Haenke, Story Bldg., L. A. Owner, William R. Hearst. This project was mentioned in a recent issue. The property on which the new building is to be erected covers an area of 360x110 feet. The structure will contain the offices and plant of the Los Angeles Examiner and about 300 modern offices. Further details will be given as the plans progress.

FRESNO, FRESNO CO., CAL.—Stores and offices, 14 story and base, Class A construction. Cost not stated. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, H. H. Brix. Only preliminary plans for this work have been prepared. The structure is to be erected on J street adjoining the Griffith-McKenzie Building, and will have a street frontage of 100 feet and a depth of 150 feet. The first three floors and the basement will be occupied by a large department store. Upper floors will be subdivided into modern offices. Construction will be fireproof throughout. Further details will be given as the plans progress.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and lofts, 3 story and base, brick. Cost not stated. Architect, none. Owner, Jotham Bixby, Contractor, V. P. Gilbert, 524 Douglas Bldg., L. A. Contract price, not stated.

LOS ANGELES, CAL.—Stores and lofts, 3 story and base, brick, \$33,000. Architect, W. S. Garrett, Currier Bldg., L. A. Owner, H. O. Vogel. Contractor, W. H. Koepfen, 1324 West 37th St., L. A. Contract price, \$33,000.

LOS ANGELES, CAL.—Stores and offices, 7 story and base, Class A construction, \$180,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Isaac Hellman. Contractor, Weymouth Crowell, Story Bldg., L. A. general construction only. Contract price, \$180,000.

THEATRES.

FRESNO, FRESNO CO., CAL.—Theatre and stores 3 story and base, Class A construction, \$150,000. Architects, Starbuck & Clark, Fresno. Owners, J. B. Whittemore and associates. Plans have been prepared for a building covering an area of 75x150 feet, and which is to be erected at the corner of Kern and K streets. Provision has been made for a number of stores on the first floor besides the theatre proper. The main auditorium will have a seating capacity of 1,600 people. Upper floors of the building, not occupied by the theatre, will be arranged for modern offices. Construction will be fire-

proof throughout. The theatre will be handsomely decorated. Exterior of the building will probably be faced with pressed brick. Working drawings have not been prepared. Further details will be given as the plans progress.

Contracts Awarded.

BAY CITY, ORANGE CO., CAL.—Amusement buildings, frame construction, \$60,000. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Bayside Land Co. Contractor, J. A. Cook, Chamber of Commerce Bldg., L. A. Contract price, \$60,000.

SEALED PROPOSALS.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general construction of the Academic Building, Polytechnic High School, on City property bounded by Willard, Frederick, Carl streets and Arguello Boulevard.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed as follows:

Proposition No. 1. Within two hundred and forty (240) calendar days thereafter.

Proposition No. 2. Within three hundred and sixty-five (365) calendar days thereafter.

Proposition No. 3. Within three hundred and sixty-five (365) calendar days thereafter.

The amount of bond for faithful performance has been fixed as follows:

Proposition No. 1, \$40,000.00.

Proposition No. 2, \$50,000.00.

Proposition No. 3, \$75,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR ELECTRIC WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The electric work of the Academic Building, Polytechnic High School.

Progressive payments will be made.

The amount of bond for faithful performance of contract has been fixed at \$2,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

PROPOSALS FOR PLUMBING AND GAS FITTING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The plumbing and gas fitting of the Academic Building, Polytechnic High School.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$4,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

PROPOSALS FOR HEATING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The installation of a heating and ventilating system in the Academic Building, Polytechnic High School.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$7,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

PROPOSALS FOR BOILERS.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of boilers, boiler auxiliaries and piping, etc., in the Academic Building, Polytechnic High School.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$6,000.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of April, 1913, for doing the following work:

The removal and reconstruction of a safety station adjacent to the northerly street car tracks at the junction of Market, Ellis and Stockton streets.

Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within seven (7) calendar days and completed within twenty-five (25) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$500.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal form will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 769—Proposals for Induction Motors, Autostarters or Compensators, Automatic Oil Switches, Copper Cable, Journal Bearings, Brake-Rod Connection Pins, Steel Keys for Brake Shoes, Bolts for Brake Shoes, Pig Iron, Aluminum Pig, Ferro-silicon, Ferro-manganese and Lumber.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. April 15, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 768—Proposals for Sheet Iron or Steel, Wire Cable, Chain, Babbitt Metal, Yellow Metal, Sheet Brass, Bronze Bars, Brass Tubing, Bronze Wire Cloth, Nuts, Cast Iron Washers, Nails, Screws, Tacks, Cotters, Shovels, Hose, Grindstones, Tackle Blocks, Valves, Belt Lacing, Emery Cloth, Sandpaper, Sash Cord, Railway Flags, Mop Heads, Ship's Felt, Marline, Paper Clips, Pins, Rules, Paper, Lime and Beeswax.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. April 12, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information

relating to this circular (No. 768) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CANAL WORK.

CANAL WORK—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Montrose, Colorado, until 4 o'clock p. m., April 17, 1913, for the construction of about 6.2 miles of the Selig Extension Canal and 3.4 miles of the Peach Valley Lateral of the Selig Canal system, Uncompahgre Valley project, in the vicinity of Olathe, Colorado. This work involves the excavation of about 171,500 cubic yards of material in open cut and 930 linear feet of tunnel. For particulars address the United States Reclamation Service, Montrose, Colorado; 519 Commonwealth Building, Denver, Colorado; or Washington, D. C. MORRIS BIEN, acting director.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 770—Induction and Direct Current Motors, Copper Louvre Panels, and Rubber Valves.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., April 19, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 770) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. A., general purchasing officer.

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m., Monday, April 21, 1913, for constructing a reinforced concrete culvert on San Bruno avenue at Colma, at the intersection of San Bruno avenue and Market street in the First Road District as per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, March 17, 1913, which said plans and specifications are now on file in the office of the Clerk of said Board where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county in an amount not exceeding the contract price, or to

enter into a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.
JOS. H. NASH,
County Clerk and ex-Officio Clerk of the Board of Supervisors.

PROPOSALS FOR TRACK WORK.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 16th day of April, 1913, for doing the following work:

• Railway track construction on Geary street, Thirty-third avenue, Balboa street, Forty-fifth avenue, Cabrillo street, from Geary street near Thirty-third avenue to the Great Highway.

Progressive payments will be made.

Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within seventy-five (75) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$15,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 763—Proposals for Furnishing and Erecting Coal-Handling Machinery and Accessories for Two Coaling Plants.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. May 14, 1913, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 763) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. T. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

SAN FRANCISCO.

RESIDENCE — 2 story and base, frame, \$5,000. San Francisco. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, Mrs. Wilhemina Taylor. The dwelling is to be erected on a beautiful lot at the corner of 18th avenue and Revere street. Floor plan provides for eight rooms, two baths and sleeping porch. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$4,600. San Francisco. Architect, none. Owner, Frank Pegel, 366 19th Ave., S. F. The house will contain seven rooms and bath. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be cov-

ered with cement plaster on metal lath, shingles and brick veneer. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, C. Howe, 110 Ord St., S. F. The house will be arranged for seven rooms and bath. All interior finish will be of pine with hardwood floors in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath and kitchen. An automatic water heater will be installed. Some elm panels will be used in the dining room and reception hall. The exterior of the house will be covered with rustic and shiplap with a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 1½ story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Andrew Lyon, 182 Liberty street, S. F. The dwelling is to be erected on Carmel street near Cole and will contain seven rooms and bath. Interior will be finished in pine, redwood and some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be open fire places and furnace heat. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered

with rustic. Plans are complete and the work is to be done by Day Labor. Owner is now in the market for all kinds of materials.

RESIDENCE—2 story and base, frame, \$2,700. San Francisco. Architect, none. Owner, Nils N. Hagen, 377 Cumberland St., S. F. The dwelling has been designed for a six-room house with bath. All interior finish will be of pine or redwood. There will be an open fire place in the living room with a brick mantel. Floors in the principal rooms will be finished in hardwood. Tile will be used in the bath and kitchen. Exterior of the dwelling will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—1 and 2 story and base, frame, \$8,000. San Francisco. Architect, Theo. W. Lenzen, Humboldt Bank Bldg., S. F. Owner, Dr. Emil Herwig. The house has been designed for a combination residence and private bath treatment sanitarium. The one-story portion will be used for a sun room. Interior will be finished in pine, hardwoods and considerable tile. There will be a special heating system and open fire places. Mantels will be of brick. There will be hardwood floors. Baths will be finished in tile and will have cement floors. The exterior of the dwelling will be covered with shiplap and rustic. The architect is taking figures on the work.

APARTMENT HOUSE—9 story and base, Class A construction, \$250,000. San Francisco. Architects, Ross & Burgen, 310 California St., S. F. Owners represented by Harrigan-Weidemuller Co. A large site has been purchased, fronting 87½ feet on Broadway and extending back 137½ feet. The lot is just east of Fillmore street and is held by the Mau Estate. A lease has been secured through the offices of Harrigan-Weidemuller Company, for the purpose of erecting thereon a nine-story Class A apartment building to be financed under the New York co-operative system. These agents report meeting with great encouragement in this enterprise, and to date have a number of applications from some of the most prominent families for apartments in the building. The lot was selected owing to the grand panoramic marine view it commands, its accessibility and its excellent environment. The building will contain sixteen apartment suites of ten rooms, two suites to each floor, with fast running passenger and service elevators, opening into private halls. The interior is to be finished entirely in hardwood with oak floors. The plumbing and steam heating are to be of the best and latest, and all bath rooms and kitchens are to be tiled throughout. Refrigerating and vacuum cleaning plants will be installed and large private safes will be in each apartment and jewel safes in each chamber. A large assembly room, suitable for dances, etc., will be an additional feature.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architect, C. M. Cook, Rialto Bldg., S. F. Owner Mrs. Ida M. Bender. The building is to be erected at the southwest corner of Broderick and O'Farrell streets, and has a frontage on one street of 35 feet and of 75 feet on the other. The interior has been arranged

for twelve apartments of three and four rooms each with private bath. Wall beds are to be used. There will be a central heating system. Interior finish will be of pine and elm panels. Some hardwood floors are specified. A hot water system will be installed. The exterior of the building will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—5 story and base, brick and steel. Cost not stated. San Francisco. Architects, A. F. and C. M. Rousseau, Monadnock Bldg., S. F. Owner, H. C. Newhall. The building will be erected at the northeast corner of Washington and Leavenworth streets and will cover a considerable ground area. There will be a complete steel frame with reinforced brick walls, faced with pressed brick. The building has been designed for a residential apartment flats, each apartment consisting of five rooms and bath. Each apartment will be finished in pine, hardwood panels and will have hardwood floors. There will be built in buffets and open fire places. Plans provide for steam heat, elevator service, a hot water system and all other modern conveniences. Servants' rooms will be located in the basement. There will also be a large billiard room, wine room and social hall. A garage will be erected at one end of the lot containing room for three machines. H. C. Newhall is the owner of the property and he has spared no expense in making the building one of the finest residential apartments in the city.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, Mrs. Brownlee. A general contract for this building has been awarded to M. Marcusen, Royal Insurance Bldg., and he is now taking figures for a number of the special parts of the work. Firms interested in tile, both floor and wall, beds, ornamental iron, painting and electric work should see Mr. Marcusen.

APARTMENT HOUSE—3 story and base, frame, \$16,000. San Francisco. Architect, none. Owner, J. V. Campbell, 1040 Bryant St., S. F. The dwelling is to be erected on the south side of California street east of Hyde, and will be 28x118 feet. Interior has been arranged to contain 18 apartments of two and three rooms each. There will be private bath rooms and wall beds. Interior will be finished in pine and some hardwood. Oak floors will be used in the principal rooms. A central heating system and hot water plant will be installed. The exterior of the building will be covered with rustic, shiplap and tapestry brick veneer. Plans are complete and the work will be done by Day Labor. The owner is now in the market for all of the various materials.

CHURCH—2 story and base, brick and steel, \$50,000. San Francisco. Architects, Shea & Loftquist, Bank of Italy Bldg., S. F. Owners, St. Patrick's Parish. The present building on Mission street between Third and Fourth streets was reconstructed after the fire and has been made to do until the present time. Plans for the complete rehabilitation of the edifice have been prepared and money is to be raised at once for the construction. There will be a large amount of structural steel used. Interior will be finished in pine and ornamental plaster. The exterior

will be faced with pressed brick. Plans are being prepared and work will be started within a few months. Father Rodgers is in charge of the building.

FIRE HOUSE—2 story and base, brick and steel, \$35,000. San Francisco. Architect, City Dept. of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works show Commary-Peterson low men at \$33,262 and they will probably be awarded the contract. Eight figures in all were submitted. A complete list of these figures can be found under the heading of San Francisco in this issue.

FLATS—2 story, attic and base, frame, \$14,000. San Francisco. Architect, Albert Schroeffer, Foxcroft Bldg., S. F. Owner, Henry Eisenberg. The building will be erected on Pacific street west of Fillmore, and has been designed for residential flats. Each of the flats will consist of five or six rooms and bath. Interior finish will be of pine, redwood and hardwood with oak floors in the principal rooms. There will be a central heating system. Tile will be used in the baths and kitchens. There will be some marble and tile used in the entrance vestibules. Exterior of the building will be covered with tapestry brick veneer and shiplap. Plans are complete and figures are being taken by the architect.

HOTEL—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, G. Passio, 368 Vallejo St., S. F. The building is to be erected on Lombard street west of Baker, and will be arranged for stores on the first floor and a number of hotel rooms on the upper floors. Interior will be finished in pine and redwood. There will be a hot water system but no heat. The exterior will be covered with rustic. Patent store fronts are specified. Plans are complete and in the hands of the owner who will do the work by Day Labor.

HOTEL—8 or 9 story and base, brick and steel, \$250,000. San Francisco. Architects, Cunningham & Pollette, First National Bank Bldg., S. F. Owners, Lachman Estate. A lease will shortly be made on a building which is to be erected by the Lachman Estate at the corner of Mason and Sutter streets. The property has three frontages and covers a large area. The proposed building will be seven or eight stories high and of Class A construction. A preliminary estimate places the cost of construction at about \$200,000. Cunningham & Pollette, First National Bank Building, will probably be commissioned to prepare plans and specifications. Further details will be given in these columns later.

HOTEL—5 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, A. F. and C. M. Rousseau, Monadnock Bldg., S. F. Owner, Florentina Wankowsky. The building is to be erected on the north line of Geary street west of Jones. There will be a store and the hotel lobby and offices on the first floor and a large number of single rooms on the upper floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Many of the rooms will have connecting baths. Interior finish will be of pine and hardwood. Some ornamental plaster will be used in the lobby. Marble and tile are to be used in the en-

rance. A hot water plant will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and a contract will be awarded at once.

HOTEL—4 story and base, brick and steel. Cost not stated. San Francisco. Architect, William Knowles. Icarus Bldg., S. F. Owners, Hind Estate. The building is to be erected on the southeast corner of 5th and Minna streets, the lot having a frontage of 80 feet on 5th street and 147 feet 10 inches on Minna. The entire building has been leased for a term of ten years to N. V. Doran and A. E. Baldwin through the offices of Kern-Sellon Co. Plans provide for five stores on the first floor besides a large and attractive office and lobby. Upper floors will contain about 180 rooms besides a number of baths and toilets. There will be steam heat, elevator service, a hot water system and vacuum cleaning. Interior will be finished in pine and some hardwood. Tile and marble will be used in the lobby and entrance. The exterior of the building will probably be faced with pressed brick. Plans are complete and figures are to be taken shortly.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, W. G. Hinds, 46 Kearny St. F. Owner, J. Deming. The building is to be erected on Hyde street between Vallejo and Green streets, and will have a street frontage of 25 feet and a depth of 87½ feet. Four plans have been arranged for four apartments of three rooms and bath each. Interior will be finished in pine with some elm panels and hardwood floors. There will be gas radiators. Tile will be used in the baths. All suites will be equipped with wall beds. Entrance vestibule will be finished in marble. The exterior of the building will be covered with shingles. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, W. K. Hinds, 46 Kearny St., S. F. Owner, Mrs. Picard. The house will be erected on the east side of Taylor street between Pacific and Broadway. Interior will be arranged to contain six apartments of four rooms and bath. All suites will have wall beds. The interior will be finished in pine and elm with hardwood floors in the principal rooms. Gas radiators will be installed. The entrance vestibule will be finished in marble and tile. Tile will also be used in the bath rooms. The exterior of the building will be covered with brick veneer. Plans are just started for this work. Bids will be called for on the various parts of the work within a month.

BRIDGE—Steel bascule type. Cost not stated. Engineer, Engineering Department Atchison, Topeka and Santa Fe R. Co., S. F. Owners, Atchison, Topeka and Santa Fe Co. The Board of Public Works have approved plans and specifications for a new bascule bridge which is to be erected by the Atchison, Topeka and Santa Fe Company over Isals Creek at Kentucky street. With the construction of this bridge 1500 additional feet of dockage will be opened up along Isals Creek channel. Bids will be called for shortly. Working drawings are now being made.

RAILROAD CONSTRUCTION—Cost not stated. San Francisco, Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed and approved for the completion of the Geary Street Municipal Road from 33rd avenue west to the ocean. The line will traverse 33rd avenue, Balboa street, 42nd and 45th avenues to the Great Highway. Plans have been called for by the Board of Public Works and will be opened on April 16th. Complete plans and specifications and full particulars of construction can be secured from the City Department of Engineering.

ACADEMIC BUILDING—Polytechnic group, 2 story and base. Class A construction. Cost not stated. San Francisco. Architect, Architectural Department City and County of San Francisco, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are complete and figures will be opened on April 30th for the finishing construction of this building. The building is one of the most important of the polytechnic group and will be from 80 to 160 feet in width and 360 feet long. Construction is to be of the class A type throughout. Excavation, foundation work and steel frame are now complete. Bids for the remainder of the work are being taken separately as follows: (a) for the general construction, including fire proofing, masonry, carpentry and mill work; (b) plumbing and gas fitting; (c) heating and ventilating; (d) furnishing and installing boilers and boiler auxiliaries, and (e) for the electric work. The official proposal appears in another column of this issue. Plans and specifications can be obtained from the Department of Architecture, Temporary City Hall.

SCHOOL—2 story and base, frame, \$80,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. The following were low on the various parts of the work for the Le Conte School, bids for which were opened on April 2nd by the Board of Public Works: General construction, J. W. Carr, \$52,842 and \$52,123; lathing and plastering, Bradley & O'Riley, \$5,900; plumbing and gas fitting, J. E. O'Mara, \$1,634; electric work, Standard Electric Construction Co., \$1,944, and water heating system, John G. Sutton Co., \$2,790. A complete list of all figures submitted for the work appears under the heading of San Francisco in this issue.

PIPE LAYING—\$20,000. San Francisco. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids were opened on April 2nd by the Board of Public Works for laying pipe in Van Ness avenue, Bay street, Fort Mason, etc. Nine figures were submitted. The lowest bid came from E. Mallory and is for \$18,000. No contract has been awarded. A complete list of all figures appears in this issue under San Francisco, City Bids Opened.

OFFICE BUILDING—12 story. Class A construction, \$1,200,000. San Francisco. Architect's name withheld for the present. Owners, British and French capital, local representation. Definite announcement is made for the first time in the Daily Pacific Builder of another million dollar commercial

structure which is shortly to be erected in this city. A site has been secured on the south side of Pine street between Montgomery and Sansome streets and construction will be undertaken this year. The site has a frontage on Pine street of 145 feet and extends back 120 feet to a rear street. The local representatives of the owners has been interviewed and states that a local architect has prepared sketches and estimates for the building. The announcement of the project makes the fifth large commercial structure which is to be erected in San Francisco during the coming year, the four other buildings of this nature previously mentioned in these columns being: 25 story class A office for John D. Spreckels, Reid Bros., Architects, cost, \$1,200,000; 12 story class A office for the Hobart Estate, Willis Polk, Architect, cost, \$1,000,000; Meyer and Liebes offices, 10 story, class A, Havens & Toepke, Architects, cost, \$500,000; and 10 or 12 story class A building at Second and Market streets, architect not selected, \$500,000.

STORES AND OFFICES—2 story and base, brick and steel, \$52,000. San Francisco. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owners, Macdonough Estate. The building is to be erected on the north side of Bush street east of Grant avenue, and will have a frontage of 53 feet 9 inches by a depth of 107½ feet. The first floor will be arranged for handsomely finished retail stores and upper floors for offices. Interior finish will be of pine and hardwood. There will be steam heat and elevator service. Metal window frames and sash are to be used. There will be sidewalk doors and light. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES—1 story and base, brick, \$10,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Water Front Realty Co. The building is to be erected at the northwest corner of Washington and East streets and will cover an area of 80x75 feet. The structure will be carried on a pile foundation. Plans provide for six stores with pine trim large display windows and patent store fronts. Mexican onyx will be used. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

STORE ADDITION—1 story and base. Class C, \$3,000. San Francisco. Architect, John Baur, Clunie Bldg., S. F. Owner, H. N. Cauwet. This work will include raising the present building and constructing the additional story on the street grade. This story will be finished for stores. Interior trim will be of pine. There will be plate glass display windows and patent fronts. Exterior will be faced with pressed brick. An ornamental marquee will be erected. Plans are being prepared.

FIRE HOUSES—3, 1 story, frame. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of three fire houses, which are to be erected on the Exposition grounds at Harbor View, have been completed and are now out for figures. Bids will close on April 22nd. Plans can be secured from the Director of Works. Official proposal appears in another column of this issue.

EXPOSITION BUILDING—2 story, frame, \$220,000. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened for the construction of the Pure Foods Building, and show Neil A. McLean low on the general construction at \$219,000. John G. Sutton low on the plumbing at \$16,350. A complete list of all figures received appears under San Francisco in this issue.

Contracts Awarded.

TRACK SPECIALS—Cost not stated. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. The following awards have been made by the State Board of Harbor Commissioners under bids opened Thursday, April 3, 1913:

Switch stands to United States Steel, \$287.50.

Brace tie plates to United States Steel, \$2,255.

5x11 tie plates to Pennsylvania Steel, \$3,630.

6x9 tie plates, 7.16 size, Eccles & Smith, \$4,350.

Compromise joints, award reset for meeting of April 10th.

65 T rails and splices, United States Steel, \$21,842.50.

Guard rails, Pennsylvania Steel, \$67,000, subject to terms of bid.

Rail joints, H. B. Green, \$5.65 each.

T rail frogs, Pennsylvania Steel, \$3,474.75.

Switches, United States Steel, \$862.50.

Guard rail, United States Steel, \$675.50.

PILE FOUNDATIONS—Cost not not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Pile foundation for Agricultural Building awarded to Mercer-Frazer Co. at 24¢ per lineal foot, and the contract for the pile foundation for the Manufacturers' Building was awarded to Contra Costa Construction Co. at 25 cents per lineal foot.

Local Architects To Open Fresno Office.

Smith, Stewart & Glass Will Enter Southern Field with Mr. Glass in Charge at Fresno.

Mr. Edward Glass, of the firm of Smith, Stewart & Glass, architects, 244 Kearny street, has just received his certificate from the California State Board of Architecture entitling him to practice his profession in any part of the State.

The above mentioned firm will open up offices in Fresno with Mr. Glass personally conducting the business in that city.

Mr. Glass has had a wide experience as draftsman both in San Francisco and in the East. In company with Mr. Stewart he spent considerable time in New York studying the apartment house and hotel problem. These two gentlemen also made a thorough study of country homes in and around Philadelphia.

Mr. Smith, the senior member of the firm has had a long experience in local practice and was for years identified

with the United States Lighthouse Service in the Eighteenth District directing much of the heavy construction work for the service on this coast.

In order that the firm may have a duplication of trade catalogues in their Fresno office as quickly as possible, building supply houses are invited to send such literature to their temporary address P. O. Box 1311, Fresno, Cal.

Bids For Big Food Products Building.

Exposition Company Open Figures For Another Exhibit Palace to be Erected at Once.

Bids were opened Tuesday by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company for the construction of the Food Products Building, which is to be erected in the Exhibit Building section of the Harbor View site. Separate figures were taken for the general construction and for the plumbing, water and sewer pipes. Neil A. McLean submitted the lowest figure for the general construction at \$216,000. John G. Sutton Co. were low on the plumbing, water and sewer pipes at \$16,350. No contracts have been awarded but the two low men will probably be given the work. A complete list of all figures follows:

General Construction.

Comnary-Peterson Co.....	\$256,600
Strehlow, Freese & Peterson	233,900
J. Monk	276,647
Lang & Bergstrom	235,655
Reese & Rountree.....	239,900
F. Rolandi	279,000
McLeran & Peterson.....	241,000
Neil A. McLean.....	219,900

Robert Dalziel Jr.....	17,735
John G. Sutton Co.....	16,350
Alexander Coleman	16,600
Burnham Plumbing Co.....	16,827
The Turner Co.....	16,881

Kern-Neilan Co., Inc. Report Large Lease.

Property South of Market Street to be Improved With Large Hotel. Rent Totals \$124,500.

For the account of Hind Estate Co. the Kern-Neilan Co. reports a lease made to N. V. Doran and A. E. Baldwin of a building to be erected on the property belonging to the Hind Estate Co., situate on the southeast corner of 5th and Minna streets. The lot has a frontage of 80 feet on Fifth street and a uniform depth of 147-10 feet on Minna street. The grading has already commenced or the erection of a four-story "Class C" structure which will contain 180 rooms upstairs and five stores and a spacious lobby on the ground floor.

The plans have been drawn by Architect William Knowles and the hotel will be one of the most modern structures of its time. The term of the lease was for a period of ten years from completion of building and the amount of rental to be paid totals, \$124,500. The tenants, Doran & Baldwin, are experienced hotel people and have taken a lease on the entire building.

Hind & Co., real estate agents, acted for the owners, The Hind Estate Co., and Kern-Neilan Co. represented the tenants

Pile Foundations For Exhibit Buildings.

Panama-Pacific International Exposition Awarded Two Pile Foundation Contracts Yesterday.

Bids were opened Thursday, April 3rd, by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company for the pile foundations of the Manufactures' Building and for the pile foundation of the Agriculture Building, both of which are to be erected in the exhibit section of the Harbor View site. Bids were taken on the basis of so much per lineal foot. Mercer-Fraser Co. were awarded the foundation work for the Agriculture Building and the Contra Costa Construction Co. the work for the Manufactures Building.

Pile Foundation, Agriculture Building
Pacific Construction Co., .29½ per foot
Healy-Thibblits Constr. Co., .25 6-10 per foot.

Contra Costa Constr. Co., .26 per foot.
Foster-Vogt Co., .32 3-10 per foot.
J. Monk, .27 per foot.
Mercer-Fraser Co., .24½ per foot.
State Constr. Co., .27 per foot.

Pile Foundation, Manufactures' Bldg.
Hyde-Harjes & Co., Inc., .29 4-10 per foot.

Mercer-Fraser Co., .29½ per foot.
Thompson Bridge Co., .28 14-100 per foot.

Foster-Vogt Co., .33 per foot.
Contra Costa Constr. Co., .25 per foot.
Healy-Thibblits Constr. Co., .31 3-10 per foot.

J. Monk, .26½ per foot.
Pacific Constr. Co., .28 per foot.
State Constr. Co., .27 per foot.

The Original Cement Wash Tray.

In 1885 Chas. Wesley, of Chicago, took out a patent for a Cement Laundry Tray, and from date, Cement Laundry Trays have been a household word.

No house is now complete without a Cement Laundry Tray.

Later, in 1888, additional patents were taken out by Mr. Wesley and from that time the Wesley Cement Laundry Tray has been a popular and

Eliminate Form Work in your concrete construction

The cost of form work doubtless has often caused you to make alterations in plans you would have liked to carry out. It is especially so in curved or arched construction—admittedly the strongest and most pleasing type.

Self-Sentering will enable you to plan roofs, floors, ceilings, walls, partitions, etc., without form work of any kind. It is adapted with equal facility to flat, inclined or curved surfaces. Concrete roofs of any character may be constructed with it. Floors can be planned with arched slab construction on spans up to 12' in width. Partitions built with it need be only 2" thick—a great saving of floor space in large lofts.

Self-Sentering is a new reinforcement and centering combined. It is manufactured in sheets 28" wide and up to 12' long, or curved in the factory to any desired radius. It is made up of a series of cold-drawn heavy ribs connected with the most efficient form of expanded metal, all cut and drawn from one sheet of special steel.

Write for our Fireproofing Handbook

We shall be glad to send you a complimentary copy on request. It is a handsome 80-page illustrated book, published for Architects, Engineers and Contractors. It will give you concisely all the facts you want to have on file regarding Self-Sentering.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, Roger Coit, 1522 Broadway. The dwelling will be similar to a great many other houses recently erected by Mr. Coit, and is to be erected on Grand avenue. The house will contain seven rooms and bath. Interior finish will be largely of pine with some elm panels in the dining and living rooms. There will be hardwood floors in the principal rooms. Furnace heat and open fire places will be used. Mantel will be of brick. Tile will be used in the bath and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, H. S. Butler, 63rd and Shattuck Ave., Oakland. The dwelling will be arranged for seven rooms, bath and sleeping porch. Interior will be finished in pine and some hardwood veneer. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. There will be an automatic water heater installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

RESIDENCE — 2 story and base, frame, \$6,000. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, A. B. Stephens. The dwelling has been mentioned in these columns before when plans were first prepared. The house has been designed to contain eight rooms, baths and sleeping porch. A garage will be erected in the rear. Interior finish will be of pine and hardwood with hardwood floors throughout. Two baths will be finished in tile. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. The exterior of the dwelling will be covered with rustic. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$2,000. Oakland, Cal. Architect, Al. J. Mazurette, 1522 Broadway, Oakland. Owner, Peter Lindblad. The house will contain seven rooms and bath. Interior will be finished in pine and elm with hardwood floors in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. There will be tile wainscot in the bath and kitchen. Exterior will be finished with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

RESIDENCE — 2 story and base, frame, \$4,500. Oakland, Cal. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner, D. A. O'Brien. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Furnace heat and open fire places will be installed. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater is to be specified.

The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$3,300. Piedmont, Alameda Co., Cal. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. The house has been designed for a seven-room dwelling with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the living and dining rooms and reception hall. There will be tile wainscot in the bath room. Furnace heat and open fire places are to be used. Mantels will be of brick. Tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$4,950. Oakland, Cal. Architect, none. Owner, H. N. Turrell, 156 Jean St., Oakland. The dwelling will contain six rooms, baths and sleeping porch. Interior finish will be largely of hardwood. Oak floors will be used throughout, except in the bath rooms, which will have composition floors and tile wainscot. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will also be used in the kitchen. There will be an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, R. H. Madden. The dwelling is to be erected in Berkeley Square Park and will contain seven rooms and bath. Interior finish will be of pine and some oak veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BUNGALOWS—5, 1 and 1 1/2 story and base, frame, \$2,500 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, F. R. Peake Co., 2127 University Ave., Berkeley. These houses will be erected in the Grove M. Berryman Tract, and each is arranged for six rooms and bath. Interior finish will be entirely of pine with some oak floors. There will be a large open fire place in the living room and an attractive tile or brick mantel. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster, rustic and shingles. Plans are complete and in the hands of the owners who will do the work by Day Labor. They are now in the market for various materials.

RESIDENCE — 2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, F. R. Peake Co., 2127 University Ave., Berkeley. The house will contain eight rooms and bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be furnace heat and open

fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. Piedmont, Alameda Co., Cal. Architect, Joseph. Cahen, 45 Kearny St., S. F. Owner, S. Greenhood. The dwelling has been mentioned in these columns before when plans were first prepared. The dwelling will contain in the neighborhood of 8 rooms, sleeping porch and baths. Interior will be finished in pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. There will be an automatic water heater installed. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$20,000. Oakland, Cal. Architect, J. Cather Newsum, 1424 Broadway, Oakland. Owner, George T. Dunlap. The building will be erected at 1st avenue and 16th street. The work will include moving the present building to the rear of the lot and completely altering the same. Front portion of the lot will be covered by the new structure. Apartments will be arranged in suites of two and three rooms each. All apartments will have connecting baths and wall beds. Interior will be finished in pine. Some hardwood floors will be used. Bath rooms will have tile wainscot. There will be a central heating system and hot water supply. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the architect is taking sub-figures on all parts of the work.

BANK—2 story and base, brick and steel, \$12,000. Oakdale, Stanislaus Co., Cal. Architect, Ralph P. Morrill, Odd Fellows' Bldg., Stockton. Owners, Commercial Bank. The building will be erected at one of the principal business corners in Oakdale and will cover an area of 25x75 feet. The first floor is to be fitted for the exclusive use of the bank and will be finished in hardwood and tile. There will be coin and safety deposit vaults. Considerable ornamental iron and bronze will be used. The upper floor will be arranged for a number of modern offices. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

FLATS—Alteration and addition, frame construction, \$3,000. Oakland, Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, P. F. Lint. The work will consist of raising the present two-story frame dwelling and adding another story underneath. Floor plans provide for a number of three and four room apartments with baths. Interior finish will be of pine and some hardwood. Oak floors will be used in the principal rooms. There will be gas grates and brick mantels. Wall beds are specified. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken for the work.

RESIDENCE—3 story and base, frame, \$11,000. Piedmont, Alameda Co., Cal. Architects, Newsum, Dickson & Meeker, 812 Broadway, Oakland. Own-

er, Mrs. Henshaw. The dwelling is to be erected in Walla Vista and is unique in its design. Interior will be arranged for nine or ten rooms, including several baths, sleeping porch and laundry. Interior finish will be of pine and hardwoods with oak floors in the main living room, dining room and reception hall. There will be steam heat and open fire places. Mantels will be of tile. Tile will also be used in the bath rooms and kitchen. An automatic water heater and vacuum cleaning system are to be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

BUNGALOW—1 story and base, frame, \$3,000. Oakland, Cal. Architects, Newsum, & Dixon, 812 Broadway, Oakland. Owner, Mr. Carrigan. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling is to be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of the architects. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,000. Piedmont, Alameda Co., Cal. Architects, Newsum & Dixon, 812 Broadway, Oakland. Owner, M. B. Cooley. The house will be erected on Hillside avenue, and has been designed to contain seven rooms, bath and sleeping porch. All interior finish will be of pine or elm. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken for various parts of the work. The dwelling will be erected by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. Piedmont, Alameda Co., Cal. Architect, none. Owner, Louis Johnson, 1732 Ward St., Berkeley. The house has been designed for a seven-room dwelling with all modern conveniences. Interior will be finished in pine with hardwood floors and some hardwood wainscot. Bath rooms will have tile wainscot and some tile will be used in the kitchen. There will be furnace heat and open fire places. Mantels will be of brick or tile. The exterior of the dwelling will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased by Mr. Johnson.

SCHOOL—1 and 2 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Architect, J. J. Donovan. Security Bank Bldg., Oakland. Owner, City of Oakland. Bids will be opened on April 21st for the construction of the Commercial High School, which is to be erected on Broadway between 41st and 45th streets. The work has been previously described in these columns. The following list contains the names of firms who had applied for plans and specifications up to April 13th:

STORES AND OFFICES—10 or 12 story and base. Class A construction. Cost not stated. Oakland, Cal. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, Hesseman and Hoff. This building is to be erected at the corner of 15th and San Pablo avenue. Only preliminary plans have been prepared and details of the construction cannot be published at this time. The preliminary sketches show a high-class office building, of fireproof construction and containing in the neighborhood of 200 modern offices. Several stories will occupy the first floor. The owners state that construction will probably be undertaken this year. Further particulars will be given in these columns as the plans progress.

STORES, OFFICES AND AUDITORIUM—6 story and base, reinforced concrete, \$180,000. Oakland, Cal. Architect, William H. Judson, Albany Bldg., Oakland. Owner's name withheld for the present. This building, which is to be known as the Arts and Crafts Building, will be erected on Harrison street. Besides the stores and offices the structure will contain an auditorium with a seating capacity of 350 people. Construction will be fireproof throughout. There will be reinforced concrete walls faced with artificial stone. Interior partitions will be of hollow tile and metal lath and plaster. Plans include elevator service, steam heat, a vacuum cleaning system, some metal trim and metal window frames and sash. Interior finish will be of pine, hardwood, metal and marble or tile wainscot. The site is 80x100 feet and the building will occupy the entire lot. Plans are now being prepared. Further announcement will be made here when plans are ready for figures.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

APARTMENT HOUSE ALTERA-
TION AND ADDITION—\$3,000. Stock-
ton, San Joaquin Co., Cal. Architect,
Walter King, Elks' Bldg., Stockton.
Owner, Mrs. Blanchard. A frame build-
ing which now occupies the site will be
raised and an addition of considerable
size will be added. Interior finish will
be of pine and some hardwood with
oak floors in the principal rooms.
Suites will consist of two and three
rooms. All apartments will have wall
beds and private bath rooms. Open
fire places and brick mantels are spec-
ified. The work will include new plum-
bing, plastering, painting and mill work.
The exterior of the building will be
covered with rustic. Plans are being
prepared.

BUNGALOW—1 story and base,
frame, \$3,500. Ripon, San Joaquin Co.,
Cal. Architect, Walter King, Elks'
Bldg., Stockton. Owner, H. L. Dickey.
The dwelling will be erected on Mr.
Dickey's ranch and will contain seven
rooms and bath. Interior finish will
be of pine throughout. Some hardwood
floors will be used. There will be fur-
nace heat and open fire places. Man-
tels will be of brick. Brick chimneys
are to be used. Tile will be used in the
bath room and kitchen. The exterior
of the house will be covered with rus-
tic. Plans are now being prepared
and bids will be called for shortly.

FRESNO, MODESTO, STANIS- LAUS AND CENTRAL CALIFORNIA.

RESIDENCE—2 story and base,
frame, \$4,500. Modesto, Stanislaus Co.,
Cal. Architect, Ralph P. Morrell, Odd
Fellows' Bldg., Stockton. Owner, G. C.
Nelson. The house has been designed
for a seven-room dwelling with bath
and sleeping porch. Interior will be
finished in pine with oak floors in the
principal rooms. There will be fur-
nace heat and open fire places. Man-
tels will be of brick or tile. Tile will
also be used in the bath room and
kitchen. The exterior of the dwelling
will be covered with pressed brick ve-
neer, rustic and cedar shakes. Plans
are being prepared.

THEATRE AND STORES—3 story
and base. Class A construction, \$150,-
000. Fresno, Fresno Co., Cal. Archi-
tects, Starbuck & Clark, Fresno. Own-
ers, J. B. Whitmore and associates.
Plans have been prepared for a build-
ing covering an area of 75x150 feet
and which is to be erected at the cor-
ner of Kern and K streets. Provision
has been made for a number of stores
on the first floor besides the theatre
proper. The main auditorium will have
a seating capacity of 1,600 people.
Upper floors of the building, not oc-
cupied by the theatre will be arranged
for modern offices. Construction will
be fireproof throughout. The theatre
will be handsomely decorated. Exterior
of the building will probably be faced
with pressed brick. Working drawings
have not been prepared. Further de-
tails will be given as the plans pro-
gress.

SCHOOL—1 story and base, brick,
\$35,000. Corcoran, Kings Co., Cal. Ar-
chitect, George M. Easton, Los Ange-
les Investment Bldg., L. A. Owners,
Corcoran School District. The building
will contain five standard class rooms,
auditorium, lecture room, two com-
mercial rooms, drawing room and prin-
cipal's office. Interior will be finished
in pine. There will be a central heat-
ing system. Exterior of the building
will be faced with cement plaster.
Plans are being prepared.

STORES AND OFFICES—14 story
and base. Class A construction. Cost
not stated. Fresno, Fresno Co., Cal.
Architect, Edward T. Foulkes, Crocker
Bldg., S. F. Owner, H. H. Brix. Only
preliminary plans for this work have
been prepared. The structure is to be
erected on J street, adjoining the
Griffith-McKenzie Building, and will
have a street frontage of 100 feet and
a depth of 150 feet. The first three
floors and the basement will be oc-
cupied by a large department store.
Upper floors will be subdivided into
modern offices. Construction will be
fireproof throughout. Further de-
tails will be given as the plans pro-
gress.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick and frame, \$40,000. Long Beach, Los Angeles Co., Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owner, Dallas M. Cate. The building has been designed in the shape of a letter U and will cover an area of 125x96 feet. Interior has been arranged for 108 rooms which are to be divided into two, three and four room apartments. All suites will have connecting baths and wall beds. A central heating system, hot water supply, vacuum cleaning and elevators will be installed. Interior finish will be of pine. The exterior of the building will be covered with veneer brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick, \$40,000. Los Angeles, Cal. Architect, A. W. Riewe, California Bldg., L. A. Owner, A. S. O'Neill. The building will be 50x132 feet and will contain 75 rooms which are to be arranged in two and three room suites with wall beds and private baths. Interior will be finished in pine and some hardwood. Bath floors will be of cement. There will be steam heat, automatic elevator and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GARAGE—2 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, R. E. Young & Son, Lankershim Bldg., L. A. Owner, Charles E. Anthony. The building will cover an area of 50x165 feet and is to be designed for a commercial garage. The front portion of the first floor will be arranged for offices and will be handsomely finished. The balance of the building will be given over to storage space and machine shops. Reinforced concrete construction will be used throughout. There will be metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are ready for figures.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, R. D. King and Edward C. Taylor, Consolidated Realty Bldg., L. A. Owner, Mark G. Jones. The building is being designed for a commercial garage. There will be a concrete floor, metal window frames and sash and special gasoline storage tanks. The exterior of the building will be faced with pressed brick. Plans are being prepared.

GARAGE—2 story and base, brick, \$12,000. Los Angeles, Cal. Architect, A. W. Riewe, California Bldg., L. A. Owner, P. V. St. Clair and A. E. Gordon. The building will be 45x145 feet and is to be used for storage purposes only. Interior finish will be of pine. There will be metal window frames and sash. The exterior of the building will be faced with cement plaster. Plans are being prepared.

CAR BARN—1 story and base, concrete and brick. Cost not stated. Los Angeles, Cal. Architect, M. C. Halsey, Pacific Electric Bldg., L. A. Owners, Pacific Electric Railway Co. The building, which will cover an area of 210x256 feet, will be erected in three sections, each 67x256 feet. There will be concrete floor and work pits, steel

room trusses and asbestos roof. The exterior of the building will be faced with cement plaster or stock brick. Plans are being prepared.

HOTEL—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabichi. The building will cover an area of 50x150 feet, and will be arranged for stores on the first floor. Upper floors will contain about 63 guest rooms and a number of baths. Interior finish will be of pine and some hardwood. There will be steam heat and elevator service and a hot water system. The exterior will be faced with pressed brick. Plans are complete and figures will be called for at once.

HOTEL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, none. Owner, T. J. Douglass, Jr., Grant Bldg., L. A. The building will cover an area of 50x100 feet, and is to be arranged with stores and the hotel lobby on the first floor. Upper floors will contain a number of baths besides the guest rooms. Plans include steam heat, elevator service and a hot water supply system. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

LIBRARY—1 story and base, brick, \$12,000. Glendale, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, City of Glendale. Plans for a Carnegie Library have just been approved. The building will cover an area of 36x70 feet and will contain general and children's reading rooms. Librarian's office, reference room and lobby. There will be a central heating system. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LIBRARIES—2, 2 story and base, concrete and brick, \$35,000 each. Seattle Wash. Architect, W. Marbury Somerville, White Bldg., Seattle. Owners, City of Seattle. Plans for both of these buildings, which have been designed for branch city libraries, will be completed shortly and bids will be called. Both buildings will be fireproof throughout. Exteriors will be faced with cement plaster. Interior finish will be of pine and hardwood. There will be central heating systems.

STORES AND LOFTS—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, J. Burton. The building will cover an area of 50x140 feet. The first floor will contain two stores and upper floor a large loft. Interior will be finished in pine. There will be patent store fronts and metal window sash and frames. The exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES AND LOFTS—5 story and base, reinforced concrete, \$120,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabichi. The building will be erected on Los Angeles street and will cover an area of 116x140 feet. Construction will be fireproof. There will be metal window frames and sash. Four elevators and a steam heating system will be installed. The exterior of the building will be faced with cement plaster.

Plans are complete and figures are being taken.

OFFICES—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, J. Martyn Haenke, Story Bldg., L. A. Owner, William H. Hearst. This project was mentioned in a recent issue. The property on which the new building is to be erected covers and area of 360x110 feet. The structure will contain the offices and plant of the Los Angeles Examiner and about 300 modern business offices. Further details will be given as the plans progress.

Contracts Awarded.

APARTMENT HOUSE—4 story and base, brick, \$70,000. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Sidney Goldman. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price \$70,000.

Editorial Comment.

Building operations for the month of March, as reported to the American Contractor, show a loss in the aggregate of about 4 per cent as compared with the same month last year. Considering the unprecedented storms and floods that have devastated many of the building centers in the middle west and has materially affected all building in the eastern states the loss is not unexpected or even as great as one would suppose. Reports from some forty-five cities throughout the country show the following figures:

	March, 1913. Cost.	March, 1912. Cost.
Akron	\$ 235,060	\$ 190,710
Baltimore	814,874	561,375
Buffalo	1,694,743	507,000
Cedar Rapids	151,000	124,000
Chicago	7,690,600	4,743,600
Columbus	307,328	458,966
Denver	322,400	591,650
Duluth	1,797,205	114,125
Fort Wayne	209,672	293,000
Grand Rapids	184,750	123,780
Harrisburg	141,555	99,075
Hartford	453,505	830,100
Indianapolis	754,305	558,780
Kansas City	911,260	1,166,730

-------------	--------------	--------------

Oakland, San Francisco and Los Angeles have shown gains for the past month while Portland and Seattle show

a slight depression. Insofar as the money market and business generally has shown inactivity and there is some uncertainty as to the tariff situation, the general building situation is just about as could be expected under the circumstances.

For getting into the newspapers with family troubles and scandals generally the architectural profession seems to be in a class by itself.

More limestone 's produced in the United States than any other kind of stone, not excepting granite, and its value is also greater.

The value of the limestone output in 1911, according to the United States Geological Survey, was \$33,897,362, a decrease of \$706,316 from the figures for 1910. The decrease in value was chiefly in limestone used for fluxing. These figures do not include the value of most of the stone that is burned into lime, nor a large quantity of limestone used in the manufacture of Portland cement.

The principal states that produced limestone in 1911 were, in rank of value, Pennsylvania, Ohio, Indiana, Illinois, New York and Missouri, each having an output of more than \$2,000,000.

The approval of the Chronicle and some of the improvement bodies of the compromise of the Board of Supervisors and the United States with regard to the use of the lower Market Street tracks seems to cast suspicion upon the measure. It is not all probable that the railroad is losing any thing or is not in fact gaining a great deal by the compromise.

The recommendation of Mr. Arnold as to a forty year extension of the railroad franchises also meets with their approval. It is a pretty safe bet that if the people turn down the whole proposition they will be doing themselves a favor at the coming election.

The Chronicle sees grave danger in the upbuilding of a political machine by the workmen's compensation bill. It is too bad that the Southern Pacific machine or the United Railroads machine never inspired the Chronicle with any degree of apprehension. If the compensation bill is wrong in principle go up to the public hearing and fight it out in the open. If the poor unfortunate employer is to be pursued beyond the grave he certainly ought to have a chance to be heard. So that some of the tears that splash over the editorial page of the Chronicle may be saved for the public and the harrowing tales of future woes may be tossed in public forum and affect the proposed perpetrators of this deadly act.

Canadian Architecture. Its Development And Surroundings.

(Reprinted from Construction.)

The paper read before the Royal Institute of British Architects, London, January 20, by F. S. Baker, P. R. I. R. A., was listened to with unusual interest. The members were agreeably surprised at the rapid progress of architecture as depicted by the speaker. Mr. Baker gave his subject life in showing the various types of commercial and domestic buildings by means of lantern slides and photographs. It has given us a better value of the artistic character which is permeating every branch of construction throughout the Provinces, and we feel that the basic principles of true art are being applied in a thoroughly wholesome and practical manner.

The former part of Mr. Baker's address dealt with the general conditions which surround the architectural profession in Canada. The following extracts, taken from the paper, may be of interest to the readers of "Construction" as a summary of many phases already appreciated, but many which may never have been considered in their vital importance to the future development of the Dominion's commercial growth.

After an expression of appreciation for the honor bestowed upon him by the Institute, Mr. Baker said: As in England, the system of "pupillage," but without fees, is the most common commencement for the would-be-architect. In four of the Provinces—Quebec, Manitoba, Saskatchewan, and Alberta—the title architect is protected by law, and no one may call himself and architect unless he has complied with the law, and qualified by passing certain examinations prescribed by the Act. A fifth Province—Ontario—also has an Act, but, owing to the insertion of the word "Registered" before "architect" by the Government of the day, it has no effect, and anyone who pleases may call himself "architect." The remaining Provinces are all organizing with a view to obtaining legislation similar to that in force in the four Provinces above named. In all of these four Provinces the degree of Associate R. I. B. A. is accepted as a satisfactory qualification for admission to membership at present, and here I may say that the Royal Institute of British Architects is held in very high esteem throughout the Dominion. The universities of these Provinces, including Ontario, have special courses in architecture, and issue degrees.

Owing to the fact that in Canada the builder takes out his own quantities, drawings have to be made very complete, and this has tended to raise the quality of draughtsmanship throughout the country, and, incidentally, gives the student a chance to learn details of the work which an English student does not come in contact with. If this is a reason in favor of the lack of quantities, the opposite must be said in the difficulties occasioned the practicing architect in dealing with builders, owing to the lack of the system in vogue in England.

At present there are no travelling

scholarships in architecture, and the necessity for these is becoming more and more apparent. Private "ateliers," in which practicing architects of the younger school mostly are patrons, are available for the students in many of the larger towns during the winter.

It has been said that "the next fifty years will decide the character and type of Canadian architecture," but having regard to the extreme youth of the country, such an event would seem to be most unfortunate, and I for one would like to feel that the students of fifty years hence will have something to strive for in creating a greater excellence than the art will then have reached in Canada. It should be said, however, that the Classic orders are fairly well understood, the value of proportion appreciated, and the application of ornament and mouldings handled in a conservative way.

Mr. Baker showed how the extreme changes in the climatic conditions necessitate careful precautions in all branches of the building trades. In referring to the natural products, the vast resources of the Provinces were brought vividly to our attention and considerable emphasis was laid on the fact that Canada would soon be able to supply all her needs in this direction. The reference to marbles, stones, etc., was as follows:

Splendid marbles are now procurable, suitable for almost any purpose, and I will not be surprised if when these quarries are fully opened marbles will be found which equal any which have been produced on the continent of Europe. In the eastern part of the country very fine granite is obtained, and also in Central Ontario. Good limestones are quarried in the Eastern Province, and throughout Ontario, and the West in many parts.

The Portland cement produced in Canada is excellent; everywhere fine grit sand is obtainable, and good limes are burnt in nearly all districts. Canadian bricks are well known for their excellence, but the production of terra cotta, other than hollow blocks for fireproof construction work, is limited. Steel sections are rolled from Canadian ore in nearly all the large centers. Castings in metal of good quality are easily obtainable. Canadian woods are well known: white pine, red pine, and spruce, white and red oak, birch, maple, walnut, cherry, butternut, white-wood, and cedar are the commonest varieties. Wood of all kinds is becoming more and more difficult to obtain, and the price is advancing, with the result that what is known as "fireproof construction" is becoming more and more popular. Sheet metal, galvanized iron, and copper are almost entirely imported. Sheet lead is, of course, scarcely used for flashing purposes, owing to the large range of temperature which prevails. Paints and oils are produced on a large scale, and of excellent quality, but the high grades of glass are as yet mostly imported. Sanitary pipes and fittings, as well as fixtures, are manufactured, but a large quantity is also imported. Gas and electric pipe, fittings, and fixtures, with all

kinds of glassware, are made in most localities.

Considerable interest was shown to Mr. Baker's answer of the article on "Imperialism and Architecture." (Printed in "Construction," Nov., 1912.) He referred to the statement that the U. S. American "ideals and methods of expression" are being appropriated by Canadians and granted that the Canadian architects have been experimenting along U. S. American lines in the designs of all classes of buildings. Mr. Baker qualified this point with the following comment: "I can say definitely, however, that American ideals and methods of expression are not being adopted any more than those of any other country, except in so far as they apply more conveniently to conditions in Canada. In the matter of design, I believe I am right in saying that the British influence is much the strongest one affecting Canadian architects, who, generally speaking, are strong Imperialists." As for the fact that "in Vancouver, Toronto and Montreal, the largest and handsomest buildings are the works of American architects" it was forcibly denied. The statement brought forth the following TWO March 27 HOYT

comment: "I know of only two large buildings in Montreal which have been erected in the last twenty years under U. S. American architects. In Toronto, strange as it may seem, the Anglican Cathedral of St. Alban is the only building I know of which is in the hands of a U. S. American architect. Winnipeg has one bank and one railway terminal designed by New York architects. Vancouver may have a building which has been designed by a U. S. American architect, but I am not aware of its identity. There is no reciprocity between the architects of the United States and Canada, and both are subjected to practically prohibitive customs tariffs. In the above I do not include architects who have permanent offices in Canada as well as in New York; but if they were included, and I say it with all modesty, the works of Canadian architects far away surpass those few buildings which have been erected by foreign architects. Canadian statesmen, benefiting by past experiences of Great Britain and other nations, have taken precautions which make it practically impossible for foreigners to exploit the opportunities which Canada presents in any way except that which will most benefit Canada. Thus it is that many manufacturers of building materials residing in foreign countries and wishing to avail themselves of the Canadian market have found it desirable to establish a factory in Canada.

Reference was then made to the work already done in the field of architecture. Among other notable structures were described the Federal Government Buildings at Ottawa, and those which house the Legislatures in each Province; the Provincial buildings at Victoria, city halls, post offices, court houses, public libraries, hospitals, art galleries, churches, etc.

The following types of buildings were then taken up, which demonstrate clearly the rapid progress that is being made in the various phases of commercial life.

Canadian shops are, generally speaking, of a fairly high class, and show a good deal of skill in their planning and arrangement. In contra-distinction to the English custom, the authorities in Canada permit huge shops to be erected as one room to each floor, and the effect of this in the large stores, with their wealth of stock, is bewildering. The newest of these shops are, of course, of fireproof construction, and are fitted with automatic sprinkler installations, and every known precaution against fire is taken.

The wholesale warehouse is a very distinct type of building, and is usually a fine structure. Lately these have been built of in-proof construction, reinforced concrete, or steel frame with tile or concrete casing. Most of them are fitted with automatic sprinkler installations and every other known method of preventing fire. In this way the cost of insurance on buildings and their contents has been reduced to a nominal sum, even in the most congested districts of the large cities.

Perhaps the most ornamental buildings throughout Canada are the banks and their branches. There are some thirty chartered banks in Canada, and many of these have upwards of 300 ranches each. The designing of these banks has brought perhaps more good architecture than any other type of building in the country, as so much work of high class is involved.

The author also referred to Canadian office buildings, railway stations, hotels, houses, theatres, educational buildings, and dwellings of the people. The dwellings of the people are mostly of the bungalow type, and are mostly of brick or wood. Although Canada is a wood country, wooden houses do not predominate; they are mostly of brick or wood. Many of those which are apparently brick have a wood frame, with a brick veneering of the thickness of a half brick, and this type of house is a wholesome and satisfactory one.

This report would not be complete without the valuable discussions entered into by the members present, which are presented herewith, in which high Imperial note is evidenced.

The President, Mr. Reginald Blomfield, A. R. A., said they had had a most vivid and interesting paper from Mr. Baker, and were fortunate in having present two distinguished gentlemen whom he would call upon to propose and second a vote of thanks. One was Mr. Herbert Baker, who had a brilliant reputation in South Africa, and the other was Mr. J. G. Colmer, a very distinguished Canadian, who had done a great deal for Canada in this country. He would therefore call upon Mr. Herbert Baker to propose a vote of thanks, and Mr. Colmer to second it.

Mr. Herbert Baker (F.R.I.B.A.) replied that he had given him very great pleasure in being present to hear the most interesting lecture just delivered to them, and well as to propose a vote of thanks and namesake from across the seas.

Mr. Baker had shown most ably how very progressive Canadians were in their architecture. But this was only to be expected by those who knew how very up-to-date, energetic and progressive Canadians were, and how they had as their immediate neighbors the most energetic of all nations, who had shown, particularly in their architecture, such Titanic powers. But he was glad to hear from Mr. Baker that the Canadians had no more intention of being swallowed by these Titanic neighbors in their architecture than in their nationality. He was one of those who thought that the principle "Art for Art's sake" was a very dangerous one; it might take them along the "primrose path of dalliance," but would not carry them far up the "steep and thorny road to heaven." And that heaven or ideal before them was to interpret or give expression to the highest national feelings of their race and nationality. And if Imperial Federation should ever become a real fact—and Canada had recently shown by her great gift of Dreadnoughts how very earnestly she was striving to this end—then architects all over the Empire must be prepared by study to give expression to those ideals. If they were to have the same unity in their architecture as they hoped to have in their federation of nations, it did not mean that either in politics or architecture they must give up their separate national individuality; indeed that would be quite impossible. Climatic reasons alone forbade. He did not think that it was generally sufficiently realized in this northern climate how great the effect of climate was upon architecture. He did not think that sufficient importance had been given to it in the text books. They knew the saying of Italians that "only dogs and Englishmen walk in the sun." He thought that in the books one reads on architecture the authors had not got beyond "the walking in the sun" stage; they looked upon the sun as simply a thing of enjoyment, and did not realize that most southern nations had worshipped the mid-day sun as an evil deity. When one lived and worked under a semi-tropical sun one realized the dominant influences it had upon architecture. To his mind Gothic architecture was not developed so much as text books made out through the special characteristics or the "crusading spirit" of northern nations, although these no doubt had a large effect, but also entirely by the demand for letting sun and warmth into buildings. So that the effect of climate, particularly in the southern dominions—perhaps less in Canada—together with the special needs and individuality of the people, would give a distinctness and individuality to its architecture. The question was how best to get this Imperial unity and spirit into our architecture. He thought it could be done largely in two ways; first, through their Mother Institute, which had come to be the real mother to nurture all its children; and, secondly, through the British School at Rome. He should like Mr. Baker to take back to Canada an idea of the value of that school. Some four or five architectural students from South Africa had been receiving the advice and hospitality of the school. Any British subject who was a genuine student of art could be made a member of the school, but although there had

been four or five South African students there, there had been no Canadians; and he hoped Mr. Baker would take back this fact and explain it to his brother architects in Canada. The best way was to get at the students, and he should like to see scholars from all parts of the Empire coming to study in Europe—they must often come to the Old World—under the direction of the Mother Institute and of the allied British Schools at Rome and Athens. And it would be good for all architects, young and old, to pay a pilgrimage every few years to St. Paul's and then to the Pantheon, to stand under those majestic domes, so as to adjust their sense of scale. He hoped, therefore, that Mr. Baker would take back this message, and that in a few years they should hear of Canada making a present to the Mother Country of three fine young architectural student Dreadnoughts!

Mr. J. G. Colmer, C. M. G., in seconding the vote of thanks, said he had no hesitation in expressing his satisfaction at the piece of work which had been presented to them that evening by Mr. Baker. It gave a very admirable illustration of what architecture had done and was doing in Canada, and he believed it would give as much satisfaction in Canada as it had done in that room. Canada, it was true, was a very young country, but, as they had seen in Mr. Baker's illustrations, Canada had reason to be proud of its buildings. No one could go there and travel from east to west without being impressed with the character of the buildings, both public and private; they would be found to compare favorably with the buildings in towns and cities of similar size whether in the United States or in the United Kingdom, and that was saying a great deal for a country whose history was so recent as that of the Canadian Dominion. Mr. Baker had spoken of the opportunities for architects in Canada. That was a matter about which he had had some experience; he had known many young architects go from this country with letters of introduction, who had seemed to fall on their feet at once, and had not been long in making reputations for themselves and in making money, which was sometimes more favorably regarded even than reputation. What he liked in Canada was that there was no professional jealousy there. If a young architect went there he was welcomed, and given every assistance, counsel, and advice, and was regarded as an additional factor in helping the building up of the country of which the Canadians were so proud. Mr. Baker had mentioned the absence of art galleries. That, unfortunately, was true, but in a young and vigorous community like Canada, where they were busily engaged in making money and developing their country, they had not so much time to devote to what they regarded as luxuries as people in older countries. But they had art galleries, and Mr. Baker would confirm him, that both in Montreal and Toronto, as well as in some of the other cities, there were magnificent collections of pictures held by private persons. Many masterpieces were now in Canada; and he should like to think that those pictures, being there, would not only remain there, but would increase in numbers, and that they would form by and

by a splendid nucleus for a great art collection in Canada.

Mr. T. H. Mawson (Hon. A.): In the matter of work I may claim to be as much Canadian as an Englishman. I am therefore delighted to meet Mr. Baker on this side of the Atlantic, for I know from personal experience what a salutary influence his work, his enthusiasm, and, may I add, his personal charm exercise over the architecture of Canada. Great art, it is said, is only possible when great ideas are patent and the prevailing atmosphere. Our lecturer is a man of great ideas, and for this reason I regret that his overmastering modesty has led him to withhold views of his own work. Canada is truly a country of pulsating energy, here men of vision, the true pioneers, are ever building castles in the air, while others are laying broad foundations upon which these dreams, materialized, may firmly and safely rest. Do you remember that fervently eloquent address which Mr. Forbes Robertson delivered some time ago before the London Society in which he mentioned the Artist Cardinal who had told him that Greece developed her highest forms of architecture in her colonies? History, he said, promised to repeat itself in our colonies. I think Mr. Robertson's statement was meant as a warning and yet as a hope. So far as Canada is concerned, there is great hope, but I am bound to confess that I detected in Mr. Baker's address a disturbing element when he spoke of preference for English ideals. I wonder if I misunderstood him? Does he mean the ideals of today, or the English traditions we so easily laid aside? I am sure that every Imperialist (if he be also a patriot) would desire, above all things, that Canadian architects should go for their inspiration to that which exhibits the most consummate skill in its planning, the most scientific form of construction, the ripest scholarship, and the highest imaginative qualities rhythmically expressed. These are qualities which are not necessarily and wholly British possessions. Canadian architects are to be trusted, however, for every office of recognized standing possesses its well-selected and well-ordered library, housed in a separate room, which is the common room for principals and staff. Any office which centers round so much learning is sure to turn out excellent and inspiring work. Speaking as an onlooker and without that wide experience possessed by Mr. Baker, I should have thought the influence of the McKim and the Ecole des Beaux-Arts traditions were stronger than he seems to admit, and that the work of American architects, including the large number of railway stations designed by New York architects, and also the Gothic work of Cram and Ferguson, especially in the cathedrals at Halifax, Nova Scotia, and at Toronto, were also strong influences. I admit, however, that it was a perfect joy to me to see our Collegiate Gothic handled in such a masterly way by firms like Sprout & Ralph, of Toronto, and Brown & Valance, of Montreal, in the Universities of Toronto and Saskatoon. Also to see the fine work of the brothers Maxwell at the Regina Parliament Buildings, and the fine domestic work being done by Mr. Baker himself and others, like Mr. Meredith, of Ottawa, and Mr. McClure, of Victoria, and our friend Mr. Lawrence Goltch in Calgary.

Mr. Baker and I are mutual admirers of the strongest of all influences now operating in Canada. I mean the work of that delightful man and great artist, Mr. Frank Darling, of Toronto, one of whose banks has been shown on the screen and met with your applause. It is by the work of this high excellence that Canadian architects are wrestling commissions from American competitors; and, may I add, it is by ability to do equally good work that young English architects will find a foothold in the Dominion of Canada. Just one word about the craftsmanship of Canada. I do not say any country where one can see such perfectly beautiful brickwork or where patent stone is treated in such an honest an inoffensive way. Woodwork is most excellent; half-timber work, however, has never seemed to me to reach the quality of English work, but this is probably more the fault of the architect than the craftsman. I think metal casements are rapidly coming into use in Canada; in fact I know of one firm alone who have paid an English firm \$78,000 for casements alone during the last three years. Westmoreland slate is beginning to be used and should eventually oust the American slates. Much of the metal work is charming, both in design and craftsmanship; sanitary fittings, central heating and vacuum cleaners, and every domestic labor-saving appliance has reached a higher degree of excellence than at home. Garden design, "the greater perfection," as Lord Bacon says, is little understood; but now that Canada has grown "to the age of civility and elegance," the art of garden-making will soon take its place and give the ideal setting to many truly ideal homes. Mr. Baker says that everywhere in Canada great interest is being taken in city planning. I, together with my friends Mr. Unwin and Mr. Vivian, have had some little share in fomenting an anxiety for civic betterment, and I am, therefore, delighted to be able to confirm his statement; and let me say in this connection that the Dominion owes a great debt in this matter to the influence and active support given to the movement by the late Governor-General Earl Grey. They are also most fortunate in having H. R. H. Field-Marshal the Duke of Connaught another Governor-General who is deeply interested in city planning and everything which has to do with the development of a national and characteristic architecture. May I, in conclusion, suggest that this Institute might organize a trip to Canada. They would find true British hospitality and much to encourage them. In short, the trip would prove the most perfect mental tonic.

The President said they had had a most interesting paper from Mr. Baker, and were very grateful to him for having crossed the Atlantic to tell them about the architecture of their kinsmen beyond the seas. It was clear from his account of what was being done in Canada that their colleagues there were addressing themselves to the problem of architecture in a very practical and strenuous spirit; they were going into the essentials of the matter. In their banks, their public buildings, their hospitals, they were determined to have something which would answer the purpose, and that

after all, was what architects had to strive for, whether in the old country or in the new. He gathered from what Mr. Mawson had said that Mr. Baker was himself responsible for some beautiful buildings which his modesty prevented him from showing illustrations of. There was of course a point at which such a country as Canada, with all its splendid promises, must be, to use a vulgar phrase, "hung up" because it had not the tradition of architecture, and it was there that we of the old country might be able to help. Of course, we ourselves were rather like the Prodigal Son; we had not only no tradition, but several, and we have squandered them all. And now our business was to build up this tradition of architecture. But even though we were prodigals and bankrupts, and several other things, we could not escape the consciousness of a great historic past in architecture. It was in that consciousness that the hope of the future of architecture in this country rested; and he was sanguine enough to think that that hope was not without foundation. Mr. Baker had said many things which they had listened to with great interest, and some which they all welcomed very heartily. He told them—and Mr. Herbert Baker of South Africa had confirmed him on that point—that their Institute was regarded with very high esteem, and even affection, in those two great countries, Canada and South Africa. That was very welcome to them, because the Institute had to weather many storms, and might have to weather many more; but this loyalty of far-away countries, from those who were gone from them and were practicing architecture across the seas, was one of the most encouraging things he knew. Mr. Baker also told them that in his opinion the most predominating influence in Canadian architecture was the British influence. That, again, was very encouraging. It was very significant that both Mr. Baker and Mr. Nobbs, the professor of McGill University, should have urged the same appeal for some collections of replicas, and reproductions of the best work that had been done in this country in the past, something such as they had in the Trocadero in Paris of the great French works. That was a very important appeal. We had the architectural Museum at Tufton street, but every one would admit that it was inadequate, and he thought we should do what we could in our own way to help this appeal. Mr. Herbert Baker had pointed out the splendid patriotism and genuine feeling in Canada with regard to the Mother Country. This was more than we thought possible a few years back, but now it was a magnificent fact, and they should do what they could to help in this matter, as he hoped the appeal would not pass unheeded at Whitehall. They heard Mr. Baker throw out certain speculations as to the future of Canadian architecture during the next twenty years. He regretted to say he differed from one of the speakers; he did not think the path indicated by that speaker was one he should hope to see in the future architecture. One great member of this Empire, he thought the neighbors of the great Dominion had possibly over-reached themselves, and had fallen a little too impetuously into the net of modern French architecture, because, he now

hardly point out, modern French architecture was not the same thing as old French architecture. It was a very different thing, although he should be the last to disparage the work of his colleagues and friends across the channel, some of whom did splendid work. But the modern vernacular of French architecture was not a thing to be adopted as the basis of a great tradition. They hoped that future architecture of Canada would be founded upon an old tradition; whether French or English was for their colleagues in Canada to determine. If they followed those lines, he did not think they would have any difficulty, with their great ability and force of character and splendid possibilities, in establishing a great tradition of architecture. He did not doubt that that tradition would be perfectly elastic and adaptable to all the requirements of modern civilization. And he would draw Mr. Baker's attention once more, as Mr. Herbert Baker had done, to the Imperial aspect of the case—viz., to the new British School at Rome. It was one of the most important departures in architectural tuition in the last fifty years, because if properly handled much might come out of it, and they should hope to see some brilliant young Canadians at work there.

Mr. F. S. Baker, in reply, said: I thank you for Canada and for myself for the kind and hearty reception which you have given my paper. If I have been able to tell you anything about the country which is so far away from you, and which probably thinks more about you at home here than you have time to think of it, I shall feel very glad. I commend it to your study, because it is a large district, and there is no doubt its development will go along the lines that the people who go to live there outline for it. It has been most interesting for me tonight to meet Mr. Herbert Baker from South Africa. I am sorry I cannot claim him as a kinsman, but I feel very proud that a man of the name of Baker should be such a distinguished gentleman. He comes direct from Rome, where he has been closely in touch with the new British School of Architecture, and I shall certainly make it my duty, on going back to Canada, to bring full particulars of the scholarships and the opportunities presented by that school to the members and students of the profession in Canada. You must realize that our students are few in number, and are not well off; and it is not easy for them to contemplate the spending of a few years in Rome. Most of them are boys who are making their own way, and are not the sons of rich men. I am afraid the sons of rich men in Canada look for some easier work. What Mr. Baker said about climatic conditions is true. It would be absurd to see a delicate Spanish cornice hanging with great icicles or piled up with snow; and there are many things possible in Spain and South Africa which would not be possible in Canada. And I think that is what most impressed Mr. Richardson after his studies in France and Spain, namely, the necessity of using materials in America in a way suitable to the climate. That is why we have those unusual works which were designed by him. Mr. Maxson spoke of the McKim, Meade & White office and its effect on Canadians. But while the highest tribute must be paid to them

individually and as a firm for the wonderful buildings which they have produced, there is not in Canada a feeling that the school of McKim, Meade & White is an altogether desirable one. There is certainly there—and our president's remarks have brought it to my attention—very clearly the desire to follow the tradition that goes back beyond any result which McKim, Meade & White have attained. There is arising now in Canada a collegiate Gothic architecture—and there are some photographs amongst those I brought over which show its commencement, and I hope indicate a good future for it—which undoubtedly is based upon the sound tradition of perhaps the best period of English architecture. I think many Canadians accept the idea that not only in architecture, but in almost everything, England has experimented, and finally arrived at a conclusion which might be called a conservative conclusion, and having tried all, has adopted which seemed some good private art collections, but best to her. We have undoubtedly

they are not available for the student, and I do not hesitate to say that adequate buildings will be forthcoming when the collections can be obtained. I think we have to look to England for assistance in obtaining these collections. The Ecole des Beaux-Arts has been spoken of tonight as if Canadians were strongly influenced by it. I think it is largely owing to the work of Professor Nobbs that that school, the excellence of which is universally accepted, is not held in higher esteem in Canada in its results than is the sound training obtainable in England. It is recognized that while the old French work was magnificent, the modern French work is not so much to be admired, nor are, in my humble opinion, the modern French methods of draughtsmanship. Something straightforward, something plain and useful and sensible is what the Canadian is always looking for. If he can get the direct result in a direct way, that will convey without loss of art the correct idea to his critic, that is what he wants.

Persons desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$50,000. Architects, Falch & noll, Hearst Bldg., S. F. Owner, Miss D. Loaiza. This building will be erected at the southwest corner of Taylor and Washington streets and will cover an area of 55x137½ feet. The two first floors will contain a total of 17 large apartments, arranging from two to four rooms each. There will be steam heat, an automatic elevator and a vacuum cleaning system. Interior finish will be of pine and hardwoods. All suites will have private baths and wall beds. A hot water system will be installed. The first floor is to be fitted up for the owner's residence and will contain in the neighborhood of 15 rooms. Interior trim will be of pine, oak and mahogany. Bath rooms will be finished in tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

ALAMEDA, ALAMEDA CO., CAL.—Apartment house, 2 story and base, frame, \$15,000. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The building will be erected on a lot with two street frontages. Only preliminary plans have been prepared and details of the construction are not available. The interior will be arranged for two and three room suites. The exterior will probably be faced with cement plaster. Complete details will be given as the plans progress.

OAKLAND, CAL.—Apartment house, 1 story and base, brick and steel, \$67,000. Architect, C. W. McColl, Central Bank Bldg., Oakland. Owner, Dr. R. B. Ayres. The building will be erected at the corner of 14th and Oak streets, and will contain a large number of two and three room suites with all modern conveniences. Interior will be finished in pine and hardwoods. Plans provide

for steam heat, vacuum cleaning system and elevator service. Bath rooms will have cement floors and tile wainscot. All suites will have private bath rooms and will be equipped with wall beds. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

3 story and base, frame, \$30,000. Architects, A. F. and O. M. Rousseau, Mohadnock Bldg., S. F. Owner, Mrs. Wilhelmela Street. The upper two floors of the building will be arranged for sixteen suites of two and three rooms each with private baths and wall beds. The first floor will contain two modern stores. Interior finish will be of pine and some hardwood. Bath rooms will have tile floors and the baths and kitchens will be wainscoted with Keene's cement. There will be a central

OAKLAND, CAL.—Apartment house, heating system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 5 story and base, brick, \$100,000. Architects, A. F. and O. M. Rousseau, Mohadnock Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Telegraph and Durant Ways, and will cover an area of 90x100 feet. Plans show a total of 100 guest rooms, which are arranged in suites of two and three rooms each with bath. Interior will be finished in pine and hardwoods. Bath rooms will have tile floors and wainscot. A unique feature of the building will be open air sleeping porches in connection with all apartments. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

PORTLAND, ORE.—Apartment house, 4 story and base, brick. Cost not stated. Architects, Claussen & Claussen, McCleay Bldg., Portland. Owner, Dr. W. L. Wood. The building

will cover an area of 62x100 feet, and will contain 35 apartments of two and three rooms each. All suites will have private bath rooms and will be equipped with wall beds. Interiors will be finished in pine and hardwood with tile, linoleum and cement floors in the bath rooms. There will be steam heat, elevator service and vacuum cleaning system. The exterior of the building will be faced with pressed brick. Segregated bids are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, William Bush. The building is to be erected on a corner and will be arranged for one store on the first floor and five apartments of two and three rooms on the upper floors. Interiors will be finished in pine and some hardwood. Tile will be used in the bath rooms and kitchens. A water heating system will be installed. The exterior of the building will be covered with cement plaster and brick veneer. All suites will have wall beds and private baths. Plans are being prepared.

SAN FRANCISCO—Apartment house, 5 story and base, Class C construction, \$50,000. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, P. J. Gartland. The building is to be erected on Geary street and will have a frontage of 42 feet and a depth of 120 feet. There will be two stores on the first floor besides the entrance. Upper floors will be divided into 88 rooms, which are to be arranged in two and three room suites with private baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning system. Interiors will be finished in pine and hardwood. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$11,000. Architect, John J. Foley, 46 Kearny St., S. F. Owner, Mr. Solari. The building will be erected at a corner and will contain six apartments of four rooms and bath each. Interior finish will be of pine with some hardwood. Each apartment will have a large open fire place and tile or brick mantel. A hot water system will be installed. Tile will be used in the baths. Wall beds are specified. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures will be taken shortly.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$12,000. Architect, W. H. Judson, Albany Bldg., Oakland. Owners, Davis Estate. The building will be erected on Hudson street and has been designed to contain 24 apartments of 2 rooms each with bath. Interior will be finished in pine and redwood. A central heating system will be installed. All suites will have wall beds. Tile will be used in the bath rooms. The exterior of the building will be covered with brick veneer and rustic. Plans are being prepared.

SACRAMENTO, CAL.—Apartment house, 5 story and base, reinforced concrete, \$180,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Dr. Paris. This building has been mentioned here a number of times be-

fore. The lot is situated on a corner and the building will contain over 200 rooms. All apartments will be provided with a sleeping porch. Mechanical plans provide for steam heat, elevator service, hot and cold running water supply, refrigerating plant, vacuum cleaning system and all other modern equipment. Suites will contain from two to five rooms each. All apartments will have connecting baths and wall beds. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now out for figures.

PORTLAND, ORE.—Apartment house, 4 story and base, Class C construction, \$70,000. Architects, W. B. Bell and T. J. Wilding, Worcester Bldg., Portland. Owner, A. C. Ruby. The building will be arranged for stores on the first floor and 45 apartments of two and three rooms each on the upper floors. Plans include steam heat, elevator service and a vacuum cleaning system. All suites will have connecting baths and wall beds. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster and pressed brick. Plans are being prepared.

PORTLAND, ORE.—Apartment house, 3 story and base, reinforced concrete. Cost not stated. Architects, Horand & Anderson, Worcester Bldg., Portland. Owner, A. E. Trump. The two upper floors of the building will be divided into two and three room suites with connecting baths and wall beds. First floor will be arranged for stores. There will be steam heat. Interior will be finished in pine throughout. The exterior of the building will be faced with cement plaster. Plans are complete and figures have been taken.

REDONDO BEACH, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, Class C construction. Cost not stated. Architects, Arthur L. Ackner and Otto Janssen, Story Bldg., L. A. Owner's name withheld. The building will be erected on one of the principal corners of the city, and has been arranged to contain 53 rooms, which will be divided into two and three room suites with private baths and wall beds. Interior will be finished in pine and hardwood veneer. Some oak floors will be used. Plans provide for steam heat, hot and cold water service and an automatic elevator. The exterior of the building will be faced with cement plaster. Plans are being prepared.

OCEAN PARK, LOS ANGELES CO., CAL.—Apartment house, 3 and 4 story and base, brick, \$50,000. Architect, J. William Roberts, 2530 4th Ave., L. A. Owner, Mr. Crosby. The building will cover an area of 50x110 feet, and will be arranged in suites of two, three and four rooms each. Interior finish will be of pine and hardwood veneer. Cement floors will be used in the baths. There will be steam heat and automatic elevators. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Apartment house, 4 story and base, Class C construction. Cost not stated. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, William McCartney. The building will be erected on a corner and will cover an area of 60x160 feet. Interior has been arranged for 150 rooms which will be

divided into two and three room suites with private baths and wall beds. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine and hardwood. Tile will be used in all bath rooms. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$90,000. Architects, Union Realty Co., Realty Board Bldg., L. A. Owner, William A. Hammell. The building will contain 80 guest rooms, amusement room, large lobby and social hall. Suites will be arranged in two and three room apartments with wall beds and private baths. Interior finish will be of pine and hardwood. Bath rooms will be wainscoted with tile and will have marble floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 4 story and base, Class C construction, \$70,000. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, M. E. Blaiser. Contractors, Los Angeles Investment Co., 8th and Broadway, L. A. Contract price, \$70,000.

BANKS.

OAKLAND, CAL.—Bank and offices, 11 story and base, Class A construction. Cost not stated. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owners, First Trust and Savings Bank. The building is to be erected at the southeast corner of 16th and San Pablo, and will cover a large ground area. The entire first floor and a large portion of the basement will be occupied by the bank. Construction will be fireproof throughout with a complete steel frame, exterior walls of brick faced with pressed brick and terra cotta. Interior partitions will be of hollow tile, floors of concrete. Metal trim and tile and marble wainscot will be used. There will be steam heat, elevator service, mail chutes, a vacuum cleaning system and hot water system. Interior of the bank will be finished in tile, marble, ornamental plaster and bronze. Special bank fixtures, coin and safe deposit vaults will be installed. A contract has been awarded to the Pacific Rolling Mills for the structural steel work at \$35,514. A general contract for the balance of the work will be let. Working drawings are nearly complete and bids will be called for on the general contract with a week or ten days.

BRIDGES, DAMS AND HARBOR WORK.

LONG BEACH, LOS ANGELES CO., CAL.—Pier, concrete and wooden pile, \$100,000. Engineers, Mercereau Bridge and Construction Co., Pacific Electric Bldg., L. A. Owners, City of Long Beach. Plans and specifications for a pier at the foot of American and Pine avenues have been submitted for approval to the city trustees. According to the plans the structure will be 350 feet long and 50 feet wide. Final approval will be given to the plans and specifications at the next meeting of the council.

CHURCHES.

BAKERSFIELD, KERN CO., CAL.—Church, 2 story and base, brick, \$25,000. Architect, Thomas B. Wiseman, Producers Bank Bldg., Bakersfield. Owners, First Presbyterian Church of Bakersfield. A site at the corner of 17th and H streets has been secured and preliminary plans have been prepared. These plans show a building 80x85 feet with a main auditorium seating 250 people. Interior finish will be of pine and ornamental plaster. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans have not been approved by the Building Committee.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Factory, 3 story and base, frame, \$3,200. Architect, none. Owner, C. H. Gish, 257 Falcon St., S. F. The building has been designed for an electric light plant. There will be no interior finish. The building will cover an area of 44x52 feet. Plans are complete and in the hands of the owner who will do the work by Day Labor.

TACOMA, WASH.—Warehouse, 4 story and base, brick, \$50,000. Architect, I. C. Irwin, Chamber of Commerce Bldg., Tacoma. Owners, California Wine Co. This work has been mentioned in these columns before. The structure will cover an area of 90x110 feet, and will be of the heavy mill type of construction. There will be an automatic sprinkler system, metal window frames and sash. The exterior of the building will be faced with stock brick. Plans are complete and figures will be taken at once.

Contracts Awarded.

PORTLAND, ORE.—Laundry building, 2 story and base, brick and concrete, \$75,000. Architects, Ellis F. Lawrence and William G. Holford, Chamber of Commerce Bldg., Portland. Owners, Troy Laundry Co. Contractors, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price, \$75,000.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, none. Owner, J. F. Wyman, 1953 Hayes St., S. F. The building will cover an area of 25x50 feet, and is to contain six apartment flats. Interior will be finished in pine with hardwood floors and some hardwood veneer. There will be open fire places and tile mantels. Some tile will be used in the baths and kitchens. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flat alteration, frame construction, \$4,000. Architect, Oliver Everett, 1940 Webster St., S. F. Owner, J. A. Bergerot. The work will consist of raising the present building and constructing and additional story underneath. The other floors will be completely rearranged and the work will require new plastering, plumbing, electric work, painting and interior finish. Exterior of the building will also undergo extensive changes. Plans are complete and figures have been taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, N. Gunee. The building has been designed to contain four modern flats of four and five rooms each. Interior finish will be of pine and redwood. Some hardwood floors will be used. Tile will be used in the baths. Exterior of the building will be covered with shiplap and rustic. Plans are being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, \$7,000. Architect, J. C. Flueger, Crocker Bldg., S. F. Owner's name withheld. The building will be erected on 29th avenue, and has been arranged for three modern residential flats of five and six rooms each. Interiors will be handsomely finished in pine and hardwoods. Bath rooms will have tile wainscot. Tile will also be used in the kitchens. There will be open fire places and brick mantels. Oak floors are to be used in the principal rooms. Exterior of the building will be covered with brick veneer and shiplap. Plans are being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, \$6,000. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Paul De Martini. The building will be erected on Broadway west of Mason, and will contain three flats of four, five and six rooms. The building will have a frontage of 27½ feet and a depth of 61 feet. Interior will be finished in pine and redwood with some oak floors. There will be open fire places and brick mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with brick veneer and shiplap. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Flat, 1 story and base, frame, \$2,000. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Mr. Hume. The building will contain one flat of five rooms. Interior will be finished in pine throughout. Hardwood floors are specified in two of the rooms. Tile will be used in the bath room and kitchen. Exterior of the building will be covered with rustic. There will be an open fire place and brick mantel. Plans are being prepared.

GARAGES.

OAKLAND, CAL.—Garage, 1 story, brick. Cost not stated. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owners, Girard Investment Co. The building is to be erected at the corner of Broadway and Orchard street, and is designed for a commercial garage and sales rooms. Interior of the sales rooms will be handsomely finished in pine and hardwoods and tile. There will be large display windows and patent store fronts. The exterior of the building will be faced with cement plaster. Plans are being prepared.

20-ton crane, span, 51 feet 7 inches; height from floor to crane rails, 41 feet. 5-ton bridge crane, stand, 27 feet 8 inches, height from floor to crane rails, 18 feet 3 inches. 3½-ton bridge crane, span, 27 feet 8 inches; height from floor to crane rails, 18 feet 5 inches. 5-ton wall cranes, outside clearance, 23 feet 6 inches; trolley radius from 3 feet to 20 feet 6 inches; maximum hoist, 19 feet 6 inches; height from floor to crane rails, 20 feet 5½ inches; length of runways, 335 feet.

Pearl Harbor, General Set.

The bid of the General Electric Co., Schenectady, N. Y., \$6,249 in amount, has been accepted for furnishing one 200-K. W. motor generator set and switchboard accessories for delivery at the naval station, Pearl Harbor, H. T.

Irrigation in Oregon

Practical conservation and business-like co-operation between State and Nation is initiated by Secretary Franklin K Lane, of the Department of the Interior, in a contract approved by him March 27 between the United States and the State of Oregon. At a conference held in his office, at which were present Secretary Lane, Director F. H. Newell, of the Reclamation Service; Senator Chamberlain and John H. Lewis, State Engineer of Oregon, a formal agreement was presented which provides for co-operation between the Federal Government and the State of Oregon in the investigation of irrigation and power subjects. The Secretary agrees to withdraw the necessary land and the State Engineer agrees to hold the necessary water for the irrigation of projects under investigation. Any project or unit may be released for construction by private capital upon payment of the cost of preparing plans provided such development will be carried out in harmony with the public plan for the highest utilization of the waters of the State.

The sum of \$100,000 is now available, one-half of which is contributed by each party, and will be expended largely on the investigation of the 300,000-acre Deschutes River project, starting immediately on the Tumalo Creek unit of 35,000 acres. The State has appropriated \$150,000 for the partial construction of this unit, and Secretary Lane has agreed to allot an equal amount for the construction of the entire project in co-operation with the State.

The Oregon Legislature has submitted a constitutional amendment for the vote of the people, authorizing the issuance of bonds for the construction of irrigation and power projects. To complete the Deschutes project will re-

quire about \$8,000,000. Secretary Lane stated that he was in sympathy with the entire plan of co-operation and if the State of Oregon would put up \$4,000,000 toward the construction of this project it was his opinion that an equal amount of money could be allotted from the Reclamation fund by that time for this work in Oregon.

The joint construction of the Tumalo Creek unit will serve as an experiment in co-operation and will prove useful in perfecting an organization before taking up the larger and more important work.

Prospective Bidders.

The following firms have applied for plans and specifications of the work to be done at Pearl Harbor under the direction of the bureau of yards and docks. Bids will be opened in Washington, D. C., on the dates indicated below:

Pearl Harbor, Coal Towers, April 19.
C. W. Hunt Co., West New Brighton, S. I., N. Y.

The Hayward Co., 50 Church street, New York city.

Link Belt Co., 299 Broadway, New York city.

Brown Hoisting Machinery Co., 50 Church street, New York city.

Carnegie Steel Co., Philadelphia, Pa.
Midland Bridge Co., Midland Building, Philadelphia, Pa.

Des Moines Bridge and Iron Co., Curry Building, Pittsburg, Pa.

Exeter Machine Works, Pittston, Pa.

Wern Machinery and Engineering Co., 30 Church street, New York city.

Mead-Morrison Mfg. Co., Singer Building, New York city.

Bergen Point Iron Works, Bayonne, N. J.

F. H. Kinden, 411 Bakewell Building, Pittsburg, Pa.

Hallberg Construction Co., 50 Church street, New York city.

Richard Marton, Equitable Building, Baltimore, Md.

Maine Electric Co., Portland, Me.

George Haiss Mfg. Co., 141st street and Rider avenue, New York city.

Pearl Harbor, Hospital, May 10.
Ed. O. Hamilton, 24th and Farnam streets, Omaha, Neb.

HOSPITALS.

Contracts Awarded.

TAFT, KERN CO., CAL.—Hospital, 2 story and base, brick. Cost not stated. Architect's name not given. Owner, Dr. M. W. Pascoe. Contractor, H. E. Messimer, Taft. Contract price not given. Note: The building will contain 14 private rooms, two wards and an operating room.

HALLS & SOCIETY BLDGS.

OAKLAND, CAL. — Auditorium, 3 story and base. Class A construction, \$500,000. Architects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. This building has been mentioned here before. Plans for the structural steel work are complete and an advertisement calling for bids on this portion of the work appears in another column of this issue. Bids will be opened on April 24th. Plans and specifications can be secured from the architect.

RICHMOND, CONTRA COSTA CO., CAL.—Lodge Hall, 4 story and base, brick and steel, \$60,000. Architect, James T. Narbett, La Selle-Sellers Bldg., Richmond. Owners, Richmond Elks' Hall Association. The building will be centrally located and is to cover a large ground area. The first floor will be arranged for stores. Upper floors will contain the lodge rooms, banquet hall and offices. There will be steam heat and elevator service. Interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

NEWBERG, ORE.—Town hall, 2 story and base, brick and concrete. Cost not stated. Architect, E. E. McClaren, Lumber Exchange Bldg., Portland. Owners, Town of Newberg. Besides the city offices and council room, the first floor will be arranged for fire and police departments. Basement will contain the jail. The second floor of the building will be fitted up for the use of the Commercial Club. There will be steam heat, hardwood and pine trim and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LENTS, ORE.—Lodge hall, 2 story and base, brick and concrete. Cost not stated. Architects, Herand & Anderson, Worcester Bldg., Portland. Owners, Lents Odd Fellows' Hall Association. The building will cover an area of 60x100 feet. The first floor is

to contain stores and the upper floor will be arranged for a large banquet hall and lodge rooms. Interior will be finished in pine and hardwoods. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are out for figures.

HOTELS.

SAN FRANCISCO—Hotel, 2 story and base, Class C construction, \$25,000. Architects, McDougall Bros., Russ Bldg., S. F. Owner, I. Steinhart. The building is to be erected on Sutter street near Leavenworth and will contain stores on the first floor and rooms above. A central heating system will be installed. Store fronts will be of the patent type. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel, 5 story and base, Class C construction. Cost not stated. Architect, L. M. Gardner, Phelan Bldg., S. F. Owner, Emil Lange. This building is to be erected at the southeast corner of 6th and Minna streets. The first floor will be arranged for stores and the hotel entrance and lobby. Upper floors will contain in the neighborhood of 70 rooms and several baths. Interior finish will be of pine throughout. There will be steam heat, elevator service and a hot water supply system. Exterior of the building will be faced with pressed brick. Patent store fronts will be used. Plans are being prepared.

SAN FRANCISCO—Hotel, 3 story and base, reinforced concrete, \$11,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Nathan Haas. The building will be erected on Jones street, near O'Farrell. The entrance and lobby will occupy the first floor and upper floors will be arranged for single rooms and baths. Plans provide for a hot water system but no heat. Interior will be finished in pine throughout. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Hotel alterations and addition, frame construction. Cost not stated. Architect, C. C. Dakin, 110 Sutter St., S. F. Owners, Frederick H. and C. C. Dakin. This work will consist of the alteration of and old-time residence on California street west of Divisadero into four stores and a modern family hotel. Considerable tile and marble work will be used. There will be a central heating system, roof garden and patent store fronts. New plumbing, plastering and electric work will be installed. Plans are now being prepared.

PORTLAND, ORE.—Hotel, 4 story and base, reinforced concrete. Cost not stated. Architect, Aaron H. Gould, Worcester Bldg., Portland. Owner, W. V. Margulis. The building will cover an area of 25x100 feet. Interior of the building will be arranged for 70 or 80 single rooms and a number of baths. There will be steam heat and elevator service. Interior finish will be of pine throughout. The exterior will be faced with cement plaster. Exterior walls will be of reinforced concrete and interior of mill construction. Plans are

being prepared and bids will shortly be called.

WILMINGTON, LOS ANGELES CO., CAL.—Hotel, 3 story and base, reinforced concrete. Cost not stated. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, G. D. Potter. The building will be erected at the corner of 13th and Canal streets. The first floor will contain six stores and the hotel lobby. Upper floors will be arranged for 45 guest rooms and several baths. Plans provide for steam heat, elevator service and a hot and cold water supply system. The exterior of the building will be faced with pressed brick. Plans are now being prepared for the work.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick and frame. Cost not stated. Architect, O. N. Dennis, Fay Bldg., L. A. Owner, Louis S. Lehman. The building will cover an area of 50x92 feet and will contain 52 guest rooms besides a number of baths. There will be steam heat and a hot and cold water supply system. Interior finish will be of pine and some hardwood. Bath rooms will be finished in tile. The exterior of the building will be faced with brick veneer. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, Class C construction, \$10,000. Architect, Joseph F. Rhodes, Central Bldg., L. A. Owner, Joseph F. Rhodes. The building will be erected on a corner lot and will cover an area of 35x110 feet. There will be a total of 70 guest rooms, a number of which will have private baths. Plans provide for elevator service, steam heat and a hot and cold water system. There will be metal window frames and sash. The exterior of the building will be faced with pressed brick. Interior finish will be of pine throughout. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 5 story and base, reinforced concrete, \$40,313. Architect, F. L. Stiff, Grosse Bldg., L. A. Owner, F. R. Towsley, Contractor, F. L. Spaulding, 1460 Dana St., L. A. Contract price, \$10,242.

RESIDENCES.

SAN FRANCISCO—Residences, 4, 2 story and base, frame, \$2,250 each. Architect, none. Owner, E. E. Mauseau, 164 Parnassus Ave., S. F. These houses will be erected on 35th avenue north of I street, and each will contain six rooms and bath. Interior finish will be largely of pine. Some hardwood floors will be used. Each of the houses will have a large open fire place in the living room with a brick or tile mantel. Bath rooms will have tile wainscot. The exteriors will be covered with cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architect, G. Albert Lansburgh, 709 Mission St., S. F. Owner, Andrew Jacob. The dwelling will contain nine rooms, two baths and sleeping porch. Interior will be finished in pine and some hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen.

The exterior of the dwelling will be covered with cement plaster on metal lath. A garage will also be erected on the lot. Plans are being prepared and the work will go out for figures by the end of this month.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, J. A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will be erected on De Sota north of Holloway street, and will contain seven rooms, bath and sleeping porch. A garage will occupy part of the basement. Interior finish will be of pine and hardwood. Floors will be of oak in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owners, Stephen A. and Charles V. Maschio. The dwelling has been designed for an eight room house and will be erected at the corner of Caselli and Eagle streets. Interior will be finished in pine and some hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be an open fire place in the living room with a brick mantel. Bath and kitchen will have tile wainscot. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures have been taken under advisement.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Miss Lindel Hoskins. The dwelling will be erected in North Cragmont, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and some hardwood. Oak floors will be used in several of the principal rooms. There will be furnace heat and open fire places. Tile will be used in the bath room and kitchen. There will be an automatic water heater. The exterior of the dwelling will be covered with shingles and shakes. Open fire place and brick mantel will be used in the living room. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$20,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner's name withheld. The dwelling will be erected in Claremont and has been designed for one of the most handsome dwellings in that tract. Plans provide for in the neighborhood of twelve rooms, several baths and sleeping porches. A garage will also be erected on the property. Interior finish will be of pine and hardwood. Hardwood and tile floors will be used throughout. There will be a hot water heating system, open fire places and automatic water heaters. Baths will be finished in tile. The exterior of the dwelling will be faced with cement plaster on metal lath. Plans are being prepared and further information will be given when plans are out for figures.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, P. Lindeblad, 3822 Randolph avenue, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. There will be an automatic water heater. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, C. E. Miller. This work has been mentioned here before when plans were first prepared. Bids are now being taken on the work and a contract will be let within a few days. The house will contain seven rooms and bath. Interior finish will be of pine and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior will be covered with cement plaster on metal lath. Bids are now being taken by the architect.

ALAMEDA, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, Mr. Lundholm. The bungalow will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living and dining rooms. Tile will be used in the bath room and kitchen. There will be an open fire place with tile or brick mantel in the living room. The exterior of the building will be covered with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, none. Owner, E. J. Grebs, 1801 Francisco St., Berkeley. The house will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mr. Gasman. The dwelling will be erected in Northbra, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. Tile will be used in the bath room and kitchen. Plans are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,200. Architect, none. Owner, H. L. Wood, 2300 Seminary Ave., Oakland. The house will contain seven rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, R. H. Naddan. The dwelling is to be erected in Berkeley Square and will contain seven rooms, bath and sleeping porch. All interior finish will be of pine or hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

MILL VALLEY, MARIN CO., CAL.—Residence, 2 story and base, frame, \$9,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Dr. C. A. Kern. The dwelling has been designed for a nine-room house with baths and sleeping porch. Interior will be finished in pine and hardwood. Oak floors will be used in all of the principal rooms. Baths will be finished in tile. Provision will be made for a hot water system of heating, which will be installed at a later date. A feature of the house will be the dressing rooms off of each bed chamber. An automatic water heater will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Residence, frame construction. Cost not stated. Architect, none. The following Day Labor jobs have been or are about to be started in San Jose: J. P. Clark, 308 So. 11th St., San Jose, one-story six-room cottage, \$2,000; S. Lindberg, 174 Hobson St., San Jose, one-story frame five-room cottage, cost, \$2,000, and Hyde-Shaw Co., East 4th St., San Jose, one-story frame warehouse, \$2,000.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owner, Linda C. Avenali. The dwelling will be erected on Green street near Taylor, and will be designed for a handsome city home. Interior finish will be of pine and hardwood with hardwood floors in all of the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms. The exterior of the house will be covered with brick veneer and cement plaster. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residences, 2, 2 story and base, frame, \$3,500 each. Architects, Patrick-Nelson Co., 2025 Addison St., Berkeley. Owners, Newell-Murdock Co. These houses will be erected on the Thousand Oaks Tract and each will be designed to contain seven rooms and bath. Interior finish

will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster. Plans are complete and the work will be done by Day Labor. Patrick-Nelson Co. will superintend all construction.

BERKELEY, ALAMEDA CO., CAL.—Sorority house, 2 story and base, frame, \$9,000. Architect, Harris Allen, 2514 Hillcass Ave., Berkeley. Owners, Alpha Phi Sorority. The interior of the building will be arranged for large social rooms, library, dining room and kitchen. There will also be a number of sleeping rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms, which will be equipped with showers as well as tubs. The exterior of the building will be covered with shingles and cement plaster on metal lath. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, A. W. Cornelius, Merchants National Bank Bldg., S. F. Owners, Waterhouse Estate Co. The dwelling will contain 7 rooms and bath. Interior finish will be of pine with hardwood floors in the living and dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room. The exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

VALLEJO, NAPA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Mrs. Costa. The bungalow will contain four rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood floors. There will be a large open fire place in the living room. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are being prepared.

LOS ANGELES, CAL.—Residence, 2 story, attic and base, reinforced concrete, \$10,000. Architect, Arthur L. Heineman, San Fernando Bldg., L. A. Owner, Charles S. Henry. The dwelling has been designed for a 15-room house with several baths, sleeping porches and a garage. There will be steam heat and open fire places. Interior will be finished in pine, redwood, mahogany and other hardwoods. Hardwood floors will be used throughout. All baths will be finished in tile. The exterior of the dwelling and garage will be faced with cement plaster. Plans are complete and the work will be done by Day Labor under the direction of the architect. All materials are now being purchased.

LIBRARIES.

TORRANCE, LOS ANGELES CO., CAL.—Library, 1 story and base, brick. Cost not stated. Architect, Robert D. Farquhar, Van Nuys Bldg., L. A. Owners, City of Torrance. The building will be 81x140 feet and will contain

the usual two reading rooms, librarians' office, stack room and an auditorium. There will be pine and hardwood trim, metal stacks and some tile and marble. The exterior of the building will be faced with pressed brick. Plans are being prepared.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Passenger station and track construction, \$1,000,000. Architects, Engineering Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Application has been made to the Board of Supervisors by the Southern Pacific Railroad Company for extensive franchises or rights, which will permit a complete re-arrangement of its tracks and depots. This, upon the granting of the permits, will mean the immediate expenditure of more than half a million dollars, and the construction of a passenger depot at Third and Townsend streets after the Mission style of architecture. The building will be an ornament, and answer the purposes of Exposition year.

The track changes to be made, except where streets are crossed, are all on property owned by the company and are designed to be of benefit to the company in handling its freight and passenger business to the greater convenience of the general public and its patrons.

The territory embraced is between Third and Eighth and Townsend and Channel streets and it will be so arranged as to facilitate the volumes of instantly increasing business.

The passenger business as in the past will be handled at Third and Townsend streets where the new depots are to be built after plans and specifications which have already been prepared. Immediately after action is taken by the Supervisors on the application which has been made by the company.

It is the intention to handle all of the passenger business between Third and Fifth and King and Townsend streets, and, as the volume of business is expected to be so great at times, that Fourth street may be temporarily blocked in making up trains, the company has announced its intention to open up at its own expense a street 75 feet west of Fourth street which will enable teams and auto trucks to clear thoroughfare to the freight depots and sheds to the south.

The freight business, when the changes are made will all be concentrated between King and Channel, Third and Eighth streets, which will mean that the present buildings are to be moved further south, to be reconstructed and equipped to handle the volume of constantly increasing trade.

While the figure set for improvements, in the application made to the supervisors, is but \$400,000, it is unofficially stated that when the reconstruction and re-arrangement is finally completed, the outlay will run close to the million dollars, as it is the intention of the company to not stop in its improvements until it has satisfied all the demands which will enable it to expedite its business with the public in a manner satisfactory to all.

Contracts Awarded.

TACOMA AND TENENO, WASH.—Stations, etc, frame and concrete construction, \$50,000. Engineers, Engineering Department Pacific Northern R. R. Co. Owners, Pacific Northern Railroad Co. Contractors, E. J. Rounds Construction Co., Walker Bldg., Seattle. Contract price, \$50,000.

SCHOOLS.

BERKELEY, ALAMEDA CO., CAL.—Convent, 3 story and base, frame, \$35,000. Architect, John J. Foley, 16 Kearny St., S. F. Owners, St. Joseph's Convent. The building, which is to be erected on the grounds now occupied by the institution, will cover an area of 100x90 feet. There will be a large music room, study halls, art room, dining room and dormitories. Plans include steam heat and hot and cold water supply. Interior will be finished in pine throughout. The exterior of the building will be covered with shiplap, sanded. Plans are being prepared.

OAKLAND, CAL.—School, 2 and 3 story and base, reinforced concrete. Cost not stated. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The following firms, in addition to the list published previously in these reports, have applied for plans for the work on the Commercial High School in Oakland. Bids are to be opened on April 21st. Lewis Hicks, Williams Bros. & Henderson, Van Sant-Houghton Co., Thurston & Co., Lange & Bergstrom, Me-

Leran & Peterson, Frederick Amweg, C. Christensen, Wold & Kohn.

STOCKTON, SAN JOAQUIN CO., CAL.—Convent, 3 story and base, brick or concrete, \$80,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Roman Catholic Convent. The institution has recently secured a new site at the corner of San Joaquin and Flora streets and have had preliminary plans prepared. No details of the building have been decided upon and it will be some time before full particulars can be printed.

ORLAND, CLENN CO., CAL.—School, 1 story and base, reinforced concrete, \$37,500. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Orville School District. The building has been designed for a six-room school with principal's office, teachers' rooms and library. A central heating system will be installed. Interior finish will be of pine with some maple floors. There will be composition blackboards and a program clock system. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—School, 1 story and base, brick and concrete, \$25,000. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Huntington Park School District. The building will cover an area of 70x168 feet, and will contain six standard size class rooms, an auditorium seating 400 people and principal's room. Interior finish will be of pine and hardwood. A plenum heating system will be installed. The exterior of the building will be faced with cement plaster. Plans are being prepared.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Tunnel construction, \$337,000. Engineer, City Engineer, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at the last meeting of the Board of Public Works for the construction of the Stockton Street Tunnel. Jacobsen & Bade of Portland submitted the lowest figure and have been awarded the contract. A complete list of all bids appears under the heading of San Francisco in this issue.

STORES AND OFFICES.

SAN FRANCISCO—Department store, 3 story and base, Class A construction, \$200,000 or more. Architect, Albert Pissis, Flood Bldg., S. F. Owners, Emporium. The property in the rear of the present building and located on Mission street between 4th and 5th streets will be improved with a large building practically covering the entire area. Architecture will be similar to that of the present building. When complete the new addition will make the Emporium the largest department store on the coast. Plans provide for a complete steel frame and fireproof construction throughout. Many of the departments in the present building will be rearranged and the interior will be somewhat altered. Plans are being prepared.

SAN FRANCISCO—Nicholasdon, 1 story, brick. Cost not stated. Architect, Alfred L. Coffey, Humboldt Bank Bldg., S. F. Owner's name withheld. The building is to be erected in the Mission District, and will have a frontage of 28 feet and a depth of 78. Interior will be finished in pine and ornamental plaster. Considerable tile and marble will be used. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Store fronts and alterations frame construction. Cost not stated. Architect, C. C. Dakin, 110 Sutter St., S. F. Owner's name not given. Three new store fronts and considerable interior alteration will be made to the building on the north line of O'Farrell street west of Fillmore. The work will include new plastering, wiring and some plumbing. Marble and tile will be used. Plans are now being prepared.

SAN FRANCISCO—Stores and offices, 2 story and base, reinforced concrete. Cost not stated. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners represented by Kern-Nellan Co. This building has been mentioned here before when plans were first started. The building has a frontage on East street of 150 feet and 50 feet on Howard. The first floor will contain a number of stores and upper floor will be arranged for offices. Interior finish will be of pine throughout. There will be metal window sash and frames. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Stores, 1 or 2 story and base, brick or concrete. Cost not stated. Architects, Ross & Bergren, 310 California St., S. F. Owners, S. & C. Forbes. This building will be mameantal plaster. Considerable tile and Rose avenue, a site recently purchased by S. and C. Forbes. The building will cover a ground area of 2,940 square feet. Leases are now being made and until these are complete the height of the building cannot be determined. The exterior will probably be faced with pressed brick. Foundations and walls will be of sufficient strength to carry several other stories. Complete particulars will be given as the plans progress.

SAN FRANCISCO—Stores, 2 story, Class A addition to two-story building. Cost not stated. Architect, Oscar Haupt, Phelan Bldg., S. F. Owner, O. D. Baldwin. The building at the southwest corner of Grant avenue and Harlan Place will be altered and two more stories added. A contract for the structural steel work has been awarded to Mortensen Bros. for \$3,450. Bids for the balance of the work have been taken under advisement in the architect's office.

SAN FRANCISCO—Department store fixtures. Cost not stated. Architect, C. C. Dakin, 110 Sutter St., S. F. Owners, Emporium. Preliminary plans are now being made for the many new fixtures which will be required for the new addition to the Emporium. Mr. Dakin is making a study of the old building as well as of the new floor plans, and will design new fixtures for many of the departments in the present building. It is estimated that between \$75,000 and \$100,000 will be expended on fixtures.

SAN FRANCISCO—Stores, 1 story, frame, \$5,000. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Mr. Eagleson. The building will be erected on 48th avenue and will contain six stores. There will be patent store fronts and plate glass windows. Interiors will be finished in pine throughout. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will probably be done by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Stores, 1 story, frame. Cost not stated. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name not given. The building will contain eight stores each of 20 feet frontage and a depth of 34 feet. Interiors will be finished in pine. There will be plate glass display windows being prepared and figures will be called for shortly.

SACRAMENTO, SACRAMENTO CO., CAL.—Stores and offices, 10 story and base, Class A construction, \$200,000. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, George W. Peltier and associates. This building, which is to be erected at the southwest corner of 4th and J streets, will be known as the Fruit Association Bldg. Construction will be fireproof throughout, with a complete steel frame, brick and concrete walls, faced with terra cotta. There will be steam heat, elevator service, a vacuum cleaning system, metal window sash and frames and metal trim and mail chutes. Halls will be wainscoted with tile and marble. Six floors have already been leased. Working drawings are being prepared and bids will be called for at once.

LOS ANGELES, CAL.—Stores and lofts, 10 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders, International Bank Bldg.,

L. A. Owner, E. W. Braun. The building will cover an area of 50x154 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and hollow tile interior partitions. There will be metal window sash and frames and fireproof doors. Plans provide for elevator service, an automatic sprinkler system and spiral chutes. The exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

LOS ANGELES, CAL.—Department store, 8 story and base, Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owners, W. H. Perry Estate. The building is to be erected at the corner of 5th and Broadway, and will cover a ground area of 150x160 feet. The entire structure has been leased to the Fifth Street Store. Construction will be fireproof. There will be a complete steel frame and exterior walls faced with pressed brick and terra cotta. Interior finish will be of metal and hardwood. A steam heating system will be installed. Plans are only in a preliminary stage and full particulars will be given later.

SEALED PROPOSALS.

PROPOSALS FOR CANAL WORK.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at Newell, S. D., until 4 o'clock p. m. May 8, 1913, for the construction of about four miles of the North Canal and about ten miles of laterals, Belle Fourche project, S. D. The work involves the excavation of about 117,000 cubic yards of material and is situated north and west of Newell, S. D. For particulars address the United States Reclamation Service, Washington, D. C.; Denver, Colo., or Newell, S. D. MORRIS BIEN, acting director.

PROPOSALS FOR CANAL WORK.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Fabb, Mont., until 2 o'clock p. m. April 28, 1913, for the construction of 22 miles of the St. Mary Canal, Milk River project, Mont. The work involves the excavation of about 1,201,000 cubic yards of material and extends along St. Mary River from Lower St. Mary Lake to the north fork of Milk River in the northwest portion of the Blackfeet Indian Reservation, Mont. For particulars address the United States Reclamation Service, Washington, D. C.; Helena, Mont., or Fabb, Mont. MORRIS BIEN, acting director.

PROPOSALS FOR STEAM SHOVELS.

STEAM SHOVELS—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Fabb, Mont., until 2 o'clock p. m. April 28, 1913, for furnishing two more or less, 75-ton steam shovels for use on the Milk River project, Montana. For particulars address U. S. Reclamation Service, Washington, D. C., or Helena, Mont. MORRIS BIEN, acting director.

PROPOSALS FOR ELECTRIC SHOVELS.

ELECTRIC SHOVELS—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Great Falls, Mont., until **2 o'clock p. m. April 30, 1913**, for furnishing five, more or less, 70-ton electric power shovels for use on the Milk River and Sun River projects, Montana. For particulars address U. S. Reclamation Service, Washington, D. C., or Helena, Mont. **MORRIS BIEN**, acting director.

PROPOSALS FOR CANAL WORK.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Great Falls, Mont., until **2 o'clock p. m. April 30, 1913**, for the construction of the Pishkun Reservoir Supply Canal, the Sun River Slope Canal and Tunnels No. 2 and No. 3, of the Poshkun Reservoir Supply Canal, involving the excavation of about 2,400,000 cubic yards of material and the construction of about 3,215 linear feet of concrete lined tunnel. The work is situated on the north side of Sun River, 25 to 70 miles west of Great Falls, Mont., and near the line of the Sun River branch of the Great Northern Railway. For particulars address the United States Reclamation Service, Washington, D. C., Helena, Mont., or Fort Chaw, Mont. **MORRIS BIEN**, acting director.

PROPOSALS FOR DRAIN.

DRAIN—Office of Constructing Quartermaster, Fort Worden, Wash.—Sealed proposals, in triplicate, for the construction of 230 linear feet of 10-inch drain and of extension to a sewer manhole at Fort Worden, Wash., will be received at this office until **11 a. m. April 16, 1913**, and then publicly opened. A deposit of \$5 will be required for return of plans. Information upon application to Captain J. R. **POURIE**, constructing quartermaster.

PROPOSALS FOR BUILDING.

BUILDING—Office of the Quartermaster, Fort Yellowstone, Wyo.—Sealed proposals, in triplicate, for re-roofing the post exchange building at Fort Yellowstone, Wyo., will be received at this office until **2 p. m. April 26, 1913**, at which time and place they will be opened in the presence of bidders. The Government reserves the right to reject or accept any or all bids or any portion thereof. Proposals must be signed by the bidders, inclosed in sealed envelopes, addressed to the quartermaster and marked "Proposals for Roofing Post Exchange Building, to be Opened April 28, 1913." Blank proposals, specifications and plans will be furnished upon application to the quartermaster, **HERBERT KOBBE**, second lieutenant, 1st cavalry, quartermaster. By **FRANK KELLER**, first lieutenant, 1st cavalry, charge of office.

PROPOSALS FOR TRAVELING CRANES.

TRAVELING CRANES—Sealed proposals, indorsed "Proposals for Electric Traveling Cranes," will be received

at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. May 3, 1913**, and then and there publicly opened, for four electric traveling bridge cranes and two electric traveling wall cranes for the general foundry, navy yard, Puget Sound, Wash. Plans and specifications may be obtained on application to the bureau or to the commandant of the navy yard named. **H. R. STANFORD**, chief of bureau.

PROPOSALS FOR STRUCTURAL STEEL AND IRON WORK.

PURSUANT to Resolution No. 5169 N. S., passed April 8, 1913, the Council of the City of Oakland will receive bids for furnishing of all materials, labor and workmanship required in connection with the fabrication, erection and completion of all structural cast iron and steel for the Auditorium, to be erected on the grounds of Peralta Park, located on the southerly side of Twelfth street, between Fallon street and Lake Shore avenue or the proposed extension of said avenue, in the City of Oakland, California.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bid for the fabrication, erection and completion of all Structural Cast Iron and Steel for the Auditorium," addressed to the Council and deposited by the bidder, or his agent, with said Council while in session, between **eleven o'clock a. m. and twelve o'clock noon, Pacific Time, on the 24th day of April, 1913**, in the room of the Council in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

No proposal of bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of H. E. Magill, City Clerk, in an amount not less than ten per centum (10%) of the aggregate amount of the proposal. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty (20) days after receiving notice of the award.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City of Oakland the faithful performance of the contract, and in an amount equal to twenty-five per centum (25%) of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all person performing labor upon or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

A bound set of the Forms of Proposal, and of the required Affidavits, Agreement, Bonds, Acknowledgements and Specifications will be furnished contractors on demand at the office of Supervising Architect of the City of

Oakland, Security Bank Building, corner 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after April 9th, 1913, within a reasonable time after application, and upon the deposit of Twenty-five Dollars (\$25.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings required for the work will be furnished each applicant complying with the above.

Each bidder shall submit a formal bid in strict accordance and without deviation from the plans and specifications, unless such deviation shall have been previously authorized by, and written permission therefor obtained from the Supervising Architect; in case any such deviation shall be allowed as aforesaid for the submission of the bid or award of contract notice thereof will be served upon all of the bidders by the architect.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland to reject any or all bids submitted.

By order of the Council.

H. E. MAGILL, City Clerk.

By E. F. HOLLAND, Deputy.

PROPOSALS FOR BOILERS.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 30th day of April, 1913**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of boilers, boiler auxiliaries and piping, etc., in the Academic Building, Polytechnic High School.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$6,000.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 763—Proposals for Furnishing and Erecting Coal-Handling Machinery and Accessories for Two Coaling Plants.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m. May 14, 1913**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 763) may be obtained from this office or the office of the assistant purchasing agent, 1056 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. **F. C. BOGGS**, major, corps of engineers, U. S. army, general purchasing officer.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, and carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame, \$50,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owner, Miss D. Loaliza. This building will be erected at the southwest corner of Taylor and Washington streets and will cover an area of 55x137½ feet. The two first floors will contain a total of 17 large apartments ranging from two to four rooms each. There will be steam heat, an automatic elevator and a vacuum cleaning system. Interior finish will be of pine and hardwoods. All suites will have private baths and wall beds. A hot water system will be installed. The first floor is to be fitted up for the owner's residence and will contain in the neighborhood of 15 rooms. Interior trim will be of pine, oak and mahogany. Bath rooms will be finished in tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES—4, 2 story and base, frame, \$2,250 each. San Francisco. Architect, none. Owner, E. E. Manseau, 164 Parnassus Ave., S. F. These houses will be erected on 35th avenue north of I street, and each will contain six rooms and bath. Interior finish will be largely of pine. Some hardwood floors will be used. Each of the houses will have a large open fire place in the living room with a brick or tile mantel. Bath room will have tile wainscot. The exterior will be covered with cement plaster on metal lath and brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

RESIDENCE—2 story and base, frame. Cost not stated. San Francisco. Architect, G. Albert Lansburg, 709 Mission St., S. F. Owner, Andrew Jacob. The dwelling will contain nine rooms, two baths and sleeping porch. Interior will be finished in pine and some hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. A garage will also be erected on the lot. Plans are being prepared and the work will be out for figures by the end of this month.

RESIDENCE—2 story and base, frame, \$4,000. San Francisco. Architect, J. A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will be erected on De Soto north of Holloway street, and will contain seven rooms, bath and sleeping porch. A garage will occupy part of the basement. Interior finish will be of pine and hardwood. Floors will be of oak in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement

plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. San Francisco. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owners, Stephen A. and Charles Maschio. The dwelling has been designed for an eight-room house and will be erected at the corner of Caselli and Eagle streets. Interior will be finished in pine and some hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be an open fire place in the living room with a brick mantel. Bath and kitchen will have tile wainscot. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures have been taken under advisement.

PASSENGER STATION AND TRACK CONSTRUCTION—\$1,000,000. San Francisco. Architects, Engineering Dept. Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Application has been made to the Board of Supervisors by the Southern Pacific Railroad Company, for extensive franchises or rights, which will permit a complete re-arrangement of its tracks and depots. This upon the granting of the permits will mean the immediate expenditure of more than half a million dollars, and the construction of a passenger depot at Third and Townsend streets after the Mission style of architecture. The building will be an ornament, and answer the purpose of Exposition year.

The track changes to be made, except where streets are crossed, are all on property owned by the company, and are designed to be of benefit to the company in handling its freight and passenger business to the greatest convenience of the general public and its patrons.

The territory embraced is between Third and Eighth and Townsend and Channel streets and it will be so changed as to facilitate the volumes of constantly increasing business.

The passenger business as in the past will be handled at Third and Townsend streets where the depot is to be built after plans and specifications which have already been prepared, immediately after action is taken by the Supervisors on the application which has been made by the company.

It is the intention to handle all of the passenger business between Third and Fifth and King and Townsend streets and as the volume of business is expected to be so great at times, that Fourth street may be temporarily blocked in making up trains, the company has announced its intention to open up at its own expense a street 27½ feet west of Fourth street which will enable teams and auto trucks a clear thoroughfare to the freight depots and sheds to the south.

The freight business, when the changes are made, will all be concentrated between King and Channel. Third and Eighth streets which will mean that the present buildings are to be moved further south, to be reconstructed and equipped to handle the

volume of constantly increasing trade.

While the figure set for improvements in the application made to the Supervisors is but \$400,000, it is unofficially stated that when the re-construction and re-arrangement is finally completed, the outlay will run close to one million dollars, as it is the intention of the company to not stop in its improvements until it has satisfied all the demands which will enable it to expedite its business with the public in a manner satisfactory to all.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, William Bush. The building is to be erected on a corner and will be arranged for one store on the first floor and five apartments of two and three rooms on the upper floors. Interiors will be finished in pine with some hardwood. Tile will be used in the bath rooms and kitchens. A water heating system will be installed. The exterior of the building will be covered with cement plaster and brick veneer. All suites will have wall beds and private baths. Plans are being prepared.

APARTMENT HOUSE—5 story and base, Class C construction, \$50,000. San Francisco. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, P. J. Gartland. The building is to be erected on Geary street, and will have a frontage of 42 feet and a depth of 120 feet. There will be two stores on the first floor besides the entrance. Upper floors will be divided into 88 rooms, which are to be arranged in two and three room suites with private baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning system. Interiors will be finished in pine and hardwood. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—3 story and base, frame, \$11,000. San Francisco. Architect, John J. Foley, 46 Kearny St., S. F. Owner, Mr. Solari. The building will be erected on a corner and will contain six apartments of four rooms and bath each. Interior finish will be of pine with some hardwood. Each apartment will have a large open fire place and tile or brick mantels. A hot water system will be installed. Tile will be used in the bath. Wall beds are specified. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures will be taken shortly.

FLATS—3 story and base, frame, \$7,000. San Francisco. Architect, none. Owner, J. F. Wyman, 1953 Hayes St., S. F. The building will cover an area of 25x80 feet, and is to contain six apartment flats. Interior will be finished in pine with hardwood floors and some hardwood veneer. There will be open fire places and tile mantels. Some tile will be used in the baths and kitchens. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLAT ALTERATION—Frame construction, \$4,000. San Francisco. Architect, Oliver Everett, 1910 Webster St., S. F. Owner, J. A. Bergerot. The work will consist of raising the present building and constructing an additional story underneath. The other

Floors will be completely rearranged and the work will require new plastering, plumbing, electric work, painting and interior finish. Exterior of the building will also undergo extensive changes. Plans are complete and figures have been taken.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, N. Cuneo. The building has been designed to contain four modern flats of four and five rooms each. Interior finish will be of pine and redwood. Some hardwood floors will be used. Tile will be used in the baths. Exterior of the building will be covered with shiplap and rustic. Plans are being prepared.

FLATS—3 story and base, frame, \$7,000. San Francisco. Architect, J. C. Flueger, Crocker Bldg., S. F. Owner's name withheld. The building will be erected on 29th avenue, and has been arranged for three modern residential flats of five and six rooms each. Interiors will be handsomely finished in pine and hardwoods. Bath rooms will have tile wainscot. Tile will also be used in the kitchens. There will be open fire places and brick mantels. Oak floors are to be used in the principal rooms. Exterior of the building will be covered with brick veneer and shiplap. Plans are being prepared.

FLATS—3 story and base, frame, \$6,000. San Francisco. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Paul De Martini. The building will be erected on Broadway west of Mason and will contain three flats of four, five and six rooms. The building will have a frontage of 27½ feet and a depth of 61 feet. Interior will be finished in pine and redwood with some oak floors. There will be open fire places and brick mantels. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with brick veneer and shiplap. Plans are complete and the work will be done by Day Labor.

HOTEL—2 story and base. Class C construction, \$25,000. San Francisco. Architects, McDougall Bros., Russ Bldg., S. F. Owner, I. Steinhart. The building is to be erected on Sutter street, near Leavenworth, and will contain stores on the first floor and rooms above. A central heating system will be installed. Store fronts will be of the patent type. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—5 story and base. Class C construction. Cost not stated. San Francisco. Architect, L. M. Gardner, Phelan Bldg., S. F. Owner, Emile Lange. This building is to be erected at the southeast corner of 6th and Minna streets. The first floor will be arranged for stores and the hotel entrance and lobby. Upper floors will contain in the neighborhood of seventy rooms and several baths. Interior finish will be of pine throughout. There will be steam heat, elevator service and a hot water supply system. Exterior of the building will be faced with pressed brick. Patent store fronts will be used. Plans are being prepared.

HOTEL—3 story and base, reinforced concrete, \$11,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Nathan Haas. The building will be erected on Jones street near O'Farrell. The entrance and lobby will

occupy the first floor and upper floors will be arranged for single rooms and baths. Plans provide for a hot water system but no heat. Interior will be finished in pine throughout. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

HOTEL ALTERATIONS AND ADDITION—Frame construction. Cost not stated. San Francisco. Architect, C. C. Dakin, 110 Sutter St., S. F. Owners, Frederick H. and C. C. Dakin. This work will consist of the alteration of an old-time residence on California street west of Divisadero into four stores and a modern family hotel. Considerable tile and marble work will be used. There will be a central heating system, roof garden and patent store fronts. New plumbing, plastering and electric work will be installed. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owner, Linda C. Avenali. The dwelling will be erected on Green street near Taylor, and will be designed for a handsome city home. Interior finish will be of pine and hardwood with hardwood floors in all of the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms. The exterior of the house will be covered with brick veneer and cement plaster. Plans are being prepared.

FACTORY—3 story and base, frame, \$3,200. San Francisco. Architect, none. Owner, C. H. Gish, 257 Falcon St., S. F. The building has been designed for an electric light plant. There will be no interior finish. The building will cover an area of 41x52 feet. Plans are complete and in the hands of the owner who will do the work by Day Labor.

DEPARTMENT STORE—3 story and base. Class A construction, \$200,000 or more. San Francisco. Architect, Albert Pissis, Flood Bldg., S. F. Owners, Emporium. The property in the rear of the present building and located on Mission street, between 4th and 5th streets, will be improved with a large building, practically covering the entire area. Architecture will be similar to that of the present building. When complete the new addition will make the Emporium the largest department store on this coast. Plans provide for a complete steel frame and fireproof construction throughout. Many of the departments in the present building will be rearranged and the interior will be somewhat altered. Plans are being prepared.

NICHOLADEON—1 story, brick. Cost not stated. San Francisco. Architect, Alfred I. Coffey, Humboldt Bank Bldg., S. F. Owner's name withheld. The building is to be erected in the Mission District, and will have a frontage of 28 feet and a depth of 78 feet. Interior will be finished in pine and ornamental plaster. Considerable tile and marble will be used. Exterior of the building will be faced with cement plaster. Plans are being prepared.

STORE FRONTS AND ALTERATIONS—Frame construction. Cost not stated. San Francisco. Architect, C. C. Dakin, 110 Sutter St., S. F. Owner's name not given. Three new store fronts and considerable interior alteration will be made to the building on the

H. B. WILLSON & CO. Patent Attorneys
Box 239 Wilson Bldg. WASHINGTON, D. C.

north line of O'Farrell street west of Fillmore. The work will include new plastering, wiring and some plumbing. Marble and tile will be used. Plans are now being prepared.

STORES AND OFFICES—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner represented by Kern-Nellau Co. This building has been mentioned here before when plans were first started. The building has a frontage on East street of 150 feet and 50 feet on Howard. The first floor will contain a number of stores and upper floor will be arranged for offices. Interior finish will be of pine throughout. There will be metal window sash and frames. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

STORES—1 or 2 story and base, brick or concrete. Cost not stated. San Francisco. Architects, Ross & Bergren, 310 California St., S. F. Owners, S. and C. Forbes. This building will be erected at the corner of Market and Rose avenue, a site recently purchased by S. and C. Forbes. The building will cover a ground area of 2,940 square feet. Leases are now being made, and until these are complete the height of the building cannot be determined. The exterior will probably be faced with pressed brick. Foundations and walls will be of sufficient strength to carry several other stories. Complete particulars will be given as the plans progress.

STORES—2 story. Class A addition to two-story building. Cost not stated. San Francisco. Architect, Oscar Haupt, Phelan Bldg., S. F. Owner, O. D. Baldwin. The building at the southwest corner of Grant avenue and Harlan Place will be altered and two more stories added. A contract for the structural steel work has been awarded to Mortensen Bros. for \$3,450. Bids for the balance of the work have been taken under advisement in the architect's offices.

DEPARTMENT STORE FIXTURES—Cost not stated. San Francisco. Architect, C. C. Dakin, 110 Sutter St., S. F. Owners, Emporium. Preliminary plans are now being made for the many new fixtures which will be required for the new addition to the Emporium. Mr. Dakin is making a study of the old building as well as of the new floor plans and will design new fixtures for many of the departments in the present building. It is estimated that between \$75,000 and \$100,000 will be expended on fixtures.

STORES—1 story, frame, \$5,000. San Francisco. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Mr.

Frank Neidick

Carpenter and Builder
Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the "BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Engleson. The building will be erected on 18th avenue, and will contain six stores. There will be patent store fronts and plate glass windows. Interiors will be finished in pine throughout. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will probably be done by Day Labor.

TUNNEL CONSTRUCTION—\$337,000. San Francisco. Engineer, City Engineer, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids were opened at the last meeting of the Board of Public Works for the construction of the Stockton Street Tunnel. Jacobsen & Bade, Portland, submitted the lowest figure and have been awarded the contract. A complete list of the bids appears under the heading of San Francisco in this issue.

City Bids Opened.

Six Sets of Figures Received For Construction of Stockton Street Tunnel No Award Made.

Bids for the construction of the Stockton street tunnel were opened by the Board of Public Works at their meeting held Wednesday afternoon at the Temporary City Hall. Six sets of figures were submitted, the lowest tender coming from Jacobson & Bade, a Portland, Oregon firm. Their figures were \$337,000. The highest bid was presented by F. Rolandi and was for \$487,950. All bids were taken under advisement. No bids for the removal of the safety station at O'Farrell and Market streets were considered. The following is a list of the figures submitted for the construction of the Stockton street tunnel.

Stockton Street Tunnel.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—2 story and
 base, frame, \$15,000. Alameda, Alameda Co., Cal. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The building will be erected on a lot with two street frontages. Only preliminary plans have been prepared and details of the construction are not available. The interior will be arranged for two and three room suites. The exterior will probably be faced with cement plaster. Complete details will be given as the plans progress.

APARTMENT HOUSE—4 story and base, brick and steel, \$67,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, Dr. R. B. Ayres. The building will be erected at the corner of 14th and Oak streets, and will contain a large number of two and three room suites equipped with all modern conveniences. Interior will be finished in pine and hardwoods. Plans provide for steam heat, vacuum cleaning system and elevator service. Bath rooms will have cement floors and tile wainscot. All suites will have private bath rooms and will be equipped with wall beds. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$30,000. Oakland, Cal.

Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Wilhemena Street The upper two floors of the building will be arranged for sixteen suites of two and three rooms each with private baths and wall beds. The first floor will contain two modern stores. Interior finish will be of pine and some hardwood. Bath rooms will have tile floors and the baths and kitchens will be wainscoted with Keene's cement. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—5 story and base, brick, \$100,000. Berkeley, Alameda Co., Cal. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Telegraph avenue and Durant Way, and will cover an area of 90x100 feet. Plans show a total of 100 guest rooms, which are arranged in suites of two and three rooms each with bath. Interior will be finished in pine and hardwoods. Bath rooms will have tile floors and wainscot. A unique feature of the building will be open air sleeping porches in connection with all apartments. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

BANK AND OFFICES—11 story and base. Class A construction. Cost not stated. Oakland, Cal. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owners, First Trust and Savings Bank. The building is to be erected at the southeast corner of 16th and San Pablo and will cover a large ground area. The entire first floor and a large portion of the basement will be occupied by the bank. Construction will be fire-proof throughout with a complete steel frame, exterior walls of brick faced with pressed brick and terra cotta. Interior partitions will be of hollow tile, floors of concrete. Metal trim and tile and marble wainscot will be used. There will be steam heat, elevator service, mail chutes, a vacuum cleaning system and hot water system. Interior of the bank will be finished in tile, marble, ornamental plaster and bronze. Special bank fixtures, coin and safe deposit vaults will be installed. A contract has been awarded to the Pacific Rolling Mills for the structural steel work at \$35,844. A general contract for the balance of the work will be let. Working drawings are nearly complete and bids will be called for on the general contract within a week or ten days.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Miss Lindel Hoskins. The dwelling will be erected in North Crummont and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and some hardwood. Oak floors will be used in several of the principal rooms. There will be furnace heat and open fire places. Tile will be used in the bath room and kitchen. There will be an automatic water heater. The exterior of the dwelling will be covered with shingles and shakes. Open fire places and brick mantel will be used in the living

room. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$20,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner's name withheld. The dwelling will be erected in Claremont and has been designed for one of the most handsome dwellings in that tract. Plans provide for in the neighborhood of twelve rooms, several baths and sleeping porches. A garage will also be erected on the property. Interior finish will be of pine and hardwood. Hardwood and tile floors will be used throughout. There will be hot water heating system, open fire places and automatic water heaters. Baths will be finished in tile. The exterior of the dwelling will be faced with cement plaster on metal lath. Plans are being prepared and further information will be given when plans are out for figures.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, P. Lindeblad, 3822 Randolph Ave., Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living and dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. There will be an automatic water heater. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, C. E. Miller. This work has been mentioned here before when plans were first prepared. Bids are now being taken on the work and a contract will be let within a few days. The house will contain seven rooms and bath. Interior finish will be of pine and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. The exterior will be covered with cement plaster on metal lath. Bids are now being taken by the architect.

BUNGALOW—1 story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architects, Newsum & Dixon, 812 Broadway, Oakland. Owner, Mr. Lundhelm. The bungalow will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living and dining rooms. Tile will be used in the bath room and kitchen. There will be an open fire place with the tile or brick mantel in the living room. The exterior of the building will be covered with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. J. Grebs, 1801 Francisco St., Berkeley. The house will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire

places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mr. Gasman. The dwelling will be erected in Northbrae, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. The exterior of the house will be covered with cement plaster on metal lath. Tile will be used in the bath room and kitchen. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$3,200. Oakland, Cal. Architect, none. Owner, H. L. Wood, 2300 Seminary Ave., Oakland. The house will contain seven rooms, bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated, Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, R. H. Naddan. The dwelling is to be erected in Berkeley Square, and will contain seven rooms, bath and sleeping porch. All interior finish will be of pine or hardwood. Oak floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

GARAGE—1 story, brick. Cost not stated. Oakland, Cal. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owners, Girard Investment Co. The building is to be erected at the corner of Broadway and Orchard street, and is designed for a commercial garage and sales rooms. Interior of the sales rooms will be handsomely finished in pine and hardwoods and tile. There will be large display windows and patent store fronts. The exterior of the building will be faced with cement plaster. Plans are being prepared.

APARTMENT HOUSE—2 story and base, frame, \$12,000. Oakland, Cal. Architect, W. H. Judson, Albany Bldg., Oakland. Owners, Davis Estate. The building will be erected on Hudson street, and has been designed to contain 24 apartments of two rooms each with bath. Interior will be finished in pine and redwood. A central heating system will be installed. All suites will have wall beds. Tile will be used in the bath rooms. The exterior of the building will be covered with brick veneer and rustic. Plans are being prepared.

FLAT—1 story and base, frame, \$2,000. Oakland, Cal. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Mr. Hume. The building will contain one flat of five rooms. Interior will be finished in pine throughout. Hardwood floors are specified in two of the rooms. Tile will be used in the bath room and kitchen. Exterior of the building will be covered with rustic. There will be an open fire place and brick mantel. Plans are being prepared.

RESIDENCES—3, 2 story and base, frame, \$3,500 each. Berkeley, Alameda Co., Cal. Architects, Patrick-Nelson Co., 2035 Addison St., Berkeley. Owners, Newell-Murdoch Co. These houses will be erected on the Thousand Oaks Tract and each will be designed to contain seven rooms and bath. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster. Plans are complete and the work will be done by Day Labor. Patrick-Nelson Co. will superintend all construction.

SORORITY HOUSE—2 story and base, frame, \$9,000. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514 Hillegass Ave., Berkeley. Owners, Alpha Phi Sorority. The interior of the building will be arranged for a large social room, library, dining room and kitchen. There will also be a number of sleeping rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms, which will be equipped with showers as well as tubs. The exterior of the building will be covered with shingles and cement plaster on metal lath. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Waterhouse Estate Co. The dwelling will contain seven rooms and bath. Interior finish will be of pine with hardwood floors in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room. The exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

AUDITORIUM—3 story and base, Class A construction, \$500,000. Oakland, Cal. Architects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. This building has been mentioned here before. Plans for the structural steel work are complete and an advertisement calling for bids on this portion of the work appears in another column of this issue. Bids will be opened on April 24th. Plans and specifications can be secured from the architect.

CONVENT—2 story and base, frame, \$35,000. Berkeley, Alameda Co., Cal. Architect, John J. Foley, 16 Kearny St., S. F. Owners, St. Joseph's Convent. The building, which is to be erected on the grounds now occupied by the institution, will cover an area of 100x90

feet. There will be a large music room, study halls, art room, dining room and dormitories. Plans include steam heat and a hot and cold water supply. Interior will be finished in pine throughout. The exterior of the building will be covered with shiplap, sanded. Plans are being prepared.

SCHOOL—2 and 3 story and base, reinforced concrete. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The following firms in addition to the list published previously in these reports have applied for plans for the work on the Commercial High School in Oakland. Bids are to be opened on April 21st. Lewis Hicks, Williams Bros. & Henderson, Van Sant-Houghton Co., Thurston & Co., Lange & Bergstrom, McLeran & Peterson, Frederick Amweg, C. Christensen, Wold & Kohn.

STORES—1 story, frame. Cost not stated. Alameda, Alameda Co., Cal. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name not given. The building will contain eight stores, each of 20 feet frontage and a depth of 34 feet. Interiors will be finished in pine. There will be plate glass display windows. The rear of the building will be fitted up for living rooms. Plans are being prepared and figures will be called for shortly.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

RESIDENCE — 2 story and base, frame, \$9,000. Mill Valley, Marin Co., Cal. Architects, Pelch & Knoll, Hearst Bldg., S. F. Owner, Dr. C. A. Kern. The dwelling has been designed for a nine-room house with baths and sleeping porch. Interior will be finished in pine and hardwood. Oak floors will be used in all of the principal rooms. Baths will be finished in tile. Provision will be made for a hot water system of heating which will be installed at a later date. A feature of the house will be the dressing rooms off of each bed chamber. An automatic water heater will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOW — 1 story and base, frame, \$2,500. Vallejo, Napa Co., Cal. Architect, Paul De Martini, 451 Columbus Ave., S. F. Owner, Mrs. Costa. The bungalow will contain four rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood floors. There will be a large open fire place in the living room. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are being prepared.

LODGE HALL 4 story and base, brick and steel, \$60,000. Richmond, Contra Costa Co., Cal. Architect, James T. Nabrett, La Salle-Sellers Bldg., Richmond. Owners, Richmond Elks' Hall Association. The building will be centrally located and is to cover a large ground area. The first floor will be arranged for stores, upper floors will contain the lodge rooms, banquet hall and offices. There will be steam heat and elevator service. Interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

CHURCH—2 story and base, brick, \$25,000. Bakersfield, Kern Co., Cal. Architect, Thomas B. Wiseman, Cal. Architects' Bank Bldg., Bakersfield. Owners, First Presbyterian Church of Bakersfield. A site at the corner of 17th and H streets has been secured and preliminary plans have been prepared. These plans show a building 80x85 feet with a main auditorium seating 250 people. Interior finish will be of pine and ornamental plaster. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans have not been approved by the Building Committee.

Contracts Awarded.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$180,000. Sacramento, Cal. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Dr. Faris. This building has been mentioned here a number of times before. The lot is situated on a corner and the building will contain over two hundred rooms. All apartments will be provided with a sleeping porch. Mechanical plans provide for steam heat, elevator service, hot and cold water supply, refrigerating plant, vacuum cleaning system and all other modern equipment. Suites will contain from two to five rooms each. All apartments will have connecting baths and wall beds. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now out for figures.

CONVENT—3 story and base, brick or concrete, \$80,000. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, Roman Catholic Convent. The institution has recently secured a new site at the corner of San Joaquin and Flora streets and have had preliminary plans prepared. No details of the building have been decided upon, and it will be some time before full particulars can be printed.

STORES AND OFFICES—10 story and base. Class A construction, \$200,000. Sacramento, Sacramento Co., Cal. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owner, George W. Peltier and associates. This building, which is to be erected at the southwest corner of 4th and J streets, will be known as the Fruit Association Building. Construction will be fire-proof throughout, with a complete steel frame, brick and concrete walls, faced with terra cotta. There will be steam heat, elevator service, a vacuum cleaning system, metal window sash and frames and metal trim and mail chutes. Halls will be vainscoted with tile and marble. Six floors have already been leased. Working drawings are being prepared and bids will be called for at once.

SCHOOL—1 story and base, reinforced concrete, \$37,500. Orland, Glenn Co., Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Orland School District. The building has been designed for a six-room school with principal's office, teachers' rooms and

library. A central heating system will be installed. Interior finish will be of pine with some maple floors. There will be composition blackboards and a program clock system. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

three room apartments with wall beds
and private baths. Interior finish will
be of pine and hardwood. Bath rooms
will be wainscoted with tile and will
have marble floors. There will be
steam heat, elevator service and a vac-
uum cleaning system. The exterior of
the building will be faced with pressed
brick. Plans are complete and figures
are being taken.

HOTEL—3 story and base, reinforced
concrete. Cost not stated. Wilming-
ton, Los Angeles Co., Cal. Architect,
Thornton Fitzhugh, Pacific Electric
Bldg., L. A. Owner, G. D. Potter. The
building will be erected at the corner
of 13th and Canal streets. The first
floor will contain six stores and the
hotel lobby. Upper floors will be ar-
ranged for 45 guest rooms and several
baths. Plans provide for steam heat,
elevator service and a hot and cold
water supply system. The exterior of
the building will be faced with pressed
brick. Plans are now being prepared
for the work.

HOTEL—3 story and base, brick and
frame. Cost not stated. Los Angeles,
Cal. Architect, O. N. Dennis, Fay Bldg.,
L. A. Owner, Louis S. Lehman. The
building will cover an area of 50x95
feet, and will contain 52 guest rooms
besides a number of baths. There will
be steam heat and a hot and cold water
supply system. Interior finish will be

of pine and some hardwood. Bath
rooms will be finished in tile. The ex-
terior of the building will be faced with
brick veneer. Plans are complete and
figures are being taken.

HOTEL—1 story and base, Class C
construction, \$10,000. Los Angeles, Cal.
Architect, Joseph F. Rhodes, Central
Bldg., L. A. Owner, Joseph F. Rhodes.
The building will be erected on a cor-
ner lot and will cover an area of 35x
110 feet. There will be a total of 70
guest rooms, a number of which will
have private baths. Plans provide for
elevator service, steam heat and a hot
and cold water system. There will be
metal window frame and sash. The ex-
terior of the building will be faced
with pressed brick. Interior finish will
be of pine throughout. Plans are being
prepared.

RESIDENCE—2 story, attic and
base, reinforced concrete, \$40,000. Los
Angeles, Cal. Architect, Arthur S.
Heineman, San Fernando Bldg., L. A.
Owner, Charles S. Henry. The dwell-
ing has been designed for a 15-room
house with several baths, sleeping
porches and a garage. There will be
steam heat and open fire places. Inter-
ior will be finished in pine, redwood,
mahogany and other hardwoods. Hard-
wood floors will be used throughout.
All baths will be finished in tile. The
exterior of the dwelling and garage
will be faced with cement plaster.
Plans are complete and the work will
be done by Day Labor under the direc-
tion of the architect. All materials
are now being purchased.

STORES AND LOFTS—10 story and
base, reinforced concrete. Cost not
stated. Los Angeles, Cal. Architect,
W. J. Saunders, International Bank Bldg.,
L. A. Owner, F. W. Braun. The build-
ing will cover an area of 50x154 feet.
Construction will be fireproof through-
out with reinforced concrete walls,
floors and hollow tile interior parti-
tions. There will be metal window
sash and frames and fireproof doors.
Plans provide for elevator service, an
automatic sprinkler system and spiral
staircases. The exterior of the building
will be faced with cement plaster. Plans
are complete and figures are now being
taken.

DEPARTMENT STORE—8 story and
base, Class A construction. Cost not
stated. Los Angeles, Cal. Architects,
Morgan, Wall & Morgan, Van Nuys
Bldg., L. A. Owners, W. H. Perry Es-
tate. This building is to be erected at
the corner of 5th and Broadway, and
will cover a ground area of 150x160
feet. The entire structure has been
leased to the Fifth Street Store. Con-
struction will be fireproof. There will
be a complete steel frame and exterior
walls faced with pressed brick and
terra cotta. Interior finish will be of
metal and hardwood. A steam heat-
ing system will be installed. Plans are
only in a preliminary stage and full
particulars will be given later.

PIER—Concrete and wooden pile,
\$100,000. Long Beach, Los Angeles Co.,
Cal. Engineers, McCreary Bridge and
Construction Co., Pacific Electric Bldg.,
L. A. Owners, City of Long Beach.
Plans and specifications for a pier at
the foot of American and Pine avenues
have been submitted for approval to
the city trustees. According to the
plans the structure will be 350 feet
long and 150 feet wide. Final approval
will be given to the plans and speci-
fications at a next meeting of the

LIBRARY—1 story and base, brick. Cost not stated. Torrance, Los Angeles Co., Cal. Architect, Robert D. Farquhar, Van Nuys Bldg., L. A. Owners, City of Torrance. The building will be 81x110 feet and will contain the usual two reading rooms, librarians' office, stack room and an auditorium. There will be pine and hardwood trim, metal stairs and some tile and marble. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SCHOOL—1 story and base, brick and concrete, \$25,000. Huntington Park, Los Angeles Co., Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Huntington Park School District. The building will cover an area of 70x168 feet and will contain six standard size class rooms, an auditorium seating 400 people and principal's room. Interior finish will be of pine and hardwood. A plenum heating system will be installed. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

APARTMENT HOUSE—4 story and base. Class C construction, \$70,000. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, M. E. Blaiser. Contractors, Los Angeles Investment Co., 8th and Broadway, L. A. Contract price, \$70,000.

HOTEL—5 story and base, reinforced concrete, \$40,343. Los Angeles, Cal. Architect, F. L. Stiff, Grosse Bldg., L. A. Owner, P. R. Tousey, Contractor, F. L. Spaulding, 1460 Dana St., L. A. Contract price, \$40,343.

Bids For Los Angeles State Normal School.

Figures for General Construction Show
Lewis A. Hicks Co. Low at \$596,000
For Work In South.

(By Special Wire.)

Eight sets of figures for the general construction of the Los Angeles State Normal School were opened in Sacramento on Saturday. The lowest figures were presented by Lewis A. Hicks Co. at \$596,000. Segregated bids were taken on all parts of the work, but these had not been tabulated at press time, and will be printed in the next issue of the "Builder."

General Construction.

McLeran & Peterson.....	\$629,500
Somers & Lund.....	553,600
C. J. Kubath Co.....	612,00
Lewis A. Hicks Co.....	596,00
F. O. Engstrun Co.....	644,495
Sound Constr. & Eng. Co.,	684,414
Southwestern Constr Co.,	638,948
J. P. Atkinson.....	612,700

PORTLAND AND OREGON.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Portland, Ore. Architects, Clausen & Clausen, McCleay Bldg., Portland. Owner, Dr. W. L. Wood. The building will cover an area of 62x100 feet and will contain 25 apartments of two and three rooms each. All suites will have private bath rooms and will be equipped with wall beds. Interiors will be finished in pine and hardwood

with tile wainscot and cement floors in the bath rooms. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Segregated bids are being taken.

APARTMENT HOUSE—1 story and base. Class C construction, \$70,000. Portland, Ore. Architects, W. B. Bell and T. J. Wilding, Worcester Bldg., Portland. Owner, A. C. Ruby. The building will be arranged for stores on the first floor and 45 apartments of two and three rooms each on the upper floors. Plans include steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine and hardwoods. All suites will have connecting baths and wall beds. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster and pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Horandt & Anderson, Worcester Bldg., Portland. Owner, A. E. Trump. The two upper floors of the building will be divided into two and three room suites with connecting baths and wall beds. First floor will be arranged for stores. There will be steam heat. Interior will be finished in pine throughout. The exterior of the building will be faced with cement plaster. Plans are complete and figures have been taken.

HOTEL—4 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Aaron H. Gould, Worcester Bldg., Portland. Owner, W. W. Margulis. The building will cover an area of 25x100 feet. Interior of the building will be arranged for 70 or 80 single rooms and a number of baths. There will be steam heat and elevator service. Interior finish will be of pine throughout. The exterior will be faced with cement plaster. Exterior walls will be of reinforced concrete and interior of mill construction. Plans are being prepared and bids will shortly be called.

TOWN HALL—2 story and base, brick and concrete. Cost not stated. Newberg, Ore. Architect, E. E. McClaren, Lumber Exchange Bldg., Portland. Owners, Town of Newberg. Besides the city offices and council room, the first floor will be arranged for fire and police departments. Basement will contain the jail. The second floor of the building will be fitted up for the use of the Commercial Club. There will be steam heat and pine trim and metal window frames and sash. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LODGE HALL—2 story and base, brick and concrete. Cost not stated. Lents, Ore. Architects, Herandt & Anderson, Worcester Bldg., Portland. Owners, Lents Odd Fellows' Hall Association. The building will cover an area of 50x100 feet. The first floor is to contain stores and the upper floor will be arranged for a large banquet hall and lodge rooms. Interior will be finished in pine and hardwoods. A central heating system will be installed. Exterior of the building will be faced with cement plaster. Plans are out for figures.

Contracts Awarded.

LAUNDRY BUILDING—2 story and base, brick and concrete, \$75,000. Portland, Ore. Architects, Ellis F. Lawrence and William G. Holford, Chamber of Commerce Bldg., Portland. Owners, Troy Laundry Co. Contractor, Hurley-Mason Co., Board of Trade Bldg., Portland. Contract price, \$75,000.

SEATTLE AND WASHINGTON.

WAREHOUSE—4 story and base, brick, \$50,000. Tacoma, Wash. Architect, I. C. Irwin, Chamber of Commerce Bldg., Tacoma. Owners, California Wine Co. This work has been mentioned in these columns before. The structure will cover an area of 90x110 feet and will be of the heavy mill type of construction. There will be an automatic sprinkler system, metal window frames and sash. The exterior of the building will be faced with stock brick. Plans are complete and figures will be taken at once.

Contracts Awarded.

STATIONS, ETC.—Frame and concrete construction, \$50,000. Tacoma, and Teneno, Wash. Engineers, Engineering Department Pacific Northern R. R. Co. Owners, Pacific Northern Railroad Co. Contractors, E. J. Rounds Construction Co., Walker Bldg., Seattle. Contract price, \$50,000.

PROGRESS OF THE FAIR.

Dredges are now deepening the Yacht Harbor of the Panama-Pacific International Exposition, in preparation for the incoming ships loaded with lumber for the Palace of Education and the other Exhibit Buildings.

Silt is also being pumped from the Harbor to fill in the open space between the piling and the shore line. A temporary plank road has been built through the Exposition grounds and it is now possible for visitors to traverse the site from Van Ness Ave. to the Presidio.

The progress of the World's Fair is now visible. The work is farther advanced at the present time than at any other previous Exposition two years before its formal opening.

The preliminary work includes the filling in of lands at Harbor View and the Presidio. The construction of a rock sea-wall; construction of the enclosing fence, 80 per cent complete; the erection of green houses and potting houses at the Presidio; the moving of buildings from the acquired site; the improvement of Fulton Basin, now 90 per cent complete; the construction of roadways; the grading of sites for the various buildings; the installation of sanitary and storm sewer systems throughout the grounds; the preliminary work of installation of the high-pressure water system; the driving of piles for the freight ferry slips at the foot of Buchanan street, and the hundreds of other necessary undertakings which of themselves gave no visible evidence of the enormous work already being accomplished.

Seven thousand men will be at work on the Exhibits Palaces of the Panama-Pacific International Exposition before the summer is over. As high as ten thousand men will be employed when the labor peak is reached. This number is exclusive of those who will be employed in the construction of

state buildings and foreign pavilions. The states and foreign nations, it is expected, will conform to the pace set by the exposition company in the work of construction.

The plans of the magnificent courts, the designs for the imposing sculpture and the sketches of the mural paintings and decorations are nearing completion. Contracts for many of the groups of statuary and for many of the mural paintings have already been let to prominent artists and sculptors in San Francisco, New York and other cities of the United States. The direction of the color work has been entrusted to Jules Guerin, and Karl Bitler has charge of the sculpture.

One of the horticultural features at the 1915 Universal Exposition, will be "California Canyon" which will be located between the Japanese Gardens and Horticultural Building or North of Lombard street between Baker and Lyon streets.

It will be six hundred feet long and two hundred feet wide. It will be adorned with one thousand red woods, madrones, California lilac, mazanitas, and California wild flowers.

A model of this beautiful canyon has been made by the landscape department which is in charge of John McLaren, landscape Engineer. The Landscape department has been extremely active during the past month. The nursery in Encensee Hollow, which covers fourteen thousand square feet, is being used to great advantage. There are two hundred and fifty thousand small plants which have been raised from seeds and cuttings in the six green houses and its number is being rapidly increased every day.

Governor Tasker L. Odde of Nevada, has approved the bill for one hundred thousand dollars for that states participation in the 1915 Universal Exposition.

Nevada was the second state to select a site at the Exposition. This adjoins the Oregon State site. The Silver State aims to erect a handsome building and make a prominent showing at the coming World's Fair.

PROJECTING A SPHERE ON TO A PLANE.

In connection with the annual meeting of the Pacific Association of Scientific Societies, Mr. B. J. S. Cahill will address the Technical Society on the subject of "Methods of Projecting a Sphere onto a Plane, or The Evolution of a New Projection for a World's Map" in Room 109 California Hall, Berkeley, Friday evening, April 11, at 8 P. M.

IRRIGATION FROM HONEY LAKE FORBIDDEN.

WASHINGTON (D. C.), April 9.—A decision of importance to residents of Idaho who are using or intend to use water from Honey Lake for irrigation purposes was handed down by the Department of the Interior when it refused the entry of John M. Ramsden on 160 acres in the vicinity of the lake, because the lake is not a flowing body of water. The decision affects many others in the same situation.

The right to use running water flowing in a river or stream or down a canyon or ravine may be acquired

by appropriation, and it was under this that the Lassen people wanted to use the waters of Honey Lake. The department holds, however, that this section does not apply to Honey Lake and that the Legislature must pass the remedial bill now before it or the department will be forced to deny the entries.

The Attorney General of California has been written to find out if the legislation has passed the bill or not, and on that will depend the rulings of the department.

NEW DIXON BUILDING.

DIXON (Solano Co.), April 9.—G. D. Schultze, the local jeweler, has let the contract for his new building and work will begin at once on the structure. The building will be a two-story brick, 50 by 35, with a cement facing. The lot on which it is to be erected is one of the choicest business properties in town, having a frontage on First street of 50 feet.

SCHOOL BOND ELECTION.

SUISUN (Solano Co.), April 9.—The Trustees of Armijo Union High School have issued a call for a special election to be held on May 17th to vote upon the proposition of issuing bonds in the sum of \$70,000 to erect a new building.

The Union District consists of Suisun and Fairfield and eight other elementary school districts. The present building is inadequate for the purpose, being not only too small but inconvenient and unsanitary.

The plans for the proposed new building call for a two-story and basement structure, fire proof throughout, the material to be reinforced concrete for the outer walls and hollow tile for the partition walls. It will accommodate about 300 students.

GERMANY'S GREAT INDUSTRIAL EXPANSION.

German growth in manufactures and commerce in the last thirty years has been remarkable but it is not nearly so well known that the agricultural growth, particularly in the line of intensive culture, has been very great. The population has increased 52 per cent in thirty-five years, while that of England has increased 37 per cent and that of France only 8, a fact of which the young Frenchmen, who are shouting for a militarist policy, would do well to take notice.

In twenty years the death rate has been reduced one-third, which is very much more than the reduction in other European countries. The figures compiled by the Dresden Bank show that the population engaged in agriculture has decreased from 42 to 28 per cent, while the population engaged in industry and mining has increased from 35.5 to 42.8 per cent. But the production of wheat per acre has increased in twenty-five years 57 per cent, of rye 73.5 per cent, of potatoes 61.4 per cent and of hay 52.8. It will be noticed that the production per acre has increased faster than the increase of the total population.

In less than forty years the production of sugar-beet pulp has increased about six times, while the amount of beet required to produce a

given weight of sugar has been reduced one-half and the production of beet per acre has increased a good deal over 50 per cent.

In about thirty years the wages of mechanics in Berlin have more than doubled, and the wages paid by the Krupp concern have increased nearly 70 per cent. The average consumption per capita of breadstuffs has increased nearly 24 per cent in twenty-five years, of potatoes 80 per cent, of sugar 188 per cent, and of tea, coffee and cocoa 44 per cent. The increased consumption of meat is given only in the case of Saxony, where it has been 44 per cent. The savings banks deposits have increased tenfold in thirty-five years and more than half the taxpayers pay on incomes of between \$1500 and \$5000.

The wealth of Germany is estimated to be about that of England and very much more than that of France. Thirty years have made a new Germany.—Philadelphia Record.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth Street N. W., Washington, D. C.

A Complete Copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of ten cents. Persons ordering Copies must give Number of Patent.

1,056,775. Circular Slide Rule. David W. Brunton, Denver, Colo.

1,056,788. Sash Operating Device. Eliza P. Harris, Chicago, Ill., assignor to The Payson Mfg. Co., Chicago Ill.

1,056,808. Molding Machine. R. F. Marsh Delphos, Ohio.

1,056,810. Tile Construction. Wm. P. McDonald, Cincinnati, Ohio, assignor to The Rookwood Pottery Co., Cincinnati, Ohio.

1,056,818. Bench Clamp. Harry R. Mitchell and I. L. Sloan, Seattle, Wash.

1,056,917. Carpenter's Tool. Eric H. Len Los Angeles, Cal.

1,056,948. Construction of Building Walls. H. J. Schubert, Hackensack, New Jersey.

1,056,973. Metal Window Frame and Sash. Andrew J. Connell and Jno. W. Rapp, New York, N. Y., said Connell assignor to said Rapp.

1,057,095. Block for Building Construction. F. V. Schiller, Oakland, Cal.

WOODLAND MAY HAVE FEDERAL BUILDING.

WASHINGTON (D. C.), April 4.—Woodland will probably have a new Post Office in the near future for Representative Curry is framing a bill for that purpose now and it will be one of the first he will introduce when the Congress is ready for general legislation. The exact cost of a building needed to fill the requirements has not yet been determined, but it will probably be between \$75,000 and \$100,000.

The receipts of the Woodland office last year from the sale of postage stamps was \$16,734.30, an amount much larger than the average of the receipts of the offices which received new buildings in the Public Building bill passed in the last Congress.

FORMATION OF POTASH DEPOSITS.

In connection with the search for potash in the West which is being made by the United States Geological Survey a great number of localities have been visited by the survey geologists, especially in the Great basin. Shallow desert lake beds, so-called dry lakes or playas, are extensively distributed throughout this region. Most of these playas contain salts to a greater or less extent, and nearly all these salts show an analysis from 1 to 4 per cent or more of potash. Few of these lake beds show evidence of having ever been submerged to a considerable depth, and the deposits that lie in the lowest parts of most of them are probably only alternating strata of clays and saline muds, with thin salt crusts produced by periodic flooding and drying up. Large and massive deposits of crystalline salts can hardly be expected, except as the result of the drying up of a very extensive and deep saline lake, or as representing the continuous accumulation of saline matter in a water body during a very long period of time. Record of the existence of such lakes in prehistoric times is to be found in certain parts of the Great Basin region. Contrary to the general assumption, however, the extensive lake basins are, in fact, relatively few. It is evident, therefore, that the search for the important salt bodies of this type has of necessity been narrowed to a relatively few localities.

The arena in Searles lake and the Panamint Valley, Cal., of public land withdrawn from entry on account of their potash content are the lowest parts of two ancient lake basins, whose waters at their highest stage probably connected through a narrow strait. Both basins were filled by overflow from the drainage of Owens river, and in both the salts are believed to have accumulated by natural concentration of the normal drainage waters from that source. The salt body in Searles lake lies at the surface of the ground and was located in claims for the soda it contained before interest in potash had been seriously awakened. The mud flat that forms the bottom of the Panamint valley has recently been located in "potash" claims, but without any evidence that can be taken to indicate the existence there of a valuable saline mass. The salt that shows on the surface in the Panamint valley is relatively insignificant in amount, and tests for potash in the surface salts or ground waters of this valley do not run higher than the average of such salts in mud flats and dry lakes generally. The lands have, therefore, been withdrawn on evidence of a more general character, the theory being that the former larger lake of the Panamint valley, when it dried up, might have deposited a bed of salt as large as or larger than that now existing on the surface in Searles lake. The Panamint valley is relatively narrow, and the streams from the rugged mountain slopes that border it have spread their fans far into the center of the valley. Drilling, possibly to a considerable depth, will be needed to test the possibility of buried salt deposits in this valley, and if such deposits are found to be present, it is believed that they will be essentially like those of the Searles deposit.

Columbus marsh, Nevada, is the evaporation pan of a shallow lake. Analyses of clays obtained in this deposit have

shown some exceptionally high percentage of potash. No important beds of clear crystal salts have yet been found in the marsh, and the possible commercial value of such a deposit still remains a subject for further investigation. Pending such work these lands also have been withdrawn from entry.

On March 19th last there started an expedition from Philadelphia to explore the Amazon river. A body of men selected for their peculiar fitness were aboard the ship *Pennsylvania* which had for its destination the City of Para on the Amazon and they will there embark on a specially built boat that will take them to the head of navigation on the largest river in the world which is 2300 miles from the mouth of the stream.

While men are losing their lives hunting the geographical poles of the earth and spending time and treasure in the exploration of inhospitable ice fields that have little or no value to the world, such fields as the Amazon lay entirely unexplored.

The basin of this mighty river covers more than 2,000,000 square miles and is undoubtedly the richest country in the world. So abundant is the heat and moisture of that great region that life is so rank and luxuriant that it is impenetrable. Dense forests covers the ground so completely as to shut out the rays of the sun and to keep the ground in perpetual shade. Insects and birds innumerable inhabit the place not to mention the reptiles and animals that live in the trees. There are the great forests of the world, the rubber tree in wild profusion and the tropical hardwoods which are so valuable in building and cabinet work.

This expedition is a scientific one. It will ascend the river as far as possible in the ship and then proceed by canoes. No doubt a great deal will be added to the scientific knowledge of the country, to its fauna and flora and many facts be ascertained as to conditions existing there.

Perhaps less is known of the Amazon region than any country in the world. The most fertile and productive land under the sun it is yet as little known as the Sahara desert. When the outposts of civilization advance into this region and science conquers the dangers of disease a producing country will be added to the world's agricultural area that will be the greatest in the history of the human race.

In the death of Gustav de Laval the world has lost a benefactor and a great inventor. He was a native of Sweden, but of French ancestry, as his name implies. His life was one of discovery in the realm of science and applied mechanics and like Edison he solved problems because it was his nature so to do. What the people of this country will remember him for most particularly is the cream separator which has saved millions of dollars to the dairy products of the country. The sewing machine, the cotton gin, and the grain harvester are the great landmarks in the line of industrial invention. Along with modern development in dairy farming the cream separator is an important step in the line of progress.

The Chronicle says that Governor Johnson needs the San Francisco waterfront in his business and that he is going to keep it. It further mentions that six members of the assembly from this city—Ryan, McDonald, Nolan, Scott, Canepa and Collins voted against their city and there are those that will see to it that they are not forgotten.

Those that will see to it are presumably the Chronicle, the Southern Pacific and all the bunch of buccaners for which it stands. For that matter the assemblymen should be proud of their record and of the enemies they have made.

It matters little to the general public just who is working on the waterfront or who has the distribution of the jobs. It does matter a whole lot how the waterfront is administered whether or not it is a free port or whether or not it is controlled by the Southern Pacific or a transcontinental railroad and run in the interest of special privilege.

It is certainly worthy of comment that of all the years before while the Southern Pacific had control it never once occurred to the patriotic Chronicle to agitate the acquisition of the waterfront by the City. As soon as the government is restored to the people and a man is elected governor who has his own political boss and acknowledges sovereignty to no special interest the Chronicle and all the other blockies are out with the big noise of local self government. And this is only in the hope that the railroad would be able to build up a political machine in San Francisco that would grant special privileges to the few and plunder the public generally.

The bill to acquire the San Francisco waterfront was championed by Assemblyman Milton Schmitt, who has always been identified with the special interests. To assume that this measure is championed for the good of the city and the welfare of the state generally is to ask one to believe the incredible. Governor Johnson has said that while he is governor the San Francisco waterfront will remain the property of the State. For this the people of the State and of San Francisco can be truly thankful.

Electric power in contracting work is an important factor in modern building. A recent issue of the Scientific American states the advantage derived from using this form of power in the following language:

"In contracting work in which pumps, ventilating fans, wood metal-working tools, air compressors, hoists, concrete mixers, etc., are used the electric motor has been advantageously employed. The flexibility and versatility of this form of power has especially commended it for the temporary applications characteristic of contracting work. A Scotch contractor concerned having a piece of reserve work on hand recently made use of electric power by installing its own engine and suction-gas producer generating plant. During eighteen months operation this isolated plant—comprising a 40-kilowatt generator belted to the gas engine, supplying variable motors on the work and an installation of electric lights—consumed only tons of anthracite coal."

Editorial Comment.

The Alien Land Law seems to be stirring up a merry row in Japan. So far as the Japanese are concerned it is hard to see what kick they have against this state insofar as they get the same treatment that other foreign nations do. Nor should the threat of war prevent the enactment of a just measure.

Inasmuch as this country now has more people of foreign races, including the negro, than it can ever assimilate it is about time that emigration be limited to those who can bear the burdens of intelligent citizenship. The necessity of importing foreign capital to develop the country no longer exists. In fact as a general proposition foreign capital is being used to exploit the resources of the state rather than to conserve them. The oil fields are a case in point. If they continue to be worked and the product used at the present rate the time will soon come when the world will have to look for some other fuel. Citizenship or the declaration to become a citizen is not an unnecessary qualification for a freeholder in this state. The only question is how best to bring it about.

The State Engineer has recommended that there be some legislative enactment looking to the state supervision of dams. Inasmuch as work is already underway providing for the impounding of vast volumes of water, greater than anywhere else in the United States, it is highly necessary that there be some kind of supervision of this construction. The breaking of one of these dams in after years would mean a wholesale destruction of life and property. And aside from the interest the builders have in the construction the people who live below the level of these great reservoirs, as well as the people of the entire state, have an interest in the safe construction of these great dams.

William Randolph Hearst comes forward to defend the country against the federalistic tendencies of President Wilson. And this federalistic tendency is the reading of his message to Congress in which he follows the custom instituted by Washington and Adams.

Hearst has his cartoonist, Frank Oppen, depict Bryan as carrying a mallet with which he is waiting an opportunity to rap the president. Here is Willie Hearst's first opportunity and he takes it to criticize the president in his cowardly way and raise a great commotion over something that is of relatively little importance.

Washington and Jefferson delivered their messages to Congress in person

as was the custom in England. Jefferson, being imbued with the democratic ideas of the French republic, a doctrinaire in political government, a splendid writer and a poor speaker he discarded the custom instituted by his predecessors. President Wilson has seen fit to revive it and there is no reason why he shouldn't.

Progressive voters have entertained doubts as to whether or not President Wilson would be able to assume such leadership in his administration as to effect needed reform legislation. Apparently he has risen to the occasion and has rightly assumed to be his own boss and take the leadership of his party that the occasion demands. He has come before the legislators in the attitude of a prime minister seeking to enact the remedial legislation which his electoral platform promised. Hearst, true to his traditions, seeks to disintegrate his following so far as he is able, and play into the hands of the trusts and special interests that sought to capture the Baltimore convention. The plan of Hearst and his trust allies was broken at Baltimore. This is his first opportunity to hit Wilson by his yellow journalism and he loses no time in turning traitor to the man he ostensibly espoused. It is some satisfaction to see Wilson assume this leadership. It will exalt him in the minds of all intelligent and right thinking people to see that he has incurred the enmity of Hearst and all his kind.

The last issue of the Scientific American contains an article on the Municipal need of Technically trained men. The Mayor of Philadelphia therein sets out the need of technical men in the several departments of that city. Sanitary engineers, civil and electric engineers and men scientifically trained are demanded in all the departments. Efficiency demands the best men in places of responsibility.

Along this line Professor Boker of the State University, has introduced a bill to provide for a school for civil service. That is a department to train men for efficient public service in the offices of the state and cities and give to the detail of government the same skilled training that is demanded in other lines of technical training. With the farther differentiation of labor there is increased demand for men technically trained in all departments.

MIGHT JUST AS WELL HAVE BEEN POOR.

"Mr. Morgan's death was due to lack of nourishment," a Rome dispatch says. There seems to be a lesson, or a moral, or a sermon or something in the fact that the world's most eminent financier died from lack of food.

Report Of Committee On Government Architecture---A. I. A.

Mr. President and Members of the Institute:

The American Institute of Architects stands as the recognized champion of architecture in America, and if the important influence of this great fine art in the upbuilding of our national life is misunderstood, or is not appreciated by the American public, the responsibility rests upon us and we have failed in our self-appointed task.

That this is happily not the case is apparent from the most casual comparison of the greater public and private works undertaken today with similar undertakings at the time of the Institute's foundation, and the even more significant comparison of ecclesiastical, educational, commercial and domestic works of the same periods.

In all this the Institute has played a leading part and has ever, through its officers and committees, lent its aid and influence to every effort to make the architecture of this country a worthy monument to the highest standards of the civilization which it unconsciously but permanently records.

While we are all familiar with such notable work as that in connection with the movement for the preservation of Major L'Enfant's plan of the city of Washington, the establishment of the Fine Arts Commission, etc., few realize how often the Institute, through its representatives, has plead the cause of a nobler architecture before committees of the National Congress and before commissioners in charge of State and municipal works, and the fact that almost daily members of the Institute throughout the country are urging the Institute's plea for the highest type of practice upon those entrusted with the erection of almost every type of structure.

No class of construction is far more reaching in its immediate influence than the public works constructed for the people collectively by their chosen representatives, and of these none are more important than those created by the Federal Government. The American Institute of Architects has long urged that the structures should represent the noblest expression of American civilization in design and scientific planning, not only because they are enduring evidences of America's status in the world's artistic progress and because of their powerful influence locally, but also because structures so designed and planned have always been the most economically constructed and maintained. This latter fact is universally recognized in the construction and maintenance of engineering works and public utilities generally.

Let us therefore consider the manner in which these great public works are conceived and brought to completion, as this is the particular department of the Institute's activities committed to your committee on Government architecture.

In the first place, Congress has full authority over the entire question, and may, in making appropriations for any public work, specifically set forth in detail the manner in which the work shall be conducted both in design and

execution. This direct method has very rarely been adopted, and if adopted frequently, would very shortly disclose the necessity of a carefully devised system, resulting, through the power of precedent, in an established standard of Government practice.

This direct method has been advanced by the present Congress as an argument for the repeal of the Tarsney act, and as a means for keeping the control of public constructions more directly in the hands of Congress.

The practice has been in the past and, for all but a few unusually important works, will undoubtedly be in the future, to leave the administration of appropriations for public constructions to the various executive departments of the Government directly interested, unless legislation is enacted, fixing the procedure in all cases.

In the absence of such legislation, and with the repeal of the Tarsney act, the great bulk of Government constructions will be directly undertaken by the various departments, a system which today results in the design and construction of buildings for the Navy Department by the bureau of yards and docks and which places future buildings of the Treasury Department altogether in the supervising architect's office, a condition very similar to that existing in 1894 and 1895 when the late Mr. John M. Carrere was under consideration for the office of supervising architect. The conclusions reached by Mr. Carrere at that time are of especial interest today, as he was reviewing a condition which it is now proposed to return to with the repeal of the Tarsney act. The following quotations are taken from Mr. Carrere's letter to the Secretary of the Treasury dated January 28, 1895:

"I have had every opportunity owing to your courtesy to investigate the office and have been trying for the last two weeks to convince myself that under certain conditions which I asked for and which I understand you are prepared to grant, I might accept the office with a fair chance of accomplishing the purpose which both you and the profession have in mind, namely, to raise the artistic standards of our public architecture.

"In my anxiety to respond promptly and fully to the confidence which has been placed in me, I have at times thought that the task might at least be attempted, and have stood ready to accept the office. After further reflection, and after having fully explained the situation to several leading architects of the country, and after consultation with them I am now convinced that if I should accept the office and meet with even partial success, I would be defeating the true object which both you and the profession have in view. To our minds the undertaking is a physical impossibility and must fail.

"Any man, no matter what his ability or his power for work and concentration, and no matter what conditions might be offered to him, even those of absolute responsibility and absolute authority, would have to de-

vote himself either to managing the office, allowing the designing to be done by draughtsmen, as at present, or to designing, allowing the office to be managed by heads of departments, as at present, and no man of ability, with a reputation to lose as an artist, would be presumptuous enough to accept the office, even if his duties were confined to the designing, irrespective of any other work or responsibility, because it is absolutely beyond the grasp and the ability of any man who has ever lived to imprint his personality upon this much work, and much less to design it and study it himself.

"The time must come, I believe it has come, when this work should be divided and entrusted to the best architects in this country, as suggested by the bill proposed by the architects, and known as the McKaig bill, leaving the administrative portion of the work only in the hands of the Government, where it belongs.

"My examination of the office and its possibilities convinces me that the underlying principle upon which it is based is radically wrong, and that it is beyond the power of any one man to make a success of it. The system, not the man, should be changed.

The bill referred to by Mr. Carrere as the McKaig bill provided for the appointment by the President, with the approval by the Senate, of a commission of three architects, to prepare programs, conduct competitions and select architects for public buildings.

This bill was drafted by the permanent committee of the Institute consisting of Mr. Bruce Price, chairman; Mr. E. H. Kendall and Mr. John M. Carrere, acting with an advisory committee consisting of Mr. R. M. Hunt, chairman; Mr. Chas. F. McKim and Mr. George B. Post. The original draft was revised a number of times by these committees and by the Treasury Department and was introduced into the House by Mr. McKaig and into the Senate by Senator Brice. It is known as House bill No. 7470, Fifty-third Congress, first session. It received the approval of the Secretary of the Treasury and passed the Committee on Public Buildings and Grounds of the House.

The following quotations from the House committee's report are interesting:

"Your committee does not believe that the beneficial results that should be obtained are obtained under the present existing methods of planning and constructing public buildings of the United States.

"While the employment of the best artistic thought, the best and most approved systems of construction and equipment ought to be represented in the public edifices of this great nation, the contrary to these propositions is the result obtained under existing methods.

"Your committee are advised that the best and highest types of artistic thought and architectural skill in European countries is found in the government buildings of those countries, while in this country the reverse is the

rule, and superiority of architectural design is represented in State, municipal and private buildings, and not those erected by the general Government.

"A comparison of other modern buildings erected by private citizens and corporations with those belonging to the Government of the United States will show, as to the former, constant progress in construction and artistic expression, while in the case of the buildings of the United States there has been but little, if any, advancement. The buildings constructed recently by the United States, as compared with those constructed a quarter of a century ago, show a marked deterioration of artistic quality. The cost has been relatively and positively much greater than private buildings of the best type.

"The conditions and results which your committee thus call to your attention necessarily follow the methods and practices now employed by the Government. . . . It now transpires that the time of the supervising architects is wholly employed in matters of administrative detail, and the architectural work of the office, the plans, designs and specifications, are prepared by mere copyists, cheap clerks. . . .

"The supervising architect rarely sees one of these buildings while in the course of construction. Its construction is generally under the supervision of some local carpenter or builder, who never made any pretense to architectural knowledge or study, whose appointment was secured not because of his skill, but because of the political influence he could marshal, and whose greatest solicitude is to prolong the tenure of his employment by delaying the completion of the work.

"A building which, if the property of a private citizen, would be constructed in months, when erected by the Government requires years for its completion. . . . A public building at Detroit, Michigan where the construction was authorized eleven years ago and \$1,200,000 appropriated by Congress years since, the foundation walls are not yet completed.

"The scope and purpose of the measure herewith presented is designed to remedy the many evils herein pointed out. To give the country a better type of architecture in its buildings and to stop the wasteful extravagance which is the necessary result of the present methods. . . .

"The measure does not abrogate or take from the supervising architect any of the functions or authority belonging to the office which under existing conditions he is capable of performing. He will remain and continue the representative of the Government and perform all the duties that now pertain to his office excepting the designing and preparation of drawings and specifications for such buildings, and the local supervision shall be subject to his approval. . . .

"In fact, this measure is intended to make him what the title of his office indicates, the supervisor of architects, not the Government's architect, but the supervisor of the architects of the Government's works.

"Therefore your committee recommended the passage of the bill."

This report in full is known as Fifty-

third Congress, second session, H. R. Report 1370.

With the failure of this bill the Tarsney act remained as the only channel through which the Government could avail itself of the services of the most skillful architects among its citizens, and during the past fifteen years a number of notable buildings have been designed and erected under the provisions of this act by architects in private practice. These buildings need no defense and mark an epoch in the history of our National architecture. Their influence was almost immediately apparent in the work of the Government departments, and has already raised the standard of public works so high as to create in the minds of the unthinking the belief that this standard will continue after the standard bearers have been removed and the deadly pall of bureau methods settles again with all its depression upon the public architecture of our land.

Some two years ago, while your committee were endeavoring to bring about changes in the regulations governing the procedure under the Tarsney act with the hope of making it a still greater power for the uplift of our public architecture, it became apparent that a formidable movement for the repeal of the Tarsney act was under way, resulting in the introduction of two bills at different times into the House, proposing its repeal. Your committee compiled a careful analysis of the whole situation showing the benefits and economies resulting from the operation of the act. This information was brought to the attention of members of Congress with the thought of defending the act in committee hearings. Neither of these bills, however, was reported by committee, and no further action was taken until a repealer again appeared as a rider to the sundry civil bill in the last days of the last session. Although the time was very short, your president appointed a special committee, with Mr. J. H. Rankin as chairman, to defeat the act and point out its many advantages to members of Congress.

The excellent report of this committee has been published in the daily and architectural press and is familiar to you all, and notwithstanding the repeal the statements made in that report remain unanswered to this day.

This convention is confronted, therefore, with a condition of which it must take cognizance, and your committee on Government architecture recommends that this convention shall by resolution call to the attention of our Senators and Representatives in Congress and to the attention of the public press of the entire country the necessity for legislation covering the whole field of public constructions, to the end that our cities, our buildings, our monuments shall be representative of the art, the science and the progress of our civilization, and that the fine arts shall be recognized as the vital part of our National life and a powerful factor in the education of future generations.

Your committee believes that the time has arrived in the artistic development of America when an act similar to the Tarsney act would be of little value, and that even the enlarging of the powers of the Fine Arts Commis-

sion to include a veto power over the design of proposed public buildings will not meet the necessities, but that if we are to place this country abreast of the countries of Europe we must have a department of our National Government performing all the functions of similar departments abroad, encouraging and fostering the study of the arts and charged with preservation of our historic National monuments.

Respectfully submitted,

(Signed) E. A. CRANE,
J. B. NOEL WYATT,
M. B. MEDARY,

Chairman,

Committee on Government Architecture.

Note: The committee appointed by the president to consider reports of standing committees submitted the following recommendations to the convention, which were adopted with the report of the committee:

On Government Architecture.—The Committee on Government Architecture has recommended that this convention shall by resolution call to the attention of our Senators and Representatives in Congress, and to the attention of the press throughout the country the necessity for legislation covering the whole field of public constructions.

We endorse this recommendation and recommend further that our several chapters, through their proper committees for such duty, be urged to keep the necessity of such legislation continually emphasized through the medium of the press in their several locations and by the influence of their Congressmen.

As a basis for definite future guidance we recommend that the Committee on Government Architecture prepare and submit to the Board of Directors some plan of action or form of legislation upon which the entire profession and all others interested in better Government architecture can unite as a measure to be adopted by the Government.

THE PURPOSE OF TOWN PLANNING.

We desire to give the people full and free access to their work and the fullest opportunity to go quickly from and to their homes in following their work. We desire that they shall lose as little time as possible, and yet that they may have access to light and air and the fullest opportunity to develop their own and their children's lives in the country fields. We desire to have the experience of the past united with the experience of all our fellowmen in our towns and cities to provide such dwellings for the future race as shall make the dirt, squalor and disease of the slums pass away like an ugly dream of the night. And therefore, while I feel utterly unable to pronounce any opinion upon the vast schemes which you have sent to us, we hope that it will not be so much a question of palatial building as of seeing that everyone, even the poorest inhabitant within your borders, has the health, wealth and development of human life fitting him to a good citizen of this community.—Extract from address of W. G. Wilkins, of England, before the City Club, Chicago.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

FRESNO, FRESNO CO., CAL.—Apartment house, 2 story and base, frame. Cost not stated. Architect, Gene Mathewson, Fresno. Owner, I. Klinspel. The building will be erected at the corner of Stanislaus and L streets, and will contain a number of modern two, three and four room suites. All apartments will have connecting baths and wall beds. A central heating system will be installed. Interior finish will be of pine and hardwood veneer. Oak floors will be used in some of the rooms. Baths will be wainscoted with tile. The exterior of the building will probably be covered with cement plaster. Plans are being prepared.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 7 story and base, reinforced concrete. Cost not stated. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, E. Tine-rat. The building is to cover an area of 60x90 feet and will contain a total of 140 rooms, which will be arranged in two and three room suites. Besides these suites plans provide for large amusement rooms, social hall and lobby. There will be steam heat, elevator service, vacuum cleaning system and wall beds. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, P. E. Weaver, Citizens' National Bank Bldg., L. A. Owner, W. P. Mauer. The building has been designed to contain a total of eighty rooms, which will be arranged in two and three room suites. All suites will have wall beds and private baths. Interior will be finished in pine and hardwood. Bath rooms will have cement floors and tile wainscot. There will be steam heat and elevator service. A vacuum cleaning system will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, C. S. Klous. The building will cover an area of 50x125 feet. Interior will be arranged for 58 rooms in two and three room suites. There will be wall beds, private bath rooms, steam heat and a vacuum cleaning system. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick. Plans are complete and the architect is taking figures on the work.

PORTLAND, ORE.—Apartment house, 5 story and base, brick and steel. Cost not stated. Architect, R. F. Wassell, 555 Yamhill St., Portland. Owner, R. F. Wassell. The building will cover a ground area of 100x100 feet. Interior has been arranged for two and three room suites. All apartments will have connecting baths and disappearing beds. Plans provide for steam heat, elevator service, a vac-

uum cleaning system and hot water supply. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile. Stairways will be of concrete. The exterior will be faced with pressed brick. Plans are complete and figures are being taken for the various parts of the work.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick. Cost not stated. Architect, M. S. Yeager & Co., Trust & Savings Bldg., L. A. Owner, Howard W. Squires. The building will be 80x145 feet in size and has been resigned to contain 108 rooms, which will be arranged in two and three room suites. There will be steam heat, elevator service, a vacuum cleaning system and other modern improvements. All suites will have private baths and will be equipped with wall beds. Interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner who is taking figures for the work.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 4 story and base, reinforced concrete. \$80,000. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, Mrs. Ira Hanst. Contractors, Kling Co., Union League Bldg., L. A. Contract price, \$80,000.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$45,000. Architect, Maine Building and Investment Co., Thorpe Bldg., L. A. Contract price, \$45,000.

BANKS.

RIVERBANK, STANISLAUS CO., CAL.—Bank, stores and offices, 2 story and base, brick and concrete, \$35,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, First National Bank of Riverbank. The building will be erected on a corner site and will cover an area of 50x150 feet. Besides the bank, plans provide for four stores on the first floor. Bank will occupy the corner and will be handsomely finished in hardwoods, tile and marble. There will be four vaults and a large safe. Upper floor will contain offices and apartments. There will be wall beds. Interior finish will be of pine. A hot water system has been specified. Exterior of the building will be faced with pressed brick. Work will be done by Day Labor, all contracts for materials being handled through the architect's offices. Plans are nearly complete.

BRIDGES, DAMS AND HARBOR WORK.

ORLAND, GLENN CO., CAL.—Bridges, 5, concrete and frame. Cost not stated. Engineer, County Surveyor, Willows. Owners, Glenn County. Plans have been approved and bids will be opened on May 5th for the construction of five bridges. The largest of these structures will be erected near Orland across Stany Creek and will cost in the neighborhood of \$150,000. The other four bridges are much smaller. Sep-

arate bids will be taken for each bridge. Plans and specifications can be secured from the County Clerk or the County Surveyor at Willows.

PORTLAND, ORE.—Bridge, steel span, \$1,200,000. Engineer, Rudolph Modjeska, Chicago. Owners, Multnomah and Clarke Counties. A tentative plan for a 24-foot bridge to span the Columbia River between Vancouver, Wash., and Portland, Ore., has been approved by the Interstate Bridge Commission, and detail plans are to be submitted at once for approval. Clarke County is to raise \$500,000 and Multnomah County \$700,000.

CHURCHES.

SAN FRANCISCO—Church, 2 story frame construction. Cost not stated. Architect, Herbert B. Maggs, 125 Alpine St., S. F. Owners, African Methodist Church. The building will be erected on the property of the congregation on Powell street north of Jackson, and will cover an area of 46x114 feet. There will be a large main auditorium, Sunday school rooms, parlors and pastor's study. Interior finish will be of pine throughout. The exterior of the building will be faced with either shiplap or metal lath and plaster. Plans have been prepared.

BAKERSFIELD, KERN CO., CAL.—Church, 2 story and base, brick, \$25,000. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owners, First Presbyterian Church. This work has been mentioned here before. Plans have been completed and are now in the hands of the Building Committee for approval. Bids will be called for as soon as minor details can be changed. The site of the new edifice will be at the corner of 15th and H streets.

COURT HOUSES.

NEVADA CITY, NEVADA CO., CAL.—Court house and jail alterations, concrete and brick construction. Cost not stated. Architect, William Mosser, Nevada Bank Bldg., S. F. Owners, Nevada County. Plans for an addition to the County Jail building and for extensive alterations to the present Court House have been completed by the architect. Contracts for the work will be let through the Clerk of the Board of Supervisors. Bids will be called for at once.

FACTORIES & WAREHOUSES

SAN FRANCISCO—Factory addition 2 story, concrete. Cost not stated. Architects, Righetti & Headman, Pheasant Bldg., S. F. Owner, G. Ratto. The present plant is located on Valencich street near 19th. The additional stories will be constructed on top of the one story building now used by Mr. Ratto. Exterior will be faced with cement plaster. Interior finish will be of pine. Plans are complete and in the hands of the owner, who is taking figures for the work.

SAN FRANCISCO—Laundry and stable, 1 and 2 story brick construction \$25,000. Architect, William H. Crim Jr., 425 Kearny St., S. F. Owner, Edward Rolkin. The buildings together will cover an area of 87x275 feet. The main structure will be one story in height. Stable will be two stories high, the upper floor being arranged

for living rooms. Interior finish will be of pine and redwood. The estimated cost does not include a large amount of machinery which will be installed. Exterior of the buildings will be faced with stock brick. Plans are complete and figures are being taken.

PORTLAND, ORE.—Factory, 5 story and base, brick, \$50,000. Architects, Root & Hoove, Commercial Club Bldg., Portland. Owners, Modern Confectionery Co. The main building, five stories high, will cover an area of 70x100 feet, besides this there will be a one story boiler room and shipping department, 30x100 feet. Construction will be of the heavy mill type. Exterior of the buildings will be faced with pressed brick. There will be a large elevator and metal window sash and frames. Plans are being prepared.

FLATS.

SAN FRANCISCO—Flat alterations and additions, frame construction, \$2,000. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Johanna Costello. The work will include raising the present building and constructing new portion on the street grade. There will be new plastering, painting, plumbing and interior finish. Exterior will be covered with rustic and ship-lap. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, Charles W. Higgins, 1306 Shrader St., S. F. The building, which has been designed to contain two flats, will be erected on 17th avenue, south of Lake street. Each flat has been arranged for five rooms and bath. Interior finish will be of pine with hardwood floors in the living rooms, dining rooms and reception halls. Open fire places and brick mantels will be used. The exterior of the building will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$2,000. Architect, none. Owner, Charles Michelsen, 446 27th St., S. F. The building will contain two flats of four and five rooms each with bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. There will be either gas grates or open fire places. Mantels will be of tile or brick. Tile will be used in the bath rooms and kitchens. Exterior of the house will be covered with ship-lap and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,850. Architect, none. Owner, Patrick M. McDonnell, 3037 24th St., S. F. The building has been de-tic and cement plaster. Plans are flats with baths. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and brick or tile mantels. Tile will be used in the baths and kitchens. The building will cover an area of 25x61 feet. Exterior will be covered with ship-lap and brick veneer. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Flats, 2 story and base, frame. Cost not stated. Architect, Sidney B. New-som, Nevada Bank Bldg., S. F. Owner, George Spencer. A two-story frame

dwelling located at 3100 Benevenue avenue will be altered into a modern flat building containing 18 rooms. Extensive additions will be made. Interior finish will be of pine and redwood. Each flat will contain six rooms and bath. There will be some hardwood floors. Open fire places will be used in all living rooms. The exterior of the building will be covered with rustic and cement plaster. Plans are ready for figures.

GARAGES.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, C. F. Stuart. The building, which is to be designed for a commercial garage, will cover an area of 51x100 feet. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Interior finish will be of pine throughout. Exterior of the building will be faced with cement plaster. As soon as plans can be completed bids will be taken by the owner.

GOVERNMENT WORK AND SUPPLIES.

Puget Sound, Pier No. 4.

The chief of the bureau of yards and docks, Navy Department, Washington, D. C. has accepted the bid of the Erickson Construction Co., Seattle, Wash., \$166,331.60 in amount, for the construction of pier No. 4 at the navy yard, Puget Sound, Wash.

Reclamation Work.

The director of the Reclamation Service is advertising for bids for the construction of about four miles of the North Canal and about ten miles of laterals in connection with the Belle Fourche irrigation project, South Dakota. The work includes the excavation of about 147,000 cubic yards of material and is situated north and west of Newell, S. D. The bids will be opened at the office of the Reclamation Service at Newell, S. D., on May 8.

Cement.

Bids for 100,000 barrels cement were received by Jay J. Morrow, major of engineers, U. S. army, Portland, Ore., on March 10, as follows:

Item 1, rate; 2, amount; 3, brand; 4, weight per barrel; 5, allowance on sacks returned; 6, location of mill.

Union Portland Cement Co., Ogden, Utah, f. o. b. mill, item 1, \$1.45; 2, \$145,000; 3, Red Devil; 4, 380 pounds; 5, 10c; 6, Devil's Slide, Utah.

Three Forks Portland Cement Co., Ogden, Utah, f. o. b. mill, item 1, \$1.55; 2, \$155,000; 3, Red Devil; 4, 380 pounds; 5, 10c; 6, Trident, Mont.

F. T. Crowe & Co., Portland, Ore., f. o. b. Cello or The Dalles, Ore., item 1, \$2.54; 2, \$254,000; 3, Santa Cruz (Cal.); 4, 376 pounds; 5, 10c; 6, Davenport, Cal.

F. T. Crowe & Co., Portland, Ore., f. o. b. Cello or The Dalles, Ore., item 1, \$2.54; 2, \$254,000; 3, Standard; 4, 376 pounds; 5, 10c; 6, Napa Junction, Cal.

Riverside Portland Cement Co., Riverside, Cal., and Portland, Ore., f. o. b. Cello or The Dalles, Ore., item 1, \$2.48; 2, \$248,000; 3, Riverside; 4, 380 pounds; 5, 10c; 6, Riverside, Cal.

Tulalip Indian School.

The following bids were received by the commissioner of Indian affairs, Department of the Interior, Washington, D. C., April 7 for the construction of an addition to frame school house and the installation of an extension to the water system at the Tulalip Indian School, Wash.:

J. L. Murphy & Son, Tacoma, Wash., water system, \$11,804.10.
Eckman & Mowat, Seattle, Wash., water system, \$9,335.

Des Moines Bridge and Iron Co., Des Moines, Iowa, water system, \$7,600; water tower only, \$4,400.

W. D. Lovell, Minneapolis, Minn., addition to schoolhouse, \$9,800; for hardwood floors, add \$250; water system, \$7,400.

SAN FRANCISCO — Supplies for transports. Cost not stated. Engineer, Donnelley, Transport Docks, S. F. Owners, United States Government. Four of the big United States Army Transports, the Sheridan, the Logan, the Thomas and the Sherman, are undergoing extensive repairs. Orders are now being placed through Col. Knight's office, Transport Docks, for a large amount of supplies and materials, which include many of interest to the building trade. Douglas plumbing goods are specified. There will be a large amount of paints, oils, and steel. Compolite flooring, electric supplies and lighting fixtures, plate and other glass, radiators, asbestos, paper damp-proof, ornamental iron and bronze, safety stair treads, blowers for ventilating, etc. Engineer Donnelly is in charge of the work.

SAN FRANCISCO — Oil burning equipment, etc. Cost not stated. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. The following contracts have just been awarded by the Constructing Quartermaster at Fort Mason: Installation for oil burners at Presidio and Fort Winfield Scott to American Heat and Power Co. at \$20,100; installation of oil burners at Fort Baker to S. T. Johnson Co. at \$6,380; pipe line for oil at Fort Baker to Pringle Dunn & Co. for \$1,295; concrete reservoir for oil at Fort Baker to Contra Costa Construction Co. at \$2,500 and machinery for same to Contra Costa Construction Co. at \$850; oil burners in Commanding General's quarters at Fort Mason to American Heat &

Power Co. at \$290; grading parade ground at Fort Winfield Scott to E. M. Hughes & Co. at \$6,086; construction of roads, walks and gutters at Letterman General Hospital to Francis Zoke at \$4,575.

HALLS AND SOCIETY BUILDINGS.

BERKELEY, ALAMEDA CO., CAL.—Club house, 3 story and base, frame, \$20,000. Architects, Parker & Kenyon, 241 Kearny St., S. F. Owners, Twentieth Century Club. This work has been mentioned in these columns before when plans were first out for figures. Several changes have been made and new figures will be called for at once. The building will contain a large meeting room, library, social hall, dining room and complete kitchen equipment. Interior will be handsomely finished in pine and hardwoods with hardwood floors throughout. A central heating system will be installed. The exterior of the building will be covered with cement plaster and stingles.

ALHAMBRA, LOS ANGELES, CO., CAL.—City hall, 2 story and base, brick and steel. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, City of Alhambra. Bids opened for the construction of this building recently were found to be above the amount available for construction and were therefore rejected. Plans will be revised at once and new bids will be called for shortly. No figures were made public.

Contracts Awarded.

TAPT, KERN CO., CAL.—Lodge hall, 3 story and base, brick, \$20,000. Architect, J. M. Safell, Bakersfield. Owners, Odd Fellows' Hall Association. Contractor, Seymour, Bakersfield. Contract price, \$20,000.

HOSPITALS.

FULLERTON, LOS ANGELES CO., CAL.—Hospital, 2 story and base, frame. Cost not stated. Architect, C. E. Shattuck, Mason Bldg., L. A. Owners, Fullerton Hospital Association. The building will contain two wards, a number of private rooms, operating room and nurses' quarters. There will be a central heating system. Interior will be finished in pine and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SEATTLE, WASH.—Hospital group, 5, 1 and 2 story brick and terra cotta buildings. Cost not stated. Architect, Daniel Huntington, Seattle. Owners, Seattle Tuberculosis Hospital. These buildings, which comprise a county institution, are to be erected at Richmond Heights. There will be two one-story and base outdoor pavilions, each 129x292, one two-story and basement hospital building, 78x252, a two-story, attic and basement administration building, 40x175, and a power house. Exteriors of all buildings will be faced with pressed brick and cement plaster. Plans will be completed this month and bids will be called.

24th for the construction of a pile foundation for the Fine Arts Building. Plans can be secured from the Director of Works. Proposal appears in another column of this issue.

SAN FRANCISCO—Excavating for foundation. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the excavation of the foundation for the Exposition Auditorium, which is to be erected in the Civic Center, have been completed. Bids for the work will be opened on May 1st. The Exposition Auditorium will be a permanent structure, costing in the neighborhood of \$1,000,000. Plans for the building were prepared by associated architects, John Galen Howard, John Reid, Jr., and Frederick H. Meyer. The official proposal appears in another column of this issue.

HOTELS.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete. Cost not stated. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, S. Rudee. The building will be erected on the west side of 4th street, 50 feet north of Folsom, and has been designed for stores on the first floor and a number of modern hotel rooms above. Interior will be finished in pine throughout. Hot and cold running water will be supplied to all rooms. There will be metal window frames and sash and iron fire escapes. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Hotel, 3 story and base. Class C construction, \$20,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Louis Friedman. This work has been mentioned here before when plans were first started. The building will be erected at the northeast corner of Bush and Grant avenue, and will contain stores besides the hotel lobby on the first floor. Upper floors will be arranged for a number of single rooms and several baths. Interior will be finished in pine throughout. There will be a hot water system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel alterations and additions, frame construction, \$3,000. Architect, none. Owner, Charles Katz, 1202 Dolores St., S. F. This work will include remodeling a two-story frame building on Mission near 15th. The first floor will be arranged for stores and upper floor for rooms. Exterior will be covered with cement plaster on metal lath. Interior finish will be of pine. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Hotel, 3 story and base, reinforced concrete, \$11,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Nathan Haas. The building is to be erected on the west side of Jones street near O'Farrell, and will contain two stores on the first floor and a number of single rooms above. Interior finish will be of pine throughout. All rooms will be supplied with hot and cold running water. Exterior of the building will be faced with cement plaster. Plate glass in patent fronts will be used on the first floor. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Hotel, 6 story and base, brick and steel, \$60,000. Architect, William Wilde, Albany Bldg., Oakland. Owners, Frank Pereira Realty Co. The building is to be erected at the southeast corner of 5th and Wash-

ington streets and will cover a considerable ground area. Several stores, the hotel lobby and offices will occupy the first floor. Upper floors will be arranged for about 120 guest rooms, a number of which will have connecting baths. Plans include steam heat, elevator service, vacuum cleaning and a hot water system. Oil burning furnace will be installed. Baths will have tile floors and wainscot. The exterior of the building will be faced with pressed brick. Interior finish will be of pine and hardwood. Ornamental plaster will be used in the lobby. Bids are now being taken on the structural steel, and figures on the general contract will be called for shortly.

OAKLAND, CAL.—Hotel alterations, \$15,000. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owners, Hotel Avalon Co. This work will include new sash and doors, no steam radiators, plumbing, tinting, plastering and electric wor. Plans are ready for figures.

BURLINGAME, SAN MATEO CO., CAL.—Hotel, 3 story and base, frame, \$10,000. Architect, John J. Foley, 46 Kearny St., S. F. Owner, Peter Liberopoulos. The building will contain about 24 rooms besides the office and lobby. Interior finish will be of pine and redwood. Hot and cold running water will be supplied in all rooms. Each floor will have several baths and toilets. Exterior of the building will be covered with shiplap and rustic. Plans are nearly complete and figures will shortly be called.

FRESNO, FRESNO CO., CAL.—Hotel and stores, 2 story, brick, \$12,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, H. Brix. The present two-story store building will be altered and an addition built so that the new building, covering an area of 80x100 feet, will contain four stores and 50 guest rooms. There will be patient store fronts, a hot water system and pine trim. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

VENICE, LOS ANGELES CO., CAL.—Hotel, 6 story and 5 story tower, brick and reinforced concrete, \$350,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owner, Abbot Kinney Co. The building is to be erected at the northeast corner of Breeze and Ocean Front and will cover an area of 110x110 feet. The main portion of the building will be six stories in height, from the center of which will raise a five-story tower which will also contain a number of hotel rooms. Construction will be fireproof throughout, with exterior walls of brick and concrete, concrete floors and hollow tile partitions. Exterior will be faced with pressed brick. Besides the general office, lobby, parlors and dining room there will be several stores, a cafe and barber shop on the first floor. Upper floors will contain 250 guest rooms, all of which will have private baths. There will be steam heat, oil burning furnaces, vacuum cleaning system and elevators. Metal window frames and sash will be used. Bath rooms will have cement floors and tile wainscot. Plans are being prepared and segregated contracts will be let.

PORTLAND, ORE.—Hotel, 4 story and base, reinforced concrete. Cost not stated. Architects, W. W. Lucius and Aaron H. Gould, Worcester Bldg., Portland. Owner, W. W. Margulius. The building will be erected on a cor-

ner site and will be arranged for stores on the first floor. Basement will be fitted up for public bath and barber shop. Upper three floors will contain a total of 150 guest rooms and a large number of baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine. Exterior of the building will be faced with cement plaster. Bids are now being taken for both a general contract and with the work segregated.

SAN FRANCISCO.—Hotel, 5 or 6 story and base. Class C construction. Cost not stated. Architect, Alfred Henry Jacobs, 110 Sutter St., S. F. Owner, Mr. Andrews. The building will be erected on Jones street near Eddy, and will contain a large number of single rooms, many of which are to have connecting baths. Only preliminary plans have been made and the construction will depend upon the owner and lessees reaching a satisfactory agreement. Further announcement will be given here when the work is ready to progress.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick. Cost not stated. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, G. I. Jacoby. The building will be erected on a corner lot and will be designed to contain 120 guest rooms, all of which will have private baths. There will be steam heat, elevator service and a vacuum cleaning plant. Hot and cold water supply will also be installed. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile. Considerable hardwood and ornamental plaster will be used in the lobby. The exterior of the building will be faced with pressed brick. Plans are being prepared and when complete construction will probably be carried out by the Milwaukee Building Co.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. Cost not stated. Architect, F. H. Gentry, Pacific Electric Bldg., L. A. Owners, G. Bloom, Dr. J. P. N. Patterson et al. The building will cover an area of 50x125 feet. The first floor will contain seven stores and upper floors in the neighborhood of 56 rooms and baths. There will be steam heat and a hot water system. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

MODESTO, STANISLAUS CO., CAL.—Hotel, 5 story and base, brick and steel, \$75,000. Architect, B. J. Joseph, First National Bank Bldg., S. F. Owner, Mrs. Luella Hughson. Work has been started by Day Labor for the construction of this building. It will be erected at the corner of 10th and J streets and will be arranged for stores and the hotel lobby on the first floor. Upper floors will contain a total of 100 guest rooms and 50 baths. There will be steam heat, elevator service and a hot water system. Exterior will be faced with pressed brick.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, D. F. Hill. This building has been mentioned here before when plans were first started. The structure will be erected at the corner of 6th and Wall streets, and will cover an area of 60x78 feet. The first floor will be arranged for stores and upper floors subdivided into about

120 rooms. There will be steam heat and elevator service. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LIBRARIES.

BAKERSFIELD, KERN CO., CAL.—Library, 2 story and base, brick and steel. Architect, O. L. Clark, Bakersfield. The building is to be erected in East Bakersfield. Working drawings will probably be approved by the Trustees at their next meeting. The building is in the classic style, and will contain the usual library rooms. Exterior will be faced with pressed brick. Bids will be called within a few weeks. Further notice will then be given in these columns.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO.—Liberal Arts building, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications for the construction of the Liberal Arts building have been completed and are now out for figures. Plans can be secured from the Director of Works. The building will be erected in the Exhibit Building Section of the Harbor View site. Separate bids are being taken for the general construction, and for the sewer, water and gas piping. The official proposal appears in another column of this issue. Bids will be opened on April 29th.

SAN FRANCISCO.—Pile foundation. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on April 29th.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO.—Railroad construction, \$35,000. Engineer, Engineering Department, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids for the construction of the Geary Street Municipal Road out 45th avenue and Balboa street from 33rd avenue to the Great Highway were opened at the last meeting of the Board of Public Works. Bids show Healy-Tibbets Construction Co. low at \$34,450 and they were later awarded the contract. A complete list of the figures appears under the heading of San Francisco in this issue.

RESIDENCES.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owners, Acme Improvement Co., Humboldt Bank Bldg., S. F. The dwelling will be erected on Pluto street and will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in two of the rooms. There will be a large open fire place in the living room. Mantel will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Bungalows, 2, 1 story and base, frame, \$1,400 each. Architect, none. Owner, James Hefferman, 59 Santa Marina avenue. These houses will each be arranged for five rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and brick or tile mantels. The exteriors will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Bungalow, 1½ story and base, frame, \$2,000. Architect, none. Owner, Emil Nelson, 580 Jersey St., S. F. The house has been designed to contain six rooms and bath. Interior will be finished in pine throughout with hardwood floors in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Tile will be used in the bath room. The exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, A. Duffie, 685 Dolores St., S. F. The house will contain seven rooms and bath. Pine and redwood will be used throughout for interior trim. There will be some hardwood floors. Tile will be used in the bath room and kitchen. A large open fire place will be a feature of the living room. A brick mantel will be used. Exterior of the house will be covered with klunker brick veneer and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Community residences, 13, 2 story and base, frame, \$25,000. Architect's name not given. Owner, G. T. Knepf, 124 Mesa Ave., Piedmont, Oakland. These houses are to occupy a splendid site on the block at the northeast corner of Lombard and will command a fine view of nearly the entire city and bay. Each of the dwellings will cover an area of 24x33 feet and will contain five rooms and bath. The dwellings will be grouped around an open court and are in the Mission style of architecture. The court will be laid out for gardens and a fountain. Interior finish will be of pine, redwood and some hardwoods. Oak floors will be used in the living rooms, dining rooms and reception halls. A central heating system, which will probably be housed in a separate building, will be installed. Exterior of the group will be covered with cement plaster on metal lath. Each of the living rooms will have a large open fire place with brick or tile mantel. Bath rooms and kitchens will be wainscoted with tile. Plans are in the hands of the owner who is a contractor and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$2,500. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Mr. Murray. The house will contain six rooms, bath and sleeping porch. Interior will be finished in pine throughout with hardwood floors in the principal rooms. Tile will be used in the bath room and kitchen. There will be furnace heat and open fire place. Mantel will be of tile or

brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architect Edward T. Foulkes, Crocker Bldg., S. F. Owner's name withheld. The house will be erected in the Claremont Tract, and will contain 11 rooms, baths and sleeping porches. Interior finish will be of pine and hardwood. There will be furnace heat and open fire places. A Rund water heater will be installed. Mantels will be of brick or tile. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owners, United Builders, 162 Broadway, Oakland. The house will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are complete and work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mr. Garrett. The dwelling will be erected on Russell street and has been designed for an eight-room house with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will also be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, W. H. Ritchie, First National Bank Bldg., Berkeley. Owner, G. P. Adams. The dwelling will be erected in the Thousand Oaks Tract, and will contain eight rooms, bath and sleeping porch. Interior finish will be of pine throughout. There will be furnace heat and a large open fire place. Mantel will be of brick. Floors in the living room, dining room and reception hall will be of hardwood. Bath room and kitchen will have tile wainscot. The exterior of the house will be covered with shakes. Plans are complete and figures are now being taken by the architect.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, Karl H. Nickel, Syndicate Bldg., Oakland. Owner, C. J. Gordon. The house has been designed for a seven-room dwelling with bath. Interior will be finished in pine throughout with hardwood floors in the two principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, C. M. Johnson, 2317 Carlton St., Berkeley. The house has been designed for a six-room dwelling with bath. Interior finish will be of pine and redwood with some oak floors. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Bungalows, 2, 1 story and base, frame, \$3,000 and \$3,500. Architect, none. Owners, Flitter and Winlund, 1721 Telegraph Ave., Oakland. These houses will be erected on Ronado street and will contain seven and eight rooms respectively. Interiors will be finished in pine and hardwood. Oak floors will be used in the living and dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms and kitchens will be finished in tile. Rund water heaters are specified. Exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, none. Owner, Wallace Clark, 1444 Broadway, Oakland. The house will contain eight rooms, baths and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will also be used in the bath rooms and kitchen. Plans provide for an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalows, 1 story and base, frame. Cost not given. Architect, none. The following Day Labor jobs have been reported as about to be started in San Jose: Esilicia Daubs, 993 Prospect St., San Jose, 1 story, frame cottage, \$1,800; W. F. Blakeslee, 436 So. 6th St., San Jose, 1 story frame cottage, \$1,850.

STOCKTON, SAN JOAQUIN CO., CAL.—Bungalow, 1 story and base, frame, \$1,500. Architect, R. P. Morrell, Odd Fellows' Bldg., Stockton. Owner, P. L. Miner. The dwelling has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Some oak flooring will be used. There will be an open fire place with brick or tile mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences, frame construction. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: Nellie S. Smith, 1017 North Center St., 2 story frame dwelling, \$2,500; Mrs. Hickenethan, 623 East Market St., 2 story frame dwelling, \$1,000; Louis McGan, 302 North Stanislaus St., 1 story frame cottage, \$1,000; Joseph Geiger, 125 East Lindsay St., 2 story frame dwelling, \$3,500; E. W. Gibbeau, 945 So. San Joaquin St., 1 story frame

dwell. \$2,000; J. J. Malley, 1818 So. California St., 1 story frame dwell., \$2,000, and E. W. Perkins, 719 East Hazelton St., 1 story frame dwell., \$2,500.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, hollow tile, \$10,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owner, R. W. Lohart. This dwelling is to be designed for a handsome country home and will be erected on the owner's property near Fresno. Plans provide for twelve rooms, two baths and a large sleeping porch. Interior will be finished in pine and hardwoods. Tile will be used in both bath rooms and in the kitchen. There will be furnace heat and open fire places. Mantels will be of brick. Hardwood floors will be used in all principal rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster. Plans are now being prepared.

BAKERSFIELD, KERN CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owner, Matt L. Solomon. The dwelling will be erected on Mr. Solomon's ranch near Bakersfield and will contain ten rooms, baths and sleeping porches. Interior will be finished in pine and hardwood. Oak floors will be used throughout, except in the baths which will have tile floors and wainscot. There will be furnace heat and open fire places. Mantels will be of tile and brick. There will be an automatic water heater. Exterior of the dwelling will be covered with cement plaster. A clay tile roof will be used. Plans are now being prepared.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$10,000. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owner, Rawland Bishop. Preliminary plans have been prepared for this dwelling, which is to be designed in the true Colonial taken from one of the famous old Virginia homes. Sketches show a total of fourteen rooms, several baths and large sleeping porches. Interior will be handsomely finished in pine and hardwoods with hardwood floors throughout. There will be a central heating system, probably steam. Open fire places are to be installed in several of the rooms with brick and tile mantels. Bath rooms will be finished in tile and will have composition floors. A vacuum cleaning system and other modern conveniences will be incorporated in the plans. Exterior of the dwelling will be covered with shiplap and rustic. Plans are being prepared.

SAN FRANCISCO—Residence alterations and additions, frame construction, \$2,500. Architect, none. Owner, J. R. Mortensen, Rio Vista. This work will include the complete alteration of the interior of the building and extensive exterior alterations. The work will require new plastering, plumbing, electric work, painting and interior finish. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Seible, 363 4th Ave., S. F. The house will be erected at the southeast corner of 25th avenue and Lake street, and has been designed to contain eight rooms and bath. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining

room and reception hall. Plans include furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all kinds of materials.

SAN FRANCISCO—Bungalows, 4, 1½ story and base, frame, \$2,000 each. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owners, Atlas Home Builders. These houses will be erected on Lisbon street near Persia. Each will contain six rooms and bath. Interiors will be finished in pine and redwood. Some oak flooring will be used. There will be open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with rustic and shingles. Plans are complete and in the hands of the owners, who will do the work by Day Labor and who are now purchasing all materials.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Dr. A. A. Solley. The dwelling will be erected in the Bakers Beach Tract, and will be designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Chester H. Miller, Foxcroft Bldg., S. F. Owner, Dr. R. T. Sutherland. The house will be erected in Fourth Avenue Heights, and has been designed for an eight-room house with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be wainscoted in tile. The exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

SANTA CRUZ, SANTA CRUZ CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Chester H. Miller, Foxcroft Bldg., S. F. The house will be designed for a handsome country home, and will contain in the neighborhood of ten rooms, two baths and sleeping porches. Interior finish will be of pine and hardwood with hardwood floors used throughout. Bath rooms will be finished in tile. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN JOSE, SANTA CLARA CO., CAL.—Residences, 2 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose:

Frank Peres, 274 North 11th St., 5 room cottage, \$2,000; Joe Banda, 675 North 13th St., 6 room cottage, \$1,800; W. E. Woodhams, 16 West 2nd St., 5 room cottage, \$1,600, and J. J. Hansen, 138 North 16th St., 5 room cottage, \$1,600.

CONCORD, CONTRA COSTA CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architect, W. H. Ratcliff, First National Bank Bldg., Berkeley. Owner, L. Olson. The dwelling will contain eight rooms, baths and sleeping porches. Interior finish will be mostly of hardwoods. Hardwood floors will be used throughout except in the bath rooms which will have composition floor and tile wainscot. There will be furnace heat and open fire places. Mantels will be of tile and brick. There will be an automatic water heater. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Residence, 2 story and base, brick, \$55,000. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owner, J. C. Rives. Contractor, Jacob K. Miller, 1255 Leighton Ave., L. A. Contract price, \$47,570. Garage contract price, \$6,450.

SCHOOLS.

PIEDMONT, ALAMEDA CO., CAL.—School, 2 story and base, frame, \$25,000. Architect, Irwin Schaefer, Bacon Bldg., Oakland. Owners, Town of Piedmont. The building will contain six class rooms and an auditorium. There will be a central heating system. Interior will be finished in pine with some maple floors. Besides the rooms above mentioned there will be two teachers' rooms, library and principal's office. The exterior of the building will be covered with cement plaster on metal lath. A site has been secured at the corner of Lake and Linda streets. Plans are nearly complete and figures will be called for shortly.

Contracts Awarded.

SOUTH PASADENA, LOS ANGELES CO., CAL.—School, 2 story and base, brick, \$51,889. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, South Pasadena School District. Contractors, Long Beach Construction Co., Long Beach. General construction, \$51,889; B. F. Hulse, L. A., heating and ventilating, \$2,249; Crescent Electric Co., L. A., electric work, \$1,532.54; Smith & Coates, L. A., plumbing, \$2,775, and Probst & Son, painting, \$1,975.

LOS ANGELES, CAL.—Normal School group. Class A construction, \$665,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, State of California. Contractor, J. F. Atkinson, L. A., general construction. Contract price, \$451,166.

SEWERS, STREET WORK AND WATER SYSTEMS.

TULARE, TULARE CO., CAL.—Water system. Cost not stated. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, City of Tulare. Bids will be opened on May 5th at 8 p. m. for the construction of a municipal water system. Plans may be secured from either the City Clerk or from the engineers in this city. Official proposal ap-

pears in this issue. Engineers, Sloan & Robson furnish the following list of quantities for this system: Pipe—4,000 feet of 10-inch, 6,200 feet of 8-inch, 5,100 feet of 6-inch, 50,000 feet of 4-inch. Bids are being taken for both cast iron and steel. Valves—2 10-inch, 12 8-inch, 36 6-inch, 150 4-inch. Hydrants—85 1-way hydrants, 30 2-way hydrants. Plans include the construction of hemispherical bottom steel tank of 150,000 gallons capacity. This structure will be erected on a steel frame with a concrete foundation, and will be 135 feet high.

STANDARD, TOLUENE CO., CAL.—Power plant, concrete and brick. Cost not stated. Architect, William Mooser, Nevada Bank Bldg., S. F. Owners, Standard Lumber Co. Plans have been completed for a one-story and basement concrete and brick power station, which is to be erected at Standard. The building will have a cement floor and steel trussed roof. Exterior will be faced with cement plaster. Plans are complete and the work will be done by Day Labor. A contract for the steel work has already been awarded to the Central Iron Works of this city.

RECLAMATION DISTRICT 70, SUTTER CO., CAL.—Levee work, etc., \$200,000. Engineer's name not given. Owners, Sutter County. The assessment for improvement work in Reclamation District 70, Sutter County, has been placed at \$10 per acre. This totals \$200,000. The greater part of the amount will be spent for levee construction. A. A. McRae, G. R. Boyd and W. J. Wilbur are the assessors.

LINTON, ORE.—Municipal water system, \$100,000. Engineer not given. Owners, Town of Linton. Contractors, James Kennedy Construction Co., Portland. Contract price, \$92,739.

THEATRE

LOS ANGELES, CAL.—Theatre, 2 story and base, brick and concrete. \$25,000. Architects, Train & Williams, Exchange Bldg., L. A. Owner, F. W. Woodley. The building will cover an area of 60x150 feet. Besides the theatre proper, there will be several stores on the first floor. The main auditorium will have a seating capacity of 50 people. Modern plumbing and a ventilating system will be installed. Interior finish will be of pine and ornamental plaster. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores and warehouse, 3 story and base, reinforced concrete. Cost not stated. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owner, Orville Pratt, Jr. The building will be erected at the corner of Spear and Howard streets and will cover an area of 68 feet 9 inches by 137½ feet. The entire structure has been leased to Hooper-Jennings & Co. Construction will be nearly fireproof. The first floor will be arranged for the general offices of the company, sales rooms and shipping department. Upper floors will be arranged for storage purposes. Plans provide for elevators, spiral chutes, automatic sprinkler system, metal window frames and sash and fireproof doors. Exterior of the building will probably be faced with cement plaster. Plans are being prepared.

BURLINGAME, SAN MATEO CO., CAL.—Stores, 1 story and base, reinforced concrete. Cost not stated. Architect, John J. Foley, 46 Kearny St., S. F. Owner, J. H. Hatch. The building will be erected at the corner of the Middlefield Road and Burlingame avenue. The site is 60x75 feet, and the building will contain two modern stores. There will be plate glass windows in patent fronts. Interior finish will be of pine and hardwood. Exterior of the building will be faced with cement plaster. Plans are being prepared.

BURLINGAME, SAN MATEO CO., CAL.—Store, 1 story and base, reinforced concrete. Cost not stated. Architect, John J. Foley, 46 Kearny St., S. F. Owner, J. H. Hatch. This building will cover an area of 40x60 feet, and will be arranged for one large store. There will be modern store fronts and plate glass windows. Interior will be finished in pine and hardwood. Cement floor will be used. The exterior of the building will be faced with Medusa cement plaster. Plans are nearly complete and a contract will shortly be let.

STOCKTON, SAN JOAQUIN CO., CAL.—Store alterations, frame and brick. \$8,000. Architect, R. P. Morrell, Odd Fellows' Bldg., Stockton. Owner, F. Madden. This work will consist of remodeling the present building into a saloon. Some structural steel will be used. Interior finish will be of pine and hardwoods. Exterior will be covered with pressed brick. Plans are being prepared.

PORTLAND, ORE.—Stores and offices, 8 story and base, reinforced concrete, \$100,000. Architects, McNaughton and Raymond, Concord Bldg., Portland. Owners, Title and Trust Co. The building will be erected on 4th street and will cover an area of 50x100 feet. Construction will be fireproof throughout. The entire first floor will be occupied by the owners and will be elaborately finished in hardwoods, ornamental plaster, marble and tile. Special vaults will be constructed. Upper seven floors will be arranged for a number of modern offices. There will be steam heat, an oil burning equipment, vacuum cleaning system and mail chutes. Interior finish will be of metal and marble. Metal window frames and sash will be used. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

SAN FRANCISCO—Stores and offices, 3 story and base, brick and steel. Cost not stated. Architects, Miller & Colmesini, Lick Bldg., S. F. Owners, Santa Cristina Investment Co. (Claus Spreckels Estate). This building will be erected at the gore corner of Market and Golden Gate avenue, and will have a Market street frontage of 157 feet and a frontage on Golden Gate avenue of 154 feet. The lot is 100 feet in the rear. The first floor will contain nine modern stores, with plate glass windows and patent fronts. Upper floors will be arranged for 42 offices. There will be a complete steel frame and exterior walls faced with pressed brick and cement plaster. There will be elevator service and a vacuum cleaning system. Plans are complete and figures are being taken.

SAN FRANCISCO—Office building addition, 14 story and base. Class A construction, \$500,000. Architect, Willis Polk & Co., Merchants' Exchange Bldg.,

S. F. Owner, Ogden Mills. Plans are being prepared for the second large addition which has been made to the Mills Building since 1906. Property on Bush street extending easterly 60 feet from the present lot line will be improved. Construction and design will be similar to that of the main portion of the building. Working drawings are being prepared and contracts will be let as rapidly as possible.

SEALED PROPOSALS.

PROPOSALS FOR BUILDING.

BRICK INDUSTRIAL BUILDING.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Brick Industrial Building, Salem Indian School, Oregon," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m. May 7, 1913, for furnishing materials and labor for the construction of a brick industrial building at the Salem Indian School, Oregon, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at this office, the offices of the supervisor of construction, Denver, Colo.; the Capital Journal, Salem, Ore.; the Seattle Daily Record, Seattle, Wash.; the U. S. Indian warehouse, San Francisco, Cal., and at the school. For further information apply to the superintendent of the Salem Indian School, Chemawa, Ore. F. H. ABBOTT, acting commissioner.

PROPOSALS FOR CISTERN.

CISTERN—Office of Quartermaster, Fort Stevens, Ore.—Sealed proposals, in triplicate, will be received in this office until 11 a. m. May 2, 1913, and then opened, for construction of one reinforced concrete cistern at Battery Russell, this post. Further information may be obtained by applying at this office. R. F. COX, second lieutenant, coast artillery corps, quartermaster.

PROPOSALS FOR HARNESS HANGERS.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, San Francisco.

In accordance with a resolution of the Board of Fire Commissioners, duly passed on March 28, 1913, sealed proposals will be received in open session of the Board on Friday, May 2, 1913, between the hours of 8:30 and 9 o'clock a. m. for furnishing fifteen sets of telescopic harness hangers for use in the San Francisco Fire Department, in strict accordance with specifications and conditions contained in the proposal blanks prepared by the Fire Commissioners on file and copies of which may be obtained at the office of the Board, Temporary City Hall, 1231 Market street, San Francisco, Cal.

BOARD OF FIRE COMMISSIONERS.

FRANK T. KENNEDY.

Secretary.

PROPOSALS FOR HOSE.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, San Francisco.

In accordance with a resolution of the Board of Fire Commissioners, duly passed on March 28, 1913, sealed proposals will be received in open session of the Board of Friday, May 9, 1913, between the hours of 8:30 and 9 o'clock

a. m. for furnishing two thousand (2000) or more feet of one (1) inch rubber chemical fire hose for the San Francisco Fire Department, in strict accordance with the specifications and conditions contained in the proposal blanks prepared by the Board of Fire Commissioners on file, and copies of which may be obtained at the office of said Board, Temporary City Hall, 1231 Market street, San Francisco, Cal.

FRANK T. KENNEDY,
Secretary.

PROPOSALS FOR RAZING BUILDING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 23rd day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The moving or razing of that certain building (known as the Burnett Building) located on the northwesterly side of Market street, three hundred and twenty-five feet northeasterly from Marshall Square.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$10,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR CIRCULATING FILTERS.

OFFICE OF THE PLAYGROUND Commission, Room 638 City Hall.

Sealed proposals will be received at this office between the hours of 3 o'clock p. m. and 4 o'clock p. m. on the 24th day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The delivery and installation of circulating filters at the Municipal Swimming Pool situated at Lombard and Mason streets, San Francisco.

The amount of bond for the faithful performance of the contract has been fixed at fifty (50) per cent of the agreed amount, to replace defective machinery and to cover the guarantee for efficiency and capacity, for one year after date of completion and operation. Proposal forms and specifications will be furnished upon application at the office of the Playground Commission, and all proposals must be made upon such forms.

The Playground Commission reserves the right to reject any and all bids.

By order of the Playground Commission of the City and County of San Francisco.

JOSEPH R. HICKEY,
Secretary.

PROPOSALS FOR OIL HOUSE.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 23rd day of April, 1913, for doing the following work, to wit:

The equipment of a lubricating oil house for the Geary Street Municipal Railway.

Progressive payments will be made. The amount of bond for faithful performance has been fixed at \$500.00.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR CONSTRUCTING FIELD HOUSE.

OFFICE OF THE PLAYGROUND Commission, Room 638 City Hall, City and County.

Sealed proposals will be received at this office between the hours of 3 o'clock p. m. and 4 o'clock p. m. on the 24th day of April, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general construction of a Field House at the Excelsior Municipal Playground located at Russia and Madrid streets.

Progressive payments will be made. The amount of bond for the faithful performance of the contract has been fixed at eight hundred dollars (\$800.).

All proposals offered must be accompanied by a certified check payable to the Secretary of the Playground Commission of the said City and County, equal to ten per cent of the aggregate of the proposals and drawn on a reputable bank. Proposal forms, plans and specifications will be furnished upon application at the office of the Playground Commission on making a deposit to cover the same, and all proposals must be made upon such forms.

The Playground Commission reserves the right to reject any and all bids.

By order of the Playground Commission of the City and County of San Francisco.

JOSEPH R. HICKEY,
Secretary.

NOTICE TO CONTRACTORS.

SEALED bids will be received by the City Clerk of Tulare, Tulare Co., California, up to 8 p. m., May 5th, 1913, and thereafter opened, for all labor and material necessary and proper to construct a system of water mains and accessories for Tulare.

Specifications may be had from the City Clerk, or from Sloan & Robson, Nevada Bank Building, San Francisco, upon payment of Five Dollars (\$5.00.).

Bids will be received for the material only, the labor only, and for the material and labor combined.

The City of Tulare, through its Board of Trustees, reserves the right to reject any or all bids, to waive defects, and to accept any bid. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 10:30 A. M., Thursday, May 1st, 1913, for the Excavation for the Exposition Auditorium to be built in the Civic Center in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful 100 per cent of the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

Each of the dwellings will cover an area of 24x33 feet and will contain five rooms and bath. The dwellings will be grouped around an open court and are in the Mission style of architecture. The court will be laid out for gardens and a fountain. Interior finish will be of pine, redwood and some hardwoods. Oak floors will be used in the living rooms, dining rooms and reception

halls. A central heating system, which will probably be housed in a separate building, will be installed. Exterior of the group will be covered with cement plaster on metal lath. Each of the living rooms will have a large open fire place with brick or tile mantel. Bath rooms and kitchens will be wainscoted with tile. Plans are in the hands of the owner who is a contractor and the work will be done by Day Labor.

RESIDENCE ALTERATIONS AND ADDITIONS — Frame construction, \$2,500. San Francisco. Architect, none. Owner, J. R. Mortensen, Rio Vista. This work will include the complete alteration of the interior of the building and extensive exterior alterations. The work will require new plastering, plumbing, electric work, painting and interior finish. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$5,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble, 363 4th Ave., S. F. The house will be erected at the southeast corner of 25th avenue and Lake street, and has been designed to contain eight rooms and bath. Interior will be finished in pine and hardwood with hardwood floors in the living and dining rooms and reception hall. Plans include furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all kinds of materials.

HOTEL — 4 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, S. Rudee. The building will be erected on the west side of 4th street, 50 feet north of Folsom, and has been designed for stores on the first floor and a number of modern hotel rooms above. Interior will be finished in pine throughout. Hot and cold running water will be supplied to all rooms. There will be metal window frames and sash and iron fire escapes. Exterior of the building will be faced with cement plaster. Plans are being prepared.

HOTEL — 3 story and base. Class C construction, \$20,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Louis Friedman. This work has been mentioned here before when plans were first started. The building will be erected at the northeast corner of Bush and Grant avenue, and will contain stores besides the hotel lobby on the first floor. Upper floors will be arranged for a number of single rooms and several baths. Interior will be finished in pine throughout. There will be a hot water system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

HOTEL ALTERATIONS AND ADDITIONS — Frame construction, \$2,000.

San Francisco. Architect, none. Owner, Charles Katz, 1202 Dolores St., S. F. This work will include remodeling a two-story frame building on Mission street near 18th. The first floor will be arranged for stores and upper floor for rooms. Exterior will be covered with cement plaster on metal lath. Interior finish will be of pine. Plans are in the hands of the owner and the work will be done by Day Labor.

HOTEL—3 story and base, reinforced concrete, \$11,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, Nathan Haas. The building is to be erected on the west side of Jones street near O'Farrell, and will contain two stores on the first floor and a number of single rooms above. Interior finish will be of pine throughout. All rooms will be supplied with hot and cold running water. Exterior of the building will be faced with cement plaster. Plate glass in patent fronts will be used on the first floor. Plans are complete and the work will be done by Day Labor.

STORES AND WAREHOUSE—3 story and base, reinforced concrete. Cost not stated. San Francisco. Architects, Eskewell & Brown, 251 Kearny St., S. F. Owner, Orville Pratt, Jr. The building will be erected at the corner of Spear and Howard streets, and will cover an area of 68 feet 9 inches by 137½ feet. The entire structure has been leased to Hooper-Jennings & Co. Construction will be nearly fireproof. The first floor will be arranged for the general offices of the company, sales rooms and shipping department. Upper floors will be used for storage purposes. Plans provide for elevators, spiral chutes, automatic sprinkler system, metal window frames and sash and fireproof doors. Exterior of the building will probably be faced with cement plaster. Plans are being prepared.

STORES AND OFFICES—3 story and base, brick and steel. Cost not stated. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owners, Santa Christina Investment Co. (Claus Spreckels Estate). This building will be erected at the corner of Market and Golden Gate avenue, and will have a Market street frontage of 157 feet and a frontage on Golden Gate avenue of 154 feet. The lot is 100 feet in the rear. The first floor will contain nine modern stores, with plate glass windows and patent fronts. Upper floors will be arranged for 42 offices. There will be a complete steel frame and exterior walls faced with pressed brick and cement plaster. There will be elevator service and a vacuum cleaning system. Plans are complete and figures are being taken.

CHURCH—2 story, frame construction. Cost not stated. San Francisco. Architect, Herbert B. Maggs, 125 Alpine St., S. F. Owners, African Methodist Church. The building will be erected on the property of the congregation on Powell street north of Jackson, and will cover an area of 46x114 feet. There will be a large main auditorium, Sunday school rooms, parlors and pastor's study. Interior finish will be of pine throughout. The exterior of the building will be faced with either shiplap or metal lath and plaster. Plans have been prepared.

FACTORY ADDITION—2 story, concrete. Cost not stated. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. J. Owner, G. Ratto. The

present plant is located on Valencia street near 19th. The additional stories will be constructed on top of the one-story building now used by Mr. Ratto. Exterior will be faced with cement plaster. Interior finish will be of pine. Plans are complete and in the hands of the owner, who is taking figures for the work.

LAUNDRY AND STABLES—1 and 2 story, brick construction, \$25,000. San Francisco. Architect, William H. Crin, Jr., 425 Kearny St., S. F. Owner, Edward Rolkin. The buildings together will cover an area of 87x275 feet. The main structure will be one story in height. Stable will be two stories high, the upper floor being arranged for living rooms. Interior finish will be of pine and redwood. The estimated cost does not include a large amount of machinery which will be installed. Exterior of the buildings will be faced with stock brick. Plans are complete and figures are being taken.

FLAT ALTERATIONS AND ADDITIONS—Frame construction, \$2,000. San Francisco. Architect, William H. Crin, Jr., 425 Kearny St., S. F. Owner, Johanna Costello. The work will include raising the present building and constructing new portion on the street grade. There will be new plastering, painting, plumbing and interior finish. Exterior will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, Charles W. Higgins, 1306 Shrader St., S. F. The building, which has been designed to contain two flats, will be erected on 17th avenue south of Lake street. Each flat has been arranged for five rooms and bath. Interior finish will be of pine with hardwood floors in the living and dining rooms and reception halls. Open fire places and brick mantels will be used. The exterior of the building will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Charles Michelson, 446 27th St., S. F. The building will contain two flats of four and five rooms each with bath. All interior finish will be of pine or redwood. Some hardwood floors will be used. There will be either gas grates or open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shiplap and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—2 story and base, frame, \$3,550. San Francisco. Architect, none. Owner, Patrick M. McDonnell, 3037 24th St., S. F. The building has been designed to contain two modern five-room flats with baths. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and brick or tile mantels. Tile will be used in the baths and kitchens. The building will cover an area of 25x61 feet. Exterior will be covered with shiplap and brick veneer. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Sidney B. Newsum, Nevada Bank Bldg., S. F. Owner, George Spencer. A two-story frame dwelling

located at 3100 Benvenue avenue will be altered into a modern flat building containing 18 rooms. Extensive additions will be made. Interior finish will be of pine and redwood. Each flat will contain six rooms and bath. There will be some hardwood floors. Open fire places will be used in all living rooms. The exterior of the building will be covered with rustic and cement plaster. Plans are ready for figures.

SUPPLIES FOR TRANSPORTS—Cost not stated. San Francisco. Engineer, Donnelley, Transport Docks, S. F. Owners, United States Government. Four of the big United States Army Transports, the Sheridan, the Logan, the Thomas and the Sherman, are undergoing extensive repairs. Orders are now being placed through Col. Knight's office, Transport Docks, for a large amount of supplies and materials, which include many of interest to the building trade. Douglas plumbing goods are specified. There will be a large amount of paints, oils and steel. Compolite flooring, electric supplies and lighting fixtures, plate and other glass, radiators, asbestos, paper, damp-proof, ornamental iron and bronze, safety stair treads, blowers for ventilating, etc. Engineer Donnelley is in charge of the work.

OIL BURNING EQUIPMENT, ETC.—Cost not stated. San Francisco. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. The following contracts have just been awarded by the Constructing Quartermaster at Fort Mason: Installation for oil burners at Presidio and Fort Winfield Scott to American Heat and Power Co., at \$20,100; installation of oil burners at Fort Baker to S. T. Johnson Co., at \$6,380; pipe line for oil at Fort Baker to Pringle, Dunn & Co., for \$4,295; concrete reservoir for oil at Fort Baker to Contra Costa Construction Co., at \$850; oil burners in commanding General's quarters at Fort Mason to American Heat and Power Co., at \$590; grading parade ground at Fort Winfield Scott to E. M. Hughie & Co., at \$6,086; construction of roads, walks and gutters at Letterman General Hospital to Francis Zoke at \$4,575.

HOTEL—5 or 6 story and base, Class C construction. Cost not stated. San Francisco. Architect, Alfred Henry Jacobs, 110 Sutter St., S. F. Owner, Mr. Andrews. The building will be erected on Jones street near Eddy, and will contain a large number of single rooms, many of which will have connecting baths. Only preliminary plans have been made and the construction will depend upon the owner and lessees reaching a satisfactory agreement. Further announcement will be given here when the work is ready to progress.

RAILROAD CONSTRUCTION—\$35,000. San Francisco. Engineer, Engineering Department, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids for the construction of the Geary Street Municipal Road out 45th Ave. and Balboa street from 33rd avenue to the Great Highway were opened at the last meeting of the Board of Public Works. Bids show Healy-Tibbetts Construction Co. low at \$34,450, and they were later awarded the contract. A complete list of the figures appears under the heading of San Francisco in this issue.

BUNGALOWS—4, 1½ story and base, frame, \$2,000 each. San Francisco, Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owners, Atlas Home Builders. These houses will be erected on Lishon street near Persia. Each will contain six rooms and bath. Interiors will be finished in pine and redwood. Some oak flooring will be used. There will be open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. Exteriors will be covered with rustic and shingles. Plans are complete and in the hands of the owners, who will do the work by Day Labor and who are now purchasing all materials.

RESIDENCE—2 story and base, frame. Cost not stated. San Francisco, Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Dr. A. A. Solley. The dwelling will be erected in the Bakers Beach Tract, and will be designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Chester H. Miller, Foxcroft Bldg., S. F. Owner, Dr. R. T. Sutherland. The house will be erected on 4th Avenue Heights, and has been designed for an eight-room house with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be wainscoted in tile. The exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

OFFICE BUILDING ADDITION—14 story and base. Class A construction, \$500,000. San Francisco, Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Ogden Mills. Plans are being prepared for the second large addition which has been made to the Mills Building since 1906. Property on Bush street extending easterly 60 feet from the present lot line will be improved. Construction and design will be similar to that of the main portion of the building. Working drawings are being prepared and contracts will be let as rapidly as possible.

LIBERAL ARTS BUILDING—Frame construction. Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans and specifications for the construction of the Liberal Arts Building have been completed and are now out for figures. Plans can be secured from the Director of Works. The building will be erected in the Exhibit Building Section of the Harbor View site. Separate bids are being taken for the general construction and for the sewer, water and gas piping. The official proposal appears in another column of this issue. Bids will be opened on April 29th.

PILE FOUNDATION—Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on April 24th for the construction of a pile foundation for the Fine Arts Building. Plans can be secured from the Director of Works. Proposal appears in another column of this issue.

EXCAVATING FOR FOUNDATION—Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the excavation of the foundation for the Exposition Auditorium, which is to be erected in the Civic Center, have been completed. Bids for the work will be opened on May 1st. The Exposition Auditorium will be a permanent structure costing in the neighborhood of \$1,000,000. Plans for the building were prepared by associated architects John Galen Howard, John Reid, Jr., and Frederick H. Meyer. The official proposal appears in another column of this issue.

City Bids Opened.

Board of Public Works Opens Bids For Completion of Geary Street Road to Great Highway.

Bids were opened at the regular Wednesday afternoon session of the Board of Public Works for the construction of track for the Geary street Municipal Road from its present terminus on 33rd avenue to the Great Highway. The route is along Balboa and 45th avenue. Nine bids were received which ran as follows:

Track Construction.

T. H. Mullin	\$35,900
Mahoney Bros.	44,710
Contra Costa Constr. Co.	53,880
Grant Smith & Co.	77,760
Central California Con. Co.	47,540
F. Rolandi	48,295
F. E. Hilmer	39,340
Healy-Tibbitts Constr. Co.	34,450
Gorrell Bros.	51,187

Bids For Another Exposition Palace.

Panama-Pacific Exposition Company Open Figures for Construction of Agriculture Building.

Bids for the construction of the Agriculture Building, another of the important exhibit palaces which are to be erected for the Panama-Pacific International Exposition Company, were opened by the Buildings and grounds Committee at 11 o'clock Tuesday morning. Seven bids were submitted for the general construction, the Exposition Company furnishing the lumber and fifteen bids for the plumbing, water and sewer pipes. Lange & Bergstrom were low on the general construction at \$253,523 and the Peterson-James Co. low on the plumbing at \$22,962. Following is a complete list of all figures presented:

General Construction, Agriculture Bldg.	
James L. Brown	\$325,000
Strehlow, Freeze & Peterson	266,500
Connary-Peterson Co., Inc	268,600
F. Rolandi	299,943

Reese & Rountree	264,400
Lange & Bergstrom	253,523
McLeran & Peterson	296,960
Plumbing, Agriculture Building.	
John G. Sutton Co.	\$25,510
Peterson-James Co.	23,962
Alexander Coleman	23,700
Herman Lawson	23,614
Frank Lyman	25,390
Kiernan & O'Brien	25,260
Lettich Bros.	24,165
Robert Dalziel Jr.	27,340
J. E. O'Mara	30,507
The J. Looney Co.	24,793
F. W. Snook & Co.	23,987
Burnham Plumbing Co.	26,821
James H. Pinkerton	25,200
The Turner Co.	25,515
Frank J. Klimm	24,489

OAKLAND AND ALAMEDA COUNTY.

BUNGALOW—1½ story and base,
 frame, \$2,500. Oakland, Cal. Architect,
 A. W. Smith, 1010 Broadway, Oakland.
 Owner, Mr. Murray. The house will
 contain six rooms, bath and sleeping
 porch. Interior will be finished in pine
 throughout with hardwood floors in the
 principal rooms. Tile will be used
 in the bath room and kitchen. There
 will be furnace heat and open fire
 place. Mantel will be of tile or brick.
 The exterior of the house will be covered
 with cement plaster on metal lath.
 Plans are complete and figures are be-
 ing taken.

RESIDENCE—2 story and base,
 frame, \$10,000. Berkeley, Alameda Co.,
 Cal. Architect, Edward T. Foulkes,
 Crocker Bldg., S. F. Owners name with-
 held. The house will be erected in the
 Claremont Tract, and will contain 11
 rooms, baths and sleeping porches. In-
 terior finish will be of pine and hard-
 wood. There will be furnace heat and
 open fire places. A Ruud heater will
 be installed. Mantels will be of brick
 or tile. Tile will be used in the bath
 rooms and kitchen. Exterior of the
 dwelling will be covered with cement
 plaster on metal lath. Plans are com-
 plete and figures are being taken.

BUNGALOW—1½ story and base,
 frame, \$3,000. Piedmont, Alameda Co.,
 Cal. Architect, none. Owners, United
 Home Builders, 162 Broadway, Oak-
 land. The house will contain seven
 rooms, bath and sleeping porch. In-
 terior finish will be of pine and hard-
 wood veneer. Hardwood floors will be
 used in the living room, dining room
 and reception hall. There will be fur-
 nace heat and open fire place. Mantel
 will be of brick. Tile will be used in
 the bath room and kitchen. The ex-
 terior of the house will be covered
 with shingles. Plans are complete
 and the work will be done by Day
 Labor.

RESIDENCE—2 story and base,
 frame. Cost not stated. Berkeley, Ala-
 meda Co., Cal. Architect, John Hudson
 Thomas, First National Bank Bldg.,
 Berkeley. Owner, Mr. Garrett. The
 dwelling will be erected on Russell
 street, and has been designed for an
 eight-room house with bath and sleep-
 ing porch. All interior finish will be
 of pine. Hardwood floors will be used
 in the principal rooms. There will be
 furnace heat and open fire places.
 Mantels will be of brick and tile. Tile
 will also be used in the bath room and
 kitchen. Exterior of the dwelling will
 be covered with cement plaster on
 metal lath. Plans are being prepared.

RESIDENCE—2 story and base,
 frame, \$4,000. Berkeley, Alameda Co.,
 Cal. Architect, W. H. Ratcliff, First
 National Bank Bldg., Berkeley. Own-
 er, G. P. Adams. The dwelling will be
 erected in the Thousand Oaks Tract,
 and will contain eight rooms, bath and
 sleeping porch. Interior finish will be
 of pine throughout. There will be fur-
 nace heat and a large open fire place.
 Mantel will be of brick. Floors in the
 living room, dining room and recep-
 tion hall will be of hardwood. Bath
 room and kitchen will have tile wain-
 scot. The exterior of the house will
 be covered with shingles. Plans are
 complete and figures are now being
 taken by the architect.

RESIDENCE—2 story and base,
 frame, \$3,500. Berkeley, Alameda Co.

Cal. Architect, Karl H. Nickel, Syndicate Bldg., Oakland. Owner, C. J. Gordon. The house has been designed for a seven-room dwelling with bath. Interior will be finished in pine throughout with hardwood floors in the two principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

BUNGALOW—1 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, C. M. Johnson, 2317 Carlton St., Berkeley. The house has been designed for a six-room dwelling with bath. Interior finish will be of pine and redwood with some oak floors. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor.

BUNGALOWS—2, 1 story and base, frame, \$3,000 and \$3,500. Piedmont, Alameda Co., Cal. Architect, none. Owners, Flitter and Winlund, 1721 Telegraph Ave., Oakland. These houses will be erected on Ronado street, and will contain seven and eight rooms respectively. Interiors will be finished in pine and hardwood. Oak floors will be used in the living and dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms and kitchens will be finished in tile. Ruud water heaters are specified. Exteriors will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$1,500. Piedmont, Alameda Co., Cal. Architect, none. Owner, Wallace Clark, 1444 Broadway, Oakland. The house will contain eight rooms, baths and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will also be used in the bath rooms and kitchen. Plans provide for an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

HOTEL—6 story and base, brick and steel, \$60,000. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owners, Frank Pereira Realty Co. The building is to be erected at the southeast corner of 8th and Washington streets and will cover a considerable ground area. Several stores, the hotel lobby and offices will occupy the first floor. Upper floors will be arranged for about 120 rooms, a number of which will have connecting baths. Plans include steam heat, elevator service, vacuum cleaning and a hot water system. Oil burning furnace will be installed. Baths will have tile floors and wainscot. The exterior of the building will be faced with pressed brick. Interior finish will be of pine and hardwood. Ornamental plaster will be used in the lobby. Bids are now being taken on the structural steel and figures on the general contract will be called for shortly.

HOTEL ALTERATIONS—\$1,500. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th street, Oakland. Owners, Hotel Avalon Co. This work will include new sash and doors, new steam radiators, plumbing, tinting, plastering and electric work. Plans are ready for figures.

CLUB HOUSE—3 story and base, frame, \$20,000. Berkeley, Alameda Co., Cal. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Twentieth Century Club. This work has been mentioned here before when plans were first out for figures. Several changes have been made and new figures will be called for at once. The building will contain a large meeting room, library, social hall, dining room and complete kitchen equipment. Interior will be handsomely finished in pine and hardwoods with hardwood floors throughout. A central heating system will be installed. The exterior of the building will be covered with cement plaster and shingles.

SCHOOL—2 story and base, frame, \$25,400. Piedmont, Alameda Co., Cal. Architect, Irwin Schaefer, Bacon Bldg., Oakland. Owners, Town of Piedmont. The building will contain six class rooms and an auditorium. There will be a central heating system. Interior will be finished in pine with some maple floors. Besides the rooms above mentioned, there will be two teachers' rooms, library and principal's office. The exterior of the building will be covered with cement plaster on metal lath. A site has been secured at the corner of Lake and Linda streets. Plans are nearly complete and figures will be called for shortly.

Building Contracts Awarded

Oakland.

SAN JOSE & SANTA CLARA CLARA VALLEY.

BUNGALOWS—1 story and base,
frame. Cost not given. San Jose,
Santa Clara Co., Cal. Architect, none.
The following Day Labor jobs have
been reported as about to be started in
San Jose: Esslie Daubs, 993 Prospect
St., San Jose, 1 story frame cottage,
\$1,800; W. F. Blakeslee, 436 So. 6th St.,
San Jose, 1 story frame cottage, \$1,850.

HOTEL—3 story and base, frame,
\$10,000. Burlingame, San Mateo Co.,
Cal. Architect, John J. Foley, 46 Kear-
ny St., S. F. Owner, Peter Liberopoulos.
The building will contain about 24
rooms besides the office and lobby. In-
terior finish will be of pine and red-
wood. Hot and cold running water
will be supplied to all rooms. Each
floor will have several baths and toi-
lets. Exterior of the building will be
covered with shiplap and rustic. Plans
are nearly complete and figures will
shortly be called.

STORES—1 story and base, rein-
forced concrete. Cost not stated. Bur-
lingame, San Mateo Co., Cal. Architect,
John J. Foley, 46 Kearny St., S. F.
Owner, J. H. Hatch. The building will
be erected at the corner of the Middle-
field Road and Burlingame avenue. The
site is 60x75 feet and the building will
contain two modern stores. There will
be plate glass windows in patent
fronts. Interior finish will be of pine
and hardwood. Exterior of the build-
ing will be faced with cement plaster.
Plans are being prepared.

STORE—1 story and base, reinforced

concrete. Cost not stated. Burlingame, San Mateo Co., Cal. Architect, John J. Foley, 46 Kearny St., S. F. Owner, J. H. Hatch. This building will cover an area of 40x60 feet, and will be arranged for one large store. There will be modern store fronts and plate glass windows. Interior will be finished in pine and hardwood. Cement floor will be used. The exterior of the building will be faced with Medusa cement plaster. Plans are nearly complete and a contract will shortly be let.

RESIDENCE—2 story and base, frame. Cost not stated. Santa Cruz, Santa Cruz Co., Cal. Architect, Chester H. Miller, Foxcroft Bldg., S. F. The house will be designed for a handsome country home and will contain in the neighborhood of ten rooms, two baths and sleeping porches. Interior finish will be of pine and hardwood with hardwood floors throughout. Bath rooms will be finished in tile. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCES—2 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: Frank Perez, 274 North 11th St., 5 room cottage, \$2,000; Joe Banda, 675 North 13th St., 6 room cottage, \$1,800; W. E. Woodhams, 16 West 2nd St., 5 room cottage, \$1,600, and J. J. Hansen, 128 North 16th St., 5 room cottage, \$1,600.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

RESIDENCE—2 story and base, Hollow tile, \$10,000. Fresno, Fresno Co., Cal. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owner, R. W. Hobart. This dwelling is to be designed for a handsome country home and will be erected on the owner's property near Fresno. Plans provide for twelve rooms, two baths and a large sleeping porch. Interior will be finished in pine and hardwoods. Tile will be used in both bath rooms and in the kitchen. There will be furnace heat and open fire places. Mantels will be of brick. Hardwood floors will be used in all principal rooms. An automatic water heater will be installed. Exterior of the house will be covered

with cement plaster. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$10,000. Bakersfield, Kern Co., Cal. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owner, Matt R. Solomon. The dwelling will be erected on Mr. Solomon's ranch near Bakersfield, and will contain ten roofs, baths and sleeping porches. Interior will be finished in pine and hardwood. Oak floors will be used throughout, except in the baths which will have tile floors and wainscot. There will be furnace heat and open fire places. Mantels will be of tile and brick. There will be an automatic water heater. Exterior of the dwelling will be covered with cement plaster. A clay tile roof will be used. Plans are now being prepared.

HOTEL AND STORES—2 story, brick, \$12,000. Fresno, Fresno Co., Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, H. Brix. The present two story store building will be altered and an addition built so that the new building, covering an area of 80x100 feet, will contain four stores and fifty guest rooms. There will be patent store fronts, a hot water system and pine trim. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

BANK, STORES AND OFFICES—2 story and base, brick and concrete, \$35,000. Riverbank, Stanislaus Co., Cal. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owners, First National Bank of Riverbank. The building will be erected on a corner site and will cover an area of 50x150 feet. Besides the bank, plans provide for four stores on the first floor. Bank will occupy the corner and will be handsomely finished in hardwoods, tile and marble. There will be four vaults and a large safe. Upper floor will contain offices and apartments. There will be wall beds. Interior finish will be of pine. A hot water system has been specified. Exterior of the building will be faced with pressed brick. Work will be done by Day Labor, all contracts for materials being handled through the architect's offices. Plans are nearly complete.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. Fresno, Fresno Co., Cal. Architect, Gene Mathewson, Fresno. Owner, I. Kinspel. The building will be erected at the corner of Stanislaus and L streets and will contain a number of modern two, three and four room suites. All apartments will have connecting baths and wall beds. A central heating system will be installed. Interior finish will be of pine and hardwood veneer. Oak floors will be used in some of the rooms. Baths will be wainscoted with tile. The exterior of the building will probably be covered with cement plaster. Plans are being prepared.

BRIDGES—5 concrete and frame. Cost not stated. Orland, Glenn Co., Cal. Engineer, County Surveyor, Willows. Owners, Glenn County. Plans have been approved and bids will be opened on May 5th for the construction of five bridges. The largest of these structures will be erected near Orland, across Stony Creek, and will cost in the neighborhood of \$150,000. The other four bridges are much smaller. Separate bids will be taken for each bridge. Plans and specifica-

tions can be secured from the County Clerk or the County Surveyor at Willows.

CHURCH—2 story and base, brick, \$25,000. Bakersfield, Kern Co., Cal. Architect, Thomas B. Wiseman, Producers' Bank Bldg., Bakersfield. Owners, First Presbyterian Church. This work has been mentioned here before. Plans have been completed and are now in the hands of the Building Committee for approval. Bids will be called for as soon as minor details can be changed. The site of the new edifice will be at the corner of 17th and H streets.

HOTEL—5 story and base, brick and steel, \$75,000. Modesto, Stanislaus Co., Cal. Architect, B. J. Joseph, First National Bank Bldg., S. F. Owner, Mrs. Luella Hughsen. Work has been started by Day Labor for the construction of this building. It will be erected at the corner of 10th and J streets, and will be arranged for stores and the hotel lobby on the first floor. Upper floors will contain a total of 100 guest rooms and 50 baths. There will be steam heat, elevator service and a hot water system. Exterior will be faced with pressed brick.

LIBRARY—2 story and base, brick and steel, \$25,000. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Bakersfield. Owners, City of Bakersfield. The building is to be erected in East Bakersfield. Working drawings will probably be approved by the Trustees at their next meeting. The building is in the classic style, and will contain the usual library rooms. Exterior will be faced with pressed brick. Bids will be called within a few weeks. Further notice will then be given in these columns.

Contracts Awarded.

LODGE HALL—3 story and base, brick, \$20,000. Taft, Kern Co., Cal. Architect, J. M. Saffell, Bakersfield. Owners, Odd Fellows' Hall Association. Contractor, Seymour, Bakersfield. Contract price, \$20,000.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

RESIDENCE—2 story and base, frame, \$15,000. Concord, Contra Costa Co., Cal. Architect, W. H. Ratcliff, First National Bank Bldg., Berkeley. Owner, L. Olson. The dwelling will contain eight rooms, baths and sleeping porches. Interior finish will be mostly of hardwoods. Hardwood floors will be used throughout except in the bath rooms, which will have composition floors and tile wainscot. There will be furnace heat and open fire places. Mantels will be of tile and brick. There will be an automatic water heater. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BUNGALOW—1 story and base, frame, \$1,500. Stockton, San Joaquin Co., Cal. Architect, R. P. Morrell, Odd Fellows Bldg., Stockton. Owner, P. L. Miner. The dwelling has been designed to contain six rooms and bath. Interior will be finished in pine throughout. Some oak flooring will be used. There will be an open fire place with brick or tile mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are being prepared.

RESIDENCES—Frame construction. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: Nellie S. Smith, 1017 North Center St., 2 story frame dwelling, \$2,500; Mrs. Hickenbethan, 623 East Market St., 2 story frame dwelling, \$4,000; Louis McGhan, 312 Stanislaus St., 1 story frame cottage, \$1,000; Joseph Gelger, 125 East Lindsay St., 2 story frame dwelling, \$3,500; E. W. Gibbeau, 945 So. San Joaquin St., 1 story frame dwelling, \$2,000; J. J. Malley, 1818 So. California St., 1 story frame dwelling, \$2,000, and E. W. Perkins, 719 East Hayleton St., 1 story frame dwelling, \$2,500.

STORE ALTERATIONS—Frame and brick, \$8,000. Stockton, San Joaquin Co., Cal. Architect, R. P. Morrell, Odd Fellows' Bldg., Stockton. Owner, F. Madden. This work will consist of remodeling the present building into a saloon. Some structural steel will be used. Interior finish will be of pine and hardwoods. Exterior will be covered with pressed brick. Plans are being prepared.

COURT HOUSE AND JAIL ALTERATIONS—Concrete and brick construction. Cost not stated. Nevada City, Nevada Co., Cal. Architect, William Mosser, Nevada Bank Bldg., S. F. Owners, Nevada County. Plans for an addition to the county jail and for extensive alterations to the present court house have been completed by the architect. Contracts for the work will be let through the Clerk of the Board of Supervisors. Bids will be called for at once.

WATER SYSTEM—Cost not stated. Tulare, Tulare Co., Cal. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, Town of Tulare. Bids will be opened on May 5th at 8 p. m. for the construction of a municipal water system. Plans may be secured from either the City Clerk or from the Engineers in this city. Official proposal appears in this issue. Engineers Sloan & Robson furnish the following list of quantities for this system: Pipe—4,000

feet of 10-inch, 6,200 feet of 8-inch, 5,400 feet of 6-inch, 50,000 feet of 4-inch. Bids are being taken for both cast iron and steel. Valves—2 10-inch, 12 8-inch, 26 6-inch, 150 4-inch. Hydrants—85 1-way hydrants, 30 2-way hydrants. Plans include the construction of hemispherical bottom steel tank of 150,000 gallons capacity. This structure will be erected on a steel frame with a concrete foundation, and will be 135 feet high.

POWER PLANT—Concrete and brick. Cost not stated. Standard, Tuolumne Co., Cal. Architect, William Mosser, Nevada Bank Bldg., S. F. Owners, Standard Lumber Co. Plans have been completed for a one-story and basement, concrete and brick power station, which is to be erected at Standard. The building will have a cement floor and steel trussed roof. Exterior will be faced with cement plaster. Plans are complete and the work will be done by Day Labor. A contract for the steel work has already been awarded to the Central Iron Works of this city.

LEVEE WORK, ETC.—\$200,000. Reclamation District, 70, Sutter Co., Cal. Engineer's name not given. Owners, Sutter County. The assessment for improvement work in Reclamation District 70, Sutter County, has been placed at \$10 per acre. This totals \$200,000. The greater part of the amount will be spent for levee construction. A. A. McRae, G. R. Boyd and W. J. Wilbur are the assessors.

RESIDENCE—2 story and base, frame, \$40,000. Los Angeles, Cal. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owner, Rowland Bishop. Preliminary plans have been prepared for this dwelling, which is to be designed in the true Colonial style taken from one of the famous old Virginia homes. Sketches show a total of 14 rooms, several baths and large sleeping porches. Interior will be handsomely finished in pine and hardwoods with hardwood floors throughout. There will be a central heating system, probably steam. Open fire places are to be installed in several of the rooms with brick and tile mantels. Bath rooms will be finished in tile and will have composition floors. A vacuum cleaning system and other modern conveniences

will be incorporated in the plans. Exterior of the dwelling will be covered with shiplap and rustic. Plans are being prepared.

HOTEL—6 story and 5 story tower, brick and reinforced concrete, \$350,000. Venice, Los Angeles Co., Cal. Architect, C. H. Russell, Humboldt Bank Bldg., S. F. Owner, Abbot Kinney Co. The building is to be erected on the northeast corner of Breeze and Ocean Front, and will cover an area of 110x110 feet. The main portion of the building will be 6 stories in height from the center of which will raise a five-story tower, which will also contain a number of hotel rooms. Construction will be fire-proof throughout with exterior walls of brick and concrete, concrete floors and hollow tile partitions. Exterior will be faced with pressed brick. Besides the general office, lobby, parlors and dining room there will be several stores, a cafe and barber shop on the first floor. Upper floors will contain 250 guest rooms, all of which will have private baths. There will be steam heat, oil burning furnaces, vacuum cleaning system and elevators. Metal window frames and sash will be used. Bath rooms will have cement floors and tile wainscot. Plans are being prepared and segregated contracts will be let.

APARTMENT HOUSE—7 story and base, reinforced concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, E. Tisnerat. The building is to cover an area of 60x90 feet, and will contain a total of 140 rooms, which will be arranged in two and three room suites. Plans provide for large amusement rooms, social hall and lobby. There will be steam heat, elevator service, vacuum cleaning system and wall beds. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, P. E. Weaver, Citizens' National Bank Bldg., L. A. Owner, W. P. Maurer. The building has been designed to contain a total of 80 rooms, which will be arranged in two and three room suites. All suites will have wall beds and private baths. Interior will be finished in pine and hardwood. Bath rooms will have cement floors and tile wainscot. There will be steam-heat and elevator service. A vacuum cleaning system will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, C. S. Klous. The building will cover an area of 50x125 feet. Interior will be arranged for 58 rooms in two and three room suites. There will be wall beds, private bath rooms, steam heat and a vacuum cleaning system. Bath rooms will have composition floors. The exterior of the building will be faced with pressed brick. Plans are complete and the architect is taking figures on the work.

HOTEL—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, G. I. Jacoby. The building will be erect-

ed on a corner lot and will be designed to contain 120 guest rooms, all of which will have private baths. There will be steam heat, elevator service and a vacuum cleaning plant. Hot and cold water supply will also be installed. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile. Considerable hardwood and ornamental plaster will be used in the lobby. The exterior of the building will be faced with pressed brick. Plans are being prepared and when complete construction will probably be carried out by the Milwaukee Building Co.

HOTEL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, F. H. Gentry, Pacific Electric Bldg., L. A. Owners, G. Bloom, Dr. J. P. N. Patterson et al. The building will cover an area of 50x138 feet. The first floor will contain seven stores and upper floors in the neighborhood of 56 rooms and baths. There will be steam heat and a hot water system. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Howard W. Squires. The building will be 80x145 feet in size, and has been designed to contain 108 rooms, which will be arranged in two and three room suites. There will be steam heat, elevator service, a vacuum cleaning system and other modern improvements. All suites will have private baths and will be equipped with wall bed. Interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner who is taking figures for the work.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Hiernian Bldg., L. A. Owner, C. F. Stuart. The building, which is to be designed for a commercial garage, will cover an area of 54x100 feet. There will be a cement floor, metal window sash and frames and special gasoline storage tanks. Interior finish will be of pine throughout. Exterior of the building will be faced with cement plaster. As soon as plans can be completed bids will be taken by the owner.

CITY HALL—2 story and base, brick and steel. Cost not stated. Alhambra, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, City of Alhambra. Bids opened for the construction of this building recently were found to be above the amount available for construction and were therefore rejected. Plans will be revised at once and new bids will be called for shortly. No figures were made public.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, L. L. Jones, I. W. Hellman Bldg., L. A. Owner, D. F. Hill. This building has been mentioned here before when plans were first started. The structure will be erected at the corner of 6th and Wall streets and will cover an area of 60x78 feet. The first floor will be arranged for stores and upper floors subdivided into about 120 rooms. There will be steam heat and elevator service. Interior finish will be of pine throughout. Exterior of

the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOSPITAL—2 story and base, frame. Cost not stated. Fullerton, Orange Co., Cal. Architect, C. E. Shattuck, Mason Bldg., L. A. Owners, Fullerton Hospital Association. The building will contain two wards, a number of private rooms, operating room and nurses' quarters. There will be a central heating system. Interior will be finished in pine and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

THEATRE—2 story and base, brick and concrete, \$25,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, F. W. Woodley. The building will cover an area of 60x150 feet. Besides the theatre proper, there will be several stores on the first floor. The main auditorium will have a seating capacity of 750 people. Modern plumbing and a ventilating system will be installed. Interior finish will be of pine and ornamental plaster. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

RESIDENCE—2 story and base, brick, \$55,000. Los Angeles, Cal. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owner, J. C. Rives. Contractor, Jacob K. Miller, 1255 Leighton Ave., L. A. Contract price, \$47,570. Garage Contract price, \$6,450.

SCHOOL—2 story and base, brick, \$51,889. South Pasadena, Los Angeles Co., Cal. Architect, Norman P. Marsh, Broadway Central Bldg., L. A. Owners, South Pasadena School District. Contractors, Long Beach Construction Co., Long Beach, general construction, \$51,889; B. F. Hulse, L. A., heating and ventilating, \$2,249; Cresent Electric Co., L. A., electric work, \$1,532.54; Smith & Coates, L. A. plumbing, \$2,775, and Probst & Son, painting, \$1,975.

NORMAL SCHOOL GROUP—Class A construction, \$665,000. Los Angeles, Cal. Architects, Allison & Allison, Hiernian Bldg., L. A. Owners, State of California. Contractor, J. F. Atkinson, L. A., general construction. Contract price, \$451,166.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$50,000. Los Angeles, Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, Mrs. Ida Hanst. Contractors, Kling Co., Union League Bldg., L. A. Contract price, \$80,000.

APARTMENT HOUSE—3 story and base, brick, \$45,000. Los Angeles, Cal. Architect, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, H. V. Bard. Contractors, Maine Building and Investment Co., Thorpe Bldg., L. A. Contract price, \$45,000.

Complete Bids For Los Angeles Normal.

Segregated Figures on General Construction and on Various Parts of Work From Board of Control.

Complete segregated bids as opened by the State Board of Control for the work at the Los Angeles State Normal School on April 12th last, are printed below:

Painting.

Only one bid was submitted for the painting, that of D. Zelinsky. Entire work \$21,395. Alternatives \$7,900, \$1,580 and \$770.

Clocks, Private Phones and Bells.

Only one bid was submitted for this work, that of the Latourette-Fical Co., for \$7400. Alternatives: \$190, \$75 and \$1,000. The same company also put in bids for the following parts of the work:

Sheet metal work, \$5,925 (a) \$525.	
Electric wire and conduit, \$16,500 (a) \$860; (b) \$1,730.	

Plumbing, gas fitting and sewerage, water leaders, field drains, heating and ventilating apparatus and sheet metal work, \$105,200.

Plumbing, gas fitting, sewerage, water drains and field drains, ventilating apparatus, sheet metal work, electric work, clocks, private phone and bell system, \$128,100.

PORTLAND AND OREGON.

HOTEL—4 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, W. W. Lucius and Aaron H. Gould, Worcester Bldg., Portland. Owner, W. W. Margulis. The building will be erected on a corner site and will be arranged for stores on the first floor. Basement will be fitted up for public baths and barber shop. Upper three floors will contain a total

of 150 guest rooms and a large number of baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine. Exterior of the building will be faced with cement plaster. Bids are now being taken for both a general contract and with the work segregated.

STORES AND OFFICES—8 story and base, reinforced concrete, \$100,000. Portland, Ore. Architects, McNaughton & Raymond, Concord Bldg., Portland. Owners, Title and Trust Co. The building will be erected on 4th street and will cover and are of 50x100 feet. Construction will be fireproof throughout. The entire first floor will be occupied by the owners, and will be elaborately finished in hardwoods, ornamental plaster, marble and tile. Special vaults will be constructed. Upper seven floors will be arranged for a number of modern offices. There will be steam heat, an oil burning equipment, vacuum cleaning system and mail chutes. Interior finish will be of metal and marble. Metal window frames and sash will be used. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

APARTMENT HOUSE—5 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, R. F. Wassell, 555 East Yamhill St., Portland. Owner, R. F. Wassell. The building will cover a ground area of 100x100 feet. Interior has been arranged for two and three room suites. All apartments will have connecting baths and disappearing beds. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwoods. Bath rooms will be finished in tile. Stairways will be of concrete. The exterior will be faced with pressed brick. Plans are complete and figures are being taken for the various parts of the work.

FACTORY—5 story and base, brick, \$50,000. Portland, Ore. Architects, Root & Hoose, Commercial Club Bldg., Portland. Owners, Modern Confectionery Co. The main building, five stories high, besides this there will be a one-story boiler room and shipping department, 30x100 feet. Construction will be of the heavy mill type. Exterior of the buildings will be faced with pressed brick. There will be a large elevator and metal window sash and frames. Plans are being prepared.

BRIDGE—Steel span, \$1,200,000. Portland, Ore. Engineer, Rudolph Modjeska, Chicago. Owners, Multnomah and Clarke Counties. A tentative plan for a 24-foot bridge to span the Columbia River between Vancouver, Wash., and Portland, Ore., has been approved by the Interstate Bridge Commission, and detail plans are to be submitted at once for approval. Clarke County is to raise \$500,000 and Multnomah County \$700,000.

Contracts Awarded.

MUNICIPAL WATER SYSTEM—\$100,000. Linnton, Ore. Engineer not given. Owners, Town of Linnton. Contractors, James Kennedy Construction Co., Portland. Contract price, \$92,739.

SEATTLE AND WASHINGTON.

HOSPITAL GROUP—5, 1 and 2 story, brick and terra cotta buildings. Cost not stated. Seattle, Wash., Architect,

Daniel Huntington, Seattle. Owners, Seattle Tuberculosis Hospital. These buildings, which comprise a county institution, are to be erected at Richmond Heights. There will be two one-story and basement outdoor pavilion, each 129x292; one two-story and basement hospital building, 78x252, a two-story, attic and basement administration building, 40x175 and a power house. Exteriors of all buildings will be faced with pressed brick and cement plaster. Plans will be completed this month and bids will be called.

Last Tuesday recalled with profound sadness in all parts of the civilized world, the loss of the Titanic one year ago, in collision with an iceberg off Grand Banks, Newfoundland. The toll of the sea upon that fateful night was fifteen hundred souls.

Fifteen hundred, and more,—men, women and children—were summoned in, a breath to take part in a tragedy of the sea, the like of which the world had never known before. From dreams of home in the fatherland, from dreams of a hoped-for home in the strange new land beyond the sea, they woke to face destruction. From scenes of revelry, where joy was unconfined, that floating palace yielded up its thousands to meet a situation that only the sublimest courage could meet with equanimity.

Near midnight, was the fateful hour, and far off shore, beneath the silent stars, the place. No thought of danger marred the perfect peace of mind of anyone on board. The sea was quiet; the ship was thought to be invincible. Until the very moment when the appalling truth was thrust upon the passengers, no thought of possible danger troubled anyone.

The scene that followed then, in all their harrowing detail; the instances of heroism, which we like best to dwell upon—the playing of the band, the bravery of the women and the men—all these come back to us, as though the date were yesterday. The partings of husbands and wives, of sweethearts, mothers and babes—for even that was not spared—all in the inevitable victory of that cruel, icy sea—no pen can possibly portray the awful scene. Only survivors can feel its awful agony.

Now, one year separates us from that fateful day. One year of study of the problems of the enigmatic sea has passed. Councils, investigations and reports, in volumes, have been added to the annals of sea history. Mistakes have been found to have existed in the Titanic's building plans and operation. Other ships and other men have been found blamable. Conspicuously, one officer of the company, owning the ill-fated ship, has been condemned, by public sentiment, for cowardice. The passing of the year has compassed the tragedy and its sequel.

How deeply the lessons of the loss of the Titanic have been digested or how far navigation of the ocean may have been made safer thereby can only be approximately known. The investigations by the American Senate and the British Board of Trade have had a marked effect upon ship management and equipment.

Among shipowners and builders there has been a radical change of structural practice, if not of principle.

Accidents such as caused the Titanic's loss might easily be averted now by

the application of these later rulings, if closely adhered to.

But there is still the human equation to be reckoned with when trial comes. The psychology of these overpowering visitations cannot be well calculated or forecasted. They involve instant and violent mental re-adjustments and the outcome cannot be calculated in advance. On land, a man may reckon, while on sea he may be panic-stricken—"his control steps with the shore."—Oakland Enquirer.

The oft quoted phrase from Shakespeare of "What's in a name," has some curious exceptions to the universal truthfulness of the statement. Thus the names of the characters that people the pages of Dickens's works are selected for their peculiar fitness to the people they describe. We expect to see an artist sign his name with some peculiar curl or part it on the side as some of our English friends do. A marked example of this peculiar fitness of a name is given in a Kansas City newspaper of wisdom displayed by parents in the selection of a name:

Now, "Johnnie Borglum" or "Bill Borglum" would not have been a particularly distinctive name. The owner of it might have driven a hack or cut hair, or done 'most anything else. But Mr. and Mrs. Borglum had a strain of genius, or suffered a stroke of inspiration. So they placed John and Willie and Tom and Charlie in the discard, and named their son Gutzon.

What the other kids did to that name while the little bearer of it was growing up can better be imagined than set up in type. But it was inevitable that

when the youthful sufferer did grow up he would have the laugh on the Jims and the Wilburs. He was bound to become an artist. He became a sculptor. How could he help it, with the name—Gutzon Borglum?

Up to February 1 the Panama Canal cost \$281,702,630.55. And the best part of it is there is no suspicion that one penny of this gigantic outlay was expended dishonestly. This feat is almost as great as the engineering triumph.

A Washington member of the Geological Survey says that floods like the recent ones in Ohio and Indiana and the devastation produced by them is inevitable. That earthquakes and tornadoes will continue to devastate the earth and there is nothing that man can do that will prevent them.

So far as scientific investigation goes there will in all probability always be unusual rains, there will always be tornadoes and there will always be earthquakes and tidal waves as long as natural law continues and change is the order of the universe. But the devastation such as was wrought by the Ohio floods can be averted and man, if he is intelligent, usually profits by experience.

Thus Galveston, Texas, presents a case in point. It expects the recurrence of tidal waves and storms. It has built a seawall to break the force of the waves. It has raised the surface of the city's principal area. It has built a causeway or viaduct to the island on which the city is built to the mainland thus insuring the entrance of trains to the city no matter what in-

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

vasion of the sea there may be and thus providing means of escape for the people if necessity arises.

San Francisco has been rebuilt in such manner that the loss of property from fire could never be repeated if there was again to be a disaster like that of 1906. Fireproof construction and water protection have rendered loss by fire highly improbable. Fire and flood and tornado can be provided against. It is only the unexpected that produces far reaching disaster.

"If the Mexican state troops and the Huerta forces keep up their slaughtering much longer," the editor of the Seventh Column suggests, "there will be no innocent bystanders left to bystand."

J. P. Morgan's fortune is estimated at one hundred million dollars and it is reported that the inheritance tax thereon will be \$3,000,000. What a commentary upon present industrial conditions! His was not the largest individual fortune. But it represented the achievements of the billionaire breed that has grown up under modern industrial and financial conditions.

It is impossible for one man to earn even the amount of the inheritance tax upon his great fortune in the natural period of a life time. But it was the alchemy of the stock market wherein the people are made to pay for things that do not exist that built up Morgan's tremendous fortune just as it has built up the fortunes of other men who are now multimillionaires.

CONSERVATION.

The state of Ohio was once covered by forests. Then there were no devastating floods. The forests were cut away, cut indiscriminately, ruthlessly, ignorantly. Now we have the tragedy at Dayton and other lesser ones every year. If a few square miles of carefully tended forests had been left at strategic points around the headwaters of the various rivers and streams of Ohio, we should not be mourning these hundreds of dead or regretting the millions of money. This is part of what is meant by conservation—Collier's weekly.

CONTINUED SLIDING AT CULEBRA CUT.

One the night of March 12th to 13th the break in the east bank of the canal, opposite Culebra, which first moved its bank on the night of February 5th, again made another rapid movement

downward and toward the canal. The bottom of the canal, according to the Canal Record, was heaved up for a distance of about one thousand feet, to a maximum vertical height of about thirty feet, destroying five tracks in the bottom of the canal, and leaving only one track in commission. The canal engineers are not dismayed, and they have already placed steam shovels at work removing this material. Later when the water is turned into this section of the cut, the two new floating dredges will be placed in service and they will remove material at the rate cubic yards per month.

ASSIGNMENT OF BLDG. CONTRACT.

April, 18, 1913—S HUDSON (8th Ave)
360 E Keith. K C Gardner with
Margaret Morris. Contract dated
April 9, 1913.....

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by the City Clerk of Tulare, Tulare County, California, up to 8 P. M. May 5th, 1913, and thereafter opened for all the labor and material necessary to construct a hemispherical bottom steel tank and tower, with accessories. Specifications may be had from the City Clerk, or Sloan & Robson, Nevada Bank Building, San Francisco, upon payment of (\$5.00) Five Dollars. The City of Tulare, through its Board of Trustees, reserves the right to reject any or all bids, waive defects and to accept any bid.

Residence:
1139 Kansas Street
San Francisco

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH**. Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders **now** and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Editorial Comment.

The current number of the Scientific American contains an outside picture and a two page collection of views illustrating the discoveries made by the Germans in their excavations in Babylon. These illustrations show the brick walls exposed, the excavations which remain after the lapse of more than forty centuries of time. Generations of cities have perished and died on the same site and yet the excavations show perfect forms of architecture, perfect bricks of artificial mold and figures molded in clay that have stood the lapse of time with scarcely a blemish or change of color.

These figures on the walls of the ancient city show almost the same mode of treatment that is now employed in terra cotta bas reliefs. The same color effects were obtained and the bricks were burned red or blue as the case might be, and the result is that after the lapse of all the years there is still a record of the time.

These painstaking investigations of the ancient ruins of the valley of the Euphrates by the Germans has brought to light many interesting facts. The manner of construction, their manner of burning bricks, their molded clay implements and utensils and the high state of perfection to which they brought clay as a building material in that early age of the world is certainly an interesting study. It should be a profitable source of study to the brick-builders to investigate the discoveries, for certainly here is where brick have had the hardest and the longest test, here is where they are monuments of history, here is where they had their cradle and development and where they have consistently withstood the tests of time.

The Chronicle is much concerned over an immigration bill introduced by Senator Kehoe at Sacramento. From the fact that this state wishes to in some way supervise the immigration that will come to us on the opening of the Panama canal. The attitude of these newspapers that claim to represent the best interests of the people is sometimes amusing.

For instance the Chronicle is much concerned over the reduction of the tariff on necessities as it will reduce the wages of the workingman. At the same time it wants the steamship companies and the railroads to dump into the state the overflow and the refuse population of all the countries in the world.

Immigration officers and men generally, that have visited Ellis Island at New York, report that any one watching the indiscriminate horde that is dumped daily upon our shores

by the steamship companies would at least exclude 90 per cent of the immigrants if left to his own discretion. Aliens that do not assimilate are no longer desirable. We have every sympathy for any people in the world who desire to better their condition. But this country is no longer a charitable institution or an asylum for the unfortunate.

It is time for this country to say, and it is time for this state to say, that those who land in this country shall only be those who are capable of becoming a part and parcel of our citizenship and are capable of becoming intelligent citizens. To this end Governor Johnson has sought to meet the situation that will confront us on the opening of the canal and in this effort he will have, and he should have, the support of all good citizens despite the Chronicle and the interests it represents.

Modern ships are of astonishing size and capacity. It is only on comparison of details that any conception can be had of the quantity of material used or the immense dimensions of the parts. For instance the smokestack of the new German Steamship, the Imperator, is elliptical in section and measures 30 feet in the longest diameter. This smokestack extends 69 feet above the upper deck and is amply large to be used for a tunnel for a railroad train.

The rudder weighs ninety tons. The stock on which it swings weighs 110 tons. Yet this vast weight is moved by the delicate touch of a wheel on the bridge, a sixth of a mile away. It is these wonders of mechanism that make the handling of immense bodies as easy as child's play.

THREADING CONDUITS PNEUMATICALLY.

A new apparatus has been designed for threading conduits. It has the advantage of being able to pass around several bends which would be difficult if not impossible with the ordinary fish-tape method. A "traveler" is provided which consists of a series of washers loosely fitting the interior of the conduit. This traveler is connected to a string or cord which passes through a tube into a compressed-air tank where it is coiled up on a reel. In service, the tank is first filled with air to a pressure of about 20 pounds by means of a hand pump, then the traveler is inserted in the conduit, the end of which is sealed by a plug on the end of the tube, and a valve is opened, permitting the air to pass out into the conduit and blow the traveler through, drawing the string with it. This string is then used to draw wire which, in turn, may be used for hauling a heavy cable through the conduit.

Fitting The House To The Cost.

Some Reasons Why Buildings So Often Cost More Than Was Originally Intended—Comparing Cubic Contents.

"Making the punishment fit the crime" was the Gilbertian method of expressing the idea of "cutting your garment according to the cloth," and the same problem is presented to the prospective home builder in the question of "making the house fit the appropriation," a problem that we all admit is not always easily solved.

Robert C. Spencer in a contemporaneous publication has been giving some reasons why buildings so often cost more than they were originally intended to, and this he attributes in many instances to a lack of frankness on the builder's part toward the architect who he has asked to provide his plans.

"You, the prospective home maker, after having gone over tentative plans with his wife all winter, says the writer, you have decided that \$7,000 is the amount you should expend.

"Your first floor plan shows something like this—a hall 9x12, living rooms 18x23, dining room 13x17, kitchen 12x15, maid's dining room 8x9½, service pantry 7x8½, cook's pantry 5x8, entrance porch, kitchen porch and entry and a screened porch off the living room and dining room 12x17 inside. On the second floor you have three room bedrooms, two baths, a dressing room, a small study or den, and a linen room. In the attic two servant's bedrooms with closets and a bath. There is but one staircase, however. Your plan allowing for thickness of walls and partitions, is a rectangle about 52 feet long and 24 feet wide, to which is added a large porch, the dining room wing 7x11, the stair bay 1x3, the mud-stair entrance porch, and the service porch and entrance. It is about the size of the house your cousin Dick built twelve years ago for eight thousand—it certainly is no larger.

"You mention your appropriation and your architect looks like a man about to break a piece of bad news as gently as possible. He asks you if you are averse to rather low ceilings—say eight feet six in. for the first story and eight feet for the second. You do not. Then he begins to do some figuring, while you wonder why he doesn't say at once that your appropriation is ample. He says, 'Well, here it is:—' 'We ought to build on the lot you have indicated, for about \$10,000, including everything necessary to make the house complete, but not including grading and planting walls, or architect's fees.

"There are the bang figures. Ground about 1,500 square feet, mean 12½ ft., allowing for roof of minimum pitch to accommodate rooms in attic 32 feet, cubic contents, therefore, 17,000. Basement floor level 18,000 feet worth, basement at 20 cents a cubic foot. Allowing about \$300 for porches and service entrance extensions it totals \$30,100. For a well built frame and first house and three on the river and twenty cents a foot is low a cubic foot cost as it would be safe to allow. You may get somewhat lower bids and you certainly will get higher ones. We planned several houses which were built there last year costing from ten

to fifteen thousand and they average twenty cents. Twelve years ago you might have built the same thing in the same neighborhood for sixteen cents.

"Then begins another discussion on the like cost of living while you hope that your architect—instructor is somehow mistaken although it would doubtless be best to figure on putting in the additional two thousand as a last resource, rather than give up that perfect plan for a perfect house, which can't be cut down anywhere and still remain worth building on that beautiful lot.

"Then comes the descriptions of how other neighbors went to architects with a \$20,000 program and a \$12,000 appropriation and the experiences that followed that sort of inexperience.

"As both houses went up the question of details began to dawn upon both builders and it was in these details and extras that the appropriation seeped away like the banks along the Mississippi on a spring flood. The fact is that architects are so dealt with frankness and fully on the question of building appropriation for private work, that they get into a rather bad habit of judging a man's real appropriation by what he wants in a building rather than by what he offers to spend.

"Like the old Oriental system of haggling over a bargain—the seller too high, the buyer too low—until a mean closing price is reached, this method is bad and ought not to be considered necessary by a practical people who are in the habit of buying goods at plainly marked prices.

"Let the owner say to his architect in the beginning, before a line has been drawn, 'You know and I know that it is not customary for clients to be frank about their house building appropriation. The average client is afraid of the extravagance of architects.

"Of course I understand that most of you try to let your clients get as much as possible for their money. Your reputation is being helped that way. But your tendency, since every artist is somewhat of an optimist, you will overdo it. You count too much on the few bids from a line of contractors that seldom come when most needed. And we who are about to build naturally want more than we are able to pay for. We have a feeling that the system of letting contracts to the lowest competitive bidder on a set of plans and specifications may bring us a piece of some thing for nothing, so we name a low price and you don't tell us that it is too low unless it is absolutely so even though you know without putting it in the paper.

"There is a rough and ready method of estimating the approximate cost of a house on the single outlines, floor plan or plan. You evolve at home or from the pockets of plans which you buy before you seek an architect's advice. Simply compute the cubic content of a house of the building and multiply by an assumed cubic foot price. The accuracy of the result will

depend on the degree of accuracy with which this cubic foot price has been guessed.

"For all estimates, except those based on actual bids from contractors, are merely guesses. And so wide are the variations between contractors' bids on completed drawings and specifications, that these often appear to be guesses, rather than the careful expert computations of men thoroughly familiar with current prices in their special lines.

"So architects often find that their rough estimates based on assured cost a cubic foot are nearer the true contract cost than many of the actual proposals which they receive.

"In no branch of building is the unit price more difficult of accurate assumption than in residence work. Not only is cost largely influenced by locality, including the local material market, wage scales, working hours and efficiency of mechanics, but it varies with the type of plan and design, while the character of construction and materials remains unchanged.

"If the cost be estimated according to cubage for a certain construction and finish, it may be modified by percentage factors to determine roughly the cost of different materials, workmanship or equipment.

"The larger and more elaborate the house the more difficult it becomes to assume a cubic foot price. For the house of moderate cost, however, fairly trustworthy data can be given, remembering that they vary with locality, size and construction, and that the tendency of all forms of wood construction and wood finish is to increase gradually as our forests continue to dwindle.

"Twenty years ago good small frame houses were being erected in Chicago's fashionable suburbs at 7 or 8 cents a foot. The same houses now cost more than double. Five years ago a good frame and stucco house costing \$10,000 to \$15,000 could be built in our Western suburbs at 17 cents, but would now cost 20—probably more.

"A few years ago solid thick walled and shingle roofed houses of good size could be built at 25 cents. The price of brick has since increased materially, but local wage scales are higher and the wood framing, floors and finish more expensive. Each year, too, the standard of quality demanded is higher, particularly in the matter of equipment. Wiring for electric lighting, formerly largely done in the cheapest way, is now run in metal conduits. The bath room floors must be of tile instead of wood. Piping for vacuum cleaning must be installed, and maid's quarters must offer the equivalent of good hotel accommodations, so acute has grown the servant problem. The old fashioned, wide open porch is now a sort of over windowed annex to the living room and must not only be glazed with sliding or casement sash, but provided with enough radiation to render it livable all winter. When ten years ago there would have been no

stable or out buildings, there must now be a small garage.

"For small frame houses, wide, sound, tight, stained, lapped, knotted boards, ship lap or boards tongued with rebated battens to shed rain are the most economical exterior covering over sheathing and waterproof building paper or quilt.

"Shingles have nearly doubled in cost in the past twenty years, but still cost no more than the thin, painted, lapped siding or clapboards which for more than a century have been the standard covering for the American frame house. Hard, painfully neat, thin and flimsy looking, without variety of color or texture, and requiring paint every few years to prevent a worn and shabby appearance—they have seen their day. In the long run, if of clear lumber and counting the cost of frequent repainting over the life period of the average house, they are no cheaper than stucco on metal lath.

"Simple brick houses will average not more than 20 per cent more than frame and stucco.

"The combination wall of brick for the first story and stucco or stucco and stained wood above will cost usually nearly as much as the all brick building, but has a picturesque and lively quality which renders it suitable to some sites, while the frame walls of the second story may readily be extended in the form of bays, overhangs or upper porches, allowing greater freedom in planning the upper floors.

"In some localities where gravel or crushed stone are close at hand, hollow cement block for outer walls, including foundations, compete in cost with ordinary frame construction, but are unsightly unless cast without facing and the walls rough casted all over. Hollow terra cotta blocks similar to those used for the partitions of fireproof buildings take and hold cement rough casting well, but the cost is so variable at the present time that the writer would hesitate to name a cubic foot price for the Chicago suburbs with which he is familiar. For the construction of a simple, square cottage costing \$2,500 at Concord, Mass., the architect states that it cost but 8 per cent more than a shingled frame wall construction, according to comparative bids received.

"Our own practice recently indicated on a \$15,000 hollow tile and stucco finished house (the work being largely done by day labor and bids having been received for the same house in frame and stucco) that 3 cents a foot added to 23 cents for the latter covered the difference in cost.

"In any locality where this type is new and unfamiliar only comparative bids on two sets of plans for the same house will clearly show the difference. To a certain extent this also applies to other materials, but is particularly true of hollow tile at the present time.

"It is not advisable to dispense with wood furring and lath for the inside of exterior tile walls. The 26 cent house and no furring or lath. The furring will almost save its cost in the labor of cutting for pipes, conduits, etc., but the lath, preferably metal, is, of course, an added expense.

"We have had tile cottages built as low as 15 cents.

"Brick veneered houses are warm and durable, and in most localities cost somewhere between the price of

frame and solid brick. On one \$8,000 house we found a saving on comparative bids of only \$100 in favor of brick veneers, so naturally used solid brick.

"Stone is seldom used for wall construction in the house of moderate cost, although in many localities it will compare closely in price with brick.

"None of the cubic foot costs enumerated makes allowance either for architects' fees or the work which must be done upon the grounds about the house.

"And in attempting to use them to wet blanket your hopes for that ideal little house, please remember that prices vary with locality, with building activity and with des' as well as with materials, and that you will in the end have to pay not always merely what it actually costs your several contractors to do the work, plus a fair profit for their time and pains, but whatever the lowest trustworthy bidder equipped to do work in your particular locality is willing to accept, and that sometimes, if he is very busy, he wants a stiff premium for his services, unless you are willing to wait until his work is slack.

"Also remember that in the country and in small towns ordinary builders' work, particularly carpentry, plastering, painting, etc., is from 10 to 25 per cent cheaper than in large cities and suburbs."

COMPENSATION FOR INDUSTRIAL ACCIDENTS IN BRITISH COLUMBIA.

Within the past ten years numerous laws have been enacted throughout the world to regulate and place the responsibility of industrial accidents where it rightly belongs. Public policy has decided that industries, collectively, should bear the burden of such accidents, rather than allow the widows and orphans of deceased employees to suffer. The province of British Columbia is fortunate in possessing laws which are sound and fair both to the employer and the employee. An act was passed by the provincial government in 1902, known as the Workmen's Compensation Act, which covers all hazardous occupations and provides for injuries of a purely accidental nature. Carefully compiled statistics show that fully 68 per cent of accidents are incidental to certain industries.

To adequately meet this condition, the Workmen's Compensation Act of British Columbia stipulates that the industry shall bear a part of the cost and the employee the other. It provides that the injured employee shall receive one-half of his weekly wages after the first two weeks, not exceeding \$10 per week for a period of three years, or a maximum amount of \$1,500.

There is a growing feeling of dissatisfaction in British Columbia over the cumbersome and expensive procedure necessary in collecting compensation under this act. According to the present legal practice, arbitration proceedings under the act carry supreme court costs. In other words the contending solicitors can tax the same fees in a minor injury claim, involving probably \$50 or \$100, as in action at common law, where the amount in dispute may

reach \$25,000. Cases are frequently occurring in which between \$300 and \$100 costs have been taxed by solicitors over a disputed amount of less than \$100. This is rather expensive justice, both for the employer and employee, and although the act was primarily intended to establish a fair workable basis of compensation between employer and employee, it has unquestionably proved, in cases of dispute, quite a source of revenue to the legal profession, at the cost of contending parties. As the maximum compensation provided by the act is \$1,500, it seems only reasonable that the costs should be assessed on a county court basis—where the limit of claim at present stands at \$1,000—instead of under the supreme court schedule, involving costs for both parties which are entirely out of proportion to the amount of damages in dispute.

In 1897 another act, known as the Employers' Liability Act, came into force in British Columbia, which act provides for accidents caused through the negligence of the employer or his superintendent. The limit of compensation under this act is full wages for a period of three years, with the minimum amount of compensation assessed at \$2,000. The employee also has the right to sue for compensation in British Columbia under the common law, in which case the amount of damages is assessed by the courts. In several recent cases decided under the common law, verdicts for damages have run as high as \$12,000.—Western Canada Contractor.

LICENSE TO RADIO OPERATORS.

Secretary of Commerce Redfield is in receipt of a statement from the Bureau of Navigation showing that during the first four months of the operation of the act to regulate radio communication, which took effect on December 13, 1912, the Department of Commerce, through the bureau of navigation, has issued 3407 licenses to wireless operators and stations in the United States. The first grade commercial operator's licenses number 1279, second grade 186, while 1195 amateurs have been licensed although work with the latter class has been delayed to push the licensing of commercial stations and operators. Eight operators' licenses of the experiment and instruction grade have been issued.

The bureau of standards has designed special testing instruments for the purpose of measuring wave length, decrement, etc., to reduce interference and insure the orderly use of radio communication, and these instruments are now being put into the hands of then ten inspectors in the field, who will be fully equipped by the end of the month.

Thus far forty-six American ship stations and eighteen coast stations have been licensed, and this branch of the work will now proceed more rapidly. Amateur stations to the number of 685 have been licensed. The inspections already have considerably increased the efficacy of wireless apparatus on ship and coast stations. The wireless apparatus on ocean passenger steamers has been inspected before about 1500 sailings from the United States during the four months.

Firms desiring news on special classes of buildings, such as flanks, churches, schools, hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 4 story and base, frame, \$12,500. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Herman Högrefe, 1980 Hyde St., S. F. The building will cover an area of 22x70 feet, and has been arranged for seven apartments of two and three rooms each with bath. Interior will be finished in pine with some elm veneer. Hardwood floors will be used in the principal rooms. There will be a central heating system, and all suites will be supplied with hot and cold running water. There will be wall beds. Exterior of the building will be covered with white cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house alterations, frame construction, \$2,000. Architect, Theo. Lenzen, Humboldt Bank Bldg., S. F. Owner, T. F. Kierman, 1715 Mission St., S. F. This work will include new interior finish, plumbing, plastering, electric work and wall beds. Interior finish will be of pine throughout. Exterior of the building which is also to undergo considerable alteration, will be covered with ship-lap and rustic. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, Edward Olsen, 29 Westall Ave., Oakland. The building will be erected at the southeast corner of 16th and Adeline streets, and has been designed to contain 18 apartments of two, three and four rooms each. Interior finish will be of pine throughout. Some hardwood floors will be used. Each apartment will have a water heater, private bath and wall beds. Tile will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

EUGENE, ORE.—Apartment house, 3 story and base, brick, \$35,000. Architect, J. R. Ford, Eugene. Owners, Smith-Sweeney. The building will contain 23 apartments of two and three rooms. All suites will have wall beds and private bath rooms. There will be steam heat and a vacuum cleaning system. Interior will be finished in pine throughout. Some oak floors will be used. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, brick and steel, \$50,000. Architects, A. F. and O. M. Roussieu, Monandock Bldg., S. F. Owner, C. J. Garband. This building has been mentioned here before when plans were first started. Working drawings are complete and figures will be called for at once. The structure will be erected on Geary street west of Larkin and will contain 88 rooms and two stores. Suites will consist of two and three rooms each, with wall beds and private baths. There will be steam heat, an automatic elevator, vacuum

cleaning system and other modern improvements. Interior finish will be of pine and hardwoods. Tile and cement will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are now out for figures.

SAN FRANCISCO—Apartment house, 1 story and base, brick and steel, \$10,000. Architect, John A. Ettler, Atlas Bldg., S. F. Owner, H. E. Bothin. The building will be erected at the northeast corner of Polk and Green streets. First floor will be arranged for stores. Upper floors will be divided into a number of two and three room apartments with wall beds and private baths. Interior finish will be of pine with hardwood veneer and floors. Bath rooms will have tile wainscot. There will be steam heat and elevator service. Exterior of the building will be faced with pressed brick and cement plaster. There will be a hot water supply system. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, Edward Olsen, 29 Westall Ave., Oakland. The building will occupy a corner site and has been designed to contain 18 rooms, which will be arranged in two-room suites with baths. Interior finish will be of pine throughout. There will be wall beds, private baths and some hardwood floors. Plans provide for a central heating system and hot water supply. Bath rooms will be finished in tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor. He is now in the market for all materials.

OAKLAND, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, J. Spellman. This building has been mentioned here before when plans were first started. The building will be erected at the corner of 25th and Telegraph avenue, and has been designed to contain a number of two and three room suites. Interior finish will be of pine and hardwood veneer. Hardwood floors will be used in the principal rooms. A central heating system and hot water supply will be installed. Bath rooms will be finished in tile. The exterior of the building will be covered with rustic. Plans are complete and the architect is now taking figures on the work.

LOS ANGELES, CAL.—Apartment house, 3 story and base, frame, \$45,000. Architect, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, W. W. Middlebroff. The building will contain 76 rooms, which are to be arranged in two and three room suites with private baths. Interior finish will be of pine and hardwood with hardwood floors. There will be steam heat and elevator service. A vacuum cleaning system and hot water plant will also be installed. Bath rooms will be finished in tile and cement plaster. The exterior of the building will be faced with pressed brick. All suites will have wall beds. The work will proba-

bly be carried out by the Maine Building Co.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, A. W. Biewe, California Bldg., L. A. Owner, M. E. Perry. The building will cover an area of 35x105 feet, and will contain 42 rooms, arranged in two and three room suites, with baths. The interior will be finished in pine throughout with hardwood floors in the principal rooms. There will be furnace heat and a hot water system. Plans also include elevator service and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Garrett & Farrell, Currier Bldg., L. A. Owner, Frank Eckley. The building will be erected on an inside lot and will have a frontage of 50 feet and a depth of 134 feet. Interior has been arranged for 57 apartments of two and three rooms each. Pine and hardwoods will be used for interior finish. There will be steam heat and elevator service, a hot water system and vacuum cleaning. All suites will be equipped with wall beds. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Meicall & Davies, 43 American Ave., Long Beach. Owner, Mrs. Lucia Boyd. The building will cover an area of 66x90 feet, and will contain 70 rooms, arranged in two and three room apartments. All suites will have wall beds and private baths. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile and cement plaster. There will be steam heat and elevator service. A vacuum cleaning system will be installed. Exterior of the building will be faced with glazed brick. Plans are now being prepared for the work.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick. Cost not stated. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owners, William M. McCartney Co. The building will be erected at the corner of Orange and Figueroa streets, and will cover an area of 75x197 feet. Plans provide for a total of 138 rooms, which are to be arranged in two and three room suites with private baths. There will be steam heat, hot and cold water supply and vacuum cleaning system. All suites will be equipped with wall beds. Interior will be finished in pine and hardwoods. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick, \$50,000. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, G. Rupert Johnson. Contractors, Hubbard & Gardner, Douglas Bldg., L. A. Note: The general contract only has been awarded and the work has been taken on a percentage basis.

SEATTLE, WASH.—Apartment house additions and alterations, reinforced concrete, \$100,000. Architect, none. Owner, H. S. Amen. Contractors, MacRea Bros., Empire Bldg., Seattle. Con-

tract price, \$100,000. The work consists of the addition of a two-story 60x120 foot reinforced concrete building under the present building, and changing the partitions, stairways, plumbing, heating, electric wiring, etc., in the existing structure. Specifications include either brick or stone facing on the addition, tile, glass, plaster, tinting, etc.

LOS ANGELES, CAL. — Apartment house, 3 story and base. Class C. Cost not stated. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owner, J. R. Lane. Contractors, Nance & Phelps, Ferguson Bldg., L. A. Contract price not stated.

CHURCHES.

PORTLAND, ORE.—Church, 2 story and base, brick and concrete, \$35,000. Architects, Johnson & Moyer, Commercial Club Bldg., Portland. Owners, Piedmont Presbyterian Church. The building will be erected at the corner of Jarrett and Cleveland streets, and will contain a large auditorium, Sunday school room, pastor's study, social hall and kitchen. There will be a central heating system. Interior finish will be of pine and ornamental plaster. The exterior of the building will be faced with pressed brick. Plans are complete and figures are to be taken at once.

be fireproof throughout with cement floors, metal window sash and frames and fire proof doors. No interior trim will be used. There will be elevators and an automatic sprinkler system. Exterior of the building will be faced with cement plaster. Excavating has been completed by Frank Holland, and the owners are now putting in the retaining walls and foundation work by Day Labor. An order has been placed for the steel. All other parts of the work will be segregated.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,500. Architect, none. Owner, J. Johnson, 488 9th Ave., S. F. The building will contain two modern flats of four and five rooms each with bath. Interior finish will be of pine throughout. Tile will be used in the bath rooms and kitchens. Hardwood floors are specified in the living rooms and dining rooms. There will be open fire places and tile or brick mantels. Exterior of the building will be covered with cement plaster on metallath. Plans are complete and in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$10,000. Architect, W. G. Hind, 46 Kearny St., S. F. Owner, J. Denning. The building has been designed for five small apartment flats with private baths. Each apartment will contain four rooms. Interior finish will be of pine with some hardwood panels. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of tile. Tile will also be used in the bath rooms. There will be wall beds. Exterior of the building will be covered with rustic and brick veneer. Plans are complete and segregated figures are being taken by the architect.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,500. Architect, none. Owner, S. B. Hallett, 1259 12th Ave., S. F. The building will contain two flats of five and six rooms, and will be erected on 7th avenue north of Irving street. The interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Both flats will have an open fire place in the living room with a brick mantel. Tile will be used in the bath rooms and kitchens. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$7,600. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, W. J. Wagner. The building will be erected on 2nd avenue, and will be arranged for two large flats and a private garage in the basement. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be open fire places and brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster and brick veneer. Plans are complete and figures are being taken.

GARAGES.

SAN FRANCISCO—Garage, 3 story and base, two mezzanine floors, reinforced concrete, \$80,000. Architects,

BRIDGES AND DAMS.

CROWS LANDING, STANISLAUS CO., CAL.—Bridges, steel and concrete. Cost not stated. Engineer, County Surveyor Anear, Modesto. Owners, Stanislaus County. The County Surveyor was ordered on Tuesday by the Board of Supervisors to prepare plans and specifications for the construction of an 80-foot steel span, with 20 feet of trestle, in place of the east end of Crows Landing bridge over the San Joaquin River, and an 80-foot steel span together with 220 feet of trestle instead of the 200 and 100 feet combination spans on the west end of the draw bridge.

Willison & Foster, Modesto, secured the contract at \$3,913 for making repairs to the Empire bridge.

OAKLAND, CAL.—Dredging, bulk head and trestle construction. Cost not stated. Engineers, Engineering Department San Francisco, Oakland and San Jose R. R. Co., Oakland. Owners, San Francisco, Oakland and San Jose Railroad. Plans have been completed for extensive work which is to be carried out in the development of the company's system. Bids will be opened on May 15th. The following work is included: 15,000 linear feet temporary railway trestle, 14,700 linear feet sheetpile bulkhead, 165,000 cubic yards rock excavating, 20,000 cubic yards earth excavating, 1,250,000 cubic yards hydraulic dredging. Alternative plan: 10,000 cubic yards preparatory dredging, 15,600 linear feet of seawall containing about 305,000 cubic yards of rock, 1,250,000 cubic yards hydraulic dredging.

SAN DIEGO, CAL.—Bridge construction, concrete and steel. Cost not stated. Engineer, City Engineer, San Diego. Owners, City of San Diego. The following bids were received by the city council for the construction of the Old Town bridge, Woolman avenue bridge, Main street bridge, and Escondido ford: For the entire work, Chas. Steffen, \$35,900; Engineering Contracting and Construction Co., \$37,100; C. L. Hyde Construction Co., \$39,000; John Campbell, \$50,000. Separate bids were as follows: Woolman and Main street bridges, Munoz & Munoz, \$12,147; Holland Construction Co., \$12,783; Mercereau Bridge and Construction Co., \$14,880; H. D. Trounce, \$12,647, including ford. S. M. Kerns bid \$22,650 for the Old Town, and \$7,000 for the Main street bridge; J. L. McKnight, \$22,272 Old Town, \$7,288 Woolman avenue; Worcester Construction Co., \$21,600 Old Town; Robert Beyle, \$2,750 Woolman avenue; R. O. Coggeshall, \$5,940 Main street bridge and ford; S. M. Kerns, \$6,230 Woolman avenue.

COURT HOUSES.

OAKLAND, CAL.—Auditorium, 3 story Class A construction, \$500,000. Architects, J. J. Donovan, Security Bank Bldg., Oakland, associated with Palmer & Hornbostel, New York. An unusual condition developed at the opening of bids for the structural steel for the Oakland Auditorium when they were opened at Thursday's meeting of the Board of Supervisors. All bids received previously were in excess of the amount available and plans have been revised. Bids received yesterday on both the entire work and on unit prices were \$26,600 higher than the first bids. One member of the Board of Supervisors made a motion that all bids be rejected, but failed to get a second. Figures have been referred to the City Attorney and Commissioner of Public Works. Only two bids were received, one from the Pacific Rolling Mills for \$203,959, and one from the Judson Iron Works for \$222,082. The unit prices were as follows: Straight beams with or without connections, Judson Iron Works, .05; Pacific Rolling Mills, .041; Plate girders, Judson Iron Works, .057; Pacific Rolling Mills, .047; trusses or built-up lumber, Judson Iron Works, .055; Pacific Rolling Mills, .055; rods, Judson Iron Works, .08; Pacific Rolling Mills, .073; bent work, Judson Iron Works, .084; Pacific Rolling Mills, .078.

SEATTLE, WASH.—Court house, 3 story and base. Class A construction, \$950,000. Architect, A. Warren Gould, Seattle. Owners, City of Seattle. This work has been mentioned here a number of times before. Working drawings are complete and figures will be opened on May 14th. Plans can be secured from the architect. Construction will be of reinforced concrete and steel. No bid in excess of \$950,000 will receive consideration.

Contracts Awarded.

NEWBERG, ORE.—City hall, 2 story and base, brick and steel, \$20,000. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owners, Town of Newberg. Contractor, G. E. Howland. Contract price, \$14,125. Note: This contract calls for the general construction only.

FACTORIES & WAREHOUSES.

R SAN FRANCISCO—Warehouse, 3 story and base, reinforced concrete, \$30,000. Engineer, A. E. Hornlein, Pacific Bldg., S. F. Owners, Warehouse Investment Co. This building has been mentioned here under another architect's name. The structure will cover an area of 120x130 feet, and will

Cunningham & Politen, First National Bank Bldg., S. F. Owners, E. L. Goldstein & Co. The building will be erected at the corner of Van Ness and Oliver avenues and has been designed for a modern garage and automobile sales rooms. Interior of the front portion of the building will be finished in hardwoods, tile and marble. There will be sales rooms, repair shop and storage space. Construction will be fire proof. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. The structure will cover an area of 109x120 feet. Plans are complete and figures are being taken.

LOS ANGELES, CAL. — Garage, 2 story and base, reinforced concrete. Cost not stated. Architects, R. B. Young & Son, Linkershim Bldg., L. A. Owner, Charles E. Anthony. The building will cover an area of 50x156 feet, and will be arranged for sales rooms and garage. The entire building has been leased to the Packard Co. Interior of the offices and sales rooms will be finished in hardwoods, tile and marble. There will be cement floors, metal window sash and frames and special gasoline storage tanks. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Extension of Crude Oil Contract.

The present contract with the Union Oil Company of California, for supplying the crude oil used by the Isthmian Canal Commission and Panama Railroad expired on March 31 of this year, and on March 4 the Secretary of War approved the extension of the existing agreement until June 30, 1914, in effect, without change. The Union Oil Company has been supplying its product to the commission since August, 1907, although it was not until November 14, 1907, that its pipe line across the Isthmus was in complete operation. The revocable license granted it on January 10, 1906, was superseded on April 1, 1909, by a contract for one year, extendible for three years, or until April 1, 1913. Under the former license the company delivered oil on the Isthmus at the rate of 90 cents a barrel; under the succeeding agreement, the price was advanced 20 cents a barrel, which price still obtains. The maximum amount of oil that can be purchased in any one month at the present time is 100,000 barrels.

Prospective Bidders.

The following firms have applied for plans and specifications for the work on the hospital at the naval training station at Pearl Harbor. Bids will be opened on May 16th:

Ed. O. Hamilton, 24th and Farnam streets, Omaha, Neb.
Connors Bros. Co., Lowell, Mass.
W. N. Concanon Co., Monadnock Building, San Francisco, Cal.
Crane Co., Washington, D. C.
Keasly & Mattison o., Ambler, Pa.
Sound Construction and Engineering Co., Seattle, Wash.
Southwestern Construction Co., Los Angeles, Cal.
Pearson Construction Co., 754 New York Block, Seattle, Wash.
Federal-Huber Co., Chicago, Ill.
Kilbourn & Jacobs Manufacturing Co., Broad Exchange Bldg., New York city.

E. A. Brandt & Co., 11 Broadway, New York city.

Seattle Car and Foundry Co., Seattle, Wash.

Jackson Manufacturing Co., 114 Liberty street, New York city.

Standard Steel Works, Morris Building, Philadelphia, Pa.

Norman H. Livermore & Co., Bailey Building, Seattle, Wash.

Fort Stevens, Bakery.

Bids for the construction of a bakery at Fort Stevens, Ore., were received by the quartermaster at Fort Stevens on April 3 as follows:

Item 1, building; 2, plumbing; 3, heating; 4, wiring; 5, fixtures.

C. L. Houston, Astoria, Ore., item 1, \$10,064; 2, \$638; 3, \$75; 4, \$174; 5, \$79.

Palmberg & Mattson, Astoria, Ore., item 1, \$11,300; 2, \$640; 3, \$750; 4 and 5, \$250.

Frank Cunningham, Hammond, Ore., item 1, \$10,363.

John C. Sheppard, Vancouver, Wash., item 1, \$12,490.

Highway Bridge.

The following bids were received April 14 by the commissioner of Indian Affairs, Washington, D. C., for the erection of a steel highway bridge across the Deschutes River, Ore.:

Item 1, riveted bridge; 2, pin connected bridge.

Midland Bridge Co., Kansas City, Mo., item 1, \$14,760 and \$12,625; 2, \$14,177 and \$12,035.

Illinois Steel Bridge Co., St. Paul, Minn., item 1, \$14,940 and \$13,940; 2, \$14,740 and \$13,740; extra concrete, \$10 and \$14 per cubic yard.

Clinton Bridge Works, Clinton, Ohio, item 1, \$20,940; 2, \$21,600; extra concrete \$13 and \$10 per cubic yard.

Coast Bridge Co., Portland, Ore., item 1, \$14,248; 2, \$13,580.

Omaha Structural Steel Works, Omaha, Neb., item 1, \$14,955; 2, \$14,225.

Albert L. Smith, Spokane, Wash., item 1, \$17,800; 2, \$17,400.

Northwest Steel Co., Portland, Ore., item 1, \$14,985.

E. G. Perham, Marshfield, Ore., item 1, \$14,900; 2, \$14,400.

Clamps for Transmission Line.

The following bids were received on March 17 by the U. S. Reclamation Service, Los Angeles, Cal., for furnishing galvanized clamps for Roosevelt-Mesa Line, Salt River project, Ariz.:

Webster Malleable Casting Co., \$230.-80; f. o. b. Los Angeles, 30 days.

Fulton Engine Works, \$263; f. o. b. Los Angeles.

Cover of Alene Indian School.

The following contracts have been awarded by the commissioner of Indian Affairs, Washington, D. C., for the construction of buildings and water and sewer system at the Cover of Alene Indian Agency, Idaho:

B. W. Young, Spokane, Wash., two frame cottages, Nos. 85 and 96, guard-house, and water and sewer system, \$14,746.

J. L. Murphy & Sons, Tacoma, Wash., three cottages, No. 86; office, No. 14; police quarters and warehouse, \$16,505.10.

Locomotive Cranes.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington,

D. C., April 12 for furnishing 11 15-ton locomotive cranes, with grab-bucket equipment, delivered at the naval station, Pearl Harbor and navy yard, Puget Sound, Wash.:

Item 1, price for 11 cranes, complete; 2, do, differing in detail from the specifications; 3, price for six cranes and for each crane additional up to a total of 11.

Browning Engineering Co., Cleveland, Ohio, item 1, \$10,000 each; 3, two cranes, Puget Sound, \$9,000.

Brown Hoisting Machinery Co., New York city, item 1, \$102,325; 3, \$55,700 for six cranes; add \$9,325 each for additional cranes.

McMyler Interstate Co., Bedford, O., item 3, two for Puget Sound, four for Pearl Harbor, \$70,000; two for Puget Sound, five for Pearl Harbor, \$81,700; two for Puget Sound six for Pearl Harbor, \$93,400; two for Puget Sound, seven for Pearl Harbor, \$105,100; two for Puget Sound and eight for Pearl Harbor, \$116,800; two for Puget Sound and nine for Pearl Harbor, \$128,500.

Pearl Harbor, H. T., Dump Cars.

The bid of the Wm. J. Oliver Mfg. Co., Knoxville, Tenn., \$33,316 in amount, has been accepted for furnishing 15 dump cars, 20-yard, for delivery at the naval station, Pearl Harbor, H. T.

Casper, Wyo., Construction.

The following is an additional bid for the construction of the U. S. post office at Casper, Wyo. This bid was received prior to the hour of opening on April 7, but was inadvertently mislaid in the office of the supervising architect:

Esmev & Ukeneskey, Casper, Wyo., limestone, \$58,023.75; sandstone, \$37,518.85.

Alternate C, substituting stone for exterior ornamental terra cotta, as specified, add to limestone bid \$2,000 add to New Castle, Wyo., white sandstone bid if same stone is substituted, \$1,000.

Alternate D, substituting Keene's cement for all plastering, as specified, add \$300.

Alternate E, substituting terra cotta for reinforced concrete construction of first and mezzanine floors, as specified, add \$500.

Alternative F, substituting galvanized sheet metal for wood covering of exterior mailing vestibule, as specified, add \$100.

Permanent Water Supply.

The committee consisting of Mr. H. H. Rousseau, chairman; H. O. Cole, George M. Wells, James T. B. Bowles, and Louis Ernst, appointed to consider plans and make recommendations for a permanent water supply for the Pacific end of the Panama Canal, has submitted its report, and same has been approved by the chairman. The plans contemplate the continued use of the Rio Grande reservoir, and the increasing of its capacity by raising the dam to elevation 265 feet, or 27 feet above the present crest. It is believed that with the increased capacity the reservoir will supply at least 6,000,000 gallons of water a day, except in years of minimum rainfall, such as 1888 and 1912.

Douglas, Wyo., Construction.

The following is an abstract of the bids opened April 12 at the office of the supervising architect, Treasury Department, Washington, D. C., for the con-

struction of the U. S. post office at Douglas, Wyo.:

Bid 1. W. D. Lovell, Minneapolis, Minn.

2. J. F. Jenkins & Co., Ocala, Fla.
Using limestone for all stone work, except where granite is required—Bid 1, \$84,000; 2, \$89,500.

Using Wyoming sandstone for all stone work, except where granite is required—Bid 2, \$94,000.

For alternate A: Substituting terra cotta for certain reinforced concrete floor construction, as specified, add—Bid 1, \$2,000; 2, \$800.

For alternate B: Substituting composition blocks for terra cotta partitions and furring, as specified, deduct—Bid 1, \$150.

For alternate C: Substituting wood framing, etc., for the ceiling and roof, as specified, deduct—Bid 1, \$1,000; 2, \$250.

For alternate D: Painting walls, ceilings, etc., as specified, add—Bid 1, \$1,600; 2, \$1,600.

For alternate E: Substituting Keene's cement for hard plaster, as specified, add—Bid 1, \$800; 2, \$650.

For alternate F: Substituting terrazzo tile for terrazzo field and marble borders and strips, as specified, add—Bid 1, \$400.

Amount included in the proposal for all work in connection with waterproofing basement walls, etc., including the brick or terra cotta lining—Bid 1, \$700; 2, \$300.

Amount included in the proposal for the subdrainage system, including catch basin—Bid 1, \$300; 2, \$700.

Amount included in the proposal for all work specified under head of "Plumbing," based on the number of fixtures as given in the schedule, exclusive of plumbing marble—Bid 1, \$2,400; 2, \$3,200.

Amount included in the proposal for all marble work and terrazzo floors, complete, in place in all toilet rooms—Bid 1, \$1,400; 2, \$1,700.

Amount included in the proposal for all work specified under head of "Gas piping"—Bid 1, \$300; 2, \$200.

Amount included in the proposal for all work specified under head of "Heating apparatus"—Bid 1, \$3,400; 2, \$2,400.

Amount included in the proposal for all work specified under head of "Conduit and wiring system"—Bid 1, \$1,600; 2, \$900.
